The Attorney reported a request from the County Court of Deschutes County that the state intercede in behalf of the county court to secure right of way for a county road across certain government lands in Deschutes County, and that the state take title to the right of way if necessary. It appears that the county court filed its application for such right of way but has been informed by government officials that the law is so written that the counties do not secure right of way benefits and that such benefits are obtainable only by the state. The Commission appeared favorably inclined to assist the county in the matter even to the taking of title to the right of way in the name of the state if it would not obligate the state to construct the road. In conformity therewith the Commission voted unanimously to obtain the right of way in the name of the state if the county will agree in writing not to hold the state responsible for the road construction, and provided further that right of way 200 feet wide, which the county wants, is considered by the Engineer to be satisfactory.

The Commission discussed and confirmed the resolution adopted at its meeting held on December 18, 1941, with respect to the transportation of defense goods and materials over Oregon highways on truck and trailer equipment having an overall length of 60 feet and a combined gross weight of load and vehicle of 68,000 pounds.

Mr. C. W. Walter of the Lebanon Lumber Company, Lebanon, came before the Commission and requested authority to transport over the Santiam Highway, between Cascadia and Lebanon, loads of logs having an overall length of 55 feet, without the necessity to provide flagmen for each movement. The Engineer advised that a recent test run of logs 55 feet overall in length was made over this section and it was found that it would not be possible for loads of such length to negotiate the turns on one section about two miles long without taking up more than half the width of the roadway. At this particular point, he said, the roadway is quite narrow and any operation thereover which takes up more than half the roadway will endanger other traffic. He explained the policy of the Commission which requires each load in such cases to be accompanied by two flagmen, one to proceed in advance of the movement and the other to follow in the rear, as a traffic safeguard. Mr. Walter asked for a modification of this ruling so as to eliminate the requirement that flagmen shall accompany the movement and suggested, in lieu thereof, the maintenance of one flagman at each end of the two-mile section to warn other traffic of the logging operations. After considerable discussion the Commission decided to adhere to the present policy and accordingly denied the request.

The Engineer reported briefly on his attempt to purchase three new paving plants as authorized by the Commission at a previous meeting. It appears that difficulties have been encountered in securing a priority rating from the OPM for the purchase, although the Commission's order for the purchase of trucks, which was authorized at the same time, was approved. He was instructed to continue his efforts to obtain the paving plants, and to point out that the paving plants are needed in order to properly maintain the highways of this state.

JAN 5 1942

The Commission approved the following telegram sent by the Engineer to Colonel Frank W. Wright, who is in charge of the Pendleton army airbase, same having to do with the use by the army of certain state-owned property which lies adjacent to the airport road near its intersection with the Old Oregon Trail at Pendleton:

THIS IS YOUR AUTHORITY TO CONTROL AND USE FOR SUCH PURPOSES AS YOU DESIRE DURING THE PERIOD OF PRESENT WAR EMERGENCY PROPERTY OWNED BY THE STATE OF OREGON AND CONTROLLED BY THE OREGON STATE HIGHWAY COMMISSION APPROXIMATELY TEN ACRES IN EXTENT LYING ADJACENT TO STATE HIGHWAY LEADING TO AIR BASE.

The following resolution relative to this matter was adopted by the Commission by unanimous vote:

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner of the following described real property situated in Umatilla County, State of Oregon, to wit:

A parcel of land lying in the Southwest quarter of Section 5, Township 2 North, Range 32 East, W. M., Umatilla County, Oregon, the said parcel being described as follows:

Beginning at a point on the north and south center line of said Section 5, said point being 783.05 feet north of the south quarter corner of said Section 5; thence North 80° 19' West a distance of 414.5 feet to a point which is 60 feet distant northeasterly from (when measured at right angles to) the located center line of the Pendleton Air Base Road; thence parallel to and 60 feet distant easterly from said center line on a 656.25 foot radius curve right a distance of 524.92 feet to a point opposite and 60 feet from engineer's station 11+42.3 P. C. S.; thence parallel to said center line on a spiral curve right, a distance of 383.25 feet to a point opposite and 60 feet from engineer's station 15+42.3 P. T.; thence North 27° 04' East parallel to said center line a distance of 68.4 feet to a point opposite and 60 feet from engineer's station 16+10.7; thence North 89° 11' East a distance of 326.14 to the said north and south center line of said Section 5; thence South 0° 49' East along said north and south center line a distance of 990 feet to the point of beginning, containing 10 acres;

AND, WHEREAS, said real property is adjacent to the area or reservation known as the Pendleton Air Base, which air base is now occupied by the Federal Government as a defense area; and

WHEREAS, Colonel Frank W. Wright has requested that the Federal Government be given exclusive control over and use of the

JAN 5 1942

real property hereinabove described so that said real property will be available to the Government in connection with the operation of said air base area; and

WHEREAS, the State Highway Commission desires, consistent with its lawful authority, to cooperate to the fullest extent with the Federal Government in the conduct of any defense activity;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the above described real property shall be and the same hereby is placed under the exclusive jurisdiction and control of the United States Army for the duration of the war.

2. That said real property may be used by the United States Army to such extent and for such purpose as may best serve the United States of America and that such use and occupancy shall be exclusive.

3. That on the termination of the war the Federal Government shall surrender to the Oregon State Highway Commission all of the control and jurisdiction vested in the Government by this resolution.

4. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered by the Commission's Secretary to Colonel Frank W. Wright.

The Engineer reported the award of the following contracts as previously authorized by the Commission:

Paving the Sun Dial Highway Section of the Sun Dial Secondary Highway, in Multnomah County. Bids taken December 18, contract awarded December 19, 1941, to Parker-Schram Company, the low bidder.

Grading, surfacing and oiling the South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County. Bids taken December 18, contract awarded December 27, 1941, to Rogers Construction Company, the low bidder.

The Commission confirmed the awards of these contracts as reported.

Chairman Cabell brought up for discussion the Burgard Street Project, in Portland. He explained that, according to the original arrangement with the City of Portland, the city was to do certain work, consisting of bringing the subgrade up to the proper elevation, and when this was done the state was to pave the entire area. However, it now develops that the city is

JAN 5 1942

without funds to pay its entire share of the costs and is asking the state to assume a portion of such expense although the city will contribute as much as it can. He further explained that the project is about three-quarters of a mile in length and is an essential project in order to relieve traffic congestion at the shipyards in the St. Johns District. After discussion, and in view of the apparent emergency, the Commission voted unanimously to assume that portion of the city's share of the cost that the city cannot pay. The Engineer was authorized and instructed to advertise this project for bids to be received at the next regular meeting.

The Secretary presented a resolution from the City Council of Beaverton and a petition signed by numerous residents of Washington County who are users of the Tualatin Valley Highway, requesting the further widening and reconstruction of such highway between the Multnomah County line and Forest Grove. The Commission denied the request because of lack of funds with which to finance the work.

A letter was presented from Mr. Frank T. Morgan, Secretary, Nyssa Chamber of Commerce, inquiring as to the Commission's plans for paving Main Street (state highway route) in Nyssa and for the construction of certain storm sewers heretofore requested by the city. The Commission approved the Engineer's reply to such letter. (See letter dated December 31, 1941.) The Engineer was instructed to have Division Engineer Paul Van Scoy contact Mr. Morgan in the near future relative to the city's plans for a new water system along this street, and to ascertain just how this will affect the pavement work, et cetera.

The Commission had under discussion a letter from the City of West Salem requesting state aid in financing a lighting system along state highway routes in West Salem. The Commission denied the request on account of lack of funds with which to finance the work.

The Commission discussed a program of projects for performance on military roads selected by the United States War Department. The Engineer submitted a list of projects eligible for the same. After careful consideration the following projects were approved by the Commission by unanimous vote:

County	Section and Kind of Work	Estimated Cost
<u>US #99</u> <u>PACIFIC HIGHWAY</u>		
Douglas	Umpqua River Bridge at Dillard	\$150,000
Multnomah	Interstate Bridge-Oregon Slough, Pave	7,800
Linn	Harrisburg Bridge Approach	150,000
Clackamas & Marion	Pudding River Bridge	90,000
Josephine	Grave Creek-Jump Off Joe Creek, Surfacing	170,000

(continued on next page)

JAN 5 1942

County	Section and Kind of Work	Estimated Cost
(US #99 - Pacific Highway - Continued)		
Lane	Eugene, Overcrossing & Approach, Grade, Pave & Relay Track	\$500,000
Jackson	Ashland Plaza, Grade & Pave	35,000
Josephine	Grave Creek-Smith Hill, Grade	<u>157,200</u>
		\$1,260,000
<u>US #101</u> <u>OREGON COAST HIGHWAY</u>		
Tillamook	Salmon River Bridge	\$50,000
"	Three Rivers Bridge	30,000
Coos	Marshfield-North Bend, Grade & Pave	<u>310,000</u>
		\$390,000
<u>CORVALLIS-NEWPORT HIGHWAY</u>		
Benton	Blodgett Overcrossing	\$60,000
<u>WILLAMETTE HIGHWAY</u>		
Lane	Coast Fork Willamette River Bridge	\$300,000
<u>US #30</u> <u>COLUMBIA RIVER HIGHWAY AND OLD OREGON TRAIL</u>		
Umatilla	Boardman-Stanfield, Surface & Oil	\$250,000
Multnomah	Troutdale-Bridal Veil, Grade	640,000
"	Parkrose, Widening	<u>43,500</u>
		\$933,500
<u>WARM SPRINGS HIGHWAY</u>		
Jefferson & Wasco	Mill Creek-Miller Flat Section, Grade	\$220,000
Wasco	Mill Creek Bridge	<u>125,000</u>
		\$345,000

The Engineer was authorized and instructed to transmit a list of such projects to the Public Roads Administration for governmental approval.

JAN 5 1942

The State Parks Superintendent, Mr. S. H. Boardman, discussed with the Commission matters pertaining to the curtailment of the state parks' program, including park purchases and park betterments, because of the existing war emergency necessitating conservation of funds. He reported the following projects as approved by the Commission and carried over from the 1941 season:

Purchase of Cascadia Park from George Geisendorfer as per agreement, \$50 per month for 12 months during 1942 -	\$600.00
Purchase of Umpqua Lighthouse cut-over tract from K. R. Richards, 140.08 acres at \$5.00 an acre - - - - -	700.40
Purchase of wayside strips at Cascadia from Rova E. Conn, 7.5 acres at \$66.66 per acre - - - - -	500.00
Purchase of wayside strips along Salmon River Highway from Miami Corporation, 40 acres at \$4.75 per acre - - -	<u>190.00</u>
Total	\$1,990.40

The Commission approved the payments involved in these transactions.

The following projects were reported by the Parks Superintendent as approved by the Commission but negotiations incomplete:

Purchase of cutover lands along the Salmon River Highway from James Churchill, 80 acres at \$5.00 per acre - -	\$400.00
Purchase of yellow fir timber land in Tillamook County, 40 acres at \$50 per acre - - - - -	<u>2,000.00</u>
Purchase of beach frontage from E. S. Collins, near Short Sand Beach, 42.22 acres at \$284.20 per acre - -	12,000.00
Timber wayside strips along the Pendleton-John Day Highway, 835 acres at \$15.20 per acre - - - - -	<u>12,700.00</u>
Total	\$27,100.00

The Parks Superintendent was instructed by the Commission to discontinue negotiations for the first three of these tracts. As to the Pendleton-John Day Highway timbered strips the Parks Superintendent was instructed to contact the owners in an endeavor to secure, if possible, the deferment of tree cutting until such time as the Commission's finances will permit the purchase of the property.

The Parks Superintendent submitted a list of park betterment orders from which the following were selected and approved by the Commission for 1942 performance:

JAN 5 1942

Purchase of refrigeration plant for Silver Creek Falls	
State Park - - - - -	\$ 350.00
Expense of disbanding park crews, one-half month of	
January only - - - - -	150.00
Legal expense - - - - -	1,000.00
Signing parks - - - - -	250.00
Cruising of timber tracts - - - - -	200.00
Photographic expense, fees for water filings, etc. - - -	100.00
Improvements at Azalea Park, Brookings - - - - -	100.00
Improvements at Boiler Bay State Park - - - - -	50.00
*Incasing fountain in Cascadia State Park - - - - -	448.00
Improvements in The Cove Park - - - - -	123.34
Improvements at Ponsler State Park - - - - -	50.00
Improvements at Short Sand Beach State Park - - - - -	621.58
Total	\$3,442.92

*(This project approved only in the event State Board of Health demands same.)

The Parks Superintendent requested approval of a maintenance budget for the year 1942 in the amount of approximately \$42,000, including the following projects:

<u>PARK</u>	<u>AMOUNT</u>
Alderwood	\$ 225.00
Azalea and Harris Beach	1,530.00
Bald Peak	150.00
Booth	200.00
Bradley	1,730.00
Cape Arago (includes Golden and Silver Falls, Simpson, Barview and Wayside strips)	2,212.00
Cape Lookout	460.00
Cascadia	2,190.00
Casey	1,445.00
Chandler	200.00
Columbia River Highway Parks	2,467.00
The Cove Palisades	1,785.00
Curry County Parks	2,442.00
Ecola	2,362.00
Helmick	210.00
Holman	340.00
Honeyman	3,667.00
Lava Caves	525.00
Lincoln County Parks	2,642.00
Neptune	950.00
Peter Skene Ogden	150.00
Pilot Butte	100.00
Ponsler	25.00
Saddle Mountain - rental on CCC camp site	125.00
Saddle Mountain - Watchman for CCC camp	550.00
Saddle Mountain Park	619.00
Salmon River	2,162.00
Shelton	200.00
Short Sand Beach	1,860.00

(Continued on next page)

JAN 5 1942

(Maintenance budget for State Parks - continued)

<u>PARK</u>	<u>AMOUNT</u>
Silver Creek Falls	\$3,791.00
Umpqua Lighthouse	225.00
Viento	270.00
O & C Leases	900.85
Fire Protection Tax (State Forestry Dept.)	720.00
Additional Projects to be selected	<u>2,570.15</u>
Total	\$42,000.00

After careful consideration of each item the Commission tentatively approved such budget with the understanding that the Parks Superintendent would review the amount set up for each item and cut out all unnecessary expense.

The Parks Superintendent brought up for discussion an offer from a mining company, represented by Mr. W. C. Hellier, to acquire a Port Orford Cedar State Park, in Curry County, that contains chrome ore which the company wishes to mine. He advised that this park contains 160 acres of land situate adjacent to the Oregon Coast Highway, about seven miles north of the Town of Port Orford, and that it was acquired by the state in 1929 for the sum of \$2,400.00. Also, its present value is only about \$1,600, in view of the fact that a considerable portion of the timber standing thereon has been destroyed by fire. The company's original proposal, he said, was to exchange other suitable park land for this park on an acre-to-acre basis; however, it has been suggested by Mr. Earl K. Nixon, Director of the State Board of Geology and Mining, that it would be fair and reasonable to ask the company to pay the state cash in the amount of \$10,000, in addition to deeding the state an equal area of land, because of the value of the ore that the state park contains. The mining company, he said, selected three prospective sites to exchange for the state's property, all of which he inspected, and the one that he prefers is a 1400-acre tract situate just south of Floras Lake with a $3\frac{1}{2}$ -mile frontage on the Pacific Ocean, which tract can be acquired, he believed, on the basis of settlement suggested by Mr. Nixon. The Commission indicated a desire to cooperate with the mining company in this venture because of the value of the chrome ore in the national defense program, but considered it inadvisable to deal with the company on the property-exchange basis. After considerable discussion the Commission decided to ask the company to pay the state \$2,400 in cash, representing the purchase price of the state park, and in addition there-to the sum of \$10,000, such amount to be paid five per cent annually from the company's earnings on the property. Such arrangement is to be used as a basis for further discussion of the matter with representatives of the mining company when they appear before the Commission at its meeting on January 21. It was understood that the amount received for the park is to be placed at the disposal of the Parks Department for acquisition of another park area comparable with the one being sold.

The Commission discussed and approved payment of an invoice from the American Association of State Highway Officials, in the amount of \$350 covering dues of the State of Oregon in such association for the year 1942.

The Commission also discussed briefly a bill that is now before Congress, the purpose of which is to vest in the Interstate Commerce Commission almost exclusive control over motor transportation throughout the several states. No action was taken by the Commission in this matter.

JAN 5 1942

The Engineer reported a request from the Contractors Association that the Commission allow contractors on state highway work to defer performance of going contracts so as to permit them to engage in the grading and paving of airports. He gave as his thought that the granting of such request would work to the state's disadvantage, and suggested that the request be denied unless the request comes from the proper army officials. The Commission approved the suggestion and instructed the Engineer to discuss the matter with Mr. Theodore Arenz of the Contractors Association on such basis, advising him that, if the army officials will request such concession along with the contractor, then the Commission will consider the granting of an extension of time to the contractor on the state job until the contractor's defense project is completed.

The Commission considered and signed agreements, etc., as follows:

Agreements with the following cities for work to be performed on city streets that are not state highway routes:

Burns	Jefferson	Enterprise
Cornucopia	Oakridge	Gold Hill
Gresham	Rainier	Joseph
Jacksonville	Canyon City	La Grande

Agreement with the Southern Pacific Company covering the Oak Hill Overcrossing of the company's Coos Bay Branch, in Lane County.

Agreement with the Bonneville Power Administration covering pole line crossing of the Old Oregon Trail at Orodell, in Union County.

Bargain and sale deed conveying unto George D. Saxton and wife two parcels of land containing 0.06 and 0.09 acre of land, respectively, in Washington County. Right of way file No. 6260-A.

Permits authorizing the taking of sand and gravel from allotted Indian lands in Wasco County, for road building purposes. Real property files Nos. 9528, 9539 and 9540.

The Commission discussed the date for its next regular meeting for the receiving of bids and decided to postpone the meeting heretofore scheduled for Thursday and Friday, January 15 and 16, to Wednesday, January 21, 1942. The Secretary was instructed to make the usual arrangements to hold the meeting in the auditorium of the Public Service Building, Portland.

The meeting was adjourned at 5:00 p. m.

JAN 5 1942

Portland, Oregon, January 21, 1942

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Huron W. Clough, Acting Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Chairman Cabell was absent, attending a meeting in Washington, D. C., relative to highway legislation.

Bids as follows for highway construction projects and sale of buildings were opened and read in conformance with previously published notice following which Commissioner Clough announced that the award of contracts would be made at 3:00 p. m. in the same room:

MAINTENANCE EQUIPMENT SHED AT ALSEA

A. T. Fox	\$2,580.75
G. E. Anderson Company	2,937.61
Erwin E. Batterman	3,261.00

**LEWIS AND CLARK BRIDGE
REMODEL TRAFFIC BARRIER AT SOUTHERLY END**

No bids received on this project

**COLUMBIA RIVER HIGHWAY
TONGUE POINT SECTION - GRADING AND PAVING**

	<u>Using Asphalt</u>	<u>Using Tar</u>
Erickson Paving Co.	\$202,314.00	\$202,290.00
Berke Brothers	206,437.50	-

Hoxe Smith	\$100.00
Burt Picha	66.00
Sullivan Wrecking Company	31.79

County Judge E. L. Pope and District Attorney Fred A. Miller of Clackamas County were present and discussed with the Commission matters pertaining to log hauling. They particularly asked the Commission to make provision in its permits for the transportation of loads in excess of the legal length limits, for the elimination of overhang of unsupported load, and for the safeguarding of other traffic at curves where such loads take up most of the traveled roadway. They explained that it is difficult to prosecute in cases involving these features when the Highway Commission's permits do not contain regulatory provisions. The matter was discussed at considerable length during which the Engineer advised that the Commission's permits have already been modified to cover both situations.

JAN 21 1942

Judge Pope complained that log haulers, who secure permits from the State Highway Commission to operate over state highways, consider that such permits also cover hauling on county roads. It was pointed out to him that the Highway Commission's jurisdiction extends only to state highways and that the permits issued by the Commission simply cover log hauling on state highways, and it is the responsibility of the county to issue the permits where the operations are over county roads and to prosecute in the event that the county's rules and regulations are violated.

The policy with respect to the granting of permits was also explained, particularly the feature that prohibits the granting of permits, except in unusual cases, if the geometric design of the road will not permit log hauling to be carried on without a portion of the load or equipment extending beyond the center line of the highway. Commissioner Clough advised that the Commission appreciates that the county is confronted with a more serious problem than the state because county roads are usually constructed to much lower standards as to curvature than state highways; however, it appears to him that the solution is strictly up to the county court, in so far as county roads are concerned, and up to the State Highway Commission, with respect to state highways. The Secretary was instructed to send Judge Pope a set of the rules and regulations that have been adopted by the Commission covering log hauling traffic.

Following this discussion, the Commission confirmed telephonic authority given the Engineer a few days previous authorizing the transportation of logs over the Santiam Highway, between Cascadia and Lebanon, having an overall length of 55 feet, it being understood that one flagman shall be maintained at each end of the two-mile section, between milepost 32.90 and milepost 35.68, where there are numerous sharp curves, and that the flagmen will stop traffic approaching such two-mile section and issue an appropriate warning, orally as well as printed, to watch out for logging trucks.

Dr. V. V. Caldwell, Dean-Director, General Extension Division, Oregon State System of Higher Education, and Mr. Burton Hutton, Director of the "Oregon on Parade" program, came before the Commission with respect to continuing, during the summer of 1942, the arrangement heretofore in effect in 1940 and 1941 for the financing of KOAC's "Oregon on Parade" radio program. Mr. Hutton pointed out that there remains unexpended from the 1940 appropriation a balance of \$300 and a like amount from the 1941 appropriation, and suggested that this be applied toward a similar arrangement in 1942 if that meets with the approval of the Commission. He said that he is not asking the Commission to make a definite decision at this meeting but would like to have an answer so they can prepare a definite program at least a couple of months in advance. The Commission expressed satisfaction with the programs previously broadcast and expressed a desire to cooperate in the future as much as possible but deferred, until the return of Chairman Cabell, a decision whether or not to contribute toward such program in 1942. Commissioner Clough stated that the Commission would pass on the matter at the earliest possible time.

Messrs. Thomas Shea, Manager, Oregon Motor Transport Association, and H. R. Williams, Traffic Manager, Arrow Transportation Company, were present.

JAN 21 1942

Mr. Williams made an urgent plea for a modification of the Commission's present ruling which will not permit his company to operate over the Columbia River Highway, between the Washington state line and the town of Umatilla, truck and trailer gasoline-tank combinations having an overall length of 60 feet which is in excess of the legal length limit in the state of Oregon. He urged this special concession in the interests of national defense and to make it possible to supply customers from the Umatilla base which is extremely difficult to do under present conditions. He pointed out that, under the Commission's present ruling, they are obliged to break up their 60-foot overall combinations at the state line and to tow the trailer to Umatilla with an auxiliary truck which can be released for other uses if the Commission will approve their request. Commissioner Clough pointed out that the Commission already has a ruling which will permit the use of equipment 60 feet overall in length in the transportation of defense goods but the Commission could not see its way clear to grant any further concession on account of the law which prohibits movements of such character and also on account of the action taken by the 1941 legislature. He also stated that so far as he personally is concerned he would not care to pass on the matter until the return of Chairman Cabell. Commissioner Oliver concurred. Mr. Williams then asked that he be advised by letter just what the Commission will do in the matter. The Commission agreed to let him know as soon as possible after conferring with Chairman Cabell.

Miss Ethel R. Decker, Superintendent, Helen Kelley Manley Community Center, Portland, was present and inquired as to the Commission's plans for the construction of an additional unit at the south end of the Front Avenue Project, Portland. She said that this project has a bearing on the program of her organization and they are anxious to know the Highway Commission's plans for this project so they can adjust their plans accordingly. She was informed that the Commission had hopes to advertise for bids for construction of an additional unit in the vicinity of Sheridan Street in March of this year but the war has changed the situation and the plans may have to be altered. It was suggested that Miss Decker contact the State Highway Engineer about the middle of February when it may be possible to give her definite information.

Mr. E. L. Rigdon, contractor for the construction of grading, surfacing and oiling the Okerman Ranch-Sagehen Hill Section of the Central Oregon Highway, in Harney County, contract No. 2367, was present and asked the Commission to relieve him from payment of the penalty heretofore assessed against him for failure to complete this project within the specified time limit. He said that he underbid this job in the first place but accepted the contract because he thought he could at least break even; however, he lost considerable money on the job. He also said that he made an honest effort to do a good job and feels, under the circumstances, that he should not be required to pay the penalty which amounts to \$2,200.00. The Engineer verified Mr. Rigdon's allegations as being substantially correct, stating that Mr. Rigdon encountered unforeseen difficulties that were beyond his control. He recommended, in view of the circumstances, that Mr. Rigdon be relieved from payment of the entire penalty. Commissioner Oliver remarked that he inspected this job a number of times during progress of construction and can also verify the statements made by Mr. Rigdon. He favored granting the request. Commissioner Clough concurred. The Engineer's

JAN 21 1942

recommendation was thereupon approved. The Engineer was instructed to secure approval of the action by the Public Roads Administration, if possible.

Mr. Edward E. Sox, attorney, Albany, came before the Commission in behalf of his client, Mr. T. M. Gilchrist, who owns property at the intersection of the Pacific Highway East and the Santiam Highway, which property is desired by one of the oil companies on which to conduct a service-station business. Mr. Sox stated that Mr. Gilchrist is unable to consummate the deal with the oil company because the connection between the Pacific Highway and the Santiam Highway, for which right of way was purchased from Mr. Gilchrist, has not been constructed. To erect the service station on the property, as it is, he said, would place it too far from Pacific Highway traffic and it cannot be placed on the highway right of way because of the ruling of the Highway Commission. He further stated that, when Mr. Gilchrist sold the right of way to the state, he took into consideration the increase in value that would accrue to the rest of his property and accordingly did not ask the state to pay as much for his property as did others in this vicinity. He urged the Commission to approve one of the three following solutions to the problem: (1) deed back to Mr. Gilchrist the land that he sold the state for the Santiam Highway connection; (2) construct the connecting road in the immediate future; (3) pay Mr. Gilchrist a just compensation for his property which he feels he has not obtained under the circumstances. Mr. Sox admitted that Mr. Gilchrist's property has been increased in value by reason of the highway improvement as now constructed; however, declared that it was for such reason that Mr. Gilchrist did not ask as much for his property as others asked for theirs.

Commissioner Clough stated that, if it can be determined to the Commission's satisfaction just how much less the Commission paid for the Gilchrist property than it was actually worth before the highway was constructed, then the Commission will pay Mr. Gilchrist the difference. However, a final decision in the matter will have to await the return of Chairman Cabell. Mr. Sox agreed to furnish such information.

The Attorney discussed with the Commission the controversy with Mr. George P. Hitchcock of Eugene with respect to the acquisition of right of way needed for the Eugene-Springfield improvement of the Pacific Highway across Mr. Hitchcock's lands. He advised that this matter is now in court under condemnation proceedings in connection with which he offered Mr. Hitchcock \$12,000 for his property as previously authorized by the Commission. Mr. Hitchcock, he said, now wishes to settle out of court, and will deed the property to the state if paid the sum of \$13,500. He recommended against the payment of the extra amount because Mr. Hitchcock in the meantime has removed from the premises certain shrubbery valued at \$2,500. After due consideration the Commission refused to increase the amount of its previous offer, and instructed the Attorney to proceed with condemnation if Mr. Hitchcock will not accept \$12,000.

Mr. Ole Grubb, County Commissioner of Deschutes County, was present in regard to the improvement of the Terrebonne-Lower Bridge county road. He stated that the county has completed the grading work on all but a $1\frac{1}{2}$ -mile

JAN 21 1942

section and inquired as to the Commission's plans for the surfacing and oiling of the road. The Engineer recalled that the Commission promised the county court that it would surface and oil the road as a federal aid secondary highway project if it was approved by the Public Roads Administration, and if the county would construct the grade; further, that such approval was obtained but before the state could do any work the war started and the federal funds were "frozen", except those needed to finance defense projects for which this road does not qualify. He doubted that it would be possible to do this work now with state money because of difficulties in securing equipment and materials and a satisfactory priority rating. He suggested that, if the county would complete the grading and surface the road, which would put it in usable condition, then the Highway Commission could spend the federal moneys on some other county road in Deschutes County when they are released. Mr. Grubb stated that the county is equipped to do grading work and some surfacing work, and the county court might approve such an arrangement if the state would give the county credit later. He approved the Engineer's suggestion; however, stated that the county is not in position to furnish all of the oil rock. Commissioner Clough stated that the Commission wants to keep faith with the county and will cooperate with the county to the best of its ability. The Engineer was instructed to work up a set of specifications for oiling, that the county can furnish the materials for, for the consideration of the Commission at its meeting in February.

The Engineer reported on the cost to construct guard fence along the Dooley Mountain Section of the Baker-Unity Highway as ordered at the previous meeting. He estimated such cost at \$15,000.00. The Commission considered the project too costly to undertake at this time and accordingly deferred it until a future date.

The Engineer presented a plan for the channelization of traffic at the intersection of the Pacific Highway and the McKenzie Highway at West Springfield. He explained that this is a deviation from the original plan, right of way for which would have cost about \$100,000, and he recommended adoption of the proposed plan as a temporary expedient in view of the fact that at some future time the Pacific Highway will undoubtedly be rerouted on another location west of Eugene. The Commission approved the plan as submitted.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Mr. Clark Irving, Independence, came before the Commission in regard to his claim for damages arising out of an accident on the North Santiam Highway near Idanha and involving a state highway truck. (See minutes of October 16, 1941, for details of accident.) Mr. Irving claimed damages in the amount of \$561, representing the cost of repairs to his truck and loss of time. The Attorney advised that the state's insurance company does not accept liability because the state's truck was not touched. The Commission considered that the state is obligated to a certain extent because the state's truck was being driven on the wrong side of the road. After a lengthy discussion, Mr. Irving offered to accept the sum of \$400 as settlement in full of his claim. The

JAN 21 1942

Commission refused to settle on such basis but voted unanimously to reimburse him for the cost of repairs to his truck plus \$25, representing personal expense in bringing the matter to the Commission. Mr. Irving was informed that this offer is final and that if it is not acceptable to him then it would be necessary for him to bring suit against the driver of the state's truck, Mr. Luther R. Melton, and the company that wrote the state's insurance. Mr. Irving requested time to think the matter over.

Mr. Merle Chessman, Chairman of the Advisory Committee on Publicity Matters, was present and discussed with the Commission the Commission's budget for 1942 with respect to the Travel and Information Department. Mr. Ben Titus, Acting Director of the Travel and Information Department, was also present and entered into the discussion. He advised that it would require at least \$20,000 to carry on the functions of his department this season, made up of the following items: salary \$4,800, distribution of motion pictures \$5,000, booklets \$5,200, maps \$3,000, miscellaneous items such as office rent, postage and incidental expense, \$2,000.00. He explained that the contract has already been entered into for the distribution of the motion pictures and could not be cancelled without costing the state at least \$3,000; also that the booklets are not dated and can be used in future years if they are not all distributed this year.

Mr. Chessman advised that, at a meeting of some of the members of the Advisory Committee on the previous day, the decision was reached, in view of the present war emergency, that expenditures in connection with the Travel and Information Department should be limited to essential items with possibly some spot advertising in the states of California and Washington notwithstanding that some of the resort people in the state are getting jittery and feel that they will lose considerable business unless the state will continue its advertising as in the past. He also said that the previous action of the committee recommending elimination of all magazine advertising was confirmed. It was also agreed, he added, to approve the \$20,000 budget; however, the committee will meet again in about April and will decide then whether or not to recommend any changes. The Commission thanked Mr. Chessman for his appearance and thereupon approved the \$20,000 budget as recommended.

Senator Wm. E. Walsh, Marshfield, and Mr. W. J. Hellier, mining engineer, were present in regard to the purchase of state park property in Curry County. Senator Walsh stated that the state's property, as well as adjacent property, contains deposits of chrome ore which are particularly valuable at this time on account of the war situation, and that the company which they represent has already acquired considerable private property in this locality but needs the state property because it occupies a key position in their setup. He gave as his understanding that the state paid \$2400 for this park, which contains 160 acres, and offered to pay the state such amount for the same notwithstanding a considerable portion of the Port Orford cedar standing thereon has been burned and that the price is about 50 per cent more than the company is paying for other land in this vicinity. The company, he said, contemplates spending a large sum of money in connection with its operations; that it is a privately-financed concern, and that no stock will be sold; further, that unless they can secure the state's land the project may not

JAN 21 1942

materialize. He also said that the company prefers not to deal on any royalty basis and that it is imperative that they know at once whether or not they can obtain the state's property as they have government contracts for chromium which must be filled as quickly as possible. He explained that the chromium deposits in this locality are low grade and that it would not be economical to mine it if it were not for the present war situation.

Commissioner Clough advised that the Highway Commission does not want to hold up the mining venture in any way, on the other hand wishes to encourage it as much as possible. However, the Commission feels that, if the property contains certain underground values, the state should secure benefits therefrom and, accordingly, is of the opinion that the company should pay a small royalty for the ore taken from the property in addition to securing reimbursement for the purchase price. Commissioner Oliver concurred and added that this is a public matter, involving public funds and, accordingly, the Commission must protect the public interests, otherwise it will be severely criticized. The Engineer recited the settlement suggested by Mr. Earl K. Nixon, Director of the State Board of the Department of Geology and Mineral Industries, that the company should pay the state \$2400 cash plus a royalty of \$10,000 payable five per cent annually from its earnings. After further discussion the Commission deferred final action on the matter pending the return of Chairman Cabell from Washington, D. C. The Engineer was instructed to secure Mr. Cabell's reaction thereto and to bring the same to the attention of Commissioners Clough and Oliver by telephone when final instructions will be given.

At 3:00 p. m. Commissioner Clough announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards having previously been approved by the unanimous action of the Commissioners present:

"Construction of a 32' x 50' shed with concrete foundation for storage of highway maintenance equipment at Alsea, in Benton County. A. T. Fox, Salem, submitted the low bid for this project in the amount of \$2,580.75, and G. E. Anderson Company, Portland, submitted the second-low bid in the amount of \$2,937.61. There was one other bidder. The Commission awards this contract to A. T. Fox, at his low bid of \$2,580.75.

"Remodel traffic barrier at southerly end of Lewis and Clark Bridge, in Clatsop County, by installation of electrically operated lifting device in place of existing hydraulic installation. No bids were received on this project. (The Commission decided later to do this work with state forces.)

"Tongue Point Section of the Columbia River Highway, in Clatsop County. 0.98 mile grading and paving. There were seven bids received for this project, the low one being that of Erickson Paving Company, Seattle, Washington, at \$202,314, based on the use of asphalt, and \$202,290, based on the use of tar. The second-low bid was that of Berke Brothers, Portland, at \$206,437.50, based on the use of asphalt,

but no bid was submitted using tar. All bids received for this project are referred to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied. (This contract was awarded later in the session to Erickson Paving Company at its low bid of \$202,290, using tar)

"Boardman-Stanfield Section of the Boardman-Stanfield Highway, in Morrow and Umatilla Counties. 25.88 miles surfacing and bituminous macadam; also furnish 13,000 cu. yds. crushed material in stock piles. F. R. Hewett, Spokane, Washington, submitted the low bid on this project in the amount of \$247,173.00. Babler Brothers, Portland, were second low, in the amount of \$270,363.00. There were two higher bidders. The Commission awards this contract to the low bidder, F. R. Hewett, at his bid of \$247,173.00.

"North Burgard Street Section of city streets in Portland, Multnomah County. 0.72 mile paving. Porter W. Yett, Portland, submitted the low bid on this project in the amount of \$18,392.00. There was one other bid received, being that of The United Contracting Company, Portland, in the amount of \$18,876.00. The Commission awards this contract to Porter W. Yett, at his low bid of \$18,392.00.

"Construction of a 32' x 50' shed with concrete foundation at Tillamook, in Tillamook County, for storage of highway maintenance equipment. A. T. Fox, Salem, submitted the low bid for this work in the amount of \$2,741, and the second-low bid was received from the G. E. Anderson Company, Portland, in the amount of \$3,065.38. There was one other bidder. The Commission awards this contract to A. T. Fox, at his low bid of \$2,741.00.

"Construct undercrossing structure with 0.44 mile approach road at the south end of the Umatilla Ordnance Depot, in Umatilla County. F. R. Hewett, Spokane, Washington, submitted the low bid for this project, in the amount of \$38,392.50. Harry I. Hamilton, Eugene, submitted the second-low bid in the amount of \$38,802.50. There was one other bidder. The Commission refers all bids for this project to the Engineer with power to award the contract to the low bidder, when certain conditions have been satisfied."

Sale of Residence Building in North Plains:

"Building No. 6545 (formerly owned by Carl Thielemann). No bids were received for this building.

Sale of Residence and Business Buildings at Eugene:

"Building No. 9316 (formerly owned by Mabel J. Reagan). Kenneth Dodd, Eugene, submitted the high bid for this building in the amount of \$312, and second-high bid was submitted by Burt Picha, Salem, in the amount of \$262.00. There were two lower bidders. The Commission rejects all bids.

"Building No. 9252 (formerly owned by Webster L. Kincaid). Three bids were received for the purchase of this building, the high one being that of Hoxe Smith, Eugene, in the amount of \$100.00, and second-high being that of Burt Picha, Salem, at \$66.00. The Commission rejects all bids."

Reconsideration was given by the Commission to the matter of remodeling the traffic barrier at the southerly end of the Lewis and Clark Bridge which project was advertised for bids to be received at this meeting, but no bids were submitted. The Commission decided to have this work done with state forces.

The Commission also discussed the disposition of the building on the highway right of way at North Plains for which no bids were submitted at this meeting. The Assistant Attorney advised that the building is of no value and suggested that it would be advisable to have it wrecked either by WPA forces or state forces. The Commission approved the suggestion.

The matter of the sale of the buildings at Eugene was also discussed. The Attorney requested authority, in view of the fact that the Commission rejected all of the bids received at the morning session for the purchase of these buildings, to negotiate private sales for the same. The Commission approved the request and authorized sale of the buildings if the offers received in such private negotiations are higher than the bids submitted at this letting.

The County Court of Marion County, represented by County Judge Grant Murphy and County Commissioners Jim Smith and Ralph Girod, and County Engineer N. C. Hubbs was present in regard to the maintenance of the North Santiam Highway between Niagara and Detroit, a distance of 12 miles. They pointed out that this section is still a county road under the jurisdiction of the county court although they understand that the Highway Commission intends to designate it a state highway when it has been constructed to state highway standards. They advised that the road is not in good state of repair and they are particularly concerned with the bridges which soon will have to be replaced. They asked the Commission to take over and maintain the road at this time because the county is not financially able to assume the expense of such work. They alleged that the traffic that uses the road is mostly state highway traffic and that it is isolated as far as county maintenance is concerned.

Commissioner Clough advised that regardless of how the Commission felt about taking over the road it could not be done at this meeting because it takes action by all three Commissioners and Mr. Cabell is absent. The Engineer advised that there is merit in the county court's request and in his estimation the state is more or less obligated because, as the court stated, most of the traffic that uses the road is state highway traffic. He suggested that the state assume the payment of 50 per cent of the cost of the maintenance work, until such time as the road is placed on the state secondary highway system and the new road is constructed. The Attorney advised that the Commission has legal authority to enter into such an arrangement if it so desires. The Commission, after discussion, approved the arrangement. The County court

JAN 21 1942

also approved, Judge Murphy stating that they are accepting the proposition as outlined if that is the best offer that the Commission can make. However, in doing so the court wants the Commission to know that it is not deviating from its position that the Commission should take over this road as a secondary state highway, and the agreement covering the arrangement in his estimation should so state. The Attorney was thereupon instructed to prepare an appropriate form of agreement covering the matter.

Reconsideration was given by the Commission to a letter from the Jackson County Chamber of Commerce requesting the removal of three or four points on the Crater Lake Highway, between Trail Junction and McLeod, where sight distance is short and where, they alleged, it is dangerous for cars to pass. The Engineer estimated the cost to improve this section as it should be done at \$180,000, and to widen at the points requested at \$30,000.00. He recommended deferment of the project until the present war emergency is over because of the urgent need of the funds elsewhere. The Commission adopted the recommendation.

A letter was presented from Mr. Harry A. Slack, Attorney, Coquille, in behalf of Mr. and Mrs. Wayne Watson of that city in which the Commission was requested to remedy a slide condition which exists along the Coos Bay-Roseburg Highway in front of the Watson property about one-half mile south of Coquille. Mr. Slack referred to an agreement entered into between the Commission and the Watsons on November 18, 1938, and asked the Commission to extend the bulkhead heretofore constructed so as to alleviate the present condition. He advised that unless something is done soon the Watsons' house very likely will slide onto the highway right of way. The Secretary presented a copy of the agreement referred to by Mr. Slack which provides that the state shall, without cost to the owner, construct a bulkhead in front of the owners' property and on the right of way of said highway between certain highway points and shall likewise place a new sill under the house and porch of the owners for the purpose of bringing the house and the porch up to its proper level and elevation; also, in which the Watsons agree that they will not hold or expect the state, its State Highway Commission, officers, agents, or employees to guarantee the permanency of said corrective measures or construe said failure, if they should fail, as an admission and acceptance of liability on the part of the state, its State Highway Commission, officers, agents or employees. The Engineer advised that the things required of the state, as mentioned in the agreement, have been done and in his estimation the Commission's obligation has been fulfilled in its entirety. The Commission concurred in the Engineer's viewpoint and thereupon denied the request. The Secretary was instructed to convey such information to Mr. Slack and to send him a copy of the agreement for his ready reference.

The Commission discussed an affidavit and bond submitted by Mr. E. W. Dick, McMinnville, Oregon, for the purpose of securing the salary check, in the sum of \$31.13, of one Edgar V. Jones, former employee of the State Highway Department. The Attorney explained that Mr. Jones left the employ of the State Highway Department owing Mr. Dick a certain sum of money, and that he wrote Mr. Dick some time later authorizing him, Mr. Dick, to collect and

JAN 21 1942

apply on this account the moneys that he, Mr. Jones, had coming from the state. However, he did not sign his name in full, using only his nickname "Buck". This letter, he said, was forwarded to the State Highway Department with a request for Mr. Jones's check but the check was not released because the letter did not bear Mr. Jones's full signature. The Attorney gave as his thought that the affidavit and the bond would clarify the situation and that the Commission, with this evidence and security, could deliver the check to Mr. Dick without assuming any liability. He recommended that the check be sent to Mr. Dick. The Commission approved the recommendation.

The Engineer reported that in accordance with authority previously granted him by the Commission he has awarded contracts, as follows, bids for which were received by the Commission at its meeting on December 18, 1941, the conditions of the awards having been fulfilled:

Grading, surfacing and oiling the Soda Mountain-Silvies Section of the John Day-Burns Highway, in Grant County. Contract awarded January 6, 1942, to M. L. O'Neil & Son, the low bidders.

Grading, surfacing and oiling the Wright Ranch-Milo Section of the Tiller-Trail Secondary Highway, in Douglas County. Contract awarded January 16, 1942, to C. J. Eldon, low bidder.

The Commission confirmed the awards.

The Commission had under consideration the selection of a date upon which the insurance policy that the state is to give the railroad companies, in connection with the lease of the Steel Bridge in Portland for use by state highway traffic, shall become effective. The Attorney advised that the railroad companies require that they be furnished a bond to protect the companies from anything that might happen to their tracks beneath the bridge when the proposed ramp, et cetera, is under construction. The Engineer advised that it is not proposed to construct the ramp this year so it is unnecessary as yet for the Commission to set an effective date for the bond. The Attorney was instructed to so inform the railroad companies.

The Engineer reported briefly on the advisability of employing a Safety Engineer on construction work. Action on this matter was deferred until some future time.

The Engineer requested authority to purchase three power hoists for use by bridge maintenance crews, at an estimated total cost of \$1,200.00. The Commission approved the request, the purchase to be made through the State Purchasing Agent in the usual manner.

The Secretary presented two resolutions prepared by the Attorney, one of which authorizes the use of certain state property adjacent to the Old Oregon Trail opposite the Pendleton Airport, by the United States Army, and the other designates the width of the Wilson River Highway right of way opposite land owned by the Consolidated Timber Company. The Commission approved both

JAN 21 1942

resolutions and authorized the Secretary to insert each in the proper place in the minutes of the meetings held on December 18, 1941, and January 5, 1942, when such matters were discussed and approved.

A letter was presented from the Consolidated Freightways, Inc., requesting increased carrying capacity on their truck and trailer equipment for all movements through the state of Oregon, involving interstate shipments, which privilege is now limited to the transportation of defense goods only. The Commission considered that it does not have legal authority to grant this request and accordingly took no action thereon. It was the thought of the Commission that this is a matter that should be passed on by the Governor.

The Commission discussed briefly and approved the Engineer's letter of December 29, 1941, directed to Mr. E. P. Leavitt, Superintendent, Crater Lake National Park, concerning route-number signs on state highways within the park.

The Secretary presented a resolution from Lincoln County Court accepting jurisdiction over a short section of the old Corvallis-Newport Highway right of way heretofore abandoned by the state upon reconstruction of the highway on other alignment. The Commission approved the resolution and ordered it filed.

A letter was presented from the Hood River Chamber of Commerce suggesting the continuation of the Commission's program publicizing the State of Oregon notwithstanding the present war emergency. The Secretary was instructed to inform the Chamber of Commerce of the Commission's plans to curtail expenditures for this purpose.

The Attorney brought up for discussion the question whether or not an effort should be made to secure relief from the payment of the taxes required by the federal government in connection with electric-power purchases. He advised that such purchases during the past twelve-month period totaled \$28,333.28 and that the state was required to pay a three per cent tax amounting to approximately \$850.00. This tax, he said, was paid to the power companies along with the payment for service rendered, but was not turned over to the government; furthermore, the power companies allege that they cannot relieve the state from the payment of the tax because of the fact that the tax is woven into the companies' rate or charge and that the Public Utilities Commissioner will not permit the application of one rate to the state and another rate to a private industry. It was his thought that an attempt should be made to secure relief from the payment of additional taxes and reimbursement from the power companies of the tax heretofore paid. After discussion the Commission approved the suggestion and instructed the Attorney to see what could be done about the matter.

The Engineer reported telephonic information just received from W. H. Lynch, District Engineer, Public Roads Administration, to the effect that the Tongue Point project on the Columbia River Highway, in Clatsop County, for which bids were taken by the Commission at the morning session, has been

JAN 21 1942

cleared by the Public Roads Administration and the Commission now is at liberty to award the contract to the low bidder, Erickson Paving Company, Seattle, Washington, if it so desires. He recommended the award of the contract at this time in view of such information. The Commission approved the recommendation and thereupon by unanimous vote awarded the contract to the Erickson Paving Company on the basis of its low bid of \$202,290, using tar.

The Secretary requested authority to eliminate hereafter from log hauling permits the PUC number of trailers used in connection with such movements. He explained that the trailer number is of no particular value and simply leads to confusion not only among operators of the equipment but also in his office where the permits are prepared, particularly in cases where a fleet of trucks is being operated under one PUC permit and trailers are frequently switched from one truck to another. He further explained that there is no way of identifying any particular trailer because most of them are built exactly alike. The Commission considered that the mention of the PUC trailer number is of no particular value in such permits and thereupon approved the request.

The Engineer brought up for discussion a complaint from Robert M. Stuart, Beaverton, with respect to a traffic hazard which he alleges exists at the intersection of Allen Street with the Beaverton-Aurora Secondary Highway in Beaverton. Mr. Stuart advises that a power pole is being maintained at the northwest corner of this intersection, same being used jointly by the Portland General Electric Company and the West Coast Telephone Company, and that the pole is so placed that anyone traveling south on the state highway and turning into Allen Street is obliged to swing over onto the left-hand side of Allen Street, into the lane of traffic approaching the highway from Allen Street, and, if such lane is occupied, has to stop until the lane is cleared thus violating the traffic law by stopping on the highway. Furthermore, the situation is conducive of traffic accidents. The Engineer advised that this matter has been investigated and that the allegations of Mr. Stuart have been confirmed; further, that the corner is so sharp that a lot of the traffic prefers to pass behind the pole, on private property, rather than take a chance of occupying the wrong lane on Allen Street. The intersection would be much safer, he said, if the pole were moved back. However, it does not appear to be a responsibility of the state because it is back of the area that is under state jurisdiction. He also said that the matter has been brought to the attention of the Public Utilities Commissioner who has offered to do everything within his power to assist in the removal of the pole to a safer location, provided the Highway Commission will agree to pave the area back of the pole as it is presently located.

As a result of the discussion of this matter it was decided that the removal of the pole is the city's responsibility and that the city is also liable for accidents that may occur under present conditions. It was agreed that the pole in its present location is a traffic hazard and should be removed. The Commission authorized the construction of new concrete curb and the paving of the area between this curb and the present highway pavement if the city will cause the pole to be moved to a location back of this curb, thus

providing a longer-radius turn and a safer intersection. The Engineer was instructed to convey such information to the city authorities and ascertain their attitude with respect thereto.

The Attorney brought up for discussion certain reservations desired by the Wright-Blodgett and Tidewater Timber Co. in the deeds conveying to the state right of way for the Fishhawk Falls Secondary State Highway across their holdings in Clatsop County. He advised that the companies are donating the right of way but want to insert in the deed of conveyance a reservation allowing them the use of their private logging roads on the right of way in connection with the removal of their timber, and also want the state to build satisfactory approaches from the logging roads to the highway at points where they intersect. They also ask the privilege of operating their logging equipment upon and along the highway within the boundaries of the property that they are deeding, regardless of the fact that the weights and dimensions of their loads may exceed the statutory limits in those respects. Furthermore, they wish to have the privilege of removing rock from any quarry that the state may open up on the lands that they are conveying to the state. The Commission decided that it does not have legal authority to approve a reservation that would allow the companies to transport loads having dimensions and weights in excess of the limits specified by statute and accordingly refused to approve such reservation; however, upon recommendation of the Engineer approved the other reservations requested.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

Pendleton-John Day Highway timbered wayside strips:-Mr. Boardman advised that, in accordance with instructions given him by the Commission at the previous meeting, he conferred with Mr. E. C. Kerns, President of the Pilot Rock Lumber Company, which owns a considerable portion of this timber, with respect to deferring the cutting of the timber until such time as the State Highway Commission is financially able to purchase the property heretofore negotiated for, same being located between Dale Ranger Station and the junction of Camas Creek with the North Fork of the John Day River. He said that he explained the reasons that the Highway Commission is unable to complete the purchase of the tract at this time, and in view of the situation Mr. Kerns agreed to hold the timber until such time as the Commission has funds available to purchase it. The Commission approved the report.

Sale of Port Orford cedar tract in Curry County:-The Commission reviewed the matters brought out in the conference earlier in the session with Senator Walsh and Mr. W. J. Hellier, representatives of the mining interests which wish to obtain this state park. The Parks Superintendent suggested that the Commission discuss this matter with Mr. Earl K. Nixon, Director of the State Board of the Department of Geology and Mineral Industries, before making its final decision in the matter because, according to Mr. Nixon, the

JAN 21 1942

state's property contains chrome ore valued in excess of \$200,000 and other minerals such as gold, platinum, et cetera. Commissioner Oliver gave as his thought that the company should be required to pay \$2400 cash and \$10,000 as royalty, payable five per cent annually from the earnings of the company. The Engineer suggested such settlement or the payment of \$12,400 cash by the company, in order to avoid public criticism, such payment to be earmarked and set aside for expenditure in connection with the acquisition of some other desirable park property. Final action on this matter was deferred pending consultation with Chairman Cabell.

Parks Department financial report for 1941:-The State Parks Superintendent presented a statement of income and expenditures for the year 1941, as follows:

STATE PARKS DEPARTMENT
INCOME FROM STATE PARKS FOR YEAR OF 1941

<u>Name of Park</u>	<u>Source of Income</u>	<u>Amount Received</u>
The Cove	Sale of Cherries	\$11.48
	Sale of Pears 2,731 lbs.)
	Sale of Peaches 12,979 ")
	Sale of Prunes 960 " 16,670 lb.)	424.97
	Sale of Apples small amounts)
		<u>436.45</u>
Honeyman	Bathhouse Receipts	231.79
Humbag	Sheep Grazing	<u>75.00</u>
	Total	\$743.24

EXPENDITURES BY STATE PARKS DEPARTMENT
FOR YEAR 1941

	<u>1941 Budget</u>	<u>1941 Expenditures</u>	<u>Balance</u>
Acquisition	\$100,000.00	\$104,419.29	\$ 4,419.29-
Betterment	30,000.00	15,432.53	14,567.47
Maintenance & Operation	<u>38,600.00</u>	<u>35,427.62</u>	<u>3,172.38</u>

The Commission approved the report and ordered it filed.

JAN 21 1942

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended be made for each. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to institute condemnation proceedings to acquire certain properties that are needed for highway improvements. He submitted a list of such properties, together with offers that he recommended in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9895	Lucinda F. Stratton	Right of Way	\$100.00
9861	Evelyn Farrelly	" " "	700.00

After discussion the Commission approved the request and the offers and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straight-end, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stock pile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of

eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Evelyn Farrelly, which property is located in the southeast quarter (SE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 29, Township 1 North, Range 10 East, W. M., Hood River County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9861, and which property is being acquired for right of way purposes in connection with the Hood River Highway;*

Real property owned by Lucinda F. Stratton, which property is located in Block A of the City of John Day, situated in Section 26, Township 13 South, Range 31 East, W. M., Grant County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 9895, and which property is being acquired for right of way purposes in connection with the John Day Highway;*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary

and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 20, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Assistant Attorney reported, as follows, on right of way expenditures in 1941:- Amount budgeted for Front Avenue Project, Portland, \$800,000; amount expended on such project \$500,000, leaving a balance of \$300,000 to be carried over to 1942. Amount of budget for 1941 for general right of way purposes \$600,000; amount expended in 1941 for such purpose \$650,000, being an overrun of \$50,000.

The Assistant Attorney advised that he is unable at this time to submit an estimate of the budget requirements for 1942 because of uncertainties as to which projects the Commission intends to construct. The Engineer advised that, according to the best information available, taking into consideration the present schedule of contract lettings and estimated receipts and expenditures for 1942, a right-of-way budget of about \$550,000 will be required for state-wide right-of-way purchases, and a budget of about \$290,000 will be required for purchase of right of way along Front Avenue, in Portland, such amounts being exclusive of the amounts needed for purchase of quarries, gravel pits, stock-pile sites, parks, and miscellaneous sites. The Commission indicated approval of such budget amounts.

Reconsideration was given by the Commission to the matter of constructing a fence along the Warm Springs Secondary Highway south of Madras, in Jefferson County, in front of property owned by a Mr. Emil Henskie. The Assistant Attorney reviewed the facts in the case, advising that Mr. Henskie purchased the property from Jefferson County, but he has been unable to ascertain whether or not he actually paid the county less for the property without the fence than he would have paid had the right-of-way fence been built. He pointed out that it is the practice of the Commission to pay for fencing only in cases where such fencing is a consideration in the right-of-way purchase, and in this particular instance the land was acquired from the county with nothing said about the fence. It was his thought that it would be establishing a dangerous precedent if the Commission would now authorize the construction of a fence at such a long time after the right of way was acquired, and he recommended that Mr. Henskie's request be denied. The Commission approved the recommendation.

The Attorney brought up for discussion a settlement with C. F. Allegre for right of way needed for the improvement of the Dee-Parkdale Section of the Hood River Secondary Highway across Mr. Allegre's land. He advised that this property is now under condemnation; and that the Commission's original offer to Mr. Allegre was \$350 for the two acres involved, but such offer was raised later to \$500 upon statements by Mr. Allegre that his land on the east side of the highway was cut off from water on the west side of the highway, although subsequent investigations reveal that to be erroneous. Mr. Allegre, he said, originally demanded \$1,200 for the two acres, but is now willing to settle if the Commission will pay him \$550. He recommended payment of \$550 for the tract in order to avoid additional litigation. The Commission approved the recommendation and so ordered.

The Attorney requested instructions relative to the purchase of property from H. L. Kuhl adjacent to the Siletz Bay-Newport Section of the Oregon Coast Highway. He advised that the highway has been reconstructed at this point and Mr. Kuhl owns two and one-half acres situate between the old and the new highway locations, which area is low ground and is being damaged as a result of the new highway-fill construction. He gave as his thought that it would be advisable for the state to purchase this tract in order to avoid the payment of excess damages, and advised that Mr. Kuhl is willing to sell the entire two and one-half acres for the sum of \$3,000 if he is allowed to keep a building located thereon, which building he will remove from the premises at his own cost and expense, or he will sell to the Commission two acres for the sum of \$2,000 if he is permitted to retain the one-half acre on which the building is located. The Commission considered it advisable to purchase the entire tract for \$3,000 and let Mr. Kuhl keep the building, provided he will remove it from the premises. The Attorney was authorized to negotiate with Mr. Kuhl on such basis.

The Secretary presented a letter from Frank J. Anlauf, Cottage Grove, directed to the Honorable Charles A. Sprague, Governor, in which the suggestion was made that the state purchase a spruce-timbered area adjacent to the Oregon Coast Highway south of Winchester Bay which he understands is to be logged off in the near future. According to Mr. Anlauf, the tract

JAN 21 1942

contains a fine stand of timber which should be preserved. The Commission decided not to purchase the tract at this time due to the stringency of the times which necessitates the curtailment of expenditures for such purposes. The matter is to be reconsidered by the Commission along with other similar projects when the present emergency is over.

The Commission had under consideration the abandonment of a portion of the Pacific Highway West (old route) through the town of Tigard, in Washington County, and the abandonment of the old Pendleton Airport Secondary Highway, in Umatilla County, on account of the reconstruction of these highways on other alignment. The Engineer advised that the sections of highways referred to are no longer of value from the state highway standpoint, and recommended that they be turned back to the respective counties in which they are situated for further maintenance as county roads or for other disposal. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolutions with respect thereto:

WHEREAS, in order to afford and make possible a better alignment and a more serviceable, safe and convenient highway for the traveling public, the Commission found it necessary to relocate and realign the section of the Pacific Highway West in the town of Tigard in Washington County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section, which section is more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way heretofore designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Pacific Highway West but is no longer a part of the right of way of said highway as the same has been relocated and constructed, be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision of this Commission is concerned, eliminated and left to revert to Washington County for such public use as the County Court may deem proper, and in the event the County Court should determine by order or otherwise that the same

can serve no public purpose, then said abandoned area may revert to the adjoining property owners as provided by law. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All of that certain section of the old right of way of the Pacific Highway West through the town of Tigard and situated in Section 2, Township 2 South, Range 1 West, W. M., Washington County, Oregon, lying on the southeasterly side of the right of way required for the reconstructed Pacific Highway West, the beginning and ending points with reference to engineer's stations of the said reconstructed highway being engineer's station 72+00 on the northerly end and engineer's station 97+30 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of E. A. Collier, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated December 15, 1941, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Washington County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said Pacific Highway West be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Washington County and beyond any responsibility or supervision of the State Highway Commission.

*Map filed Right of Way Abandonment and Retention File - No. 99.

WHEREAS, that section of the Pendleton Airport Highway lying between engineer's station 1282+50 on the Old Oregon Trail Highway and engineer's station 51+50 on the southeasterly right of way line of the reconstructed Pendleton Airport Highway has been relocated and reconstructed over a different route, thereby making unnecessary the further maintenance and use of the following described section as a part of the state highway system:

All that certain section of the old right of way of the Pendleton Airport Road lying in the East half of Section 5, Township 2 North, Range 32 East, W. N., Umatilla County; the beginning point being on the center line of the Old Oregon Trail Highway at engineer's station 1282+50, and the ending point being on the southeasterly right of way line of the reconstructed Pendleton Airport Highway opposite engineer's station 51+50.

The above described section of said highway, while not needed as a part of the state highway system can serve a useful purpose as a county road and the County Court of Umatilla County has requested that the said abandoned section of the Pendleton Airport Highway be turned over to the County Court to be maintained as a county road.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and affirmatively voting as follows:

1. That the section of the Pendleton Airport Highway above described be and the same hereby is abandoned as a part of the Pendleton Airport Highway as the same has been relocated, reestablished and improved by the State Highway Commission.

2. That said abandoned section of the former route of the Pendleton Airport Highway be surrendered to Umatilla County to be maintained by the said County as a county road, and that the County Court of Umatilla County be hereby requested to adopt a formal and appropriate resolution by which the County will accept the said highway and designate and adopt the same as a county road and assume full responsibility thereover.

3. That there is attached to this resolution and made a part hereof a blueprint marked Exhibit "A" and on which there is shown shaded in red the road affected by this resolution, which blueprint for identification purposes is signed by Paul Van Scoy, Division Engineer, H. G. Smith, Construction Engineer, and C. B.

McCullough, Assistant Highway Engineer, and bears date of December 17, 1941.*

4. That this resolution be entered in the minutes and records of the Highway Commission and a duly certified copy thereof be delivered to the County Court of Umatilla County and a like copy to the Public Roads Administration.

*Map filed Right of Way Abandonment and Retention File - No. 100.

The Engineer brought up for discussion a request from the United Contracting Company for relief from payment of penalty charged it for failure to complete its contract No. 2441, grading and paving the St. Helens Section of the Columbia River Highway, in Columbia County, within the specified time limit, which penalty is in the amount of \$254.22 and represents extra engineering costs incurred by the state in connection with this job subsequent to the date of completion specified in the contract. The contractor, he said, alleges the following: that bids were taken by the Commission for this job on February 27, 1941, that the date of completion specified was July 3, 1941, that it was the second-low bidder but the Commission awarded the contract to it during the latter part of March, upon the refusal of the low bidder to accept the award. Further, that it did not receive a signed copy of the contract until April 7, 1941; also that this company attributes its failure to complete the project within the specified time limit to delays incident to the award of the contract and delivery of the signed copy to it, totaling 40 days, and points out that if the Commission would allow it an extension of time equal to the 40 days lost, the contract could be considered completed without overrunning the time limit, because the work was actually finished on September 6, 1941. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct, and, in addition thereto, the contractor was handicapped because of uncertainties of labor and equipment. He recommended, in view of the circumstances, and for the reason that the contractor carried on the work to the best of its ability, that it be relieved of the payment of the penalty heretofore imposed. The Commission approved the recommendation.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

JAN 21 1942

- Loc. & Plans - - 3-1432 - Pudding River Bridge Approaches, Pacific Highway East, Clackamas County. 1st authorization - \$500
- Bridge Crossing 4-1462 - Columbia River, near Knappa, Columbia River Highway, Clatsop County. 1st authorization - \$2,000
- Bridge Crossing 4-1463 - Columbia River at Puget Island, Columbia River Highway, Clatsop County. 1st authorization - \$1,000
- Plans- - - - 106-1423 - Enegren Ferry Approach, Coos River Secondary Highway, Coos County. 2nd authorization - \$450
Total to date \$850.
- Plans- - - - 12-1427 - Beech Creek Section, Pendleton-John Day Highway, Grant County. 1st authorization - \$2,000
- Plans- - - - 13-1419 - Buchanan-Drewsey Section, Central Oregon Highway, Harney County. 1st authorization - \$200
- Location - - - 218-1458 - Sprague River-Klamath Falls Jct. Section, Sprague River Hwy., Klamath Co. 2nd authorization - \$700
Total to date \$3,700.
- Quarry - - - - 218-1459 - Sprague River-Klamath Falls Jct. Section, Sprague River Hwy., Klamath Co. 1st authorization - \$300
- Plans - - - - 121-1458 - Lytle Creek Section, Eddyville-Blodgett Highway, Lincoln County. 1st authorization - \$250
- Location - - - 21-1459 - Otis-Kernville Section, Oregon Coast Highway, Lincoln County. 1st authorization - \$350
- Plans - - - - 21-1460 - Spencer Creek Section, Oregon Coast Highway, Lincoln County. 1st authorization - \$1,500
- Plans - - - - 22-1446 - Tombstone Summit Section, Santiam Highway, Linn County. 1st authorization - \$400
- Bridge Crossing 25-1410 - Columbia River, near Paterson, Columbia River Highway, Morrow County. 1st authorization - \$750
- Plans - - - - 26-1457 - Oregon Slough-City Limits Section, Pacific Highway East, Multnomah County. 1st authorization - \$1,000
- Reconnaissance 28-1413 - Columbia River-Madras Section, The Dalles-California Hwy., Sherman County. 2nd authorization - \$1,500
Total to date \$4,500
- Plans - - - - 29-1437 - Hebo Section, Oregon Coast Highway, Tillamook County. 1st authorization - \$150

Plans - - - - 33-1430 - The Dalles-Seufert Section, Columbia River Highway,
Wasco County. 1st authorization - \$250

Location - - - 36-1429 - Sheridan-McMinnville Section, Salmon River Highway,
Yamhill County. 1st authorization - \$ 2,700

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Frank Penepacker, contract No. 2412, for grading the South Unit of the Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County, requested an extension of time from July 31 to September 27, 1941, within which to complete this project. He attributed his failure to complete the project within the specified time limit to unavoidable delays caused by frequent movements of army trucks and the fact that he was not permitted to construct this year the connection between the new highway and the old highway at the south end of the job. The Engineer advised that the troop movements interfered considerably with the progress of the work, and had it not been for such interference, the job could have been done within the specified time, with the exception of about 2,000 cu. yds. of excavation work on the south end of the project to connect the new road with the old road. This connection, he said, cannot be made until the work on the adjoining unit, under contract to Mr. Penepacker and Mr. Clifford Dunn, is finished, which work was delayed on account of negotiations with the Southern Pacific Company for right of way. He further advised that Mr. Penepacker was willing to defer the grading work involved in the completion of the connection on the condition that the Commission would allow the work to be done under the contract for the North Unit and would make a final payment in connection with the South Unit contract. He gave as his thought that such arrangement is satisfactory; however, advised that the Public Roads Administration will not consent thereto because they will not consider that a contract is completed until all the work covered by the specifications has been accomplished. He recommended in view of the circumstances that Mr. Penepacker be granted an extension of time without penalty of sufficient length to complete contract No. 2412 at the earliest possible time next spring, and that the Commission release to Mr. Penepacker as much of the money now due him as is possible without deviating from established practice or policy. The Commission approved the recommendation.

W. D. Miller Construction Company, contract No. 2318, for bridge construction on the Lost River Section of the Klamath Falls-Malin Highway, in Klamath County, requested an extension of time from December 31, 1940, to June 25, 1941, within which to complete this job, attributing its failure to complete the project within the specified time limit to bad weather conditions which would not permit the painting of the structure. The Engineer advised that bids for this project were taken by the Commission on January 11, 1940,

JAN 21 1942

but due to negotiations with the Reclamation Service the contract was not awarded until May 10, 1940. Further, that the time limit for the completion of the job was extended automatically on account of this delay to December 31, 1940. Such delay in the award of the contract, he said, made it necessary to carry on construction during the irrigation season, and delays on that account exceeded the delays incident to the award of the contract. He estimated such delays on this account at approximately two months. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty up to February 28, 1941, but that the contractor be charged with engineering costs incurred by the state between March 1 and May 31, 1941, which he said, is the date the job was actually completed. The Commission approved the recommendation.

R. I. Stuart & Sons, contract No. 2353, for furnishing crushed gravel in stock piles for the Little Butte Creek-Cascade Gorge Section of the Crater Lake Highway and Sams Valley Secondary Highway, in Jackson County, requested an indefinite extension of time within which to complete this project. They attributed their failure to complete the project within the specified time limit to an increase in the quantity of materials to be furnished, as ordered by the Engineer. The Engineer stated that this contract was awarded by the Commission on August 22, 1940, and that the date of completion specified was April 30, 1941. The contractor started operations, he said, October 1, 1940, and completed the same October 16, 1941. He added that the reasons given by the contractor for overrun of time limit are correct, the facts being that they were required to produce 25 per cent more material than was originally contemplated. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Jacobsen-Jensen Company, contract No. 2393, for grading and surfacing the Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah, Washington and Clackamas Counties, requested an extension of time from August 31, 1941, to July 1, 1942, within which to complete this job. It attributed its failure to complete the contract within the specified time limit to the fact that it was engaged in grading runways for the Pendleton Airbase under a government defense contract, which delayed construction of the state's contract until the last week in June, 1941. Weather conditions were satisfactory when the state job was started, but from August on the work was interrupted by rain to such an extent that it was impossible to complete the job this year. The Engineer advised that he has investigated the reasons given by the contractor for failure to complete the project within the specified time limit and has found them to be correct. He also stated that it was impossible for the contractor to secure other equipment due to defense priorities. He recommended, in view of the circumstances,

that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Berke Brothers, contract No. 2435, for grading, paving and construction of a bridge on the Deer Creek-Bellevue Section of the Salmon River Highway, in Yamhill County, requested an extension of time from September 30 to December 3, 1941, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: bad weather conditions in the spring of 1941 and during the summer months, which delayed paving work; failure of a detour road; time required to salvage old pavement which is to be used for riprap work at Sheridan; necessity to stock pile cement aggregate for rewashing; and necessity to perform extra work as ordered by the Engineer. The Engineer advised that the contractor experienced considerable difficulty in securing suitable materials and in repairing the detour road which was damaged by log-hauling traffic. He further stated that rains did interfere somewhat with the progress of the work, but the time lost on that account was not great. The contractor, he said, also suffered delays on account of labor and priorities on equipment due to the fact that all of his labor and equipment were being used at the time on his contract at Sheridan. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Berke Brothers, contract No. 2440, for grading and paving the West Sheridan Section of the Salmon River Highway, in Yamhill County, requested an extension of time from July 31 to December 11, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the following: unusually heavy rains during the spring and summer months; failure of property owners adjacent to the project to prepare their properties in conformity with the highway improvement; delay on account of reconstruction of the city's water pipe lines; delay of approximately five weeks on account of change in specifications which necessitated the use of the old pavement from their Bellevue contract as riprap on the Sheridan project, rather than the use of rock from a borrow pit as specified in the contract, and other reasons. The Engineer advised that the contractor carried on this work without undue delay so far as the grading work and concrete paving work was concerned, considering the difficulties experienced in securing labor and materials. The main reason for failure to complete the project within the specified time limit, he said, was difficulties encountered in securing a blacktop paving plant to complete the blacktop paving work, all available paving plants being tied up on government defense contracts for paving airbases and other government projects. He recommended, in view of the circumstances, that the extension of time requested be granted without

JAN 21 1942

penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Leonard and Slate, contract No. 2446, for grading and surfacing the Dixie Summit Section of the John Day Highway, in Grant County, requested an extension of time from November 30, 1941, to July 15, 1942, within which to complete this job. They alleged that their failure to complete the contract within the specified time limit was due to difficulties encountered in securing repair parts for their tractors, which could not be obtained without priority rating. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. Milne, contract No. 2451, for grading, surfacing and oiling the Long Creek-Fox Section of the Pendleton-John Day Highway, in Grant County, requested an extension of time from August 31, 1941, to June 30, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to unusually heavy rainfall during the summer months, difficulties in securing priority preference rating for repair parts and other supplies, and scarcity of suitable skilled labor. The Engineer advised that the reasons given by the contractor for failure to complete the project on time are correct. He further advised that, with the exception of the oiling work, the project is now practically complete and that all of the rock has been stock piled for the oiling operations which, he said, cannot be performed until next spring when weather conditions will be favorable for such work. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2353, 2433, 2435, and 2501, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2353, with R. I. Stuart & Sons, for furnishing 16,300 cubic yards of crushed gravel in stock

JAN 21 1942

piles on the Little Butte Creek-Cascade Gorge Section of the Crater Lake Highway and Sams Valley Secondary Highway, in Jackson County. Completed October 16, 1941.

Contract No. 2433, with General Construction Company, for grading and roadbed topping on the Tunnel Point-Rooster Rock Section of the Columbia River Highway, in Multnomah County. Completed December 20, 1941.

Contract No. 2435, with Berke Brothers, for grading, paving and construction of a bridge on the Deer Creek-Bellevue Section of the Salmon River Highway, in Yamhill County. Completed December 3, 1941.

Contract No. 2501, with Frank Watt Construction Company, for construction of a bridge over East Dairy Creek near North Plains on the Wolf Creek Highway, in Washington County. Completed November 30, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under discussion the setting of the date for its next regular meeting for receiving of bids, and tentatively decided to hold such meeting on Thursday and Friday, February 19 and 20, 1942. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland.

The Commission considered and signed agreements, et cetera, as follows:

Cooperative agreements with the following cities and towns covering the improvement of certain city streets that are not on state highway routes:

Oregon City	Haines	Prairie City	Echo
Glendale	Rogue River	Huntington	
Fairview	Florence	Heppner	
Fossil	Reedsport	Myrtle Creek	

Agreement with Southern Pacific Company covering installation of automatic grade crossing signals at Grants Pass, Reedsport, and Sheridan.

Agreement with Sunnyhill School District, Coos County, authorizing construction and maintenance on the right of way of the Oregon Coast Highway near Hauser of an entrance gate to the school grounds.

JAN 21 1942

Bargain and sale deed conveying unto the Eugene Power Company 1546 sq. ft. of land situate in Lot 2, Block 34, Amended Plat of Fairmont Addition to Eugene. Right of way file 9242.

Bargain and sale deed conveying unto Evan Lum 3479 sq. ft. of land situate in Lot 3, Block 10, McClures Astoria. Right of way files No. 5867 and No. 9393.

Bargain and sale deed conveying unto the State Board of Higher Education 2.11 acres of land situate in the North half (N $\frac{1}{2}$) of Section 32, Township 17 South, Range 3 West, W. M., Lane County. Right of way file No. 9232.

Stipulation in the case of the United States of America versus O. M. Jetson, et al., by the terms of which the plaintiffs shall pay the sum of \$7,000 for certain lands being acquired from the defendants, which said lands are subject to easements for county roads, and a roadway easement in favor of the Oregon State Highway Commission.

There being no further business to come before the Commission at this time, the meeting was adjourned at 6:00 p. m.

State Highway Engineer

Acting Chairman

Secretary

Commissioner

Portland, Oregon, February 13, 1942

The State Highway Commission met in regular session at 9:00 a. m. in Room 415, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

A delegation from Medford, consisting of the following, appeared before the Commission in regard to the routing of Pacific Highway travel through this city: W. A. Gates who was spokesman, John P. Moffatt, G. W. Field, L. M. Weisenbruger, Glen L. Fabrick, C. C. Furnas, and Frank H. Rogers. Mr. Gates

gave as his understanding that the Highway Commission plans to make the present highway a one-way route for north-bound travel only and to route south-bound travel along Court Street and Central Avenue. Medford business interests, he said, object to the routing of travel along Central Avenue between Second Street and Eleventh Street because it is a narrow street and leads through their most congested district. He suggested that south-bound travel be directed along Central Avenue to Second Street, thence westerly one block to Front Avenue, thence south along Front Avenue to Eleventh Street, thence along Eleventh Street to the junction with the Pacific Highway. Such manner of routing, he said, will help to relieve the congestion between Second Street and Eleventh Street and will permit two-way travel along Central Avenue between these points. He suggested, as an alternate routing for south-bound traffic, the use of Front Street and extensions thereof to a connection with Central Avenue. Open discussion of the matter followed during which the delegation exhibited a map showing results of traffic counts taken over a considerable period of time and disclosing that the point of greatest congestion is on Central Avenue at its intersection with Main Street.

The Engineer advised that the Commission is simply endeavoring to avoid congestion along the Pacific Highway that is bound to occur when the proposed army cantonment is built at Medford. He pointed out that all that is necessary to effect such objective is the construction of the short connecting link at the north end of Court Street which project is to be financed with federal funds. The Public Roads Administration, he added, has already approved the plans for the project and all that is lacking is approval by the army authorities which is a prerequisite for the expenditure of the federal funds. The Highway Commission, he said, is ready to construct the improvement as soon as such army approval has been obtained. He doubted that the Public Roads Administration would approve the project if traffic is routed as suggested by Mr. Gates. He suggested adoption of the proposed plan with the understanding that additional studies would be made of the Front Avenue route and changes made if deemed advisable.

Chairman Cabell confirmed the Engineer's remarks. In reply to a statement from the delegation that the proposed routing will seriously damage certain local business interests, he advised that the Commission sometimes finds it necessary to hurt local interests if the Commission considers the interests of the general public are paramount, although that is avoided if possible. It was his thought that the Central Avenue route is the most logical and would be the cheapest to construct, and advised that the Commission is ready to award a contract for the construction of the connecting link on Court Street at the north city limits as soon as governmental approval has been obtained.

The Commission conferred privately with respect to this matter and, upon return to the conference room, informed the delegation, through Chairman Cabell, that the Commission has decided to adopt the present plan, routing south-bound travel along Court Street and Central Avenue and north-bound travel along Riverside Avenue, the present highway route, each of which streets is to be designated a one-way street; however, has instructed the Engineer to

make further studies of the Front Avenue route, including connections with Central Avenue at Second Street and at Eleventh Street and the plan to extend Front Avenue north and south to connections with Central Avenue. He promised the delegation that the matter would be investigated in good faith and advised that, if one of the alternate plans appears to the Commission to be a better solution of the problem, the Commission will adopt it. He asked the delegation's support in securing the passage of an ordinance by the Medford City Council approving the plan, it being understood, if the Commission later adopts the Front Avenue plan, that the city could feel free to modify its ordinance in conformance therewith. The following resolution pertaining thereto was thereupon adopted by the Commission by unanimous vote:

WHEREAS, Riverside Avenue in the City of Medford has heretofore been selected and designated by the Highway Commission as one of the streets of said City over which to route Pacific Highway traffic; and

WHEREAS, because of increased volume of traffic into and through said City over the Pacific Highway it has become necessary to provide an additional traffic artery; and

WHEREAS, it is the judgment of the Commission that Court Street from the north city boundary of Medford to a connection with Central Avenue and Central Avenue from its junction with Court Street to its junction with Riverside Avenue should be selected and designated as streets of the City of Medford over which to route a portion of the Pacific Highway traffic; and

WHEREAS, it is the opinion of the Commission that the traffic needs of the general public using the Pacific Highway into and through the City of Medford will be best served if each of said streets is made a one-way-traffic street;

THEREFORE, BE IT RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

1. That Court Street from the north city limits to a junction with Central Avenue and Central Avenue from its junction with Court Street to Riverside Avenue be and the said sections of said streets hereby are designated as streets of the City of Medford over which shall be routed Pacific Highway traffic.

2. That Riverside Avenue from the north city limits of Medford to the junction of Riverside Avenue and Central Avenue be designated as a one-way-traffic street and that only north-bound traffic be directed over said highway or street.

3. That Court Street from the north city limits to a junction with Central Avenue and Central Avenue from said junction to the

junction with Riverside Avenue be and said sections of said streets are designated as one-way streets and only south-bound traffic shall be directed thereover.

4. That the municipal authorities of the City of Medford be and said authorities hereby, are respectfully requested to provide by ordinance for the designation of said streets as one-way streets and that traffic over said streets by said ordinance be controlled in harmony with the provisions of this resolution.

5. That Court Street from the north city limits be improved to a connection with the Pacific Highway and that said improvement be put under way at the earliest possible moment so that if possible traffic may be directed thereover during the coming summer.

6. That when this resolution becomes effective and said streets are converted into one-way-traffic streets the Engineer is hereby directed to erect and maintain appropriate and needed traffic-control signals and signs.

7. That until the said connection is made between Court Street and the Pacific Highway, the provisions of this resolution with respect to one-way-traffic movement shall not be in effect, and that if and when the municipal authorities of the City of Medford provide by ordinance for the making of said streets one-way-traffic streets the provisions of said ordinance with respect to one-way traffic movement shall likewise not be in effect until said street extension is completed and made available for traffic.

8. That the Engineer be and he hereby is instructed to immediately make a study and survey in respect to the request of citizens of Medford to determine what, if any, change in routing of traffic can be made on Central Avenue between Second Street and Eleventh Street and report his findings and studies to this Commission.

9. That this resolution be entered in the minutes and records of the Commission as of February thirteenth and a duly certified copy thereof delivered to the Mayor of Medford and a copy to the United States Public Roads Administration.

The Engineer was instructed to make immediate studies of the alternate Front Avenue routing and the Attorney was instructed to forward pertinent information to the City council that would be helpful in preparing an appropriate ordinance approving the present plan.

The Commission also discussed with the delegation the proposed plan to control traffic along the Crater Lake Highway between Medford and the Army

FEB 13 1942

cantonment so as to relieve traffic congestion during the period when construction of the cantonment is underway. The Engineer explained that it is planned to designate the Crater Lake Highway a one-way highway for south-bound traffic only from a point about two miles northeast of Agate Station to an intersection with the McAndrews Road in Medford. From that point to a connection with the Pacific Highway, the road is to be continued as a two-way highway; further, that north-bound traffic will be routed over the old Pacific Highway and Midway County Road from Medford to a connection with the Sams Valley State Secondary Highway. This plan, he said, calls for the designation of the section from Medford to the Wellen Road junction a one-way route for north-bound traffic, but from that point to the Sams Valley Secondary Highway junction, the road will be open for two-way travel. It is contemplated, he said, to put such plan of routing into effect on Sunday, March 1, 1942. The delegation approved such routing of traffic as a temporary expedient during the construction of the cantonment which, it was thought, would be for about four months. The State Highway Commission also approved the plan and ordered the matter covered by an appropriate agreement between Jackson County and the state. The Commission voted unanimously to maintain at state expense the north-bound traffic route during the life of this arrangement. The following resolution covering the entire matter was adopted by the Commission by unanimous vote:

WHEREAS, because of the cantonment under construction in Jackson County, Oregon, and because of other defense activities in said area, vehicular traffic has increased beyond the capacity of the Crater Lake Highway serving said section of the State, and

WHEREAS, because of traffic conditions, additional traffic arteries must be made available in order to relieve at least in a measure the congestion which now exists and will become more acute in the near future; and

WHEREAS, the State by agreement with Jackson County has taken over for a specified period a certain described county road and contemplates maintaining said road for the use of traffic originating in or destined to the said cantonment area, and contemplates likewise the conversion of a section of said county road into a one-way traffic highway, and

WHEREAS, the county road covered by the agreement between the State and Jackson County is described as follows, to-wit: the county road beginning at a junction of the old Pacific Highway Route with the present Pacific Highway near the north city limits of Medford; thence along the old Pacific Highway route to a junction with Bybee County Road, sometimes known as Midway Road; thence northerly along said Bybee Road to the Bybee Bridge over Rogue River; thence westerly and northerly to a connection with the Sams Valley Secondary State Highway No. 271, and

WHEREAS, in the judgment and opinion of the Commission, traffic conditions suggest and warrant the establishment of one-way

traffic over a portion of the Crater Lake Highway to supplement one-way traffic over a part of said county road,

NOW, THEREFORE, be it and it hereby is resolved by the Highway Commission, all members being present and voting affirmatively, as follows:

1. That the section or unit of the Crater Lake Highway which extends from a point approximately two miles northeast of Agate Station to the McAndrews County Road near the North City Limits of Medford, be and said section of said state highway hereby is declared to be a one-way highway and shall be available for southbound traffic only.

2. That the section of said county road which begins at the junction of the old Pacific Highway and the Bybee County Road and terminates at a junction with the Wellen County Road hereby is declared a one-way traffic road and hereby is made available to northbound traffic only.

3. That the State Highway Engineer be and he hereby is directed to place and maintain on said highway necessary and appropriate traffic signs and signals signifying and indicating that said highway is open only to northbound traffic.

4. That this resolution shall be in full force and effect until rescinded or modified by the Commission.

5. That this resolution be entered in the minutes and records of the Highway Commission, and the Secretary be and he hereby is instructed to furnish a certified copy of said resolution to the proper officer in charge of said cantonment, to the Superintendent of State Police, to the County Court of Jackson County, and to the Public Roads Administration.

County Judge Guy Boyington of Clatsop County was present and conferred with the Commission relative to the county's indebtedness to the state for highway purposes. The Engineer advised that the county owes the state a balance of \$5,500 under previous agreements. Judge Boyington stated that the county would like to be relieved from this payment but is not particularly anxious that the records show that it is an outright gift by the state. He suggested that such amount be considered as payment for land that the county has heretofore deeded the state for purposes other than right of way or, if the Commission prefers, that the county pay the state's claim in cash and the state in turn pay it back to the county as payment for the land. Chairman Cabell advised that the Commission would look into the matter and do what it could. It was thereupon referred to the Engineer for investigation and report.

FEB 13 1942

Judge Boyington also brought up for discussion the matter of constructing a new approach road to the beach at Gearhart. He advised that at present there is only one vehicular approach to the beach at this place, that being along Sixth Street, and the city wants this closed to vehicular traffic in the interest of safety to pedestrians, and has asked the county to construct a substitute road near the north city limits but the county hesitates to do so in view of the present war situation and the possibilities that vehicular traffic will be denied the use of the beach. He inquired as to the Commission's attitude with respect thereto. The Commission deferred a decision in the matter pending investigation. Judge Boyington is to be advised as soon as a decision has been reached.

The question whether or not to press the state's claim, in the amount of \$4,024.58, against the City of Beaverton and its claim, in the amount of \$2,522.32, against the City of Vale was also discussed by the Commission. The Engineer advised that the City of Beaverton refuses to pay its claim upon advice from its city attorney that the constitutional limitation has expired and the claim is no longer legal; also, that the City of Vale refuses to pay its claim alleging that the city has a counterclaim against the state for water and gravel. After discussion the Commission referred the matter to the Attorney for advice as to the legal procedure which will have to be followed in order to clean up these accounts.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with amounts that he recommended be paid in connection with each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitively set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED, that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of

the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to institute condemnation proceedings to acquire certain parcels of real property that he has been unable to obtain through negotiations. He submitted a list of such properties together with offers that he recommended in condemnation as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9995	Norval M. Strite, et ux	R/W	\$200.00
9615	Pietro Carnini	R/W	\$2500.00
9622	M. R. Scotti	R/W	\$325.00
9767	R. H. Bunnell	R/W	\$2400.00
9862	Karie Chiako Hirata and Fusako Hirata, minors	R/W	\$80.00

After discussion the Commission approved the request and the offers and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Norval M. Strite and Inez T. Strite, which property is located in the W. H. Gray D. L. C. No. 41, situated in the southwest quarter (SW $\frac{1}{4}$) of Section 28, Township 8 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9995, and which property is being acquired for right of way purposes in connection with the Delaura Beach Road Connection;*

Real property owned by Pietro Carnini and Teresa Carnini, which property is located in Lots 9, 10, and 11, Re-Subdivision of Lot 803 of Enterprise Tracts in the City of Klamath Falls, in Lot 5 of the Re-Subdivision of Lot 803, Enterprise Tracts in the City of Klamath Falls, and in Lots 11 and 12, Block 218, Mills Second Addition to the City of Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2, 3, and 4 and is further identified in the records of the Highway Commission as file R 9615, and which property is being acquired for right of way purposes in connection with the Klamath Falls-Lakeview Highway;*

Real property owned by M. R. Scotti, which property is located in Lots 49 and 50, Block 4, Sixth Street Addition to Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 9622, and which property is being acquired for right of way purposes in connection with the Klamath Falls-Lakeview Highway;*

Real property owned by R. H. Bunnell, which property is located in the southeast quarter (SE $\frac{1}{4}$) of the northeast

FEB 13 1942

quarter (NE $\frac{1}{4}$) of Section 3, Township 39 South, Range 9 East, W. M., Klamath County, Oregon, and in the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 2, Township 39 South, Range 9 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7 and is further identified in the records of the Highway Commission as file R 9767, and which property is being acquired for right of way purposes in connection with the Klamath Falls-Lakeview Highway;*

Real property owned by Marie Chiako Hirata and Fusako Hirata, minors, which property is located in the east half (E $\frac{1}{2}$) of the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 32, Township 1 North, Range 10 East, W. M., Hood River County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 9862, and which property is being acquired for right of way purposes in connection with the Hood River Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions,

as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 21, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

In this connection the Attorney requested instructions relative to the purchase of the P. M. Ross property at North Bend, right of way file No. 9518. He recalled that this is apartment-house property that is needed in connection with the improvement of the Oregon Coast Highway between North Bend and Marshfield, and that the Commission previously authorized condemnation of the property and an offer of \$7,000 in connection therewith which offer was refused. The owner of the property, he said, has now stated a willingness to settle for \$9,000. The Commission considered such amount exorbitant and thereupon instructed the Attorney to proceed with condemnation.

The Attorney reported an offer received from Mr. A. Schweinfurth, Jefferson, Oregon, to lease a 70-acre tract of state-owned property adjacent to the Pacific Highway south of Salem. Mr. Schweinfurth, he said, will pay \$150 annually for this privilege and will construct a fence along the highway at his own cost and expense in order to keep stock off the traveled roadway. The Commission decided not to lease the property because of complications that might arise.

The Commission adjourned at 12:45 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Reconsideration was given by the Commission to the sale of Port Orford Cedar Park, in Curry County, to a chrome mining corporation. The Attorney read aloud the provisions of an agreement between the Commission and the corporation, covering such matter, in which it is agreed that the corporation will pay the state \$2400 for surface rights, and \$10,000 for subsurface or mining rights, the \$10,000 to be paid out of production and to be computed at the rate of thirty-five (35) cents per cubic yard for every yard mined exclusive of overburden or stripping. Payments are to be made at thirty-day intervals until the full amount of the \$10,000 has been paid. The Commission approved such settlement and the form of agreement. (See agreement for details.)

The Attorney presented a letter from the Crown-Zellerbach Corporation, Portland, offering to pay the sum of \$500 annually for lease of moorage rights

along the Willamette River at Oregon City. The Attorney read aloud the provisions of a proposed agreement covering the matter in the event the Commission accepts the offer. The Commission, after discussion, considered the offer acceptable and thereupon approved the form of agreement covering the matter. (See agreement for details.)

Reconsideration was given by the Commission to the sale of certain state-owned property adjacent to the Warm Springs Highway at the Madras overcrossing. The Engineer recalled that two offers were previously received to purchase this land, one from Mr. Howard W. Turner of Madras and the other from the Deschutes Grain and Feed Company of Redmond. He advised that this property is of no special benefit to the state and recommended sale of the same with the understanding that right of access to the highway would be withheld and that provision to that effect would be inserted in the deeds. The Attorney concurred in the recommendation. The Commission approved the recommendation subject to the condition that the property is not desired by any other state department. The Engineer was instructed to circularize such other state departments and report his findings. If the property is not wanted by any state department then the Commission will set a price for sale to the above-mentioned parties.

The Commission discussed and approved the granting of an easement to the United States Navy over and across a portion of the right of way of the Columbia River Highway near Tongue Point Naval Base, in Clatsop County, which property is now being acquired by the government under condemnation proceedings. The easement was thereupon signed.

Chairman Cabell reported briefly on the state's controversy with the Phoenix Iron Works, Portland, with respect to a claim for damages arising out of construction of the Union Avenue viaduct on the Pacific Highway East in front of the Phoenix Iron Works plant. He advised that, at the request of Governor Charles A. Sprague, he intends to give this matter further study and as soon as that is done he will present the matter to the other Commissioners for final action.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

Sale of two pipe lines in John Yeon State Park at Warrendale:—The Parks Superintendent advised that, when this park was purchased by the state, the state also acquired title to two metal pipe lines, one 14 inches in diameter and the other 20 inches in diameter, which were formerly used for conveyance of water in connection with activities of the previous owner. These pipe lines, he said, are about 2200 feet in length and contain approximately 36 tons of steel which is of no value in so far as the parks department is concerned. It was his thought that it would be advisable to sell the pipe in view of the present high price of steel and the need of such material during the present war emergency. After discussion the Commission approved the sale of the material subject to the condition that the pipe cannot be used to advantage by either the road or bridge departments. The parks department is to be credited with the value of the pipe.

Disposal of accumulated junk at Cascadia State Park:-The Parks Superintendent reported an accumulation of scrap iron in the clean up of this park and requested instructions relative to the disposal of the same. He was told to move this material to the state highway shops in Salem for sale along with other scrap materials that have accumulated at that place.

Bradley Park Maintenance:-The Parks Superintendent advised that, as a result of the Commission's recent order to reduce maintenance costs in state parks, the services of the caretaker at Bradley Park have been dispensed with so there no longer is any state activity at this place. He inquired whether or not some provision should be made for maintenance of the restroom facilities which are now closed. He estimated the total saving to the state to be \$1,780 annually by dispensing with the services of the caretaker. The Commission decided not to reinstate the caretaker at this park nor to maintain the restroom facilities unless complaints are received.

The Secretary presented a report from the Department of State Police with respect to a traffic law violation committed by the Oregon Nevada California Fast Freight, Inc., involving the transportation of a gross load of 73,230 pounds on a truck and trailer, being 19,230 pounds in excess of that permitted by the Oregon statutes. It appears that the company was engaged in hauling general freight from California to Klamath Falls, when observed by the arresting officer, and, instead of breaking up the hauling units at the state line to comply with the Oregon statutory weight provisions, continued on into the State of Oregon with the overload on the chance that it would not be observed by the state police, it being apparent that the violation was intentional. It also appears that this company is an habitual violator of the laws in this respect. The Secretary was instructed to write the company to the effect that, if the company is desirous of having the assistance of the Oregon State Highway Commission in securing a modification of the present law so as to permit transportation over Oregon highways of loads 60 feet long and weighing 68,000 pounds, the company must cooperate by complying with the rules and regulations, otherwise the Highway Commission will not permit the granting of any special concession to the company and will order them off the Oregon highways with loads that do not strictly meet the Oregon requirements.

The Engineer brought up for discussion the matter of tire purchases for highway department equipment, particularly a letter from Mr. Ben W. Lewis, Price Executive of the Rubber and Rubber Products Section of the Office of the Price Administrator, Washington, D. C., outlining a plan for rationing tires and tubes to prevent delays in essential service. He explained the details of the plan outlined in Mr. Lewis's letter and read aloud the questions contained therein and his proposed answers thereto. The matter was discussed at considerable length during which the Commission approved the Engineer's letter of reply. (See letter of February 13, 1942, for details.)

The Attorney presented a status report with respect to his investigations concerning damage that occurred to The Dalles-California Highway by reason of failure of a dike situate adjacent thereto in the vicinity of Algoma,

Klamath County. He recited the history of this case and pointed out that it cost the state \$50,000 to repair the damage caused by the flood. The dike, he said, was constructed and owned by the Southern Pacific Company, the Central Pacific Railway Company, and the California-Oregon Power Company, and in his estimation the state is not liable for any of the damage that occurred to the adjacent private property and has good cause for suit of action against the owners of the dike to recover the cost of the highway repairs. He requested instructions. After discussion the Commission decided to start suit to recover the cost of the highway repairs and so ordered. This suit is to be separate and distinct from the suits of the private property owners which are now under way. The Commission considered it inadvisable to join in the other action.

A letter was presented from the County Court of Josephine County requesting the designation as a state secondary highway of the county road known as the Merlin Market Road, and the Merlin Cut-off, so as to form a loop with the Lower River Road out of Grants Pass; also requesting the oiling of the Merlin Road Section thereof. The Engineer recommended, in view of the stringency of the times, that the request be denied and that, as a matter of policy during the present war emergency, no additional roads be added to the state highway system unless they are of an emergency nature. The Commission approved the recommendation.

The Engineer reported the cost to oil the shoulders adjacent to the highway pavement through the town of Garibaldi, Tillamook County, which work was heretofore requested by the Garibaldi Civic Club. He estimated such cost at \$2,000 and recommended that the work be not done at the present time so as to conserve the funds for other uses of more importance. The Commission approved the recommendation, subject to review later in the year. In this connection the Engineer also recommended that the Commission do not approve minor betterment projects of this nature during the present war emergency unless they are of an exceptional or unusual nature. The Commission deferred a definite decision in this matter until next summer.

The Engineer requested approval of the following federal aid survey projects for 1942 in order to take up the federal funds which have been provided specifically for financing of surveys:

	<u>Mileage</u>	<u>Estimated Cost</u>
Cascade Locks-Viento	12	\$12,500
Viento-Hood River	8	8,000
Mosier-The Dalles	17	17,000
Washburn-North Plains	11	11,000
Chemult-Chiloquin	52	51,200
Walker-Rice Hill	28	28,000
McMinnville-Valley Junction	18	18,000
Tillamook-Pleasant Valley	10	8,000
Green Station-Canyonville	25	25,000
Arlington-Boardman	26	15,500
Monmouth-Corvallis	22	20,000
Total -		\$194,200

He explained that the Commission previously authorized surveys for the improvement of the Upper Columbia River Highway between Cascade Locks and The Dalles; Wilson River Highway between Washburn and North Plains; the Pacific Highway West between Monmouth and Corvallis; and for the Pacific Highway between Walker and Rice Hill and between Green Station and Canyonville; and, under such authority, requests have already been presented to the Public Roads Administration for approval of these surveys as federal aid projects although such approval has not as yet been obtained. The Commission decided not to authorize the additional projects at this time, it being considered advisable to wait until the governmental authorities have passed on the projects previously presented.

The Attorney reported briefly on the matter of acquisition of right of way needed for the improvement of the Oregon Coast Highway through the town of Gold Beach, Curry County, but no action thereon was taken by the Commission.

A letter was presented from Swift and Company, Portland, in which the Commission was asked to give consideration to the widening of the Swift Secondary Highway between the livestock exposition building and the railroad bridge west of the Swift and Company plant so as to provide four lanes for the increasing amount of traffic that this road carries. The Engineer estimated that it would cost about \$25,000 to improve this road as requested. The Commission acknowledged that this is a meritorious project but decided in view of the war emergency and scarcity of funds not to do the work at this time unless the army authorities request it.

A letter was presented from Mr. Theodore R. Conn, attorney, Lakeview, in behalf of Lake County School District No. 7, in which the Commission was asked to construct sidewalks or footpaths along the Fremont and Klamath Falls-Lakeview Highways for a distance of one mile south and west of the city limits of Lakeview for the benefit of school children who live outside of the city limits and are obliged to walk to the schools in Lakeview. The Engineer estimated that it would cost about \$1,000 to build two miles of sidewalk four feet wide adjacent to the shoulders of the highway and that it would cost about \$1,200 to build such a sidewalk at the right of way line. In this connection the Commission discussed the establishment of a policy with respect to sidewalk construction during the present war emergency and decided to defer all such projects, notwithstanding that they may have previously been approved, for the duration of the war. The request of Lake County School District No. 7 was thereupon denied. The Secretary was instructed to reply to all requests received for such projects that the Commission has found it necessary on account of the war situation to defer expenditures for projects of this nature, and is concentrating its efforts on projects desired by the army and also on the maintenance of the highway system in the interests of national defense and the general traveling public.

The Engineer brought up for discussion the matter of oiling the Terrebonne-Lower Bridge County Road, in Deschutes County. He explained for the benefit of Chairman Cabell the action taken by the Commission at the previous meeting whereby the Commission agreed to oil this road, spending state funds for the same, if the county would complete the grading and surface the

road; and the Commission also agreed to spend on some other county road in Deschutes County an amount equal to that budgeted for surfacing the Terrebonne-Lower Bridge Road. Chairman Cabell approved the action taken by Commissioners Clough and Oliver on this matter.

The Commission had under discussion the matter of revising the secondary highways in Northeast Portland, particularly Lombard Street Secondary Highway east of Union Avenue, Northeast Portland Secondary Highway, and Northeast 82nd Street Section of the Cascade Secondary Highway. The Engineer pointed out that Lombard Street west of Union Avenue is now being maintained by the state as a state highway route although it has not been designated a state secondary highway; also that Lombard Street has been designated as a state secondary highway east from Union Avenue to a connection with Columbia Boulevard; and that Northeast Portland Secondary Highway now extends along the southerly side of the Union Pacific railway from a junction with the Lombard Street Secondary Highway to a connection with Sandy Boulevard (Columbia River Hwy); and that 82nd Street Secondary Highway now terminates at Sandy Boulevard. It was his thought that that portion of Lombard Secondary Highway which lies east of the junction with Northeast Portland Secondary Highway should be removed from the state secondary system, and that Cascade (82nd Street) Secondary Highway should be extended northerly from its terminus at Sandy Boulevard to Killingsworth Avenue and he so recommended. The Commission considered that such changes are to the state's advantage and are in conformity with previous understanding with the Board of County Commissioners of Multnomah County and thereupon approved the same. The following resolutions with respect thereto were adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts or boards of county commissioners of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary State highways, which highways shall be selected from the market roads or other county roads, city streets, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Board of County Commissioners of Multnomah County of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Lombard Street Secondary Highway No. 121, and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Board of County Commissioners of Multnomah County of the State of Oregon, to eliminate and remove from the system of secondary State highways, under the provisions of Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Laws of 1939; the hereinafter described section of the Lombard Street Secondary Highway No. 121, and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the Board of County Commissioners of Multnomah

County of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Lombard Street Secondary Highway No. 121 shall, under the provisions of the laws of Oregon, become a county road or city street, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the Board of County Commissioners of Multnomah County or the city authorities of Portland;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described section of the Lombard Street Secondary State Highway No. 121 is hereby eliminated and removed from the secondary State highway system, to wit:

A Section of the Lombard Street Secondary Highway No. 121:

Beginning at the intersection of Northeast Lombard Street with Northeast 10th Avenue; thence east to the intersection of Northeast Lombard Street with Columbia Boulevard; a distance of 0.397 miles.

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall become a county road or city street, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the Board of County Commissioners of Multnomah County or the city authorities of Portland, as provided by law.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the Board of County Commissioners of Multnomah County.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts or board of county commissioners of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary State highways, which highways shall be selected from the market roads or other county roads, or city streets, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Board of County Commissioners of Multnomah County of the State of Oregon, has selected the road, highway or city street hereinafter named, and it is the purpose of the Commission to officially

FEB 13 1942

and regularly designate and adopt said road, highway or city street as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, city street, route, or location of a highway in Multnomah County be and the said market road, county road, highway, city street, location, or route, hereby is selected, designated, established, adopted and approved as a secondary State highway and shall be and hereby is designated as a part of the secondary State highway system, to wit:

An Extension of the Cascade Secondary Highway No. 160:

Beginning at the intersection of Northeast Sandy Boulevard with Northeast 82nd Avenue; thence north to the intersection of Northeast 82nd Avenue with Northeast Killingsworth Street; a distance of 0.706 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the Board of County Commissioners of Multnomah County.

The Engineer reported that on January 24, 1942, in conformance with authority previously granted him by the Commission, he awarded the contract for the construction of an undercrossing structure at the south end of the Umatilla Ordnance Depot, Umatilla County, to F. R. Hewett who submitted the low bid therefor on January 21, 1942, the conditions of the award having been satisfied. The Commission confirmed the award of this contract.

The Commission discussed and denied as a matter of policy a request from the Willamina Commercial Club for permission to install city markers on the right of way of the Salmon River Highway, a short distance outside of the city boundary lines, at the east and west entrances into Willamina.

The Secretary presented resolutions, as follows, from the County Courts of Washington County and Umatilla County, with respect to portions of state highways that have been abandoned by the State Highway Commission as a result of reconstruction of the highways on other alignment:

Resolution from Washington County retaining portions of the Pacific Highway West through the town of Tigard as a county road;

Resolution from Umatilla County assuming jurisdiction over the old Pendleton Airport Highway.

The Commission approved the resolutions and ordered them filed.

The Commission discussed a proposed agreement with the Kinzua Pine Mills Company covering construction by the company of a logging road across the Heppner-Spray Secondary Highway, in Wheeler County. The Engineer recalled that the Commission some time ago approved such crossing and that the agreement is simply to cover the arrangements in writing. The Commission confirmed the previous action and thereupon signed the agreement.

The Attorney reported briefly on the state's claim against a Mr. Tom Bailey, Diamond, Oregon, for the theft of highway culvert pipe, but action thereon was deferred pending information from the District Attorney of Harney County.

Consideration was given by the Commission to the claim of Mrs. Swan Bokvist for reimbursement for the value of certain personal property that was destroyed by fire started by highway department employees. It appears that Mr. and Mrs. Bokvist were traveling along the Klamath Falls-Lakeview Highway enroute from Sprague River to Klamath Falls and were obliged to pass a point where a highway maintenance crew was burning an accumulation of brush on the highway right of way and that, after driving several miles past this point, their attention was called to a fire in their trailer which could not be put out until it had burned a considerable portion of the load carried thereon, consisting principally of personal belongings. Mr. and Mrs. Bokvist allege that the fire was started by sparks from the highway crew's operations and in view thereof feel that they should be reimbursed by the state for their loss, amounting to \$300.00. The Engineer stated that there is some question whether or not the trailer fire was caused by sparks from the highway crew's burning operations in view of the fact that it was not discovered until the Bokvists had traveled some ten miles or so beyond the point where the highway crew was working, and because the fire could have been started by a carelessly-thrown cigarette stub. However, there is no way that it can be definitely proven that the fire started from any particular source. It appeared to the Commission from the evidence at hand that the state's burning operations very likely caused the fire and in view thereof the Commission authorized settlement with Mrs. Bokvist for \$150, being 50 per cent of the amount of the claim. The Commission refused to pay the full amount of the claim because of the impossibility of checking the damage.

The Commission discussed briefly the question whether or not to contribute funds toward the cost of conducting the KOAC "Oregon on Parade" radio program during 1942 but deferred its decision until the next meeting when the accomplishments of the program conducted in 1941 are to be reviewed.

The Engineer reported briefly the results of an investigation that was made of the suggestion offered by Mr. A. M. Collier, Klamath Falls, that a parting strip 14 feet wide be provided down the center of South Sixth Street, Klamath Falls, when the improvement of the street is undertaken. He recalled that he reported to the Commission at the previous meeting that a parting strip of such width could not be provided without acquiring additional right of way and without introducing two bad reverse turns at each end of the project. However, subsequent investigation reveals that it would be possible to provide a parting strip ten feet wide with a five-foot sidewalk on each side of the highway without additional right of way, and that it would be possible to ease off the curves at each end of the project so they would not be objectionable. Such information, he said, has been conveyed to Mr. Collier who has approved the same. The Commission approved the report.

The Commission by unanimous vote adopted the following resolution with respect to the defalcations of a former employee by the name of W. L. Moorman, exonerating liability of State Highway Engineer R. H. Baldock:

WHEREAS, one Wilbur L. Moorman while in the employ of the State Highway Department committed a series of forgeries and irregularities which extended over a period of ten and one-half years, commencing in April 1927, and ending in October, 1937, the date of the discovery by the department of said defalcation; and

WHEREAS, the total amount of funds involved in the said forgeries was the sum of \$8,017.76, of which amount the State recovered from companies with which the State carried protection by way of forgery bonds the sum of \$6,001.29, leaving unrecovered the sum of \$2,016.47, which represents the State's loss by reason of said forgeries; and

WHEREAS, said irregularities and forgeries were committed in connection with funds disbursed by the Engineer out of an account established and maintained in Ladd & Bush Bank pursuant to law, which account was known as the pay roll account; and

WHEREAS, said forgeries were accomplished by said employe by carrying on the pay roll for indefinite periods fictitious or dummy persons and then forging on time statements the name of an employe whose signature was required by Mr. Baldock and on the genuineness of whose signature Mr. Baldock would draw a check against the pay roll account payable to the person whose name appeared in the time statement and which check would be mailed to the payee at the address designated in the time statement or check; and

WHEREAS, the pay roll account or deposit maintained by the Engineer as by law required was maintained in Ladd & Bush Bank, Salem, against which account all pay roll checks were drawn; and

WHEREAS, by means of the plan and scheme of said defaulting employe all checks drawn payable to said fictitious or dummy persons

in due course came into the possession of said guilty employe and were cashed by him some times at Ladd & Bush Bank, but quite often they were cashed at places of business outside of the City of Salem; and

WHEREAS, said forgeries were all forgeries of an endorser and none were forgeries of the name of the drawer or depositor and all were committed by an employe working under the depositor; and

WHEREAS, the Commission has been advised that all losses sustained during the tenure in office of R. H. Baldock have been paid by bonding companies with which the State carried protection and said counsel has advised further that R. H. Baldock is not liable for losses sustained prior to his appointment as State Highway Engineer;

THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively as follows:

1. That, based upon the record and upon all material facts and circumstances connected with the forgeries and irregularities of Wilbur L. Moorman and upon the advice of the Commission's Chief Counsel, it is the considered judgment of the Commission that the outcome or result of litigation against Ladd & Bush Bank for the recovery of losses sustained by the State through the irregularities and forgeries of said guilty employe, which recovery would be confined to losses occurring between the years 1927 and 1930, but not discovered until October, 1937, is so uncertain and so doubtful as to make the prosecution of any such litigation quite unwise and, therefore, it is the decision of this Commission that no litigation against Ladd & Bush Bank shall be instituted;

2. That R. H. Baldock be exonerated of any liability for losses occurring prior to his appointment as State Highway Engineer, the date of which appointment was February, 1932; and

3. That this resolution be spread upon the minute records of the Commission and H. B. Glaisyer, the Commission's Secretary, be and he is directed to deliver to the State Auditor, the Honorable Earl Snell, Secretary of State, a duly certified copy thereof.

The Commission discussed the appointment of a State Highway Engineer, Assistant State Highway Engineer, Attorney, and Secretary in view of the fact that the terms of the present incumbents of those positions expire on March 1, 1942. Motion was made by Commissioner Oliver that R. H. Baldock be reappointed as State Highway Engineer, that C. B. McCullough be reappointed as Assistant State Highway Engineer, that J. M. Devers be reappointed as Attorney, and that H. B. Glaisyer be reappointed as Secretary for four-year terms, commencing

FEB 13 1942

March 1, 1942, unless terminated sooner by the Commission. The motion was duly seconded by Commissioner Clough and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Engineer reported an urgent request from the Public Roads Administration for his attendance at a meeting in San Francisco, California, on Monday and Tuesday, February 16 and 17, 1942, with representatives of the Fourth Air Force and the Public Roads Administration for a discussion of construction and operation of airplane flight strips along state highways. The Commission authorized him to attend such meeting at state expense if that meets with the approval of Governor Charles A. Sprague.

The Engineer reported the need to acquire additional right of way 50 feet wide along the east side of Front Avenue, Portland, between Clay Street and Montgomery Street, so as to provide access to certain South Portland industries which are now served by traffic over the private roadway facilities of the Southern Pacific Company. The Southern Pacific Company, he said, objects to such use of its private roadway inasmuch as it interferes with the railroad company's use of its property, so it is necessary to provide another way for this traffic. This matter, he said, has been investigated and a plan has been devised that appears to be satisfactory to the railroad company and to the City of Portland, which plan provides for the closing of the Harrison Street, Mills Street and Market Street connections on both sides of Front Avenue, and for the closing of the Montgomery Street connection on the west side of Front Avenue, and necessitates the acquisition of a 50-foot strip of extra right of way for a distance of three blocks on the east side of Front Avenue. He estimated the cost of such extra right of way at \$7,800 and recommended approval of the plan and the purchase of the property at such figure. After discussion the Commission approved the arrangement and by unanimous vote authorized the purchase of the extra right of way.

The Engineer requested authority to advertise for bids for improvement of certain city streets that are not on state highway routes. He recalled that the Commission previously authorized an expenditure of state funds for such purpose in cities and towns of 250 population or more provided that such cities and towns would enter into written agreements with the state covering the work. He further stated that agreements with most of the cities and towns have been executed and the projects are ready to go forward as soon as the Commission gives its approval. The Commission authorized the contracting of such projects on condition that the agreements have been signed.

Consideration was given by the Commission to a request from a Mr. Wesley Ober for reinstatement of his log-hauling permit heretofore cancelled for failure on his part to voluntarily surrender his PUC plates on two trucks which were weighed and found to be overloaded. The Secretary explained that two of Mr. Ober's trucks were weighed on February 2, 1942, and were found to be carrying loads weighing in excess of the statutory limits, that the drivers were notified of the overloads and were given an opportunity to voluntarily surrender their plates within 24 hours; also that the plates were not delivered within the specified time and the Public Utilities Commissioner was requested

to cancel the permits in conformity with the established policy of the Highway Commission. He said that had Mr. Ober surrendered the plates within the 24-hour period his penalty would simply have consisted of temporary suspension of the plates for four days. It was also explained that the case is further involved in that when Mr. Ober's PUC plates were actually taken up by the State Police it was found that his trucks were not properly licensed and that he was operating them under temporary license stickers issued for private automobiles. After discussion, during which it was pointed out that Mr. Ober's trucks have been out of operation for ten days which is really a week longer than would have been necessary had he complied with the regulations, the Commission decided unanimously to reinstate the permit under the condition that Mr. Ober will submit evidence that his trucks are properly licensed. The Secretary was instructed to convey such information to Mr. Ober and to warn him that the Commission may take more drastic measures in the event that reports are received of further violations by him.

A letter was presented from the Tillamook Air-Raid Precaution Committee, Rockaway, Oregon, in which the Commission was requested to take action as may be necessary to prohibit open beach fires on beach areas during the present war situation and suggesting the erection of signs on the beaches prohibiting such fires. The Commission approved the suggestion and authorized the placing of the signs after the matter has been discussed with Mr. Jerrold Owen, Coordinator, Oregon State Defense Council. The Engineer was instructed to discuss the matter with Mr. Owen.

The Commission discussed briefly and ordered filed a letter from Mr. A. B. Sanders, Executive Secretary, Oregon Coast Highway Association, quoting in part a resolution adopted by the Board of Directors of such association in which suggestion is made that the Highway Commission authorize surveys, preparation of plans, et cetera, as may be necessary for a major program of highway construction that will assist in taking up some of the slack in employment that it is anticipated will occur during the post-war period.

The Secretary presented a letter from the Balsiger Motor Company, Klamath Falls, requesting authority to operate over Oregon highways, from the California state line to Klamath Falls, truck and trailer equipment having a gross weight of 68,000 pounds, in the transportation of motor-vehicle fuels and domestic-burning fuel for use in the Klamath Falls area. It asked this authority so as to avoid the necessity to break up its truck and trailer units in order to comply with the dimensions and weights that are specified in the Oregon statutes. The Commission denied the request for the reason that it is not prepared to make a decision in this controversial question at the present time.

The Commission discussed a letter from C. R. Moore, Colonel, Corps of Engineers, and District Engineer for the Portland District of the United States War Department, with respect to the construction of access roads to the proposed Medford and Corvallis cantonments. Colonel Moore outlined his understanding of the arrangement agreed upon among the State Highway Engineer and other representatives of the State Highway Department and representatives of

the Public Roads Administration at a previous conference in his office when it was decided that the access road to the Medford cantonment should be constructed with concrete pavement, two lanes wide, at an estimated cost of \$672,000 of which amount \$100,000 would be contributed by the State Highway Commission; and that the access road for the Corvallis cantonment should consist of widening and re-locating a portion of U. S. Route 99W, between Corvallis and Monmouth, at a cost of \$715,000 of which amount the State Highway Commission would contribute \$100,000. He further stated that he has recommended these improvements to his superiors on the above basis. The State Highway Engineer advised that Colonel Moore's understanding of the matter coincides with his exactly. The Commission thereupon approved the arrangement as to plans and financing, thus confirming telegraphic approval heretofore given.

The Commission discussed briefly and ordered filed a statement from the Office of Emergency Management, Seattle, Washington, transmitted through W. H. Lynch, District Engineer, Public Roads Administration, with respect to the dissemination of information relative to the letting of procurement contracts and similar matters.

The Commission discussed the following requests for extensions of time within which to complete highway construction projects:

Cochran and Gatton, contract No. 2311, for grading the Warm Springs River Section of the Warm Springs Highway, in Wasco County, requested an extension of time, from October 31, 1940, to September 19, 1941, within which to complete this job. They gave no reasons for failure to complete the project within the specified time limit. The Engineer advised that the contractors worked continuously on the project except between December 14, 1940, and March 10, 1941, when extremely bad weather was encountered, and made an honest effort to complete the project within the shortest possible time, however, were handicapped by conditions beyond their control. He further stated that the materials moved overran the estimated quantity by three per cent; also, that the delay in completing the project has not interfered with any use of the road nor has it caused any loss to the state other than a small extra engineering expense totaling \$139.15. He recommended in view of the circumstances that the extension of time requested be granted without penalty, notwithstanding that the Public Roads Administration is of the opinion that the penalty should be assessed except during the period, December 14, 1940, to March 10, 1941, when the work was held up on account of bad weather conditions. The Commission approved the recommendation.

Sam Orino, contract No. 2409, for grading, surfacing and construction of retaining wall on the Depoe Bay Section of the Oregon Coast Highway, in Lincoln County, requested an extension of time, from August 31 to December 23, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties encountered in surfacing the entrance road to the Depoe Bay schoolhouse. The Engineer advised that the contract was

awarded on January 10, 1941, and work was started on January 15, 1941, but was not completed until December 23, 1941, due mainly to the fact that the contractor did not have sufficient equipment and men employed to complete the clearing and grading work until late in the summer. The surfacing work, he said, was delayed because the contractor was unable to secure a sufficient supply of surfacing materials from a small commercial plant located several miles south of the job with which he had arranged to secure such materials. It was his thought that the facts contributing to the delay are sufficient reason for the granting of the extension of time without penalty and he so recommended. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

C. E. Oneal, contract No. 2463, for grading, surfacing and construction of bituminous macadam on the Pendleton Airport Section of the Airport Secondary Highway, in Umatilla County, requested an extension of time of 60 days, from August 15 to October 15, 1941, within which to complete this job. He alleged that his failure to complete the contract within the specified time limit was due to the following reasons: delays occasioned by construction of water mains by the City of Pendleton; extra work in hauling materials for the United States Army Cantonment parking area not included in the original contract; use of rock materials from excavations to construct topping course requiring excessive amount of overhaul and backhaul; and difficulties in securing necessary materials, supplies and repair parts for equipment. He also alleged that the oiling work was delayed because of adverse weather conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Averill & Corbin, contract No. 2479, for construction of a bridge over Rock Creek on the John Day Highway, in Grant County, requested an extension of time, from November 30 to December 24, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to their inability to secure necessary labor when needed. The Engineer advised that the work done by the contractors subsequent to December 17 consisted of riprapping a roadway embankment and covering the lining of an irrigation canal which items were not included in the original contract. It was his thought that the contractor should have completed the remaining work within the specified time limit. He recommended in view thereof that the extension of time requested be granted subject to the condition that the contractor be required to reimburse the state for extra engineering expense incurred between November 30 and December 17, with no penalty being assessed for the period December 17 to December 24, 1941, when they were performing the extra work. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Rogers Construction Company, contract No. 2480, for grading, surfacing and oiling the Dee-Woodworth Acres Section of the Hood River Secondary Highway, in Hood River County, requested an extension of time, from October 15 to December 27, 1941, within which to complete this job. It attributed its failure to complete the project within the specified time limit to difficulties experienced in securing spring bracket guardrail for guard fence construction which is the only part of the work that was not completed within the specified time limit. The Engineer advised that the reason given by the contractor for failure to complete the project on time is correct, that the contractor was unable to purchase the guardrail through the regular channels and was eventually supplied from the highway department's stock. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2311, 2409, 2440, 2463, 2479, 2480, 2518, 2523 and 2533, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2311, with Cochran & Gatton, for grading on the Warm Springs River Section of the Warm Springs Secondary Highway in Wasco County. Completed September 19, 1941.

Contract No. 2409, with Sam Orino, for grading and bituminous macadam surfacing and construction of a retaining wall on the Depoe Bay Section of the Oregon Coast Highway in Lincoln County. Completed December 23, 1941.

Contract No. 2440, with Berke Bros., for grading and paving on the West Sheridan Section of the Salmon River Highway in Yamhill County. Completed December 11, 1941.

Contract No. 2463, with C. E. Oneal, for grading, surfacing and bituminous macadam on the Pendleton-Airport Highway Section of the Airport Secondary Highway in Umatilla County. Completed October 11, 1941.

Contract No. 2479, with Averill and Corbin, for construction of an 80-foot reinforced concrete viaduct and 0.046 mile of highway roadbed, on the Rock Creek Section of the John Day Highway in Grant County. Completed December 24, 1941.

Contract No. 2480, with Rogers Construction Company, for grading, surfacing and oiling the Dee-Woodworth Acres Section of the Hood River Secondary Highway in Hood River County. Completed December 27, 1941.

Contract No. 2518, with A. S. Wallace, for the Swisshome Rock Production Project on the Siuslaw and Alsea-Deadwood Highways in Lane County. Completed February 7, 1942.

Contract No. 2523, with F. R. Hewett, for the Condon-Servicecreek Rock Production Project on the John Day Highway in Gilliam and Wheeler Counties. Completed January 2, 1942.

Contract No. 2533, with the Shipyard Wood Company, for wrecking and removing two buildings located at 101 S. E. Union Avenue, East Portland, in Multnomah County. Completed January 24, 1942.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Southern Pacific Company covering grant of easement to the state for highway purposes over two parcels of land along the right of way of the Southern Pacific Company's tracks near Monroe, Oregon.

Agreement with Coos Electric Cooperative, Inc., being an application for the purchase of electrical energy for use in connection with lighting a maintenance station near Remote, Oregon.

Agreement with Katherine Helen Jones, et al, covering the purchase of certain real property at Eugene for which the state is paying the sum of \$11,075.00.

Agreement with Kinzua Pine Mills Company covering the construction of the company's logging road across the Heppner-Spray Secondary Highway, in Section 35, Township 6 South, Range 25 East, W. M. Wheeler County.

Agreement with Hoke Smith covering the lease of certain state-owned property which was purchased for use as right of way for the reconstruction of the Pacific Highway between Eugene and Springfield. Right of way file No. 92460.

FEB 13 1942

Agreement with Fisher Brothers, contractors, for use of the state-owned quarry, known as Hjorteland quarry, in connection with their contract with the federal government in the construction of the Camp Clatsop-Fort Stevens Highway, near Astoria.

Agreement with Crown-Zellerbach Corporation covering lease to the corporation of certain riparian rights on the east bank of the Willamette River, in Oregon City, Oregon.

Agreements with the following cities and towns covering improvement of certain city streets that are not on state highway routes:

John Day	Lebanon
Hubbard	Richland
Lafayette	Roseburg
Walla	Walla

Easement granting to the United States Navy the use of a portion of the right of way of the Columbia River Highway (old route) in connection with the development of the Tongue Point Naval Base near Astoria.

Quitclaim deed conveying unto the Wallowa Sheep and Land Company the NW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 26, Township 2 North, Range 41 East, W. M., Wallowa County, which property was deeded to the state by mistake along with other property in this vicinity. Right of way file No. P35.

Bargain and sale deed conveying unto Mary Palandri an undivided four-tenths interest in and to Lot 5, Block 1, Caruthers Addition to the City of Portland. Right of way files No. R8650 and No. R9089.

The Commission adjourned at 5:30 p. m. and reconvened at 8:00 p. m. in the home of Chairman Cabell, with all Commissioners, the Engineer and the Attorney present.

The Commission discussed the matter of granting permits for the operation over Oregon highways of freight-hauling equipment having an overall length of 60 feet and a gross weight of 68,000 pounds, which movements are legal in the bordering states but are illegal in Oregon. The Engineer advised that investigation reveals that a real transportation emergency exists due to war-time conditions, which have necessitated the curtailment of ocean shipping, and a corresponding increase in shipping by rail and trucks. The railroads, he said, are handicapped by a shortage of locomotives and cars, and the trucking industry is handicapped by a shortage of trucks, which seriously affects the transportation problem in this state. The situation could be relieved, he said, if the trucking industry were permitted to operate in Oregon, during this war emergency, equipment that meets the legal requirements of the adjoining states. This matter was discussed at considerable length and it was the Commission's decision that relief should be granted if that meets with the approval

of Governor Charles A. Sprague. The following resolution with respect thereto was adopted by the Commission by unanimous vote with the understanding that it shall not become effective unless and until the Governor's approval has been obtained: (See letter from Governor Sprague, dated February 25, 1942)

WHEREAS, because of the movement of large quantities of defense materials and because of other conditions and imposed inhibitions made necessary by and for national defense there exists a real emergency in the transportation systems of the State of Oregon, both with respect to transportation by rail and transportation by motor vehicle; and

WHEREAS, such emergency is increased by reason of the fact that under the laws of the State of Oregon the normal and usual movement of property by motor vehicle over the public highways of the State is limited to a combined weight of vehicle and load or vehicles and load of not to exceed 54,000 pounds and to an overall length of not to exceed fifty feet; and

WHEREAS, most of the defense materials moved by motor vehicle through or into the State of Oregon move in interstate commerce between the states of Oregon, California, Washington, Nevada and Idaho; and

WHEREAS, in each of said states except Oregon motor vehicles are permitted by law to operate over the public highways carrying a combined weight of vehicle and load or vehicles and load of not to exceed 68,000 pounds and having an overall length of not to exceed sixty feet; and

WHEREAS, if the laws of the State of Oregon with respect to the normal movement of commodities under normal conditions are rigidly applied to motor vehicles entering the State of Oregon from the State of Washington, the State of Idaho, the State of Nevada or the State of California a bottleneck will be created and the transportation of defense materials by motor vehicle will be seriously impaired; and

WHEREAS, His Excellency Governor Sprague has been very urgently requested by carriers of property by motor vehicle, by shippers, by representatives of the United States Army and the United States Navy and by representatives of the Division of Motor Transport, Office of Defense Transportation, to work out some method or procedure by which motor vehicles operating in the transportation of property over the public highways of the State of Oregon and those motor carriers which may enter the State from adjoining states may travel within Oregon over certain public highways of the state with an overall length of vehicle not in excess of sixty feet and with respect to which vehicle the combined weight of vehicle and load or vehicles and load shall not exceed 68,000 pounds; and

FEB 13 1942

WHEREAS, the Governor has transmitted to the Highway Commission and to the Public Utilities Commissioner the said requirements and requests and has recommended that a study be made by the said two state agencies for the purpose of determining what, if anything, can be done to facilitate the movement of defense materials; and

WHEREAS, after consultation, it is the opinion of the Public Utilities Commissioner and of the State Highway Commission that by cooperative effort the laws of the State can be properly and efficiently administered and enforced, and at the same time the interests of national defense be given appropriate consideration and the congestion which prevails with respect to the movement of civilian goods relieved to a considerable extent; and

WHEREAS, Section 115-393, O. C. L. A., vests in the Highway Commission authority to issue a permit or permits for the movement over the public highways of the State of any vehicle, article or property having a combined weight in excess of that permitted under the provisions and the laws of the State or having a size not permitted by law if after investigation and examination the Commission shall find that the movement of such vehicle or property is in the interest of the public or that the public will be served thereby; and

WHEREAS, the Commission has caused an examination and inspection to be made of the highways hereinafter enumerated and as a result of such investigation and inspection the Commission has found that the geometric design of said highways is such that a vehicle having an overall length of not to exceed sixty feet and a width of not in excess of eight feet can be operated and its movement at all times be kept on the right-hand side of the center line of the traveled way and need not at any time or at any place on any of said highways be operated in the opposite traffic lane or any part thereof, and the Commission has found further from said investigation and examination that the structure of said highways is such that they can, without serious impairment, carry a vehicle and load and vehicles and load having a combined weight of not in excess of 68,000 pounds; and

WHEREAS, for the purpose of affording a measure of relief and thereby aiding in the transportation of defense and other materials, it is the judgment and opinion of the Commission that the interests of the general public will be served by the adoption of a policy which will permit the movement over the public highways hereinafter enumerated of motor vehicles the overall length of any one of which shall not exceed sixty feet and the combined weight of vehicle and load or vehicles and load shall not exceed 68,000 pounds, such policy to be in effect for the duration and while the emergency continues, unless otherwise modified by the action of this Commission.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The Commission does hereby find and declare that an emergency exists in the State of Oregon with respect to the transportation of defense materials, both with respect to rail transportation and motor transportation, and that such emergency is increased by reason of the statutory limits with respect to weight of vehicle and length of vehicle and load.

2. The Commission does further find and declare that in its opinion the national emergency justifies the Commission in the adoption of a policy authorizing the issuance of permits under the provisions of Section 115-393, O. C. L. A., which permits may authorize the movement of vehicles within, into and through the State of Oregon over the highways hereinafter designated with a combined weight of vehicle and load or vehicles and load of not to exceed 68,000 pounds and an overall length of not to exceed sixty feet; provided, however, that the operation of any motor vehicle under a permit issued pursuant to the policy and scope of this resolution shall, with respect to the combined weight of vehicle and load or vehicles and load or wheel weight or axle weight, be specifically controlled by the following formula: The allowable gross weight shall be controlled by the formula $W = 750(L+40)$, wherein W equals the total gross weight, L equals length in feet between first and last axles. The total gross weight applied to any group of axles spaced closer than 18 feet apart shall not exceed that determined by the formula $W = 650(L+40)$, wherein W equals gross weight and L equals distance in feet between first and last axles of the group in question. In addition to the control provided for in said formula no vehicle shall be permitted to operate under any permit issued pursuant to this resolution with an axle weight in excess of 18,000 pounds, nor shall any truck train, consisting of a truck tractor and semi-trailer, have a total length in excess of fifty feet.

3. Any permit issued pursuant to this resolution may be cancelled by the Commission at any time for cause or when in the opinion of the Commission the cancellation of such permit is required in the interests of the general public.

4. The particular highways over which such movement or transportation may take place are the highways listed on the attached sheets.**

5. From time to time, as conditions and circumstances disclose and warrant, other and additional highways may be designated by the Highway Commission and thereby brought within the scope and reach of this resolution. Any additional highways so designated shall automatically be available to carriers holding permits for the operation of vehicles over the highways selected and designated by the Commission and listed on the attached sheets.**

** (See list of highways on back of Emergency Transportation Permit, form No. E-235-1CM-3-42)

6. The form of permit which is hereto attached hereby is approved as the form of permit to be issued for the operation of vehicles over the highways listed on the attached sheets, subject, however, to such modifications or additions as may be necessary to conform to particular circumstances and conditions.**

7. The Secretary of the Commission, upon application by any qualified operator, hereby is authorized and directed to issue a permit to such applicant. All permits issued shall conform substantially to the form approved by the Commission.

8. Such permits shall contain proper and appropriate instructions and conditions and must at all times be carried in the cab of the motor vehicle while in operation on the highways of the State of Oregon.

9. Any permit issued may be for the duration, but in any event shall expire one year from date thereof but may be renewed in the discretion of the Commission. Each permit shall contain not only the date of issuance but its expiration date.

10. Any permit issued pursuant to the policy and authority of this resolution shall be subject in all respects to the regulatory powers of the Federal Government and of the Public Utilities Commissioner of the State of Oregon.

11. The sole purpose and object of this resolution is to provide for the existing emergency and for the duration, and therefore all persons are expressly warned against the purchase of equipment or the making of investments on the theory or assumption that the policy which by this resolution is established will in any sense become permanent or be extended beyond the duration or that the privileges provided will be continued beyond the period of the emergency.

12. In addition to issuance of permits for the transportation of property over the highways listed on the attached sheets, it is recognized that there are other highways in the State over which it may become necessary in national defense to transport defense materials. With respect to such highways a permit or permits may be issued for a single or isolated movement under the conditions and requirements which now prevail for similar movements in connection with which permits are now, under the existing policy of the Commission, issued.**

** (See Emergency Transportation Permit, form No. E-235-10M-3-42)

The meeting was adjourned sine die at 10:00 p. m.

FEB 13 1942

Portland, Oregon, March 19, 1942

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work and sale of land were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards would be made at 3:00 p. m. in the same room:

THREE STATE HIGHWAYS
BAKER ROCK PRODUCTION PROJECT

No bids received on this project

INDEPENDENCE-GRANGER COUNTY ROAD
WELLS-GRANGER SECTION - GRADING, SURFACING & BITUMINOUS MACADAM

	<u>Using Asphalt</u>	<u>Using Tar</u>
McNutt Brothers	\$99,915.50	\$ 99,915.50
Leonard & Slate	- -	105,465.00

FOUR STATE HIGHWAYS
REDMOND ROCK PRODUCTION PROJECT

A. C. Suhre dba Bend Sand & Gravel Co.	\$18,936.49
E.C. Hall Co.	22,260.00
Babler Brothers	23,075.00

CRATER LAKE HIGHWAY
NORTH UNIT, ANTELOPE CREEK-MEDFORD SECTION
GRADING AND PAVING

Berke Brothers	\$312,887.50
*McNutt Brothers	345,539.00
*Leonard & Slate & Jacobsen-Jensen Co.	362,275.00
*Bidder will not accept this project alone	

CRATER LAKE AND PACIFIC HIGHWAYS
SOUTH UNIT, ANTELOPE CREEK-MEDFORD SECTION - GRADING & PAVING

** Leonard & Slate & Jacobsen-Jensen Co.	\$421,337.00
*McNutt Brothers	443,433.00
*Bidder will not accept this project alone	
**Lump sum reduction of \$15,000 for award of both units	

**COMBINATION BIDS ON THE NORTH AND SOUTH UNITS
ANTELOPE CREEK-MEDFORD SECTION**

	<u>North Unit</u>	<u>South Unit</u>	<u>Lump Sum Reduction</u>	<u>Total Combined Bid</u>
Leonard & Slate and Jacobsen- Jensen Company	\$362,275.00	\$421,337.00	\$15,000	\$768,612.00
McNutt Brothers	345,539.00	443,433.00	- -	788,972.00

**PACIFIC HIGHWAY
GRAVE CREEK-JUMPOFF JOE CREEK SECTION
SURFACING AND BITUMINOUS MACADAM**

McNutt Brothers	\$147,818.00
E. C. Hall Company	149,091.00
Babler Brothers	165,100.00

**PACIFIC HIGHWAY EAST
HARRISBURG BRIDGE SECTION
REPLACE PILE TRESTLE APPROACH**

Tom Lillebo	\$102,544.00
S. S. Montague	120,508.40
Lindstrom Brothers	136,480.00
C. J. Eldon	144,810.00

**PORTLAND AIR BASE EAST ACCESS ROAD
AIR BASE-COLUMBIA BOTTOM ROAD SECTION
GRADING AND PAVING**

Parker-Schram Company	\$6,963.00
Porter W. Yett	7,261.00

SALE OF TRACT OF LAND NEAR BANKS

Emil H. Duyck	\$1,670.00
---------------	------------

Senator Wm. E. Walsh, Marshfield, attorney for certain chrome mining interests, came before the Commission in regard to an agreement heretofore reached between such interests and the Commission with respect to a Port Orford Cedar Park tract in Curry County, title to which the Commission is transferring to the mining company. (See previous record for terms of original agreement) Senator Walsh asked the Commission for the privilege of paying the agreed sum of \$10,000 sooner than the time specified in the agreement if the company so desires. He explained that the company may wish to settle for the property in full prior to the time called for in the agreement and in such event would want the deed to the property and the mineral rights at that time. The Commission agreed to such modification.

Senator Walsh asked the Commission for clarification of the provisions with respect to the \$10,000 payment if such sum is paid in increments out of proceeds of production. He gave as his thought that the company should not be required to pay the full amount of the \$10,000 if it should abandon the project

before completing the payments; and that provision should be made that the company would not lose its rights in the event it ceased operations for short periods of time. Under the present arrangement, he explained, the company would lose its rights if its operations were carried on intermittently. It was the thought of the Commission that the mining company should be given a reasonable length of time within which to complete this transaction regardless of whether or not its operations are continuous or intermittent and, accordingly, the Commission set five years as such time limit, it being understood that if the company has not paid its obligation within such five-year period then its use of the property shall cease and the state shall retain ownership to the minerals situate thereon. The Attorney was instructed to incorporate the above decisions in the form of agreement with the company.

The Engineer brought up for discussion matters pertaining to forest highway funds which, according to the latest advice, have been "frozen" by the federal government on account of the war situation. He particularly pointed out the need to surface a four-mile section of the John Day Highway east from Prairie City, which section, he said, now has only a rough rock surface that is difficult to travel. He suggested that it would be advisable to smooth-surface this section and provide a light oil treatment which would be satisfactory until the return to normal times. He estimated the cost of such work at \$25,000. The Commission approved the project and authorized the taking of bids for same at the next meeting.

County Judge Nelson B. Higgs of Harney County was present and asked for the following improvements: (1) Resurfacing of the Stinkingwater Mountain Section of the Central Oregon Highway which, he said, is in bad condition. He was informed by Chairman Cabell that the Commission does not have funds to finance the work at the present time due to war conditions. (2) Construction of the Burns Airport Road which begins at a point on the Burns-Crane Highway five miles east of Burns and extends northerly a distance of about two miles. The Engineer explained that this road is not on the state highway system but could be constructed as an access road, using federal funds, if it were certified by army authorities; otherwise there are no funds available. (3) Improvement of the Diamond State Secondary Highway. Judge Higgs advised that certain sections of this road are badly in need of improvement, being practically impassable during certain times of the year. The matter was referred to the Engineer for investigation.

The County Court of Lane County, represented by County Judge Clinton Hurd and County Commissioners W. J. Holland and Allen P. Wheeler, and County Engineer P. M. Morse came before the Commission in regard to the construction of a roadway leading to the Eugene Fruitgrowers Cannery, in Eugene. They advised that, under the present arrangement for one-way travel on High Street, the only access to the cannery is via a roundabout course, which is very inconvenient and unsatisfactory. They asked the Commission to modify its present plan and provide for two-way traffic on High Street or to construct an entirely new road on a diagonal from the High Street-Sixth Avenue intersection. The Engineer advised that he has investigated three alternate solutions for this problem, all of which include a revision of the High Street-Sixth Avenue

intersection. One of these plans, he said, is the one mentioned by the county court; the second is the use of the alley which parallels the Southern Pacific Company's tracks about one block east of High Street, with a crossing of Mill Creek on an extension of Seventh Avenue; and the third requires the use of this alley clear through to Eighth Avenue with an entrance to the cannery from Eighth Avenue. He favored alternate No. 1 which, he said, is the cheapest of the three and is estimated to cost about \$13,000. He pointed out that the Highway Commission does not have authority to spend state funds for either right of way or construction of any of the alternates except for the revision of the High Street-Sixth Avenue intersection, so whatever plan is adopted it would be up to the city or the county to finance the work, except that involved at this intersection.

Chairman Cabell explained that the Commission adopted one-way traffic on High Street as a control for Pacific Highway travel through Eugene, and that any alteration in the traffic routing, as adopted, would disrupt the entire plan so the Commission is not inclined to make such alteration. He favored the revision of the High Street-Sixth Avenue intersection as suggested by the Engineer, provided arrangements are made by the city or the county to finance the balance of the improvement. Commissioners Clough and Oliver concurred and the Engineer was thereupon authorized to reconstruct the intersection in conformity therewith, when arrangements have been made for financing the balance of the work. Judge Hurd advised that the court would consult with the city officials in an endeavor to work out an arrangement for financing the roadway construction.

The County Court also brought up for discussion matters pertaining to the "Route F" Highway (Richardson-Eugene Secondary State Highway No. 220). They advised that the oiled surface constructed last year on a portion of this road is in bad state of repair, and as a result traffic has to use the Elmira Road. The Engineer advised that he is aware of this condition and that it is his intention to make necessary repairs this spring.

The County Court also asked that the present improvement on this highway be extended about 4,100 feet east from Fisher crossing so as to eliminate the right angle turn at the present crossing where numerous accidents occur. A new crossing of the railroad at such point, they said, would eliminate the present hazard, and they urged the improvement from the safety standpoint. The Commission denied the request on account of lack of funds with which to finance the work.

Mr. F. B. Wire, State Game Supervisor, was present and conferred with the Commission relative to the proposed purchase by the Highway Department of certain Game Commission property at Union, Oregon. The Engineer advised that inspection of this property reveals that it could be used to good advantage for state highway purposes. He suggested purchase of the same for \$5,500, notwithstanding that about one acre is to be reserved for the use of the Union County Sportsmen's Club for its clubhouse and trapshooting grounds, provided that the southerly boundary of such reserved area shall not extend more than 50 feet south of the clubhouse. He presented a map showing the reserved area and approximate location of the buildings. The Commission appeared favorably inclined to purchase this property but deferred a definite decision relative thereto.

pending the making of a definite survey of the boundaries. The Engineer was authorized and instructed to make such survey as soon as possible and to prepare descriptions as may be necessary for use of the Attorney in negotiating the purchase.

The Engineer reported on investigations relative to the rerouting of the Pacific Highway West (Highway No. 99W) to accommodate the United States Army cantonment north of Corvallis. He exhibited a map showing the proposed routing which commences at a point approximately two miles north of the Polk-Benton County line and extends northerly approximately parallel to the present highway to a connection with the present highway about one and one-half miles south of Rickreall. He explained that there are several alternate routes that could be used but from the standpoint of constructing a permanent highway the proposed line is best notwithstanding that it will cost somewhat more than the others. He pointed out that the money budgeted to finance the present improvement is insufficient to construct the project throughout its entire length and suggested, until such time as additional funds become available, that the construction now to be undertaken be limited to the section south of cemetery hill, south of Monmouth, where a feasible connection with the present highway could be effected. This matter was discussed at considerable length during which the Commission indicated a favorable attitude toward the adoption of the plan recommended by the Engineer. It was decided to discuss the matter with Dr. C. A. Howard, President, Oregon College of Education, Monmouth, from that standpoint when he appears at this session.

The Engineer also brought up for discussion the bids received at this meeting for the construction of the Independence-Granger County Road. He pointed out that the low bid for the work is slightly more than ten per cent above the Engineer's estimate. He recommended in view of the urgency of the improvement that the contract be awarded to the low bidder, notwithstanding this slight difference and that it is not in strict conformance with the Commission's established policy. The Commission approved the recommendation.

The Engineer also advised that the people of Independence and vicinity are extremely anxious that this road be designated a state secondary highway, from Granger to Independence, and that it be improved throughout to state standards because the highway is vital to the proper functioning of the army cantonment and in their estimation the improvement is a state obligation. The Commission deferred action on the matter.

Dr. C. A. Howard, President, Oregon College of Education, Monmouth, and Dr. R. E. Kleinsorge, Silverton, member of the State Board of Higher Education, appeared before the Commission in regard to the proposed improvement of the Pacific Highway West through Monmouth. Dr. Howard explained that the present road passes through the college campus and they are particularly interested from the standpoint of providing greater safety to college students. He particularly urged the rerouting of the highway on some other location when the permanent improvement is undertaken. The Engineer explained that alternate routes are being considered by the Commission. He advised that, regardless of which route the Commission selects, it would not be possible to build the entire section now because there are insufficient funds available to pay

the costs involved, so the Commission has tentatively decided to limit construction to the section south of the cemetery hill, with a temporary connection with the existing highway at the north side of this hill. This plan, he said, provides for the use of the existing highway through Monmouth until such time as additional funds are made available that would make it possible to extend the improvement. Dr. Howard approved such plan but requested the opportunity to discuss with the Commission the improvement north of the cemetery hill before the Commission makes a definite selection as to the route, particularly if the plans provide for the retention of the existing route through the town of Monmouth as a permanent proposition. The Commission approved Dr. Howard's request and thereupon by unanimous vote authorized the Engineer to make surveys as may be necessary to establish a new location for this highway between Corvallis and Rickreall. He was also authorized and instructed to prepare plans and specifications for the immediate construction of the section along such new route, between Corvallis and the cemetery hill south of Monmouth, and to advertise such project for bids to be received at the earliest possible time.

County Judge A.R. Bowman, Crook County, was present and asked the Commission to surface an 11-mile section of the Crooked River Primary Highway south from its junction with the Crooked River-Paulina Secondary Highway. He advised that it is extremely difficult to drive a car over this section during the winter season on account of its slippery condition and similar difficulties are encountered in the summer months just after rains; in fact, the road was closed for a time during the past winter. He estimated that it would cost about \$4,500 to place a light coating of rock on the grade which would serve as a temporary expedient until the Commission could provide a permanent improvement. He was informed that the Commission cannot provide a standard improvement because of lack of funds but will have an investigation made by the Engineer to ascertain just what is needed to place the road in passable condition, it being understood that if the Commission can spare the funds it will authorize the work to be done.

Judge Bowman also asked the Commission to retain jurisdiction over a section of the old Ochoco Highway between Marks Creek and Mill Creek which the Commission abandoned some time ago when the highway was reconstructed on other alignment. It was his thought that the old road could be used to good advantage as a stock driveway and that it is the state's obligation to maintain it as such. The Commission instructed the Engineer to investigate the matter and report his findings.

The Commission adjourned at 12:15 p. m. and reconvened at 2:00 p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

Mr. L. L. Krause, attorney, Toledo, came before the Commission in regard to a right of way matter affecting property owned by Mr. V. L. Moore at Toledo. He advised that when the Corvallis-Newport Highway was realigned at Toledo the Commission purchased right of way from a Mr. Prewett and one of the conditions of the purchase was that the state would move Mr. Prewett's residence and re-establish it on another location. This was done, he said, but it so

happened that the building was placed so that it encroached a short distance on the old highway right of way and, in view of the fact that Mr. Prewett was not responsible for the error, the state agreed to deed to Mr. Prewett a small area involved in the encroachment rather than go to the expense of moving the building back. The deed of conveyance, he said, was never given to Mr. Prewett who has since sold the property to a Mr. Vincent L. Moore, who is desirous of having the matter consummated. Mr. Krause asked the Commission to quitclaim to Mr. Moore sufficient area that would allow him full use of his property without trespassing on the state's property. The Attorney verified Mr. Krause's allegations whereupon the Commission approved deeding to Mr. Moore by quitclaim deed the property heretofore agreed upon. The property thus to be conveyed shall be eight feet wide so as to permit Mr. Moore to pass around his building without trespassing on the old right of way.

Mr. Krause then suggested that the Commission might prefer to abandon the old road between its junction with the present highway and the stock pile that is being maintained by the state a short distance back of Mr. Moore's house. Access to the stock pile, he said, is available to highway department employees over another roadway. He particularly requested such abandonment so as to eliminate noise and confusion caused by people who "party" on the old roadway near Mr. Moore's residence. He suggested, if the Commission could not see fit to abandon this roadway, that it be closed so that people could not enter. The Commission took under advisement the matter of abandoning the roadway and instructed the Engineer to ascertain whether or not it would be advisable to do so. Mr. Krause was given to understand that whatever its decision, the Commission would execute a deed in favor of Mr. Moore conveying an eight-foot strip of land past Mr. Moore's house. Mr. Krause is to be given a reply within 15 or 20 days.

Mr. Carl Jacobsen, contractor, of the firm of Jacobsen-Jensen Company who, with Leonard & Slate, submitted the low combination bid at the morning session for the construction of the North and South Units of the Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County, came before the Commission and urged acceptance of this bid. He gave as his understanding that the bid is considerably in excess of the Engineer's estimate and there is a question whether or not the Commission will award the contract. He gave reasons for the excessive amount of their bid. The Commission took the matter under advisement. (The Commission on the following day decided to reject the combination bid.)

Messrs. H. H. Pearce and J. M. McLoughlin, president and secretary, respectively, of the Parkrose Chamber of Commerce, were present regarding traffic signals on Sandy Boulevard at its intersection with 89th Avenue, 99th Avenue and 105th Avenue. They advised that some time ago they wrote the Commission requesting that the existing lights at these intersections be changed from the flashing-type signals to the red and green stop-and-go signals but the request was denied, the reason given being that the expense of such change did not appear to be justified. They gave as their thought that something should be done to insure greater safety to traffic at these points and suggested, if the Commission could not see its way clear to install the stop-and-go

signals, that it might change the amber lights to red lights in the existing flashing signals, which would require east and west traffic on Sandy Boulevard to come to a stop before proceeding through these intersections. Traffic on Sandy Boulevard, they added, is steadily increasing and they are fearful that, if something is not done to increase traffic safety, serious accidents will result. The Commission agreed to have the matter investigated.

Mr. Pearce also asked the Commission to repaint the pedestrian traffic stripes across the highway at these intersections, the existing stripes being practically obliterated by traffic. The matter was referred to the Engineer.

Mr. Pearce inquired as to the Commission's plans for widening Sandy Boulevard between 82nd Avenue and 122nd Avenue, which project he understood has previously been approved by the Commission. Chairman Cabell replied that it is true the Commission promised this project but since the commitment was made conditions have changed and the country is now at war; also, that federal funds with which the Commission expected to finance the improvement have been tied up and cannot be used unless the expenditure has first been approved by the army authorities and there is a question whether or not this particular project meets the army requirements. Furthermore, there is a question of priorities for materials and supplies; however, the Commission intends to secure army approval of the project if possible and, if attempts are successful, will proceed with the work. Commissioners Clough and Oliver confirmed Chairman Cabell's statement.

Mr. Pearce then brought up the question of securing extra right of way for this improvement beyond 102nd Avenue, particularly in front of the cemetery. He suggested that the Parkrose Chamber of Commerce could assist in securing such right of way if the Commission cared to have its help. Chairman Cabell expressed appreciation for the offer and referred the matter to the Attorney.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts and sale of tract of land, bids for which were received by the Commission at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Baker Rock Production Project on three state highways, in Baker County. Requires approximately 5,000 cu. yds. crushed gravel in stock piles. No bids were received on this project.

"Wells-Granger Section of the Independence-Granger County Road, in Benton County. 4.5 miles grading, surfacing and bituminous macadam. McNutt Brothers, Eugene, submitted the low bid for this project, in the amount of \$99,915.50, based on the use of tar, and the same amount, based on the use of asphalt. Leonard & Slate, Multnomah, submitted the next-low, and only other bid, in the amount of \$105,465.00, using tar. They did not submit a bid based on the use of asphalt. The Commission awards this contract to the low bidder, McNutt Brothers, at their low bid of \$99,915.50, based on the use of tar.

"Redmond Rock Production Project on four state highways, in Crook and Deschutes Counties. Requires approximately 12,500 cu. yds. crushed gravel in stock piles. A. C. Suhre dba Bend Sand & Gravel Company, Bend, submitted the low bid for this project, in the amount of \$18,936.49. E. C. Hall Company, Eugene, submitted the next-low bid, in the amount of \$22,260.00. There was only one other bidder. The Commission awards this contract to A. C. Suhre dba Bend Sand & Gravel Company, at his low bid of \$18,936.49.

"North and South Units of the Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. The bids for these units were submitted separately and also in combination. The Commission has deferred a decision with respect to both of these jobs but will announce its decision at 2:00 p. m. tomorrow at a special meeting in the Imperial Hotel. The results of the bids on both jobs are as follows:

"North Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County. 4.91 miles grading and paving. Berke Bros., Portland, submitted the low bid for the construction of this unit at \$312,887.50. McNutt Bros., Eugene, submitted the second-low bid at \$345,539.00. They qualified their bid by stating that they would not accept this project unless also awarded the contract for the construction of the South Unit. Leonard & Slate and Jacobsen-Jensen Company, Portland, submitted the third and only other bid for this work at \$362,275.00. They likewise stated that they would not accept this contract unless also awarded the contract for construction of the South Unit. However, they agreed to accept a \$15,000 reduction if awarded both jobs.

"South Unit, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. 4.0 miles grading and paving. Leonard & Slate and Jacobsen-Jensen Company, Portland, submitted the low joint bid for this project in the amount of \$421,337.00. They qualified their bid by stating that they would not accept this project unless also awarded the contract for the North Unit, and further stated that they would reduce the amount of their bid in the sum of \$15,000 if awarded both units. McNutt Bros., Eugene, submitted the only other bid for this job, being in the amount of \$443,433. They likewise stated that they would not accept this project unless also awarded the contract for the construction of the North Unit.

"Combination bid for both North and South Units, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. Leonard & Slate and Jacobsen-Jensen Company, Portland, were low with a joint bid of \$768,612.00. McNutt Bros., Eugene, submitted the only other combination bid at \$788,972.00.

"Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County. 6.01 miles surfacing and bituminous macadam; also

furnishing 3,400 cu. yds. crushed gravel in stock pile. McNutt Brothers, Eugene, submitted the low bid for this work, in the amount of \$147,818.00. E.C. Hall Company, Eugene, submitted the second-low bid, in the amount of \$149,091.00. There was one higher bidder. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Harrisburg Bridge Section of the Pacific Highway East, in Lane County. Remove approach at southerly end of bridge over Willamette River at Harrisburg and construct new approach. Tom Lillebo, Reed-sport, submitted the low bid for this project, in the amount of \$102,544.00. S. S. Montague, Portland, submitted the next-low bid in the amount of \$120,508.40. There were two higher bidders. The Commission refers all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Air Base-Columbia Bottom Road Section of the Portland Air Base East Access Road, Multnomah County. 0.16 mile grading and paving. Parker-Schram Company, Portland, submitted the low bid for this work in the amount of \$6,963.00. Porter W. Yett, Portland, submitted the next-low, and only other bid, in the amount of \$7,261.00. The Commission refers these bids to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

Sale of Tract of Land Near Banks

"Emil H. Duyck, Banks, submitted the only bid for this tract, in the amount of \$1,670.00. The Commission refers this bid to the Attorney with power to sell the property to Emil H. Duyck at his bid of \$1,670.00 when certain conditions have been fulfilled."

A delegation from Polk and Benton Counties, consisting of County Commissioner W. H. Malone, representing the Benton County Court; County Judge Herman Van Well and Commissioners Fred Gibson and H. H. Brant, representing the Polk County Court; Senator Dean H. Walker, E. L. Gray, Glen C. Smith, R. M. Walker, and Melford Nelson all of Independence, came before the Commission in regard to the Independence-Granger County Road. Senator Walker was spokesman. He urged the Commission to designate this road a state secondary highway and to improve it to state highway standards, including surfacing and oiling, throughout its entire length and later to extend the improvement into Salem via the South River Road. He urged the improvement from the standpoint of traffic safety and relieving Highway No. 99W of traffic through the United States Army Cantonment north of Corvallis, and advised that, according to Colonel Des Islet, the improvement is a real need from a military necessity. Mr. Malone endorsed Senator Walker's remarks and advised that, so far as Benton County is concerned, it does not have funds available to pay increased maintenance cost on county roads that is bound to result from the establishment of the cantonment in this vicinity. Judge Van Well advised that Polk County likewise is unable financially to assume such expense in Polk County.

The Engineer advised that it would cost about \$250,000 to construct a minimum type road that would bear the traffic that this road will carry, including cost of bridges. Chairman Cabell summed up the situation from the Commission's standpoint by stating that the Commission does not have money available to pay such expense but will be glad to consider it if the governmental authorities consider that the road is of sufficient importance to qualify as a military road and will so certify to the end that federal access road moneys may be obtained to finance the cost. As to designating the road a state secondary highway, he said the Commission is not in position today to make a decision but will take the matter under advisement. This concluded the conference.

Chairman Cabell was excused from the meeting at this time.

Mayor H. M. Austin and Councilmen L. H. Shorey, Fred Hecker, Elmer Mattson, and K. Smith, Woodburn, were present in regard to the improvement of Young Street, Woodburn, between the business district and the Pacific Highway. Mayor Austin was spokesman. He asked the Commission to widen this street, which is a state secondary highway route, construct curbs and improve drainage facilities so as to provide a full paved or oiled street between curbs with suitable facilities for carrying off water. He advised that the city would contribute toward such work a sufficient amount to pay for all of it except the grading work, surfacing, oiling and the removal of the old concrete curb. The Engineer estimated the total cost of the project at \$21,000 of which amount, he said, the city's share would be approximately \$10,893.00. He gave as his opinion that this is a meritorious project and advised that he would recommend it if the status of the Commission's finances would permit the expenditure which it does not at the present time. Commissioner Clough explained the status of the Commission's funds and advised that, because of shortage of funds, it is very doubtful that the Commission could authorize the improvement. However, the matter will be given due consideration. Mr. Austin advised that they are not asking for immediate relief but simply want the Commission to bear the matter in mind inasmuch as the property owners want to improve their holdings by constructing sidewalks, curbs and storm sewers.

Mr. Porter W. Yett, contractor, came before the Commission and requested relief from payment of the penalty that has been imposed on him for failure to complete his contract No. 2472, for grading, surfacing and construction of bituminous macadam on the Vollmer Creek and Necanicum Junction Sections of the Wolf Creek Highway, in Clatsop County, within the specified time limit. He alleged that he could not complete this project within the specified time because of difficulties in securing labor, material and supplies. Construction Engineer Smith advised that the reason given by Mr. Yett for failure to complete the project on time is substantially correct. He recommended cancellation of the penalty which amounts to \$501.88. The State Highway Engineer concurred. The Commission approved the recommendation.

The matter of relieving the City Motor Trucking Company (Porter W. Yett) from payment of the penalty heretofore imposed on it for failure to complete its contract, No. 2331, for grading and paving the Rainier Section of the

Columbia River Highway, in Columbia County, was also considered. The Engineer advised that he has investigated this matter and it is his opinion that the full amount of the penalty should not be charged against the City Motor Trucking Company. He recommended that the penalty be reduced 50 per cent. The Commission approved the recommendation.

A delegation from Cannon Beach, headed by Mr. Carl E. Davidson, attorney, and including Norman N. Rupp, R. J. Greer, G. R. Van Vleet, and Duncan Shields, came before the Commission relative to the hauling of logs over the Wolf Creek Junction-Cannon Beach Section of the Oregon Coast Highway. Mr. Davidson advised that Mr. Van Vleet owns a tract of spruce timber south of Cannon Beach and it is necessary for him to move his logs over the Oregon Coast Highway to a dumping point near Astoria, there being no other route available; also that there will be 15 or 20 loads to be hauled daily and that the material is for defense purposes. He asked the Commission to authorize log hauling over this section during the summer months, which is now prohibited, as is now being done during the winter season. Mr. Shields stated that he is in business at Cannon Beach and in his estimation log hauling on this road will not endanger beach traffic. Furthermore, logging operations will not be detrimental to his business. Mr. Greer endorsed the remarks of Mr. Shields. Mr. Rupp, owner of the timber, stated that he has wanted for a long time to sell this timber but could not do so because of regulations imposed by the Highway Commission relative to the hauling of logs over state highways. He also said that the spruce timber is needed badly as airplane stock.

Commissioner Clough advised that the Commission's first concern is to provide the best possible safety to the traveling public and there is a question whether or not the Commission will be doing the right thing by permitting log hauling on this road during the summer months when beach travel is heavy. Commissioner Oliver concurred; however, suggested that inasmuch as the Commission wants to help the logging industry as much as possible that log hauling be permitted on this section until July 1, 1942, as a trial proposition, which would be a 30-day extension of the present time limit. After further discussion, the Commission approved Commissioner Oliver's suggestion. The Engineer was instructed to watch traffic conditions during this time, the results thereof to be given to the individual members of the Commission on July 1 by telephone when a decision will be made whether or not to extend the privilege.

Mr. D. F. Moehnke, manager of the 3-M Logging Company, Alsea, Oregon, headed a delegation, including Norman Rupp, C. E. Bowen, Geo. W. Hendrix, Norman Sapp and County Commissioner W. H. Malone of Benton County, which appeared before the Commission and requested the improvement of a $1\frac{1}{2}$ -mile section of the Alsea-Deadwood Secondary State Highway between "Batdorf's place" and the "foot of the mountain". They explained that the highway has been constructed, and is in fine condition up to Batdorf's place, and that it has been graded for a considerable distance beyond the foot of the mountain, leaving only this $1\frac{1}{2}$ -mile intervening section to be graded and surfaced, the clearing work and grubbing already having been completed along the adopted alignment. The present road, he said, is very narrow and crooked and it is difficult to operate logging trucks over the same. The Engineer advised that it will cost

about \$30,000 to grade and surface this $1\frac{1}{2}$ -mile section. He doubted it would be possible to secure governmental priorities for the project. Commissioner Clough advised that the Commission has no funds available at the present time except those needed to finance highways of military importance, and in view thereof the Commission has no alternative but to deny the request. However, when times return to normal the Commission will be pleased to reconsider it. Commissioner Oliver concurred.

Mr. Moehnke then asked the Commission if it would authorize him to fix up the present road with his own equipment and at his own expense. The Commission appeared favorably inclined but deferred a decision pending investigation and report by the Engineer. The Engineer was thereupon instructed to inspect the premises and, if he considers it advisable, to work up some sort of a proposition for Mr. Moehnke to fix the road, using his own equipment. A report on the matter is to be presented to the Commission when the investigations have been made.

Mr. Jay Gould, representing System Freight Service which operates between Washington, Oregon and California points, was present and inquired as to the possibility of securing a permit to transport prefabricated airplane tails over state highways from Portland to California, involving an overall width of approximately 8 feet 10 inches and an overall height of approximately 13 feet, if two of the tails are loaded on a truck. He asked for a blanket permit covering the excess dimensions. Commissioner Clough stated that it is contrary to the Commission's established policy to grant blanket permits covering overwidth features; however, in this particular instance, in view of the fact that the commodity to be hauled is for national defense purposes, the Commission will give special consideration to the request but is not in position to make its decision today. Furthermore, it cannot make a decision until the exact overall dimensions have been furnished the Commission. After further discussion it was agreed that Mr. Gould shall furnish the State Highway Engineer with the exact dimensions of the loads when they have been definitely determined. The question whether or not the permit will be issued will then be decided.

A delegation from Albany and Sweet Home, consisting of Archie Hessman and C. H. Wheeler, representing the McDowell Creek Logging Company; Fred Lemery and J. L. Ray, representing the Evans Products Company; H. C. Patton, representing the Hammond Lumber Company; L. V. Manthe, representing the Albany Plylock Company; and John Powers, representing the Vancouver Plywood Company, came before the Commission and asked for the lifting of the penalty now imposed on log haulers for overloading, which penalty consists of a fine and the loss of FUC plates for a period of four days for each offense. Mr. Hessman was spokesman. He urged the Commission to waive the four-day suspension of operation of equipment involved in the overloads and to increase the amount of the fines for such violations. In support of his request he advised that logs that they are hauling are all for filling defense orders and it is urgently demanded that the orders be filled at the earliest possible time. The suspension of the hauling equipment, he said, interferes greatly with the filling of these orders and they cannot afford to lose the services of any truck

in view of the emergency. It was his thought that the increasing of the fine would solve the problem satisfactorily, and there would be an advantage in that the trucks would not have to be taken out of service which is particularly important at this time in view of the fact that it is practically impossible to buy new equipment and that so many of the trucks are being taken off the log hauling service for other purposes. Mr. Powers advised that they would have no objections to the present rules and regulations if times were normal but times are not normal and the logs must be gotten to the mills so defense orders can be filled; the loss of any truck from log-hauling service, he declared, is a serious handicap. He suggested that the measuring of loads by log scale rather than by weight would be advisable. Mr. Patton advised that his company is operating shorthanded so far as trucks are concerned, having lost nine recently, the owners having secured other employment for them. He suggested the imposition of fines, only, for the first two offenses and the tying up of the trucks for a certain period for each offense thereafter. It was his thought that such solution would remedy the difficulty.

Commissioner Clough advised that the gross load allowed by law is about all that the highways and bridges can carry with safety and, if greater loads are allowed, the roads would go to pieces and the logging operators then would be much worse off than they are under present conditions. He explained that the State Highway Commission has nothing whatsoever to say about the imposition of fines and the only way in which the Commission can act to curb overloading is to require the penalty of suspension of the trucks involved for a period of time. As to changing the method of determining the size of the load, he advised that the law specifies weight measure rather than scale measure and such weight must be governed by density rather than by log scale. Commissioner Oliver concurred in the remarks of Commissioner Clough. He added that the logging problem is a very difficult one and the Commission is giving it a lot of study; also that the Commission sympathizes with the logging operators but it must protect the roads for general public use. It appeared to him to be as much to the interest of the loggers as it is to the state to keep the roads in good condition and that the solution of the problem is something that must be worked out by both sides to the controversy. The Commission is not in position at this time, he added, to make a decision in this matter but will give it serious consideration. (Reconsideration was given to this matter on the following day when Commissioner Cabell was present and it was decided at that time not to make any change in the present rules and regulations until the Commission receives a more general appeal for the change; however, the Commission indicated that it would try out the "fine-only" suggestion some time next summer when the highways have dried out.)

The County Court of Deschutes County, represented by County Judge C. L. Allen and County Commissioners E. E. Varco and Ole Grubb, appeared before the Commission in the interests of the Terrebonne-Lower Bridge county road. The county court was accompanied by Messrs. M. A. Lynch, P. M. Houk, and a Mr. Stockton, all of Redmond. Judge Allen headed the group. He advised that the county has nearly completed the grading work on the six-mile section west from Terrebonne and that there will be remaining, when this work is done, only the grading of the one-mile section adjacent to the Oromite Company's plant.

This one-mile section, he said, will cost about \$8,000 to grade and the county does not have the money to pay for the work. He inquired whether or not the Highway Commission will proceed with the surfacing and oiling of the six miles notwithstanding that the county is unable to fulfill its obligation in its entirety.

Mr. Oscar Cutler, Assistant Staff Engineer, advised that he made a personal inspection of the road and is satisfied that it is not absolutely necessary to regrade the one-mile section mentioned by Judge Allen. He gave as his opinion that a light oil treatment on the present roadway would suffice although the six miles west from Terrebonne must be surfaced before it can be oiled. In reply to an inquiry from the State Highway Engineer, Judge Allen advised that the county would rock surface the entire section, which was to be a state obligation under the original agreement, if the state will do the oiling work and will spend on some other county road an amount equivalent to the county's expenditure for such surfacing. After further discussion the following arrangement was finally agreed upon: Deschutes County will finish the grading work on the six-mile section west of Terrebonne and will place a rock surface on the same. This eliminates further grading or surfacing work on the one-mile section adjacent to the Oromite Plant. The state will furnish oil rock and construct an oil surface on said six-mile section and will place a light oil treatment on the additional one-mile section. Deschutes County will be given credit for the rock surfacing work and the state will spend a like sum of money at some future date for the improvement of some other county road. The arrangement is to be covered by written agreement between the state and the county.

Judge Allen renewed the county's request for the oiling of a four-mile section of the Cline Falls Secondary Highway No. 373 north from the town of Tumalo; and for the oiling of a three-mile section of the Tumalo-Deschutes Secondary State Highway No. 374 east from Tumalo. The Commission expressed regrets that it cannot do such work because funds are not available to finance it.

The meeting was adjourned at 6:15 p. m. to reconvene the following morning in the Imperial Hotel.

Portland, Oregon, March 20, 1942

The State Highway Commission reconvened at 9:00 a. m. in Room 415, Imperial Room, Imperial Hotel, with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

The Attorney brought up for discussion matters pertaining to the collection of fines and penalties for violation of the traffic laws, particularly those arising out of activities of state police officers. It appears that in numerous instances Justices of the Peace, who try these cases, impose no fines but do require the defendant to pay court costs which are applied toward the payment of the salaries and expenses of the Justices, and in such

cases the state receives no financial benefit whatsoever, which, in his estimation, is not fair and should be corrected if possible. The matter was discussed at considerable length but no action was taken thereon, the Commission considering it has no authority with respect to the imposition of fines.

In this connection reconsideration was given by the Commission to the request presented by the delegation from Sweet Home on the previous day for relief from penalty now in effect for overloading logging trucks, and the increasing of fines in such cases. The Commission decided not to make any change in the present regulations until it receives a more general appeal for such change; however, indicated that it might try out the "fine-only" arrangement sometime during the summer, when the roadways are dry, to determine whether or not such procedure would prove a satisfactory solution of this problem.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the price that he recommended be paid for each parcel. After careful consideration the Commission approved the Attorney's request and thereupon adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Mr. Tom M. Davis, Senior Highway Engineer, Public Roads Administration, was present and approved settlements with respect to acquisition of right of way needed for access roads to the Medford cantonment. Also in connection with this matter, the Attorney reported on negotiations with a Mr. C. M. Parker, Medford, for right of way needed for improvement of the Pacific Highway in Medford, in connection with the Medford cantonment access road. He explained that acquisition of this property involves the termination of a two-year lease owned by a Mr. A. W. Denney and that it would cost about \$15,000 to acquire the property and terminate the lease. The Commission considered such settlement exorbitant and instructed the Attorney to negotiate further in an endeavor to secure a reduction in the price. He was authorized to offer \$12,000 as a basis for negotiation.

The Engineer brought up for discussion the matter of award of contracts for the construction of the North Unit and the South Unit of the Antelope Creek-Medford Section of the Crater Lake Highway, bids for which projects were received by the Commission on the previous day. After careful consideration of this matter, the Commission voted unanimously to award the contract for the North Unit to Berke Bros., Portland, the low bidders, at their bid price of \$312,887.50. It was also decided unanimously to readvertise for bids for the construction of the South Unit, such bids to be received at the next regular

meeting of the Commission, which was thereupon scheduled to be held on Thursday, April 2, 1942, in Portland. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

The Engineer reported receipt of a communication from Frank J. Van Dyke, Executive Secretary, Jackson County Civic Coordinating Board, requesting approval of a change in the Commission's plans for limiting travel on the Crater Lake Highway to south-bound travel only, particularly along the section which extends northerly from the junction with McAndrews Road to the old Airport Road, a distance of about one-half mile, as an accommodation to people who wish to use the facilities of the Jackson County trailer camp. Mr. Van Dyke states that under the present arrangement tourists are confused and experience difficulty in getting to the trailer camp, and suggests that the Commission allow two-way traffic between McAndrews Road, the present terminus for one-way traffic, and the old Airport Road, as a solution for the problem. He also states that the army engineers and the county court are in favor of such change. The Engineer advised that the old Airport Road is not a natural place to change from one-way traffic to two-way traffic and, if north-bound traffic were permitted along this section, it would create a dangerous condition and traffic accidents would undoubtedly occur. He suggested, as a solution, the construction of a third traffic lane on the east side of the Crater Lake Highway from McAndrews Road to the entrance to the trailer camp, for the exclusive use of north-bound travel. Such lane, he said, would serve not only the trailer camp but also people who live along the Buckshot Hill County Road, which extends easterly from the Crater Lake Highway south of the trailer camp. This would not have to be a high-class roadway, he said, because its use could be limited to the time that the cantonment is under construction. Also, there are possibilities that local people will contribute a portion of the cost to build the road.

He also said that the army engineers have agreed, if the Highway Commission will terminate one-way traffic at the old Airport Road, to maintain guards that may be necessary to protect traffic at this intersection. He suggested, however, that the construction of a temporary side road would prove a more satisfactory solution of the problem. After discussion the Commission instructed the Engineer to contact the local people with respect to the construction of the third traffic lane. In the event these people do not approve the plan, then the Engineer is authorized to terminate the one-way traffic at the old Airport Road and to erect barricades and appropriate signs at such location for the guidance of traffic, and to arrange with the army engineers to provide guards at this point, at least during rush hours when travel is heavy.

The Engineer also brought up for discussion a request from the army engineers for the extension of one-way traffic for north-bound Crater Lake Highway traffic on the Midway County Road. He pointed out that one-way travel on this road now terminates at the old Pacific Highway junction with the Midway Road just north of Medford; whereas, the army engineers prefer its termination at the junction of the old Pacific Highway with the new Pacific Highway. He

MAR 20 1942

recommended approval of this request as a trial proposition. The Commission approved the recommendation and ordered appropriate signs erected in accordance therewith.

The Commission adjourned at 12:20 p. m. and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Attorney requested authority to institute condemnation proceedings for the acquisition of certain parcels of real property that he had been unable to secure by negotiation. He presented a list of such parcels, together with the offer that he recommended for each in condemnation as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
10029	W. G. Drummond, et ux.	Gravel Pit	\$ 175.00
10033	Anna B. Lindley	Gravel Pit	1,800.00

9257A	Leora R. Miller	Right of Way	\$50.00 - \$60.00
10092	Clarence A. Blackburn, et ux.	Right of Way	40.00
8998	Frank A. Moore, et ux.	Right of Way	900.00
8989	Floy Liles Thompson	Right of Way	900.00
9497	Fhebe S. Armstrong	Right of Way	450.00

After careful consideration of each item the Commission approved the request and the recommended offers. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of

MAR 20 1942

eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by J. A. Struss, et al., which property is located in the west half ($W\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 11, Township 15 South, Range 12 East, W. M., Deschutes County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 10150, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the McKensie Highway;*

Real property owned by C. J. Moser and Margaret Moser, which property is located in the northeast quarter ($NE\frac{1}{4}$) of Section 9, Township 34 South, Range 6 West, W. M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2 and 3 and is further identified in the records of the Highway Commission as file R 10102, Parcel No. 2 being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the Pacific Highway, and Parcel No. 3 being acquired for the construction thereover of a hauling road to be used in connection with the acquisition and appropriation of roadbuilding materials from Parcel No. 2;*

Real property owned by C. J. Moser, et ux., and The Federal Land Bank of Spokane, which property is located in Lot 1 ($SE\frac{1}{4}$ of $SE\frac{1}{4}$) of Section 4, Township 34 South, Range 6 West, W. M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as

MAR 30 1942

Parcel No. 4 and is further identified in the records of the Highway Commission as file R 10103, which property is being acquired for the construction thereof of a hauling road to be used in connection with the acquisition and appropriation of roadbuilding materials from Parcel No. 2 for use in the improvement of the Pacific Highway;*

Real property owned by the Estate of C. L. Morris, deceased, et al., which property is located in the north half (N $\frac{1}{2}$) of Section 16, Township 15 South, Range 4 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 5 and 6 and is further identified in the records of the Highway Commission as file R 10110, and which property is being acquired for right of way purposes in connection with the Pacific Highway East;*

Real property owned by Leora R. Miller, which property is located in the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 34, Township 13 South, Range 3 East, W. M., Linn County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 9257A, and which property is being acquired for right of way purposes in connection with the Santiam Highway;*

Real property owned by Clarence A. Blackburn and Edna V. Blackburn, which property is located in the Charles B. Sweet D. L. C. No. 61 and situated in Section 34, Township 17 South, Range 3 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 10092, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by George W. Thompson and Floy Liles Thompson, which property is located in the northeast quarter of Section 24, Township 18 South, Range 3 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9 and is further identified in the records of the Highway Commission as file R 8989, and which property is being acquired for right of way purposes in connection with the Willamette Highway;*

Real property owned by Phebe S. Armstrong, which property is located in Lot 27, Block 52, in the Town of North Bend, Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10 and is further identified in the records of the Highway Commission

as file R 9497, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 22, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

At 2:00 p. m. Chairman Cabell made the following announcement with respect to the bids received on the previous day for the construction of the

MAR 20 1942

North and South Units of the Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County:

"With respect to the bids received for the North Unit of the Antelope Creek-Medford Section of the Crater Lake Highway, the Commission considers the low bid, which was submitted by Berke Bros., Portland, in the amount of \$312,887.50, to be a satisfactory bid and has awarded this contract to Berke Bros. at their bid price.

"The Commission has rejected all bids received for the construction of the South Unit of the Antelope Creek-Medford Section of the Crater Lake Highway and has ordered the Engineer to readvertise this project for new bids at the earliest possible time."

The Commission thereupon confirmed Thursday, April 2, 1942, as the date for its regular meeting in Portland, and instructed the Secretary not to schedule any delegations for such meeting unless the matters to be discussed are urgent.

The Commission discussed House Resolution No. 6750 now before Congress which resolution exempts from state, territorial and local taxes the sale, purchase, storage, use or consumption of tangible personal property and services for use in performing defense contracts. The Engineer pointed out that, if this resolution is enacted into law, it will exempt contractors and defense workers from payment of gasoline taxes and motor transportation fees, and the state's annual income from such sources will be reduced between \$1,000,000 and \$2,000,000, which the state cannot afford to lose, particularly in view of the reduction in state highway income which is anticipated by reason of tire rationing and the falling off of tourist traffic. It was his thought that everything possible should be done to prevent the adoption of this resolution or, at least, to eliminate therefrom the provisions that relate to the state taxes on gasoline, motor transportation fees and motor vehicular taxes. The Commission concurred in the viewpoint of the Engineer and thereupon authorized the sending of the following telegram relative thereto to each member of the Oregon delegation in Congress:

"Rationing of motor vehicles and tires is expected to reduce state highway income at least two million dollars below income of 1941. By curtailment of expenditures and construction programs wherever possible state will be able to carry on its maintenance operations, to meet its bond obligations and to meet its commitments in connection with federal projects on access roads and on strategic network in 1942. If, however, House Resolution 6750 exempting defense contractors from payment of gasoline tax and motor transportation fees should be passed, state income will be reduced an additional amount between one million and two million dollars forcing the state to borrow a like amount or to repudiate commitments on cooperative projects involving that amount of state participation. In 1943 the reductions in income mentioned will be double what they are in 1942 and will aggregate approximately six million dollars leaving the state without any funds for construction and with barely sufficient income to meet bond obligations and maintenance.

We urge you to exert every effort to prevent adoption of House Resolution 6750 or at least to delete from Bill provisions relating to state taxes on gasoline, motor transportation fees and motor vehicular taxes."

The Engineer brought up for discussion the matter of increasing the salaries of highway department employees who now receive less than \$200.00 per month, including both hourly-paid employees and employees who are receiving a monthly salary. He recommended increasing the rates \$10.00 per month for each employee of this class provided a \$200.00 per month maximum is not exceeded. He also recommended an increase of \$15.00 per month, from \$135.00 to \$150.00, for weighmasters who are obliged to be away from headquarters a considerable part of the time. He explained that the increases are recommended due to increased living costs, which especially affect the employees in the lower brackets. The matter was discussed at some length, but the Commission deferred its decision until the next meeting.

The Engineer also brought up for discussion the matter of increasing the salaries of men employed on engineering crews in the vicinity of the Corvallis and Medford cantonments. He said that, due to construction activities at these cantonments, it is impossible for such engineering employees to secure living accommodations at reasonable cost, inasmuch as available facilities have been taken up by cantonment workers. He gave as his thought that special consideration should be given to the men on these engineering crews and that they should be allowed an additional amount to take care of this expense. He suggested an allowance of \$20.00 per month for such purpose, during the time that they are engaged in work that is affected by the cantonment conditions which, he thought, would be about eight months. After due consideration the Commission approved the recommendation subject to the condition that it shall apply only to the engineering crews that are engaged on highway work at each of these cantonments and are residing either in Albany, Corvallis, Monmouth, or Medford.

The matter of constructing an airplane flight strip along the Wolf Creek Highway in the vicinity of North Plains had the attention of the Commission. The Engineer advised that a site has been selected which meets with approval of the army authorities, which site is situate along a section of the Wolf Creek Highway that will not be constructed until after the war is over. The plan, he said, is to construct the flight strip on the highway alignment so that it can be used as a section of highway when the present emergency is over and when it is not needed as a landing place for airplanes. The Commission indicated approval of such an arrangement and authorized the Engineer to proceed with construction of the flight strip when proper governmental approval has been obtained.

The Commission discussed the establishment of a 40-mile-per-hour speed limit for all traffic operating over state highways as has been requested by President Franklin D. Roosevelt in a letter directed to the Governor of each

state, in order to conserve gasoline and to avoid unnecessary wear on automobile tires. The Attorney advised that, according to the Attorney General, the State Highway Commission does not have authority to make a blanket order reducing the speed limit, although it does have authority to reduce or increase the speed limit on certain sections of the highway if the Commission considers such modifications justified by the physical features of the highway. The Commission's authority, he said, extends only to state highways outside of incorporated cities and towns. The Commission decided, after discussion, to convey such information to Governor Charles A. Sprague, should he direct an inquiry to the Commission with respect thereto. It was the thought of the Commission, however, that it should cooperate with the President and the Governor in so far as possible in this regard, and, accordingly, the Commission instructed the Engineer to issue an order limiting the speed of all highway department equipment to 40 miles per hour when the request for such reduction has been received from the Governor.

In this connection the Engineer recommended the adoption of a 35-mile-per-hour speed limit along the Pacific Highway West through the Corvallis cantonment and along the Crater Lake Highway through the Medford cantonment. The Commission considered the adoption of such speed limit through these areas justifiable and advisable and accordingly approved the recommendation. The following resolutions relative thereto were thereupon adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and

does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said section of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway:..... Pacific Highway West

Highway number:..... 1W Route number:..... 99W

	Location of Termini	Established Speed
M. P.	74.17.....to M. P.	78.50.....; ..35..miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

MAR 20 1942

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway:.....Crater Lake Highway.....

Highway number:.....22.....Route number:.....62.....

	Location of Termini	Established Speed
M. P.	6.70.....to M. P.	9.75.....}...35.....miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Engineer requested instructions relative to improvement of the roadways within the State Fairgrounds property in Salem. He explained that an army cavalry unit is headquartered at the Fairgrounds and that Colonel Hazeltine, who is in charge, has asked the state to repair the roads which are in very bad condition, so that the army equipment may be moved over them rapidly, if occasion necessitates, which cannot be done under present conditions. He estimated the cost to gravel the roads at \$7,500 and to provide an oiled surface improvement at \$10,000, and suggested approval of the project with state forces if arrangements can be made with the State Fair Board to pay the costs involved. The Attorney advised that the Commission has legal authority to make this improvement, if it so desires, but in his estimation, if the work is undertaken an agreement should be reached with the State Fair Board for reimbursement. The Commission approved the project and the advancement of state funds to pay the costs involved, it being understood, however, that before the work is commenced a written request for the improvement should be received from the army officials, and a written agreement should be entered into with the State Fair Board relative to costs. The Attorney was instructed to prepare an appropriate form of agreement with the State Fair Board covering the matter and to include therein provision for reimbursement of the cost within five years.

The Secretary presented a letter from the Public Utilities Commissioner inquiring whether or not the Commission expects to extend the privilege

heretofore granted log haulers to operate trucks over state highways on Saturday afternoons, Sundays, and during certain hours of darkness, which privilege automatically expires on June 1, 1942, unless extended. The Commission deferred decision in the matter until a future meeting.

The Attorney presented an offer from Mr. H. L. Claycomb, Ashland, to purchase, at the rate of fifty cents per square foot, plate glass windows in two buildings that were acquired in connection with the proposed improvement of the Pacific Highway in Ashland. Said buildings were formerly owned by H. S. Harrison and Clara Engle. He recommended acceptance of this offer. The Commission approved the sale at the price quoted.

The Attorney also presented an offer from Briggs and Briggs, attorneys for a Mr. Butler, Ashland, to purchase the plate glass windows in a building acquired from Mr. Butler in connection with the Ashland improvement. He advised that the offer is \$350 for the windows, less a credit of \$100 for the performance of a certain amount of demolition work in order to recover the glass, which work the state would have to pay for later on in any event. He gave as his thought that the offer is fair and reasonable and recommended acceptance of the same. The Commission approved the recommendation.

The Attorney reported that in connection with the acquisition of right of way from Mr. A. D. Jones, at Eugene, the Commission came into possession of a cash register which is of no particular value from the state's standpoint. An offer of \$45 for the purchase of the register, he said, has been received from a Mr. Hoke Smith of Eugene. He recommended acceptance of Mr. Smith's offer. The Commission approved the recommendation.

The Engineer requested authority for the Right of Way Department to proceed with the acquisition of right of way that is needed for the proposed improvement of the John Day-River Quinton Section of the Columbia River Highway, in Sherman County, so that this project can go forward without delay from the right of way standpoint when funds become available to finance construction. He explained that this improvement is the next one to be undertaken on this highway when it is cleared by the Public Roads Administration and the army engineers. The Commission considered it advisable to acquire the right of way and thereupon authorized the Attorney to negotiate options for the same.

The Commission discussed a request from a Mr. Elmer Herried, in behalf of an actor named Murphy, for permission to construct an irrigation ditch on certain park property situate in the northeast quarter of the southeast quarter of Section 27, Township 33 S., Range 1 East, W. M., in Jackson County, which property the Commission has under lease from the federal government as a recreational site. The Attorney advised that the state does not own this land but is simply occupying it under lease from the federal government; also, that the State Parks Superintendent advises that an irrigation ditch on the property would not interfere with the use of the property for park purposes. After discussion the Commission instructed the Attorney to inform Mr. Herried that the state does not own the land but will offer no objections to the construction of the irrigation ditch over the same. (See Park File No. 194 - description of park area)

The Commission discussed a stipulation prepared by the federal government for use in obtaining right of way easements for highway crossings over reclamation canals. The Attorney advised that this is a standard governmental requirement and in so far as it pertains to the case at hand, which is the securing of lease rights on the Boardman-Stanfield Highway near Stanfield, in his estimation is not too drastic. The Commission indicated approval of the stipulation in so far as it pertains to this case but deferred signing the same upon suggestion of the Engineer that the matter should first be discussed with Senator Charles A. McNary and at the next meeting of the Western Association of State Highway Officials.

The Engineer requested instructions as to the disposition of a small building that was used as an engineer's office in connection with the construction of the railroad grade separation structure in Nyssa. He advised that this is a small building of not much value, and that it was erected on property owned by the City of Nyssa. He suggested that the building be given to the city without charge. The Commission approved the suggestion.

The Attorney requested instructions whether or not to advertise for sale certain property, consisting of land and a building, that was acquired from the Fletcher Oil Company in connection with the highway improvement in Nyssa. The City of Nyssa, he said, would like to have the building for use as a library and has asked the Commission to set a price for which the same can be purchased. He was instructed by the Commission to ascertain what the city is willing to pay for the property. If the city offers a fair amount for the same, the Commission will accept it; otherwise, the property is to be advertised for sale in the regular manner.

The Commission discussed a request from the John Day Catholic Church to acquire a portion of the highway right of way in front of their church building in John Day, so as to permit sidewalk and curb construction, et cetera. The Engineer advised that the right of way in front of the church building is somewhat wider than the adjoining section so, if the sidewalk were constructed along the right of way line as established, it would introduce a jog in the sidewalk alignment. He questioned the advisability of giving up any of the right of way that the state now owns because very likely at some future date the Commission will want to widen the adjoining sections in order to make an uniform right of way at this place. The Commission deferred a decision in the matter pending inspection of the premises by Commissioner Oliver and receipt of his recommendation.

The Commission considered and refused an offer received from Mr. A. M. Myer to pay \$50 for that portion of Lot 5, Block 2, Townsite of Glenada, Lane County, which lies outside of the standard width highway right of way that was acquired for the Oregon Coast Highway at this point.

The Commission reconsidered the matter of the sale of certain state-owned property adjacent to the right of way of the Warm Springs Highway at the Madras overcrossing, but deferred action until the next meeting. The Assistant Attorney was instructed to make a complete report on the matter at that time.

A letter was presented from the Swan Lake Moulding Company in regard to the moving of the Associated Oil Company's buildings from property acquired by the state from the Swan Lake Moulding Company for the widening of the state highway on South Sixth Street, Klamath Falls. It appears that the Associated Oil Company is leasing the ground from the Swan Lake Moulding Company and wishes to know if the state will move the buildings off the newly-acquired right of way or will pay for having them moved now if the Associated Oil Company will assume the obligation of surfacing the area in front of the buildings and will maintain the same until such time as the proposed South Sixth Street improvement is completed. The Attorney advised that the Commission previously authorized the moving of the buildings at state expense with the understanding that the state would not be obligated to surface the area in front of the buildings until the highway improvement is completed and that the company has been so informed. He was instructed by the Commission to reconvey such information to the company and to assure it that the state will pay the cost of moving the buildings but will not do anything further until the highway improvement is undertaken.

Reconsideration was given by the Commission to its claim against Clatsop County, amounting to \$5,500, and the request of Clatsop County that the Commission give the county credit for at least a portion of this claim on properties recently deeded to the state for which no charge was made by the county. The Engineer submitted a list of properties that have been acquired from the county without cost and advised that a reasonable cash market value of such properties will at least offset the state's claim. In view of the presentation the Commission considered that the county has fulfilled its obligation. The following resolution accepting the conveyance of such real properties from the county as complete and final payment of the county's obligation and debt to the state was thereupon adopted by the Commission by unanimous vote:

WHEREAS, because of certain contractual obligations and arrangements between Clatsop County and the State Highway Commission Clatsop County became and is indebted to the State in the sum of \$5,500; and

WHEREAS, Clatsop County has by deed conveyed to the State of Oregon, by and through its State Highway Commission, certain real properties, which real properties have a reasonable cash market value of \$5,500; and

WHEREAS, said real properties are identified in the Highway Commission records as follows:

File 2487, which covers property located in Astoria which is being used for maintenance buildings by the State and consists of 1.21 acres.

File 4522, which covers property located near West Lake, which is 13 miles south of Astoria, which property is being used for stockpile purposes and consists of 1.54 acres.

File 3870, which covers property near Cannon Beach Junction being used for stockpile purposes and which consists of 1.00 acre.

File 4663, which covers a tract of land located in Seaside, and which property is being used for stockpile purposes and consists of 1.83 acres.

File 6004, which covers land located in Astoria on the Nehalem Secondary Highway, which is used for stockpile purposes and consists of 1.27 acres.

File 9841, which covers a tract of land consisting of 1.54 acres located near Camp Clatsop and which is being used for a scale site.

File 2492, which covers 0.02 acre of land near Ecola Park and is being used for park purposes.

File 4898, which covers 0.39 acre of land in Seaside and is being used for park purposes.

Also, tract of land at North Fork of the Necanicum River on the Necanicum Highway, title to which has not yet been conveyed by the County to the State, but which property is being used for park and stockpile purposes.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and voting affirmatively, as follows:

1. That title to the real properties described in the above identified files, which properties heretofore have been conveyed by Clatsop County to the State of Oregon, by and through its State Highway Commission, be accepted, including the tract at the North Fork of the Necanicum River on the Necanicum Highway when title is conveyed by the County to the State.
2. That said properties and title thereto be accepted at the total appraised value of \$5,500.
3. That the conveyance of said real properties by the County to the State be accepted as complete and final payment of the County's obligation and debt to the State in the said sum of \$5,500.
4. That the Commission by this resolution expresses its appreciation of the cooperation which Clatsop County, by and through its County Court, has given the State Highway Commission, and pledges a like cooperation with the County in all matters of public interest calling for joint activity on the part of Clatsop County and the State Highway Commission.

The Secretary was instructed to forward a certified copy of the same to Clatsop County Court.

The Commission approved and signed a "petition" and "consent to vacate" a part of Tenth Street and the alley which runs through the center of Block 72

in the original townsite of Redmond, such procedure being necessary in order to provide an enlargement of the state highway department's maintenance headquarters in that town. The Secretary was authorized to sign and acknowledge the "consent to vacate" in behalf of the Commission.

The Attorney requested instructions relative to commencing action to evict Mrs. Ines Van Dyke from Casey State Park, in Jackson County. He explained that Mrs. Van Dyke consistently ignores orders to vacate the premises and it appears necessary to take legal action against her. The Commission authorized the Attorney to start such legal action about the first of June.

The Attorney also requested instructions relative to the Enyart condemnation case at St. Helens. He explained that this case has been up for trial for a long time but for one reason or another the Attorneys for the owners have been able to have the case postponed and in each instance he has approved of the postponement as an accommodation; however, he is anxious to have the case closed, hence his request for instructions in the event the owners' attorneys again ask for postponement. He was instructed by the Commission to let the case come up in court in the regular manner.

The Engineer reported on the need to store road oil to serve as a reserve during the present tank car shortage. He gave as his thought that storage tanks should be constructed at strategic points so as to insure availability of road oil to carry on the coming season's oiling operations by state forces. He estimated the cost of the tanks at \$2,450 each, and requested authority to erect five tanks at the following locations: Philomath in Benton County, Eola in Polk County, Redmond in Deschutes County, Pendleton in Umatilla County, and Baker in Baker County. The tanks, he said, will be of wooden construction and will be built by state crews. After discussion the Commission by unanimous vote authorized construction of five tanks at an estimated total cost of approximately \$12,000; however, instructed the Engineer to first ascertain whether or not any of the oil companies have empty storage tanks available which the state might use in lieu of the construction of its own tanks.

The Secretary presented a letter from Governor Charles A. Sprague advising that he is in receipt of letters from Rear Admiral C. J. Freeman, Commandant of the Thirteenth Naval District, from Lieut. Gen. J. L. DeWitt, Commanding the Fourth Army and the Western Defense Command, and a telegram from John L. Rogers, Director of the Division of Motor Transport, Office of Defense Transportation, requesting that for the period of the present war emergency there be a relaxing of Oregon restrictions so that vehicles of the size tolerated in adjacent states may be allowed to operate upon Oregon highways; also advising that he has had investigations made by competent individual authorities which thoroughly convince him of the absolute necessity of going just as far as the Oregon laws will allow along the lines requested; and further advising that this, in his judgment, is indispensable in support of the war effort, for the providing of the population of this state and for the maintenance of industries operating in Oregon. It was the Governor's recommendation that the Commission go as far as it can under the law in issuing permits to allow trucks, of dimensions and weights corresponding to those in adjoining

states, to operate over the Oregon highways, due regard being given to public safety and with the understanding that permits issued are based definitely upon military necessity and for the duration of the present emergency only. The Commission considered that such communication is ample authority for the issuance of permits authorizing movements of vehicles measuring 60 feet overall in length and having a gross weight of not to exceed 68,000 pounds, which is legal in the adjoining states. Accordingly, the resolution relative thereto, which was adopted by the Commission at the previous meeting, was thereupon confirmed by unanimous vote as was also telephonic authority previously given the Engineer authorizing the issuance of permits in conformity therewith.

The Attorney brought up for discussion matters pertaining to the Federal Labor Act as applied to state highway contracts. He advised that he has received inquiries from a number of contractors whether or not they must adhere to a 40-hour week or will be permitted to operate under a 48-hour week. The Engineer advised that this matter is fully covered by the specifications and in his estimation this is a matter that the contractors' attorneys should decide. The Commission took no action in the matter.

The Engineer requested authority to purchase the following equipment:

8 auxiliary gasoline motor generator sets to produce current for emergency operation of radio stations at Salem, Milwaukie, Medford, Roseburg, Coquille, Astoria, Klamath Falls and LaGrande. He advised that a request has been received from Lieutenant Colonel Raymond F. Edwards, Commander of Infantry, Vancouver Barracks, Washington, recommending that steps be taken to insure the operation of key radio stations in the event of commercial power failures, especially the stations serving the coastal areas, so that the operations of the same may be assured during emergencies. He also said that the auxiliary generator sets could be used to good advantage in normal times in the event of failure of regular power supplies on account of storms, fire, et cetera. He estimated the cost involved at \$7,700 for the six first-mentioned stations which are an immediate necessity and \$3,400 for the Klamath Falls and LaGrande stations which possibly could be installed later, making a total of \$11,100.

4 Monroe calculating machines. Total estimated cost \$880, less 15 per cent.

2 loadometers for use of weighmasters. Estimated total cost \$1,150.

3 electric-motor-driven compressors of five cubic-foot capacity. Estimated total cost \$360.

The Commission by unanimous vote approved the purchase of such equipment.

The Attorney advised that, in connection with the acquisition of right of way for the Eugene-Springfield Project, a certain service station was purchased including a compressor which he thought might be used to good advantage. The Commission instructed the Engineer to ascertain whether or not this compressor is now in use.

The Secretary requested instructions relative to the granting of special emergency transportation permits for movements 60 feet overall in length and having a gross weight of 68,000 pounds over the Green Springs Highway between Klamath Falls and Ashland. He explained that there are numerous sharp curves at the westerly end of this highway which will not permit movements 60 feet overall in length without crossing the highway center line, which is the reason that this highway was not included in the previously-approved list, although it is possible for legal length loads to negotiate these curves without difficulty. He also explained that certain haulers have contracts to deliver lumber from Klamath Falls to the army cantonment at Medford necessitating the use of this highway and, because of the urgency of the delivery of the lumber, they would like to haul loads weighing in excess of the legal statutory limit. The Commission authorized the granting of such permits on this highway provided the overall length of the vehicle and load does not exceed 50 feet and provided further that the gross weight of vehicle and load or vehicles and load does not exceed the limit provided in the emergency permit.

The Secretary also reported the application of W. J. Lichty, Eugene, for a permit to haul piling 79 feet long over the Deadwood Secondary Highway and the Siuslaw Highway from the Deadwood district to Swisshome, there being 160 such piling which he was unable to deliver under special authority heretofore given him by the Commission. The Commission authorized the granting of a 30-day permit to move these piling, subject to the conditions of the previous permit.

The Commission discussed and deferred a decision with respect to permitting trucks loaded with chromium ore and having a gross overload of 45,000 pounds to operate over the Oregon Coast Highway between Port Orford and Coquille. The matter is to be reconsidered at the next meeting of the Commission at which time more detailed information is to be presented.

A letter was presented from the Oregon-Washington Bridge Company requesting that the state maintain guards at the southerly end of the Hood River Bridge over the Columbia River so as to prevent destruction of the bridge by saboteurs. The Commission considered this a private matter in view of the fact that the bridge is privately-owned and thereupon denied the request.

The Commission discussed the advisability of attending a meeting of the Western Association of State Highway Officials which is to be held in Salt Lake City, Utah, on April 17 and 18, 1942. It was decided that Chairman Cabell and the State Highway Engineer should attend such meeting at state expense provided Governor Sprague approved the out-of-state expenditure.

MAR 20 1942

In this connection the Secretary presented a bill from the Western Association of State Highway Officials for payment of Oregon's 1942 membership in this association, amounting to \$25.00. The Commission approved the payment of this fee.

The Commission discussed a letter from the Multnomah Civic Club suggesting that Front Avenue, Portland, be renamed Douglas MacArthur Boulevard in honor of General Douglas MacArthur. The Commission indicated a sympathetic attitude toward the matter but declined to take action, it being the Commission's thought that this is a matter without its jurisdiction and that the naming of streets in the City of Portland is a function of the city council.

A letter was presented from the Honorable Wm. O. Powell, County Judge of Yamhill County, requesting the assistance of the Commission in securing federal access moneys with which to finance construction of the road which extends easterly from McMinnville to the city's airport. The Engineer was instructed to discuss the matter with Colonel C. R. Moore and to then advise Judge Powell of the necessary procedure to obtain such moneys.

In this connection Commissioner Clough advised that, during a recent visit to McMinnville, he discussed this matter with Mr. E. C. Apperson who expressed a desire for the members of the Commission to attend one of their civic meetings in the near future so as to give local people an opportunity to be heard with respect to this and other projects. It was decided that Chairman Cabell and Commissioner Clough would meet with the McMinnville people on April 1, immediately preceding the Commission's meeting on April 2, if that is satisfactory with the local group. The Engineer was instructed to ascertain the pleasure of Mr. Apperson relative thereto.

The Attorney brought up matters pertaining to construction of the Front Avenue project past the Public Market Building, Portland. The matter was discussed at considerable length following which the Commission by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the State of Oregon and the City of Portland are cooperating in the acquisition of rights of way necessary for the promotion and completion of the Front Avenue Project in the City of Portland; and

WHEREAS, one of the properties involved in said right of way acquisitions is the property generally known as the Public Market, fee title to which is in the Public Market Company of Portland; and

WHEREAS, there exists between the owners of said property and the City of Portland a controversy with respect to whether title to said property shall remain in the Public Market Company of Portland or be taken over by the City, which said controversy is now the subject of litigation pending in the Supreme Court of the State of Oregon; and;

WHEREAS, until the issue involving title to said property is finally determined, the compensation to be paid by the City and the State for the portion of said Public Market property needed for right of way in connection with the said Front Avenue Project cannot be measured or paid; and

WHEREAS, the City, pursuant to charter authority, instituted condemnation proceedings for the purpose of acquiring along with other properties needed for said project a portion of the Public Market property, and in connection with said proceedings the compensation to be paid for and the damage imposed on said property was determined by the City in connection with said proceedings, and an award in keeping with such appraisal was made by the City, but the owners of said property refused to accept the award and appealed therefrom, which appeal is now pending in the Circuit Court of the State of Oregon for Multnomah County; and

WHEREAS, said Front Avenue project cannot be completed without encroachment upon the said Public Market property, and the accomplishment of certain changes in the heating facilities now a part of said Public Market Building and the making of certain other alterations; and

WHEREAS, the owners of said property desire to cooperate with the public authorities in the promotion and accomplishment of the Front Avenue Project, but because of issues involved in the said pending litigation the owners are of the opinion that they should not surrender any of their rights or in any way jeopardize their interests; and

WHEREAS, it is imperative that the State Highway Commission and its contractor be permitted immediately to go upon the said Public Market property and make certain changes or alterations in the heating facilities and make other changes, all of which are disclosed on the exhibits attached hereto.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and voting affirmatively, as follows:

1. That the City of Portland be and it hereby respectfully is requested to, by appropriate ordinance or other official act, authorize and empower the Highway Commission with its own forces and/or by its contractor or contractors to go upon the property known as the Public Market property in Portland, Oregon, and change, alter and reconstruct the heating facilities now a part of said Public Market Building and make other changes, all of which are disclosed and shown on the blueprint and in the specifications hereto attached, or are expressly set forth herein.*

MAR 30 1942

2. That the Public Market Company of Portland, in which company is vested legal title to said Market property be likewise and it hereby is requested, subject to conditions hereinafter set forth, to consent to and permit the State to go upon said property and make the changes, alterations and improvements herein proposed.

3. That the changes, modifications and alterations for which authority and approval hereby is requested shall consist of the removal of the existing concrete platform along the east side of the Public Market Building, including the footings of the platform, and the surfacing or paving of the area between said building and the harbor wall, and shall consist also of the changes and modifications disclosed and shown on the blueprint marked Exhibit A and in the specifications entitled "New Sawdust Conveyor for the Public Market Building in Portland, Oregon", marked Exhibit B, and the specifications entitled "Relocation of Fuel Oil Tank in Public Market Building, Portland, Oregon", marked Exhibit C, each of which said exhibits is attached hereto and made a part hereof.*

4. That nothing in this resolution and no action taken by the City of Portland and/or by the Public Market Company of Portland in response to and with respect to this resolution shall be deemed or construed in any way to restrict, impair or control either the City of Portland or the owners of said Public Market Building in any litigation now pending either in the Supreme Court of the State of Oregon or in the Circuit Court of the State of Oregon for Multnomah County, but said matters and issues involved therein, and all of the rights and interests of the parties concerned in said pending lawsuits, shall remain unaffected by anything which the Highway Commission may do or any encroachment which may be made upon said property by the State in the furtherance of said Front Avenue Project. In other words, the rights of all parties involved, including the State, shall be in all particulars preserved.

5. It is recognized that when the platform on the east side of the Market Building has been removed some other arrangement and some special privileges will have to be provided for the delivery of produce and other commodities at the Front Street entrance, and, therefore, and for such purpose the City is requested to provide by ordinance or otherwise for such temporary or substitute arrangements and privileges.

6. That the Chief Engineer of the Oregon State Highway Commission be instructed, if and when said alterations and changes are made, to employ every practical and feasible method and observe every precaution so that there may be reduced to the minimum any and all interference to or with the occupants of said Public Market Building and the patrons of the same.

7. That no consent given or other action taken by the Public Market Company of Portland shall be deemed or considered as an

approval or acceptance of any alteration or installation contemplated hereby as satisfactory, nor as relinquishing any right to damages or compensation based on the fact that the new installations may be less satisfactory, less convenient or less economical to operate than the present facilities, and that the Market Company does not waive, relinquish or release any rights of any kind or character for damages or compensation of any kind based on, arising out of or connected with any changes or alterations, installations or other work carried on by the Highway Commission and/or the City of Portland, as contemplated by this resolution, and any consent given by the Market Company shall be entirely without prejudice to any right of any kind or character and without being deemed to have waived any right to any damages of any kind or character or in any amount.

8. That a duly certified copy of this resolution be delivered to the Honorable R. E. Riley, as Mayor of the City of Portland, and a duly certified copy delivered to Mr. P. W. Cookingham, as Attorney for the owners of said Public Market.

9. That this resolution be entered in the minutes and records of the Commission as of the date of March 20, 1942.

*Resolution and map filed in General Files (Administration, Commission, Resolutions - Right of Way file)

The Attorney reported on the matter of paying federal tax in connection with purchases of electrical energy. He advised that, as instructed by the Commission at the previous meeting, he wrote the Portland General Electric Company relative to the payment of this tax and received a reply from the company's attorney, Mr. Peck, that the company is required by law to make the charge and that the law does not exempt the state from payment of the tax nor is there any provision made in the law for rebate in behalf of the state so there appears to be nothing that the company can do about it regardless of the fact that the company does not pay over to the government the moneys it receives by reason of the tax. The Attorney advised that he does not concur in the opinion of Mr. Peck and read aloud a provision of the law which states that no tax shall be imposed in certain instances. The Engineer advised that there are several vouchers in process of payment in favor of the Portland General Electric Company and suggested that such vouchers be not paid until this controversial matter has been decided. The Commission approved the suggestion and instructed the Attorney to continue his investigations of the matter.

The Commission discussed a letter from Earl C. Reynolds, Executive Secretary, Klamath County Chamber of Commerce, urging the Commission to contract additional improvements on The Dalles-California Highway, between Klamath Falls and Modoc Point, so as to complete the reconstruction of this section to modern standards at the earliest possible time. The Engineer

MAR 20 1942

advised that he advised Mr. Reynolds of the status of highway funds and the necessity to secure army approval on all projects before federal funds could be obtained to finance construction work. The Commission approved the reply.

The Engineer reported results of investigations relative to the routing of south-bound Pacific Highway traffic along Front Street in Medford, rather than on Central Avenue, as was suggested by a delegation which appeared before the Commission at the previous meeting. (See detailed report in letter dated March 13, 1942, from K. D. Lytle, Division Engineer, to H. G. Smith, Construction Engineer.) After full discussion of the facts presented the Commission decided unanimously to adhere to the original plan which provides for the routing of such traffic along Central Avenue.

The Engineer also reported on the cost to conduct snow removal operations on the McKenzie Highway over McKenzie Pass so as to open up this highway for general public travel on April 15. He estimated such expense at \$1,000 if the work were started at once, and at \$500 if the work were started about April 15. However, he said, in the latter case the highway would not be available for public use until May 1. He recommended the opening of the road by April 15 notwithstanding the extra expense involved. The Commission approved the recommendation.

The Engineer reported receipt of a request from Admiral Freeman of the United States Navy for the further improvement of the Cape Arago Secondary State Highway, as a national defense project. The Commission approved the project and authorized the Engineer to advertise it for bids to be received if and when formal governmental approval has been obtained.

The State Parks Superintendent was present and reported on the following matters:

Acquisition of juniper wayside tracts along the Central Oregon Highway between Bend and Burns:-The Parks Superintendent presented a form of "field" agreement between the State Highway Commission and the United States Department of Interior, Grazing Service, covering the joint preservation of juniper tracts situate along this section, particularly between Bend and Horse Ridge. He explained that there are a number of 40 acre tracts that will be withdrawn from public entry by this agreement, which has been prepared on an annual basis and is to be renewed from year to year; also, that by this agreement the State Highway Department will act in a patrol capacity over the area set aside, but will not be required to assume any expense. The Commission approved the agreement and thereupon signed the same.

Juniper wayside strips between Redmond and Bend:-The Parks Superintendent also brought up for discussion the acquisition of juniper timbered tracts adjacent to The Dalles-California Highway between Bend and Redmond. He stated that these lands are owned by the federal government and the original plan was to effect an exchange of state-owned lands in Harney County for the same, which state lands are owned by the State Land Board but can be purchased by the Highway

Department at the rate of \$2.50 per acre. The United States Grazing Service, he said, has changed its attitude with respect to exchange of the properties and now wants the state to lease the government lands on a yearly basis, as is being done with respect to the preservation of juniper tracts between Bend and Horse Ridge. He condemned such plan in this instance and recommended that the government property be acquired outright in accordance with the original arrangement. The Commission approved the recommendation and instructed the Parks Superintendent to notify the State Land Board and the United States Grazing Service accordingly.

Silver Creek Falls CCC Camp:-The Parks Superintendent reported necessity to renew the Silver Creek Falls CCC Camp for a period of one year, beginning on the first of April, 1942. He explained that this is the only state park camp under CCC Camp jurisdiction in the entire west and that he would like particularly to retain this camp for fire-protection purposes, and recommended approval of the camp. The Commission approved the recommendation.

In this connection the Parks Superintendent presented a progress report for the month of February on operations in this camp, which report the Commission approved by unanimous vote.

Tree cutting in Emigrant Park:-The matter of permitting the Pacific Telephone and Telegraph Company to fall certain trees in Emigrant Park to facilitate construction of a new telephone pole line was brought up for discussion by the Parks Superintendent. He advised that the company has already built its pole line and advises that there are some 56 trees located on the Emigrant Hill timber reserve, between mileposts 258 and 259, which are a menace thereto. The company, he said, has asked the privilege of cutting these trees and has agreed to pay for them. He recommended approval of the request. The Commission approved the recommendation.

Addition to state park west of Eugene:-The Parks Superintendent advised that the Commission is now leasing from the federal government certain O & C lands situate at the summit of the Siuslaw Highway, west of Eugene. As a protection for this park, he recommended the leasing of additional land from the government at this point which, he said, can be obtained upon the payment of a yearly rental charge of \$5.00, such lands being described as the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 1, Township 16 South, Range 7 West, W. M., Lane County. The Commission approved the lease of such additional lands.

Parks Department financial report: The Parks Superintendent reported the following report on activities of his department:

MAR 20 1942

STATE PARKS DEPARTMENT

	<u>1942 Budget</u>	<u>Expenditures to 2/28/42</u>	<u>Balance</u>
Acquisition (see detail below)*	\$ 1,990.40	\$1,468.41*	\$ 521.99
Betterment	2,921.69	3,031.60	109.91-
Operation & Maintenance	42,334.85	6,400.66	35,934.19
	<u>\$47,246.94</u>	<u>\$10,900.67</u>	<u>\$36,346.27</u>

Acquisition Detail*

Lane County:	Wood Lot	\$ 30.00
Linn County:	Rova E. Conn	500.00
Hood River County:	Frances G. Horn	175.00
Douglas County:	K. R. Richards	700.40
Legal Costs		<u>63.01</u>
	Total Acquisition Costs -	<u>\$1,468.41</u>

The Commission approved the report by unanimous vote.

Cancellation of lease given to Paul Schuttpels:-The Parks Superintendent recalled that on March 5, 1938, the Commission entered into an agreement with Mr. Paul Schuttpels by which Mr. Schuttpelz was given a temporary easement for a roadway over and across certain state park property in Douglas County, and that it was provided that such roadway should be constructed not more than 100 feet southerly from the north boundary line of the park. Mr. Schuttpels, he said, has not constructed the roadway at the location agreed upon although he did build the road in another location. He further stated that certain logging interests now desire to construct and use a logging road in the location specified in the agreement for Mr. Schuttpelz's road. He recommended approval of this request and the cancellation of the Schuttpelz easement in view of the fact that Mr. Schuttpels has not exercised his rights therein. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution in regard thereto:

MAR 20 1942

WHEREAS, the OREGON STATE HIGHWAY COMMISSION and PAUL SCHUTTPELZ made and entered into an agreement on the 5th day of March, 1938; and

WHEREAS, by the terms of the said agreement the Highway Commission granted to Paul Schuttpels a temporary easement for a roadway over and across the East half of the Southeast quarter (E $\frac{1}{2}$ SE $\frac{1}{4}$) of Section 25, Township 22 South, Range 13 West, W. M., Douglas County, Oregon, which said roadway was to be located not more than 100 feet southerly from the north boundary line of the State's property, and the center line of the said roadway was to commence at approximately highway engineer's station 90+30 on the Oregon Coast Highway and extend thence easterly approximately 250 feet to the property of the said Paul Schuttpels; and

WHEREAS, the said Paul Schuttpels has not availed himself of the said easement and has not constructed the roadway at the location agreed upon; and

WHEREAS, the terms of the said agreement provided that the said easement was terminable by the Highway Commission without liability to the said Paul Schuttpels, if and when, in the judgment of the State Highway Commission, the interests of the general public will be best served by so doing; and

WHEREAS, it is now the opinion and judgment of the State Highway Commission that the interests of the general public will be best served by terminating and canceling the said easement;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby terminate and cancel that certain easement for roadway purposes granted to Paul Schuttpels by that certain agreement made and entered into the 5th day of March, 1938, by and between the State Highway Commission and the said Paul Schuttpels.
2. That the Secretary of the State Highway Commission be and he hereby is instructed to mail, by registered post, a copy of this resolution to the said Paul Schuttpels.
3. That this resolution be entered in full in the minutes and records of this Commission.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them

MAR 20 1942

and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

- Prospect - - - - 1-1429 - Baker Rock Production Project, Old Oregon Trail,
Baker County. 2nd authorization - \$500
Total to date \$700.
- Right of Way - - 4-1464 - Astoria-Seaside Section, Oregon Coast Highway,
Clatsop County. 1st authorization - \$700
- Plans- - - - - 4-1455 - Neawanna Creek-Mecanicum River Sec., Oregon Coast
Hwy., Clatsop County. 2nd authorization - \$570
Total to date \$3,570.
- Plans- - - - - 12-1427 - Beech Creek Section, Pendleton-John Day Highway,
Grant County. 2nd authorization - \$500
Total to date \$2,500.
- Location - - - - 18-1452 - Modoc Point-Parkley Springs Section, The Dalles-
Calif. Hwy., Klamath Co. 4th authorization- \$1,855
Total to date \$8,480.
- Plans- - - - - 22-1447 - Sheep Ridge Section, Santiam Highway, Linn County.
1st authorization - \$500
- Plans- - - - - 23-1425 - Baker County Line-Ontario Section, Old Oregon Trail,
Malheur County. 2nd authorization - \$800
Total to date \$13,800.
- Loc. & Plans - 226-1458 - Portland-Columbia Airport Section, Portland-Columbia
Airport Hwy., Multnomah County.
1st authorization - \$400
- Plans- - - - - 130-1441 - Weston Mt.-McDougall Camp Section, Weston-Elgin Hwy.,
Umatilla County. 2nd authorization - \$124
Total to date \$1,034.
- Location - - - - 2-1430 - Rickreall-Corvallis Section, Pacific Highway West,
Benton County. 1st authorization - \$14,000
- Plans- - - - - 3-1433 - Wilsonville Flight Strip, West Portland-Hubbard Hwy.,
Clackamas County. 1st authorization - \$500
- Test Pit - - - - 17-1417 - Sexton Mountain Section, Pacific Highway, Josephine
County. 1st authorization - \$900
- Test Pit - - - - 29-1438 - Honey Ranch-Three River Quarry Section, Three Rivers
Hwy., Tillamook County. 1st authorization - \$40

Plans - - - - 130-1440 - Helix Jct.-Oregon-Washington Hwy. Section, Havana-Helix Hwy., Umatilla Co. 2nd authorization - \$400
Total to date \$900.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, contract No. 2396, for grading and surfacing the Scappoose-Multnomah County Line Section of the Columbia River Highway, in Columbia County, requested an extension of time, from September 30, 1941, to July 1, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to bad weather conditions and shortage of skilled labor and material. The Engineer advised that the reasons given by the contractor for overrun of time limit are substantially correct. Mr. Houck, he said, had numerous jobs under way during the past season and under normal conditions it would have been possible for him to secure extra equipment to speed up the progress of the work; however, due to the war emergency with its restricted priorities such equipment was not available and it was difficult for Mr. Houck to obtain satisfactory skilled labor. He further advised that the state will incur considerable extra expense for engineering and the general traveling public will be somewhat inconvenienced due to non-completion of the work until 1942; nevertheless, for reasons stated, he recommended that the extension of time requested be granted without penalty notwithstanding that the Public Roads Administration does not concur therein, which means that the state will have to bear the extra engineering costs. A letter was presented from the Public Roads Administration stating its position. After discussion the Commission voted unanimously to grant the extension of time requested without penalty as recommended by the Engineer.

M. L. O'Neil & Son, contract No. 2422, for grading, surfacing and oiling the Plunkett Creek-Read Creek Section of the Kings Valley Secondary Highway, in Benton County, requested an extension of time, from August 31 to October 18, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to bad weather conditions and their inability to obtain oiling equipment. The Engineer advised that all work on this job, except the oiling work, was completed within the specified time limit and that it was not possible for the contractor to do the oiling work because of difficulties in securing oiling equipment. Furthermore, it would not have been possible for the contractor to have completed the job on time if he had had the equipment available because of bad weather conditions during the latter part of August and throughout the month of September. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Chester T. Lackey, contract No. 2434, for the Lapine Rock Production Project on The Dalles-California and Fremont Highways, in

MAR 20 1942

Deschutes and Klamath Counties, requested an extension of time, from September 30, 1941, to January 3, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to bad weather conditions, delays encountered in securing repair parts and satisfactory labor. The Engineer advised that this contract was a maintenance material job and that Mr. Lackey was unable to start the work for a considerable time after the award of the contract because of other work that he had under way on the Central Oregon Highway. He further stated that no inconvenience has been suffered by the general traveling public by reason of the delay and there will be no increase in the cost of engineering supervision. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation.

M. L. O'Neil & Son, contract No. 2449, for grading the Taylor Creek Section of the Ochoco Highway, in Wheeler County, requested an extension of time, from October 31, 1941, to January 2, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing satisfactory labor and the fact that there was more solid rock to be excavated than was anticipated. The Engineer advised that the contractor's failure to complete this project within the specified time limit did not inconvenience the general traveling public in any way, neither did it increase the state's expense for engineering supervision. He further stated that the contractor experienced considerable difficulty in securing men and materials for the job. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. L. Gates, contract No. 2495, for grading and surfacing the Kimberly-Simas School Section of the Kimberly-Long Creek Secondary Highway, in Grant County, requested an additional extension of time, from February 28 to June 1, 1942, within which to complete this job. He attributed his failure to complete the project on time to adverse weather conditions which made it necessary to close down the work. The Engineer advised that it was necessary to increase the excavation quantities on this job in order to raise the grade line above possible high water; also that, due to unusual conditions prevailing last summer, it was impossible for the contractor to obtain additional equipment to operate his several jobs simultaneously. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. O. Ekstrom, contract No. 2502, for furnishing crushed rock in stock piles for the Detroit-South Santiam Junction Section of the North Santiam Secondary Highway, in Linn and Marion Counties, requested an extension of time, from October 31, 1941, to February 7, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the muddy condition of his quarry

which caused considerable trouble in his plant operation; also to bad weather conditions and delays in securing machinery and repair parts. The Engineer advised that this contract was awarded two weeks after bids were taken for the same, which would automatically extend the time for completion. He also advised that the contractor experienced considerable trouble in securing suitable repair parts, as stated. The delay, he said, has not inconvenienced the general traveling public and the state has not incurred any extra expense for engineering supervision. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Porter W. Yett, contract No. 2547, for grade widening on the Interstate Bridge-Oregon Slough Section of the Pacific Highway East, Multnomah County, requested an extension of time, from January 15 to January 31, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions and to changes ordered by the Engineer with respect to the borrow pit, involving negotiations with the adjacent property owners. The Engineer advised that the reasons given by the contractor for overrun of time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2318, 2422, 2434, 2449, 2502 and 2547, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2318, with W. D. Miller Construction Company, for construction of a bridge and a concrete siphon on the Lost River-Malin Section of the Klamath Falls-Malin Highway, in Klamath County. Completed June 25, 1941.

Contract No. 2422, with M. L. O'Neil and Son, for grading, surfacing and oiling the Plunkett Creek-Read Creek Section of the Kings Valley Secondary Highway, in Benton County. Completed October 15, 1941.

Contract No. 2434, with Chester T. Lackey, for the Lapine Rock Production Project on The Dalles-California

MAR 20 1942

and Fremont Highways, in Deschutes and Klamath Counties. Completed January 3, 1942.

Contract No. 2449, with M. L. O'Neill and Son, for grading the Taylor Creek Section of the Ochoco Highway, in Wheeler County. Completed January 1, 1942.

Contract No. 2502, with A. O. Ekstrom, for the Detroit-South Santiam Junction Rock Production Project on the North Santiam Secondary Highway, in Linn and Marion Counties. Completed February 7, 1942.

Contract No. 2547, with Porter W. Yett, for roadbed widening on the Interstate Bridge-Oregon Slough Section of the Pacific Highway East, in Multnomah County. Completed January 31, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Board of County Commissioners of Multnomah County, relative to the construction and maintenance of the Portland Air Base East Access Road.

Agreements with the following cities and towns, covering improvement of certain city streets that are not on state highway routes:

Dayton	St. Helens	Gaston	Chiloquin
Forest Grove	Medford	West Linn	Sherwood

Agreement with Jackson County providing for the maintenance of one-way traffic on the Crater Lake Highway and on Bybee County Road during construction of the Medford cantonment.

Agreement with the Coos Bay Dredging Company, disposing of its claim for extra compensation arising out of contract No. 2339, for the construction of the Bandon Section of the Oregon Coast Highway.

Agreement with Marion County, covering maintenance of the North Santiam County Road between Niagara and Detroit.

Agreement with Benton County, providing for the reconstruction and improvement of the Independence County Road northerly from its

junction with the Albany-Corvallis Highway near Richmond School, a distance of about 4.5 miles, to a junction with the Wells County Road.

Agreement with Clatsop County covering the improvement of the DeLaura Access Road in Warrenton.

Bargain and sale deed conveying unto G. H. Billings and wife a portion of Lot 10, Block 3, City of Ashland. Right of way file No. 9689.

Bargain and sale deed conveying unto Chris A. Vandran property situate in Lots 5 and 6, Block 73, Monteiths Southern Addition to Albany. Right of way file No. 5507.

Bargain and sale deed conveying unto Henry Duyck and wife 10.75 acres of land situate in the east half of Section 33, Township 2 North, Range 3 West, W. M., Washington County. Right of way file No. 6528.

Bargain and sale deed conveying unto H. L. Claycomb and wife three parcels of land situate in Lots 7, 8 and 9, Block 3, City of Ashland. Right of way file No. 9682.

Bargain and sale deed conveying unto W. G. Hellier approximately four acres of land situate in the Northwest quarter (NW $\frac{1}{4}$) of Section 34, Township 31 South, Range 15 West, W. M.; and in the Southeast quarter (SE $\frac{1}{4}$) of the Northeast quarter (NE $\frac{1}{4}$) of Section 33, Township 31 South, Range 15 West, W. M., Curry County. Right of way file No. 10107.

There being no further business to come before the Commission at this time the meeting was declared adjourned at 5:45 p. m.

Bargain and sale deed conveying unto Medford Corporation 0.076 acre of land in Jackson County;

11181

Quitclaim deed conveying unto Medford Corporation 0.081 acre of land situated in Jackson County.

Projects. Bids to be received on following projects at next regular meeting:

Harney County, Buchanan Rock Production Project;

Linn County, Richardson Gap County Road;

Rock production projects to be decided later;

Airplane flight strips.

Tillamook County. Railroad trestle, adjacent to Wolf Creek

Highway. Bids for purchase to be received at next meeting.

Meeting date. August 27, 1942, set for next regular meeting.

Portland, Oregon, April 1, 1942

The State Highway Commission met in regular session at 8:30 p. m. in Room 515 (Imperial Room), Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Dr. E. B. McDaniels, member of the Advisory Committee on Publicity Matters, was present in regard to increasing the Commission's 1942 budget for advertising purposes. He advised that, at a meeting of the committee members on the previous day, it was decided unanimously to recommend to the Commission an expenditure of \$15,000 for space advertising in newspapers printed in California, Washington, and other nearby states, and that he was delegated by the committee to present the matter to the State Highway Commission. It is not the intention of the committee, he said, to recommend any major change in the operation of the Commission's Travel and Information Department. Chairman Cabell thanked Dr. McDaniels for his presentation and advised that the Commission would act on the matter the following day. (Increase approved on following day.)

Mr. Ben Titus, Acting Director of the Travel and Information Department, who was present, advised that a meeting of public advertising agencies from the states of Washington and Idaho and the Dominion of British Columbia is to be held in Seattle on Friday, April 3. He requested authority from the Commission to attend such meeting in order to help arrange a program for funds available so as to avoid a duplication of advertising. The Commission deferred a decision on this matter until the following day. (Approved on following day.)

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with offers that he recommended be made in connection with each. Mr. W. H. Lynch, District Engineer, Public Roads Administration, also sat in on the discussion of the various parcels that are needed for access road improvements, particularly those needed for the revision of the Pacific Highway West through the Corvallis cantonment area. After careful consideration of each item, the Commission approved the offers, Mr. Lynch concurring. The following resolution relative thereto was adopted by the Commission by unanimous vote:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

APR 1 1942

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney reported the results of further negotiations for the acquisition of the C. M. Parker property at Medford, which property is needed as

right of way for the improvement of the Crater Lake Highway at Medford, being right of way file R 10067. He advised that he has reached a satisfactory settlement with the owner of the land, Mr. Parker, who has agreed to accept \$500 per acre for 0.91 acre and 84¢ per square foot for some 36,154 square feet of land, plus \$6,630, which settlement the Commission has already approved; however, Mr. A. W. Denney, who is leasing the property and who is conducting a store business thereon, and whose lease has two years yet to run, will not dispose of the lease for less than \$5,000, which, in his estimation, is an exorbitant price to pay for the same. He recommended an offer of \$2,000 for the lease, and that the lease be acquired by condemnation in the event that Mr. Denney will not accept it. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution authorizing condemnation of the property in the event that Mr. Denney will not accept \$2,000:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office building, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, the State Highway Commission is acquiring from C. M. Parker and Della Parker a parcel of land described as follows, to wit:

A parcel of land lying in the southeast quarter (SE $\frac{1}{4}$) of Section 13 and in the northeast quarter (NE $\frac{1}{4}$) of Section 24, Township 37 South, Range 2 West, W. M., Jackson County, Oregon; the said parcel being described as follows:

Beginning at the northeast corner of said property; said corner also being the southeast corner of D. L. C. No. 60; thence west along the south line of said D. L. C. No. 60 a distance of 137.06 feet to the northwest corner of said property; thence South 19° 19' West along the west line of said property a distance of 154.1 feet to the southwest corner of said property; thence South 54° 35' East along the southerly line of said property a distance of 230.6 feet to the southeast corner of said property; thence North 0° 02' East along the east line of

said property a distance of 279 feet to the point of beginning; containing 0.83 acre, including all right, title and interest to a strip of land 60 feet in width lying immediately east of and parallel to the west boundary line of D. L. C. No. 61, said strip of land now being used for roadway purposes.

and

WHEREAS, A. W. Denney has a leasehold interest in a portion of said property by virtue of that certain indenture of lease entered into by C. M. Parker and A. W. Denney dated March 28, 1941, which lease by its terms expires on the 28th day of March, 1944; and

WHEREAS, in the judgment of the State Highway Commission the acquisition of the unexpired term of the said lease is necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the acquisition of the unexpired term of the said lease is necessary for right of way purposes in connection with the improvement of the Antelope Creek-Medford Section of the Crater Lake Highway.

2. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the lessee of said parcel or tract of land with regard to the compensation to be paid therefor, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the unexpired term of the said lease and all rights therein for the purposes herein stated.

3. That this resolution be entered in full in the minutes and records of this Commission.

The Commission discussed the matter of abandoning portions of the Drews Gap-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway, in Lake County, which property is no longer of value from the state's standpoint since the highway has been reconstructed on other alignment. The Engineer recommended abandonment of the parcels in favor of Lake County. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution relative thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Klamath Falls-Lakeview Highway in Lake County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there were eliminated and made unnecessary as parts of the permanent highway certain sections, which sections are more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragments or portions of right of way heretofore designated and which were heretofore included within the area of the right of way of said highway as formerly located, but which are now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragments of land confined within the area hereinafter described, which fragments or parcels of real property were formerly within the limits of the right of way of the Drews Gap-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway in Lake County, but are no longer parts of the right of way of said highway as the same has been relocated and constructed be and said parcels of real property are abandoned as parts of the right of way of said highway, and said parcels of land are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lake County for highway or other public purposes as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain parts of the old right of way of the Drews Gap-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway in Sections 13 and 14, Township 39 South, Range 18 East, and in Sections 15, 16, 17 and 18, Township 39 South, Range 19 East, W. M., Lake County, Oregon, lying on each side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway, said section also lies between Mile Post 79.5 and 90.5 of said highway, the beginning and ending points with reference to the engineer's stations of the new highway being station 905+45 to station 1139+80 on the northerly side of the reconstructed highway and between station 1149+20 to station 1229+05 on the southerly side of the reconstructed highway.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this

APR 1 1942

reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated March 17, 1942, upon which map or exhibit are reflected the above described parcels of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lake County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned sections of the right of way of said Klamath Falls-Lakeview Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Lake County and beyond any responsibility or supervision by the State Highway Commission.

The Commission discussed a letter from the City of Bend inquiring whether or not the State Highway Commission has use for the Southwest quarter (SW $\frac{1}{4}$) of the Southwest quarter (SW $\frac{1}{4}$) of Section 17, Township 17 South, Range 13 East, W. M., Deschutes County, which the Commission has under lease from the federal government as a source of borrow materials for use in connection with the construction of the Butler Market Road. Mr. Reiter, City Manager, advises that the city has already made arrangements to obtain 160 acres of land in Section 20 on which to construct an airport, but needs the 40 acres in Section 17 in connection therewith if the state will relinquish the same. The Engineer advised that this property is of no further value to the State Highway Department inasmuch as the purposes for which it was acquired have been satisfied. He recommended relinquishment of the state's interest to the property. The Commission approved the recommendation and thereupon signed a letter directed to the Commissioner, General Land Office, Washington, D. C., dated March 26, 1942, relinquishing all of its interest in said property to the United States of America.

*Map filed Right of Way Abandonment and Retention File - No. 102.

The Attorney brought up for discussion a form of stipulation that is required by the federal government in connection with applications of the state for right of way for highway improvements across government land with particular reference to the securing of right of way for The Dalles-California Highway near Klamath Lake, in Klamath County, and for the Boardman-Stanfield Highway, near Stanfield. He read the provisions of the stipulation aloud and called particular attention to the clause relating to the state's obligation in the event of future construction by the government of government facilities. The Engineer offered objections to such provision as a matter of general policy; however, recommended approval of the stipulation in this particular instance because there is no possible chance of its involving the state in a large expenditure. After discussion the Commission approved the recommendation so far as these particular stipulations are concerned but decided to take a stand in opposition to future stipulations in the event that a considerable amount of state funds is involved.

The Engineer reported the results of an inspection of the stock pile site roadway at Toledo, concerning which Mr. H. H. Krause, attorney, Toledo, appeared before the Commission at a previous meeting. He advised that such inspection reveals that the roadway is needed as an access road to the stock pile, and recommended that it be not abandoned in favor of the adjoining property owner. The Commission approved the recommendation; however, instructed the Engineer to maintain a gate across the road at its junction with the state highway so as to keep out trespassers.

The Commission also ordered the preparation of a deed conveying to Mr. Moore, the adjacent property owner, an 8-foot strip of the roadway so as to give him room to pass around his house without trespassing on the state's property.

The Engineer brought up for discussion a proposed modification of the rules and regulations covering transportation of logs over state highways, particularly the rule that requires that violations of axle loadings be cited to the justices of the peace. This is in connection with movements involving the use of tandem axle truck and tandem axle semitrailer. He gave as his thought that a 10 per cent tolerance should be allowed for axle loadings and that violations with respect to this feature should not be cited unless such tolerance is exceeded. He pointed out that the Commission now allows a 5 per cent tolerance on gross loads of 68,000 pounds and a 10 per cent tolerance on the total load on any group of axles provided the gross weight does not exceed 71,400 pounds. After discussion the Commission approved the recommendation subject to the following: PUC plates are to be picked up if the 5 per cent tolerance on an allowable gross weight of 68,000 pounds is exceeded and such violations are to be cited to the justices of the peace. PUC plates are also to be picked up if the actual gross weight on any group of axles exceeds the gross weight as determined by formula by more than 10 per cent and such cases are to be cited to the justices of the peace. PUC plates shall not be picked up for axle overloads and violations of this nature shall be cited to the justices of the peace only if the actual total weight on the axle exceeds by more than 10 per cent that allowed by formula.

In this connection the Engineer brought up for discussion the matter of transporting loads consisting of one large log involving a gross weight considerably in excess of the gross weight allowed by law, including tolerances. He advised that, in the Clatsop County district, operators are endeavoring to market large spruce trees which are cut up into logs of from 20 to 24 feet in length, but these logs are very heavy and cannot be transported over state highways without endangering bridges and breaking down the roadway, and indications are that it will be necessary to let the logs deteriorate in the woods unless the Commission will permit loads weighing in excess of the legal weights. He suggested the granting of permits for single log movements up to 24 feet in length, provided the combined weight of load and equipment does not exceed 65,000 pounds, and provided that the equipment used in connection with such movements consists of tandem axle truck and tandem axle semitrailer, and provided further that the gross weight on any set of tandem axles shall not exceed 34,000 pounds. It was his thought that such concession would make it possible to move most of the big logs.

As to the method of weighing, he suggested that the loads be weighed in the woods so logs can be removed from the hauling equipment in the event that the approved gross weights are exceeded, the weighing to be done on portable scales and under the supervision of a weighman in the employ of the State Highway Department. After considerable discussion of this matter the Commission approved the Engineer's suggestion and decided to discuss the matter from that standpoint with a delegation which is to appear before the Commission on the following day. (The plan as outlined was approved by the delegation. See ahead for details.)

The Commission discussed and approved the following letter prepared by the Engineer, prohibiting state highway department employees from taking part in political activities:

TO ALL HIGHWAY DEPARTMENT EMPLOYEES:

(Circular Letter #283)

Circular letters Nos. 31, 83 and 143, under dates of December 27, 1937, October 20, 1938, and September 19, 1939, signed by the Oregon State Highway Commission, prohibit political activities of any kind by members of the Oregon State Highway Department. Quoting from these letters:

"The Highway Department is a nonpolitical agency of the State of Oregon. No inquiry has ever been made nor is any record kept concerning an employee's political affiliations any more than his religious or fraternal affiliations."

"The holding of office in political parties, the personal solicitation of political funds, and all active participation in political affairs, by employees of the department, are not permitted."

"No one is or will be authorized by the Oregon State Highway Commission to solicit contributions from state highway employees for the campaign fund of any candidate. No employee will be permitted to engage in such solicitation."

Reference is also made to Section 36-2420 and Section 36-2419 of the Corrupt Practices Act, Oregon Code 1930, as follows:

"Section 36-2420. Holders of non-elective positions not to contribute. No holder of a public position or office other than an office filled by the voters, shall pay or contribute to aid or promote the nomination or election of any other person to public office. No person shall invite, demand or accept payment or contribution from such holder of a public position or office for campaign purposes."

In addition to these mandates by the State Highway Commission against political activity, your attention is called to the federal law known as the Hatch Act. Following is a summary of the provisions of this federal law. All employees of the Highway Department are included within the purview of the Act. Under the provisions of this Act, such employees may be members of political groups, but it is improper for them to be active in organizing such groups or to be an officer of the groups or members or officers of any of its committees or to act as such or to address a political group. An employee may attend, as a spectator, any meeting of a political committee to which the general public is admitted, but must refrain from activity. No employee may serve as an election officer in any capacity. He must refrain from soliciting votes or campaign funds, from transporting voters (other than the members of his own family) to and from the polls, from taking part in political parades, from distributing campaign literature, badges, or buttons.

In short, under both the Highway Commission regulations and the federal law, you may vote as you please, but must refrain from all political activity.

The Engineer brought up for discussion the matter of purchase of old steel for use in bridge construction, particularly in connection with bridges that are to be constructed in connection with state highway improvements necessitated by the establishment of army cantonments at Medford and Corvallis. He advised that some old steel rails are for sale at Klamath Falls, but the owner is asking a price in excess of the price ceiling set by the federal government, and there is a question in his mind whether or not he should complete the purchase in view of the governmental rulings. He also advised that he has already directed an inquiry to the Federal Price Coordinator with respect thereto and he is expecting a reply at any time. It was the thought of the Commission that this steel should not be purchased until a reply to the Engineer's letter has been received, and it was so

APP 1 1942

ordered. (Such reply was received by telegram on the following day, at which time the Commission authorized the purchase of the steel rails. It also authorized the Engineer to purchase steel as may be necessary for other purposes. See ahead for details.)

The Attorney reported the results of investigations with respect to the Commission's claim against F. A. Greer and James Saint, Marshfield, who removed some of the guardrail from the old Coalbank Slough Bridge just south of Marshfield without permission from the State Highway Commission. He read aloud the report of his Office Attorney, W. A. Martin, dated February 14, 1942, who made the investigation. It appears from the report there is a bare possibility that the state could recover damages, in any event it would be difficult to secure a favorable judgment in the courts. It was the thought of the Commission that Messrs. Greer and Saint should be prosecuted if there were any possible chance to recover damages, which is very doubtful from the facts disclosed in the report. In view of such question and the fact that the claim is in a small amount, the Commission decided not to take any further action against these men.

Consideration was given by the Commission to the request of County Judge A. R. Bowman, Crook County, at a previous meeting, that the State Highway Commission continue its jurisdiction over a section of the old Ochoco Highway between Mill Creek and Marks Creek which has been abandoned by the Commission in view of the reconstruction of the highway on other alignment. The Engineer recalled that the Commission adopted a resolution on December 18, 1940, abandoning the old highway section, which is seven miles in length, because it was of no further value for state highway purposes. However, the county court has not accepted it as yet as a county road because the court believes that it is valuable as a stock driveway and as such should be maintained by the state. He estimated the cost to maintain the section at approximately \$300 annually; however, pointed out that there are two 40-foot A-frame timber bridges on the section which probably will have to be replaced within a few years at a cost of approximately \$2,500. He gave as his thought that the county court's idea in maintaining the old road as a stock driveway is reasonable but that the maintenance of the same should be a county obligation and he so recommended. The Commission approved the recommendation and instructed the Secretary to so inform Judge Bowman. (Commissioner Oliver approved the action on the following day.)

The Engineer reported, as requested by the Commission at the previous meeting, the disposal of an air compressor that was acquired in connection with a right of way purchase at Eugene, and advised that this air compressor has been installed and is being used at the Odell Lake Maintenance Headquarters. The Commission approved such disposition.

Reconsideration was given by the Commission to the matter of securing reimbursement of federal taxes paid a number of electrical companies in connection with purchases of electrical energy. A decision in the matter was deferred until the next meeting. The Engineer was instructed in the meantime to release to the several companies a portion of the amounts due them for such purchases, retaining, however, enough to cover the amount of the federal taxes

until the Commission arrives at a decision with respect thereto. He was also instructed to ascertain and report back to the Commission the names of the companies concerned.

The Commission discussed the matter of eliminating a curve on the Columbia River Highway in front of the schoolgrounds at Deer Island, which was requested by the Honorable J. D. Perry of Deer Island and a delegation which appeared before the Commission at its meeting on August 15, 1941. It was recalled that the Commission at that time approved the work for 1942 construction, the estimated cost of the same being \$15,000. The Engineer gave as his thought that this project should be deferred, in view of the present war conditions, so as to conserve the funds for other projects that are of more importance. The Commission deferred a decision on the matter until the next meeting. The Engineer was instructed to present to the Commission at that time a list of projects that the Commission has promised for 1942 construction so that all may be considered at the same time.

In this connection the Commission reconsidered a minor betterment project, consisting of oiling of the shoulders adjacent to the pavement on the Columbia River Highway through the town of Cascade Locks, which work is estimated to cost about \$2,900 and was tentatively promised for 1942 construction. The Engineer gave as his thought that this work is not absolutely necessary, and recommended deferment of the project for the duration of the war, in order to conserve funds for more important work. The Commission approved the recommendation and instructed the Secretary to so inform the city.

A letter was presented from the City of Lostine, by Sadie B. Hall, City Recorder, requesting the improvement of certain of its city streets, that are not state highway routes, notwithstanding that the population of Lostine is less than the 250 population which the Commission has set as a minimum population of cities and towns in which it will expend state funds for projects of this kind. The Commission decided, in view of the stringency of the times, that it would be inadvisable to alter the formula that has been adopted as a guide in connection with such improvements and thereupon denied the request, although agreed to bear the project in mind for future consideration. The Secretary was instructed to so inform the City of Lostine.

The Attorney requested instructions relative to the securing of options for the proposed improvement of the Oregon Coast Highway through the town of Gold Beach. He explained that the option forms are now in the hands of local citizens, who have inquired whether or not they should get them signed by the property owners. The Commission deferred action on the matter.

The meeting was adjourned at 11:30 p. m. to reconvene the following morning in the Public Service Building.

AND 1 1942

Portland, Oregon, April 2, 1942

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 Huron W. Clough, Commissioner
 Herman Oliver, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 2:30 p. m. in the same room:

THREE STATE HIGHWAYS
 BAKER ROCK PRODUCTION

D. C. & A. L. Williams \$12,090.50

CRATER LAKE HIGHWAY
 SECTION "A" OF SOUTH UNIT, ANTELOPE CREEK-MEDFORD SECTION
 GRADING AND PAVING

Berke Brothers \$252,908.50

CRATER LAKE AND PACIFIC HIGHWAYS
 SECTION "B" OF THE SOUTH UNIT, ANTELOPE CREEK-MEDFORD SEC.
 GRADING AND PAVING

Jacobsen-Jensen Company \$123,278.00

CRATER LAKE AND PACIFIC HIGHWAYS
 SOUTH UNIT, ANTELOPE CREEK-MEDFORD SECTION - STRUCTURES

Tru-Mix Concrete Company	\$19,930.00
J. F. Johnston	20,398.00
Averill & Corbin	24,126.00
A. T. Fox Company	27,466.50

SANTIAM HIGHWAY
 LEBANON-SWEET HOME ROCK PRODUCTION

No bids received on this project

Mr. Phil Berthiaume, representative of the California Western States Life Insurance Company, came before the Commission in regard to furnishing group life insurance to state highway department employees. This matter was discussed at considerable length, but a decision whether or not the company

shall be authorized to write such group insurance, necessitating deductions from the monthly pay rolls of the State Highway Department, was deferred until the next meeting of the Commission. The Engineer was instructed to report at that time the number of insurance companies that could write such insurance and the effect that it would have on the State Highway Department if salaried employees, as well as hourly-paid employees, were allowed to participate.

The Commission discussed matters pertaining to the Plaza Corner project on the Pacific Highway, in Ashland. It was recalled that the Commission previously approved this project for construction with state funds if federal funds could not be obtained to finance it, and that the city was given to understand that the project would go forward; however, on account of the war situation it is becoming more difficult to secure governmental approval and the proper priority rating. The Commission indicated that it is ready to go ahead with the job, either with federal or state funds, if federal approval can be secured for expenditure of either class of funds, and the proper priority rating obtained.

In this connection, the Assistant Attorney advised that some of the buildings that have to be remodeled in connection with this improvement have been vacated and remodeling is now under way. He particularly referred to the remodeling of a garage building owned by a Mr. Claycomb. He advised that he is now taking bids, in behalf of Mr. Claycomb, for such remodeling work, and requested instructions relative thereto. In the discussion which followed it was pointed out that the new ruling of the federal authorities places a limit of \$500 on building reconstruction projects, so there is a question whether or not it will be possible to secure approval for the remodeling of this garage. It was also brought out that the City of Ashland has been placed in an undesirable position by reason of the fact that so many of the buildings fronting on the proposed improvement have been vacated and partially demolished, and if the project does not go forward the situation will detract greatly from the appearance of the street and will have an undesirable effect on the city. After further discussion the Engineer was instructed to obtain from the federal government before the next meeting of the Commission either definite approval or disapproval of the project so the Commission can make a final decision with respect thereto.

Mr. H. C. Johnson, Coordinator for the Four-County Cantonment Council, Albany, and Mr. E. L. Gray, Independence, came before the Commission relative to the improvement of the county road which extends southerly from the town of Independence to a connection with the Albany-Corvallis Highway near Granger, which road forms the eastern boundary of the Corvallis cantonment. Mr. Johnson was the principal spokesman. He urged the Commission to designate this road a state secondary highway and to improve the same as such because of its value in serving the cantonment. He advised that the road carries a large volume of traffic and is badly in need of maintenance and neither Polk County nor Benton County is financially able to assume such obligation. It was his thought that the maintenance of the road is a state obligation, in view of the fact that it will relieve greatly the traffic congestion on the Pacific Highway West (99W). He pointed out that construction operations at

APR 2 1942

the cantonment will be such, within the next two weeks, that general public use of Highway 99W will not be available; in fact, according to Colonel Des Islet, general traffic on Highway 99W cannot be tolerated, at least during the time that construction activities are under way in the cantonment area. He also said that, because of the large volume of traffic on Highway 99W on the previous Sunday, it was necessary for army trucks to discontinue operations entirely, in order to avoid the occurrence of accidents, which is an undesirable situation because it slows down work in the cantonment where speed is essential. The matter was discussed at considerable length and was concluded by a statement from Chairman Cabell to the effect that, while the Commission is not in position to make a decision today, it will discuss the question of maintenance of the road during the cantonment construction with Colonel Des Islet at once. Mr. Johnson filed with the Commission a letter from each of the counties forming the Four-County Cantonment Council urging the Commission to adopt the Independence-Granger Road as a state secondary highway, and to maintain the same.

Mr. Max Kuney, contractor for grading the Warm Springs River-Mill Creek Section of the Warm Springs Highway, in Wasco County, contract No. 2517, came before the Commission relative to the termination of his contract. He advised that his contract calls for seven miles of grading work on an isolated section of the highway which cannot be used by the general public until adjoining sections are constructed, and information that he has received is to the effect that such adjoining sections will not be built for some time, in view of the war situation. He pointed out difficulties in securing a convenient priority rating that would permit him to obtain equipment, repair parts, and supplies. He suggested, if the Commission approves, the termination of this contract and payment to him for work performed, thus releasing a considerable sum for allocation to other projects which may be considered more desirable from the Commission's standpoint and from the standpoint of national defense. The Commission took the matter under advisement. The matter was reconsidered by the Commission after Mr. Kuney's departure when it was decided not to terminate the contract and to require Mr. Kuney to proceed with the same in accordance with his contractual obligation. Mr. Kuney was so informed during the afternoon session of the Commission and he at that time agreed to go ahead with the work.

The matter of increasing the 1942 budget covering the activities of the Travel and Information Department was reconsidered. Chairman Cabell and Mr. Ben Titus, Acting Director of the Travel and Information Department outlined for the benefit of Commissioner Oliver, the presentation made on the previous evening by Dr. E. B. McDaniels, member of the Advisory Committee, which committee recommends an increase in such budget, in the amount of \$15,000, for newspaper advertising in the northwestern states. After some discussion the Commission approved such budget increase.

The Commission also approved the attendance of Mr. Titus at a meeting of the Northwest Advertising Agency in Seattle on the following day at state expense, it being estimated that such expense would not exceed \$35.00, subject to the condition that the out-of-state travel is approved by Governor Sprague.

The question of purchase of steel rails for use in connection with bridge construction was again brought up for discussion by the Engineer, who reported receipt of a telegram from the Federal Price Administrator to the effect that the Commission has authority to purchase such steel rails. In view of this telegram the Commission authorized the Engineer to purchase such material for use in bridge construction at the Medford and Corvallis cantonments and for other projects in approved programs.

The Engineer reported results of a personal inspection of conditions existing at the intersection of the old Pacific Highway and the new Pacific Highway in the northern part of Albany, where an accident occurred on June 7, 1941, resulting in injuries to Mr. Charles F. Peake, Jr., and damage to his car. According to Mr. Peake's claim for damages, he drove his car into a traffic island that was installed by the state as a traffic guide. The Engineer advised that he inspected the premises carefully, and in his estimation it is simply a case of Mr. Peake driving his car too fast, and if he had had his car completely under control the accident could easily have been avoided because the island was well outlined with reflector buttons and traffic was well protected by a reflectorized stop sign which Mr. Peake knocked down and which should have been clearly visible to him if he had been at all observant. He added that the island was located at this place in order to control the type of erratic driving that Mr. Peake evidenced. He recommended, in view of the situation, that Mr. Peake's claim be denied. The Commission approved the recommendation.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

The Commission discussed with Mr. W. H. Lynch, District Engineer, Public Roads Administration, the award of contracts for the Medford projects, bids for which were taken at this meeting, particularly the question whether or not to announce the contract awards in view of uncertainties with respect to federal funds which are to be used to finance the work. It was decided not to announce the awards at this time but to refer the bids to the Engineer with power to award the contract to the low bidder in each instance, when satisfactory arrangements have been effected with the federal government with respect to the financing feature.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having previously been approved by the unanimous action of the Commission:

"Baker Rock Production Project on three state highways, in Baker County. D. C. & A. L. Williams, La Grande, submitted the only bid for this project, in the amount of \$12,090.50. The Commission rejects this bid.

"Section "A" of the South Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County. 3.4 miles grading and paving. Berke Brothers, Portland, submitted the only bid on this project, in the amount of \$252,908.50. The

Commission refers this to the Engineer with power to award to such bidder, when satisfactory financial arrangements have been made with the federal government.

"Section "B" of the South Unit, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. 1.4 miles grading and paving. Jacobsen-Jensen Company, Portland, submitted the only bid on this project, in the amount of \$123,278.00. The Commission refers this to the Engineer with power to award to such bidder, when satisfactory financial arrangements have been made with the federal government.

"Structures on the South Unit, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. Tru-Mix Concrete Company, Medford, submitted the low bid for this project, in the amount of \$19,930.00, and J. F. Johnston, Newberg, submitted the second-low bid, in the amount of \$20,398.00. There were two higher bidders. The Commission refers this to the Engineer with power to award the contract to the low bidder, when satisfactory financial arrangements have been made with the federal government.

"Lebanon-Sweet Home Rock Production Project on the Santiam Highway, in Linn County. No bids were received on this project."

Mr. E. G. Whipple, Drain, Oregon, was present in regard to the hauling of long piling over the Elkton-Sutherlin State Secondary Highway. He advised that he has defense orders for piling 140 feet in length and that his application for a permit to transport these over said highway has been denied because the movement will take up the entire roadway and will probably result in destruction of privately-owned fences on the right of way line. He stated that he appreciates the reason that the permit was refused but asked the Commission to reconsider the matter in view of the urgency for delivery of the piling, which are to be used in connection with defense construction work. He agreed to provide flagmen and to pay the cost of repairing fences as may be necessary. After discussion and in view of the fact that the Commission is desirous of doing everything possible to assist in national defense, the Commission, by unanimous vote, authorized the granting of permits for the transportation of piling over state highways, without restriction, during the present emergency, provided each load is properly flagged to protect other traffic. If necessary, a clause is to be inserted in the permit providing that the permittee shall repair fences and/or other private property that may be damaged by his operations.

The Engineer reported on the cost to construct an access road from Hermiston to the Umatilla Ordnance Depot, particularly a substitute for a section of the present roadway which lies within the boundary of the Ordnance Depot and which will be closed to general public travel shortly when the new underpass and roadway leading to the depot from the Boardman-Stanfield Highway is finished. It appears from information received from the Hermiston Commercial Club that there is to be considerable new activity at the Ordnance Depot, and that workmen employed on this construction and who reside in Hermiston

will have to take a circuitous route to gain entrance to the depot grounds at the underpass, a considerable portion of which distance is over and through sagebrush territory where no road exists. The Hermiston Commercial Club has asked for the construction of a new highway, about two miles in length, on the south side of the O.W.R. & N. railroad and paralleling the railroad from the end of the present paved road to Hermiston, which is at the eastern boundary line of the Ordnance Depot, to the main entrance to the depot grounds; or as an alternate proposition, the improvement of the Westland School county road which connects the present Hermiston Road with the Boardman-Stanfield Highway. The Engineer estimated that a new roadway paralleling the railroad would cost about \$10,000, and that to improve the county road would cost about \$5,500. He suggested, as an alternate proposition, a roadway extending from the present Hermiston Road at the southeast corner of the Ordnance Depot grounds southerly to a connection with the Boardman-Stanfield Highway, which he estimated could be built for about \$4,000. The matter was discussed at some length but a decision was deferred by the Commission pending inspection on the ground by Commissioner Oliver and the State Highway Engineer. It was arranged that such inspection would be made on Friday of the following week.

Mr. L. A. Christensen, Seaside, headed a delegation which came before the Commission and urged the granting of permits authorizing transportation over state highways of loads consisting of one big log, from 20 to 24 feet in length, involving a gross load considerably in excess of the statutory weight limit. Others in the delegation were Messrs. O. R. Miller, E. P. Stamm and Truman Collins, all of whom represented the logging and lumber industries. Mr. Christensen advised that they have some 200 or more big spruce logs in the woods that cannot be moved to market under existing weight restrictions; that they are exceptionally fine pieces of timber and are needed badly for defense purposes, particularly for airplane stock, and that the value of the same for such purpose would be greatly enhanced; in fact, the logs would be rendered practically valueless if split in order to reduce the weight. He urged the Commission to grant a special concession for the movement of the same over state highways, regardless of the weight, and advised that they will purchase and use special equipment for the purpose, consisting of tandem axle truck tractors and tandem axle semitrailers.

The Engineer pointed out that the roadways and bridges over which the logs would have to be transported were not designed to carry such heavy loads and overstressing the bridges to such an extent would result in failure and possibly serious accidents. He further advised that he has given this matter serious study and has previously advised the Commission that a gross load of 65,000 pounds is absolutely the maximum that could be moved over the bridges with safety, and even then the bridges would be overstressed from 40 to 45 per cent. The maximum load that could be carried on any set of tandem axles, with safety, he added, could not exceed 34,000 pounds. He recommended the granting of permits on such basis for logs not less than 24 feet in length, and the waiving of the overall width and height requirements with respect to such movements; also, that the loads be weighed in the woods on loadometers furnished by the state, the weighing to be done by an employee of the logging company under the supervision of a weighman in the employ of the state, the idea being that if such weighing discloses that the allowable

weights are exceeded then the logs are not to be moved onto the highway. After considerable discussion of this matter, during which the members of the delegation asked for further concessions which were denied by the Commission, the Commission approved the Engineer's recommendation by unanimous vote, Chairman Cabell explaining that the Commission is waiving the height and width requirements, subject to proper clearances and is granting the concession, for the present emergency only, in so far as the Commission can legally do so with due regard to safety. The delegation accepted the Commission's decision.

Mr. Christensen then asked the Commission to waive for the duration of the war the penalty for overloading in regular log hauling operations, in view of the urgency to deliver logs to the mills and the scarcity of log-hauling equipment. Chairman Cabell advised that the Commission has given this matter considerable thought and study and has tried different ways to solve the problem, but it appears that the present penalty is the only reasonable way that the Commission can get results. The Commission doesn't like the idea of suspending the permits, he added, but there seems to be no other way to handle the situation. However, the Commission is susceptible to any new ideas.

Mr. Stamm stated that overloading is not a willful violation on the part of the log haulers but is simply the result of not being able to estimate the weight of logs. He suggested elimination of the "suspension-of-permit" penalty and the increasing of the fine. Chairman Cabell advised that the State Highway Commission has no control over the amount of the fines; furthermore, past experience reveals the "fine method" of curbing the overloading of trucks to be unsatisfactory.

Mr. Stamm then stated that it would help considerably if weighmasters did not weigh every load, but would limit such weighing to loads which, in their judgment, from inspection, are in excess of the allowable weight limits, to which Chairman Cabell responded that the Commission must have a general rule to fit everyone and the Commission cannot discriminate among operators.

Mr. Miller suggested that perhaps the logging industry could help out in the matter of policing. Chairman Cabell replied that if the industry were composed of only one organization it might be possible to work out some kind of a proposition along that line, but unfortunately there are numerous organizations throughout the state and he is not as yet satisfied that such a solution would work satisfactorily, although it is his intention to give the matter further thought.

The discussion of this matter was concluded by a statement from Commissioner Oliver to the effect that the Highway Commission must maintain its highways in the best possible condition as its contribution to the winning of the war; that road money is scarce and must be conserved in the best possible manner so that the Commission will not be placed in the position of being derelict in its duty to maintain the highways properly. The Highway Commission feels, he said, that it has just as grave a responsibility to protect its highways for national defense use as the logging industry has for the

furnishing of logs for defense purposes; and, while the Commission wants to assist the logging industry in every way possible, in his estimation there is a limit to what it should do because when such limit is exceeded it would simply mean interference with the war efforts rather than aiding them, inasmuch as the highways must be kept in good condition for troop movements, as well as for the movement of defense commodities.

Mr. Stamm inquired whether or not it is the intention of the Commission to extend the privilege of hauling logs over state highways on Saturday afternoons and Sundays, which privilege now expires on June 1, 1942. Chairman Cabell replied that the Commission wants to withhold a decision in such matter until it can get a fair idea as to how much tourist travel there is to be this summer and how great a necessity there will be for logs. He indicated that, if tourist travel is light and the demand for logs is great, the Commission would probably extend the privilege.

The matter of night-hauling of logs over state highways was also discussed. Mr. Miller suggested that, since the country is now on war-time basis, night hauling should be permitted up to 9:00 p. m. rather than 8:00 p. m., which is the present limit. The Commission approved the suggestion and ordered that it be made effective on May 1, 1942.

The Commission discussed the matter of constructing the Cape Blanco Federal Aid Secondary Highway, particularly the Hughes Ranch-Lighthouse Section thereof, which has been requested by Rear Admiral C. J. Freeman. In this connection a letter was presented from District Engineer W. H. Lynch, Public Roads Administration, advising that there is no objection to the use of federal aid secondary highway funds in the construction of this section, including the necessary connection with the lighthouse reservation boundary, provided the work is done on regular federal aid basis, requiring 38 per cent of the cost to be paid with state funds. In view of this the Commission authorized the Engineer to proceed with the project and to advertise the work for bids to be received as soon as the plans are prepared.

Mr. S. H. Boardman, State Parks Superintendent, was present and reported on the proposed purchase of 360 acres of timber land as an addition to Short Sand Beach State Park. He advised that this tract contains a fine stand of spruce and hemlock timber and that the owner is asking the sum of \$18,000 for the property, including the timber. He valued the timber at \$32,000 on the present market and advised that he had suggested to the owner that he sell the timber and then deed the cut-over land to the state for state park purposes, but the owner preferred that the state secure the benefits from the sale of the timber, which is his reason for bringing the matter to the Commission's attention at this time. He further advised that this is an outstanding scenic setting and would make a fine addition to the present park; further, that the proposition is a very good one and could be worked out to the state's advantage if the timber were fallen under the selective-cutting method, and under his direct supervision. The Engineer recommended purchase of the property at the price quoted, and that the method of sale of the timber be worked out later. The Attorney gave as his opinion that the proposition is a very good one, because the value of the timber standing on the tract

APR 2 1942

is far in excess of the amount that the Commission would have to pay for the property. The Commission voted unanimously to purchase the tract for \$18,000 under the condition that selective cutting of the timber be carried on under the direct supervision of the Parks Superintendent, who was thereupon instructed to arrange a plan for such selective cutting and sale of the timber.

The Engineer reported to the Commission that the department's loss of men to the defense industries and to the federal government is continuing at an increasing rate, and that he fears that with the advent of spring there will be a more or less general exodus from the department, leaving the department in a position where it cannot effectively carry on its vital maintenance operations and other necessary functions. He pointed out that the maintaining of the highways, the construction of access roads and other functions of the department are essential to the war effort and must be carried on during the emergency; that although the department can release a part of its organization to shipbuilding, cantonment construction and other defense industries, it must hold a force sufficient to prevent deterioration of the state's transportation facilities. He expressed the thought that a comparatively small general increase in wage rates and salaries might hold a force sufficiently large to carry on essential operations, and he recommended that the Commission give consideration to the granting of an increase of that kind.

It was the opinion of the Engineer that the department could not, and probably should not, meet the wage scales offered by the defense industries, but that there was justification for an increase in wages and salaries to offset increased living cost and to serve in limited degree as an inducement to employees to remain in the state's service. He suggested that an increase of \$10 to \$15 per month might prove satisfactory, and appeared to be as much as the department could obligate itself for at this time, in view of depleted finances.

Following a discussion, the Commission approved, unanimously, the granting of wage rate and salary increases, effective as of April 1, 1942, as follows:

1. An increase of eight cents (8¢) per hour for all hourly-rate classifications.
2. An increase of ten dollars (\$10) per month for all monthly-rate classifications for which the present rate does not exceed \$250 per month. Border line cases are to be adjusted by the Engineer.

The Engineer estimated that this adjustment in rates of pay would increase the pay roll approximately nine and one-half per cent, or approximately \$330,000 per 12-month period.

The question whether or not to grant increases to employees who now receive salaries in excess of \$250.00 per month is to be considered later in the year.

The Engineer presented a written report on the status of the state highway department's finances. The Commission deferred action on the matter pending study of the report.

A letter was presented from Mr. H. L. Friday, Gateway, Oregon, requesting the construction of a cattle pass across The Dalles-California Highway at milepost 77.78 so as to avoid accidents when cattle are being driven from one side of the highway to the other. The Engineer recommended denial of the request because every dollar of state money that is available to the Commission is needed for more important projects. The Commission approved the recommendation; however, agreed to reconsider the matter when times return to normal.

The Commission discussed briefly matters pertaining to the construction of the Sprague River Road, in Klamath County, but deferred action until its next meeting.

The Engineer reported the condition of the existing bridge over the Wilson River on the Wilson River Highway, being the second crossing of such river, in Tillamook County. He advised that the present structure was built a number of years ago by Tillamook County for use as a detour bridge during construction of a permanent structure and, accordingly, is not on proper alignment; further, that it is a 120-foot timber deck truss with 172 feet of frame trestle approach. The roadway width, he said, is only 17 feet 1 inch. He estimated that it would cost about \$3,500 to widen the structure for a 24-foot roadway, whereas it would cost approximately \$50,000 to construct a concrete bridge on permanent alignment and \$29,000 to build a new timber structure on permanent alignment. He recommended the widening of the present structure at a cost of \$3,500 as a safety measure. The Commission authorized the improvement.

A letter was presented from County Judge F. E. Gilkey of Lincoln County requesting state aid in connection with the repair of a steel bridge over the Yaquina River on a county road in Toledo, such aid to consist of erection of the necessary steel which the county has already purchased and has on hand and the painting of the structure, at the county's expense. The Engineer recommended approval of the request in so far as the erection of the steel is concerned, because the county is not equipped to do such work, but suggested that the county be requested to make other arrangements for the painting of the structure because the highway department's painting crews cannot very well be spared. After discussion the Commission authorized the loan of a state bridge crew to erect the steel under the condition that the county would pay the cost involved, but decided not to do the painting work if it can be avoided. The Engineer was instructed to discuss the matter with the county court.

Reconsideration was given by the Commission to the matter of constructing sidewalks in the town of Toledo, Lincoln County, and in the town of Eastside, Coos County, which projects the Commission heretofore approved for 1942 construction but on which no work has as yet been undertaken. The

Commission decided in view of the stringency of the times to defer both projects and all similar projects during the present war emergency.

A letter was presented from the Pacific Truck Express Company requesting permission to operate, over Oregon highways between California and Oregon points, a train of vehicles 60 feet overall in length and consisting of three units—truck tractor, semitrailer and trailer. The Engineer gave as his thought that this is an undesirable combination of equipment which could not be operated over highways of this state without endangering other traffic and accordingly recommended denial of the request. The Commission approved the recommendation.

The Engineer reported that, in conformance with authority previously granted him by the Commission, he has awarded contracts, as follows, bids for which were taken by the Commission at its meeting on March 19, 1942, the conditions of the awards having been satisfied:

Construction of Air Base—Columbia Bottom Road Section of the Portland Air Base East Access Road, in Multnomah County. Awarded March 28, 1942, to the low bidder, Parker-Schram Company.

Construction of new pile trestle at Willamette River Bridge crossing at Harrisburg. Awarded March 31, 1942, to Tom Lillebo, low bidder.

The Commission confirmed the awards by unanimous vote.

The Engineer brought up for discussion the claim of Mr. Benjamin F. McConnell, Coquille, for loss of time and doctor's expense which he incurred as the result of a fistic encounter with one Elmer Stokes, both men being former employees of the State Highway Department engaged in work on a paving crew. It appears that Messrs. McConnell and Stokes had not been on friendly terms for some time. On the day that the crew was disbanded they happened to meet on the street and became involved in a street fight which resulted disastrously to Mr. McConnell who suffered a broken leg and was obliged to go to the hospital. Mr. McConnell feels that he is entitled to pay from the state for the time lost as a result of the injuries and to reimbursement for his hospital expense. The Engineer advised that neither Mr. McConnell nor Mr. Stokes was on the state's pay roll at the time the fight occurred, they having been previously time checked and the crew disbanded, so in his estimation Mr. McConnell lost no time in so far as the state is concerned. Furthermore, in his opinion the state is in no way responsible for the feud, and the fight occurred off state property. He recommended that the claim be denied. The Commission approved the recommendation.

The Commission discussed briefly but deferred action on the question whether or not to contribute state funds toward the cost of conducting KOAC "Oregon on Parade" program in 1942, as was done in 1940 and 1941. The Engineer was instructed to have Mr. Ben Titus, Acting Director of the Travel and Information Department, secure information from the college authorities as to

their plans for the 1942 program and to submit such information along with his recommendation to the Commission at its next meeting, when the question will be decided.

The Secretary brought up for discussion a proposed agreement with the South Umpqua Telephone Company covering the moving of certain telephone poles on the Tiller-Trail Secondary State Highway, in Douglas County. The Engineer recalled that the Commission some time ago approved the payment of \$3.00 each for the moving of 45 poles, and the sum of \$5.00 each for the moving of seven additional poles along the Days Creek-Wright Ranch Section so as to accommodate the highway improvement. Since that time, he said, it has been necessary to move 74 additional poles along the adjoining Wright Ranch-Milo Section to accommodate another highway improvement. He recommended payment to the company of the cost of moving such poles on the same basis that the original 52 poles were paid for. (See original agreement for details.) The Commission approved the recommendation and thereupon signed an agreement with the telephone company with respect thereto.

The Commission discussed the claim of Joseph W. Boyer arising out of an accident that occurred on the Dooley Mountain Section of the Baker-Unity Highway, in Baker County, which involved a state highway department truck. Mr. Boyer based his claim on the following: (1) that the driver of the highway truck failed to permit his car to pass in an accessible place; and (2) that the truck driver drove his truck to the extreme right of the highway as if to let his car pass but, when his car was directly opposite, the truck swerved over to the left side of the highway center line, forcing the passenger car to stop off the traveled roadway which resulted in a collision between the passenger car and the trailer that was being towed by the truck. Mr. Boyer feels that he is entitled to reimbursement in the amount of \$18.17 which he paid for his car repairs. The Engineer advised that investigation reveals this to be another case of too much speed on the part of the driver of Mr. Boyer's car, and that if it should be determined that the state is liable, then it is a matter for the state's insurance company to settle. The Commission concurred and thereupon referred the matter to the Attorney to handle.

The Commission considered, approved and ordered filed county court resolutions, as follows, relative to the disposal of certain sections of state highways that have been abandoned by the state because of reconstruction of such highways on other alignment:

Resolution from the Yamhill County Court accepting jurisdiction over portion of the Rex Hill Section of U. S. Highway No. 99W.

Resolution from Yamhill County Court accepting jurisdiction over portion of the Muddy Creek-Pringle Corner Section of the McMinnville-Tillamook Highway. (Three Rivers Highway)

Resolution from the Yamhill County Court accepting jurisdiction over portion of the old Spaulding Ranch Section of the Salem-Dayton Secondary Highway.

APR 2 1942

Resolution from the Lake County Court turning over to adjacent property owners an abandoned section of the old Klamath Falls-Lakeview Highway, in Sections 14, 15 and 22, Township 39 South, Range 19 East, W. M.

Resolution from the Lake County Court accepting jurisdiction over a portion of the old Klamath Falls-Lakeview Highway in Sections 8 and 9, Township 39 South, Range 18 East, W. M., and abandoning certain other sections of the highway in this vicinity.

Resolution from the Benton County Court accepting jurisdiction over portion of the old Kings Valley Secondary Highway, Benton County.

The question of jurisdiction of the Elsie-Jewell county road which is being used and maintained as a state highway detour, pending construction of the proposed Fishhawk Falls State Secondary Highway, had the attention of the Commission. This matter arises in view of the Commission's previous ruling that recommendations with respect to log hauling on this road should be filed with the Public Utilities Commissioner by Clatsop County, in view of the fact that the road is a county road, and to clarify the operations of highway department weighmasters. The Attorney gave as his thought that, if the State Highway Commission continues to maintain the road as a substitute road for state highway traffic pending construction of the new highway, then the Commission should enter into a written agreement with the county court with respect to the maintenance of the road and control of traffic. The matter was discussed at some length during which it was pointed out that there are other county roads throughout the state in the same category, such as the Gales Creek Road, in Washington County, which is being used by state highway traffic pending completion of the Wilson River Highway, and the county road between Mehama and Mill City on the south side of the North Santiam River, in Linn County, which is being used by state highway traffic pending construction of the North Santiam State Secondary Highway between these points on the north side of the North Santiam River. As a result thereof the Commission approved the Attorney's suggestion, and thereupon instructed the Attorney to prepare an appropriate agreement with Clatsop County covering maintenance and jurisdiction over the Elsie-Jewell Road for consideration by the Commission at its next meeting. The Commission also ordered similar agreements covering other county roads in the same category.

The Secretary presented a letter from Division Engineer W. C. Williams with respect to the hauling of piling 74 feet long through the town of Forest Grove. Mr. Williams advises that the piling originate in the Gales Creek vicinity and are transported to Forest Grove over the Gales Creek county road; and that they are routed along Main Street and Pacific Avenue, in Forest Grove, necessitating a right angle turn at the intersection of these two streets, which is the center of the town's business district where accidents frequently occur because the loads take up the entire intersection. In an endeavor to eliminate this hazard the city officials, he said, want the state to prohibit the parking of automobiles near this intersection and to erect signs and paint "no parking" areas at such point. It was Mr. Williams's opinion that piling of such length should not be routed on city streets that involve right angle

turns. The Secretary advised that all permits for hauling logs, poles, and/or piling are prepared to terminate at the city limits of cities and towns, in conformity with advice from the Attorney that the Commission does not have legal control over such traffic within the city limits; also, that if the Commission should assume jurisdiction over such traffic within the city limits, it would mean the assumption of a serious responsibility because there are so many cities and towns through which such operations are being carried on. The Attorney advised that, under the new law that was enacted by the 1941 Legislature, the State Highway Commission has full control of traffic over city streets that have been designated as state highway routes and, under such authority, has the power to regulate traffic over such streets. The Commission desired more time to decide the question and, accordingly, deferred further consideration until its next meeting. The Secretary was instructed to present at that time a list of cities and towns affected by such movements.

The Commission had under discussion a request from Mr. Phil Willis for reinstatement of his log-hauling permit which was cancelled because of his refusal to remove a load of logs that he lost on the highway right of way near Grand Ronde. The Secretary advised that Mr. Willis dropped the logs on the highway at 3:00 p. m. on March 2, and that he was warned several times by the District Maintenance Superintendent to remove them, but neglected to do so, notwithstanding that it was pointed out to him that he would probably lose his permit if he did not comply with the provisions thereof. He further stated that the Public Utilities Commissioner was requested to cancel the permit on March 13 and did so on the following day. Subsequently, Mr. Willis asked for reinstatement, and was informed of the necessity to present the matter to the State Highway Commission for instructions. The Commission considered that Mr. Willis has been sufficiently penalized for this offense and authorized reinstatement of the permit.

The Commission also considered the reinstatement of the log-hauling permit of Gordon T. Pickell, of Ashland, which was cancelled for his refusal to voluntarily surrender his PUC plates to the state weighmaster when apprehended for transporting a combined load of logs weighing in excess of the gross weight limits, including tolerances, permitted by statute. The Secretary advised that Mr. Pickell's truck was weighed on March 18 and was found to have a gross weight of 64,650 pounds, which is considerably in excess of the permissible weight; further, that Mr. Pickell was given 24 hours within which to voluntarily surrender his PUC plates but did not surrender them until March 26. In the meantime, the Public Utilities Commissioner had been requested to cancel Mr. Pickell's permit in accordance with the usual practice. He further stated that, while Mr. Pickell owned the truck involved in this violation, he was not the driver of the truck and states that he was unaware that the truck driver had refused to turn in the plates when requested, and in view of such misunderstanding he is asking the reinstatement of his permit. After due consideration the Commission approved the request.

A letter was presented from the Coos Bay Logging Company, North Bend, requesting permission to transport, over the Cape Arago State Secondary Highway between Empire and North Bend, loads of lumber having an overall height of 12½ feet. The Engineer recommended approval of this request. The

APR 2 1942

Commission approved the recommendation and thereupon authorized such movements as a general policy, including overall heights up to 12½ feet in connection with log hauling operations if the loads are properly tied with binder chains and the authorized weight limits are not exceeded.

The question whether or not to permit log hauling on the Oregon Coast Highway from Coquille northerly a distance of about eleven miles toward Marshfield, involving overall lengths of 60 feet, had the attention of the Commission, particularly the request of Frank J. Fish for such privilege. The Commission indicated that it would have no objections to such hauling if no portion of the hauling equipment or load extended over the center line of the highway. On account of the curvature of this section of the highway, the Commission considered it advisable to have a test run of loads of logs to determine the feasibility of the movements under such conditions. The Secretary was authorized to approve permits for such movements if the test loads reveal that such loads can be transported without using more than one half the traveled roadway.

Consideration was given by the Commission to the establishment of a policy with respect to permitting transportation of piling of long length over the South Santiam Highway between the North Santiam Highway junction and Albany. The Commission authorized such movements if the loads are properly flagged as protection to other traffic. Due to the present war emergency the Commission adopted such procedure as a general policy to be followed hereafter throughout the state in connection with the hauling of piling. It was left with the Engineer and the Secretary to determine the proper method of flagging.

The Commission discussed the releasing of the final payment to contractor F. C. Feldschau and Son in connection with state highway contract No. 2371, Tillamook Rock Production Project on the Oregon Coast and Wilson River Highways, in Tillamook County. The Secretary explained that all of the work contemplated under the original contract was completed on April 4, 1941, prior to the expiration of the time limit specified in the contract, and that the Commission approved payment of the final estimate; however, before the final payment was made, additional materials were ordered by the Engineer and such materials were not furnished until the specified time limit had expired which necessitates an extension of time and supplemental approval of the Commission before payment of the final amount, if the Commission's established policy is followed. He inquired, in view of the fact that the contractor has waited several months for the final payment, which amounts to less than \$700, whether or not the Commission would waive the usual requirement in this particular instance. The Commission authorized final payment as soon as the contractor's request for an extension of time and written consent thereto by the surety on his bond have been received.

The Engineer brought up for discussion the claim of the Colonial Construction Company for extra compensation arising out of its contract No. 2357 with the Commission for grading the Forest Boundary-Warm Springs River Section of the Warm Springs Highway, in Wasco County. He advised that the contractor has filed a claim for \$4,498.79, representing extra credit for excavation on account of change in plans, and that he has gone over this

claim thoroughly and is convinced that the contractor is entitled to payment in the amount of \$2,155.35 which amount the contractor has agreed to accept as payment in full of the claim. He recommended payment of such sum. After due consideration the Commission approved the recommendation and thereupon signed an agreement with the Colonial Construction Company covering the matter.

Consideration was given by the Commission to the matter of continuing its endeavors with respect to the proposed 1943 Oregon Trail Centennial Celebration. A decision in regard thereto was deferred by the Commission until later so as to give Chairman Cabell an opportunity to discuss it with Mr. Ben Titus, Acting Director of the Travel and Information Department.

Communications were presented from Mr. T. B. Watters, Klamath Falls, with respect to the reconstruction of The Dalles-California Highway between Klamath Falls and Modoc Point, but action thereon was deferred until the next meeting.

The Secretary presented a letter from Mr. L. O. Nelson, Newberg, regarding the use of prefabricated wooden tires on his automobile. It was pointed out in the discussion that such tires are not prohibited under the Oregon statute unless the combined weight of load and vehicle, on which the tires are used, exceeds 7,000 pounds or the combined weight on any one axle exceeds 3,500 pounds. The Commission considered, in view thereof, that this is a licensing feature, coming under the control of the Secretary of State, and instructed the Secretary to so inform Mr. Nelson.

The Secretary also presented a telegram from Senator Charles L. McNary, advising that it is his intention to oppose the adoption of HR 6750 and particularly the provision thereof that exempts contractors and others from payment of the state gasoline tax in the event that they are engaged in defense work; and a letter from the Ashland Chamber of Commerce, directed to the Honorable Walter M. Pierce, urging similar action on his part with respect to this bill. The Commission ordered these communications filed.

The Commission discussed a letter from the Newport Agate Society urging the Highway Commission to take action in furtherance of its previous orders prohibiting the taking of agate-bearing sand and gravel from the Oregon beaches. The Commission took no action on this matter.

The Commission approved a request from Herbert Swift, Chairman of the Parade Committee of the City of Newberg, for permission to detour traffic on the Pacific Highway West in their town, between Main Street and Center Street, during the progress of their "Total War Day" parade, which is to be held on Monday afternoon or evening, April 6, in response to a proclamation of the President and the Governor. The Engineer was instructed to have Maintenance Engineer E. A. Collier take charge of the signing of the detour during such period.

The Engineer brought up for discussion the necessity to revise the resolution adopted by the Commission on February 13, 1942, establishing one-way traffic routes at Medford to accommodate the Medford cantonment. He

advised that, since the adoption of such resolution, the routing has been revised, as follows: the southern terminus for one-way traffic on the Crater Lake Highway has been changed from "McAndrews County Road" to "the entrance to the Jackson County Trailer Camp near the north city limits of Medford", and that the southern terminus for north-bound traffic on the Midway or Bybee County Road has been extended southerly to the junction of the Pacific Highway with the old Pacific Highway near the north city limits of Medford. It was his thought that the record should be corrected in this regard. The Commission concurred and thereupon adopted the following resolution with respect thereto:

WHEREAS, as of February 13, 1942, the Highway Commission adopted and made a part of its records and minutes a resolution by which a portion of the Crater Lake Highway was designated as a one-way traffic highway and a portion of the Bybee County Road was, with the approval of the County Court made a one-way-traffic road; and

WHEREAS, since the adoption of said resolution it has been found necessary to modify said resolution in the manner and to the extent in this resolution set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, as follows:

1. That section 1 of said resolution shall be and the same hereby is amended so as to read as follows:

"1. That the section or unit of the Crater Lake Highway which extends from a point approximately two miles north-east of Agate Station to the entrance to the Jackson County trailer camp near the north city limits of Medford, be and said section of said state highway hereby is declared to be a one-way highway and shall be available for southbound traffic only."

2. That section 2 of said resolution shall be and the same hereby is amended so as to read as follows:

"2. That the section of said county road which begins at the junction of the Pacific Highway and the old Pacific Highway near the north city limits of Medford and extends northerly over said old Pacific Highway to an intersection with the Bybee County Road, sometimes known as the Midway Road, thence over said Bybee County Road, terminating at a junction with the Wellen County Road hereby is declared a one-way-traffic road and hereby is made available to northbound traffic only."

3. That except as hereby and herein amended the said resolution shall remain in full force and effect.

4. That this resolution shall be entered in the minutes and records of the Commission as of the date of April 2, 1942.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

J. W. & J. R. Hillstrom, contract No. 2221, for construction of a bridge over Coalbank Slough on the Oregon Coast Highway at Marshfield, in Coos County, requested an additional extension of time, from August 31, 1940, to January 20, 1942, within which to complete this job. They advised that their contract called for the razing of the old Coalbank Slough Bridge and such work was delayed upon written instructions from the Division Engineer on August 14, 1940. The new bridge, they said, was open to traffic on September 11, 1941, but their bridge crew and their equipment were engaged in constructing the North Bend Airport as a national defense project, and it was not until November 10, 1941, that they were able to resume operations on the state's contract. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Roy L. Houck, contract No. 2300, for grading and paving the Tigard Section of the Pacific Highway West, in Washington County, requested an extension of time, from July 31, 1941, to November 6, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to shortage of skilled labor and material and to adverse weather conditions during the spring of 1941. The Engineer advised that this contract was awarded on March 21, 1940, and that when the completion date was fixed therefor it was anticipated that operations could be carried on successfully during the month of May, 1940; however, continued rain made it impossible for Mr. Houck to make any material progress during either May or June, as he could not haul material from his stock piles. The contractor also experienced considerable delay in securing delivery of aggregate, and the shortage of skilled concrete workers prevented him from operating additional shifts. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty, notwithstanding that the Public Roads Administration has not as yet agreed to waive the penalty. The Commission voted unanimously to extend the time limit on this contract without penalty regardless of the action that may be taken by the Public Roads Administration. (See letter from W. H. Lynch, District Engineer, Public Roads Administration, dated April 8, 1942, recommending an extension of time to November 6, 1941, with penalty from July 31 to September 15, 1941.)

APR 2 1942

L. B. James, through his attorney F. E. Wagner, requested an additional extension of time, from August 31, 1941, to March 13, 1942, in connection with his contract No. 2405, for the construction of a laboratory building on state highway property in Salem. The reasons given for failure to complete the contract within the specified time limit were the contractor's inability to obtain certain material necessary for the completion of the work, due to the National Emergency Defense Program, the priorities and preference ratings created by the federal government, and the orders and decrees made by the same. The Engineer advised that practically all of the work was completed by Mr. James by August 31, 1941, and that the work remaining to be done then consisted of placing certain Transite lining, which material, due to priority regulations, the contractor was unable to obtain until about the first of March, 1942. The building, he said, has been occupied by highway department employees since since October 10, 1941. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Roy L. Houck, contract No. 2454, for grading and paving the Union Flat Section of the Pacific Highway West, in Washington County, requested an extension of time, from September 30, 1941, to November 5, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to shortage of skilled labor, materials, and to inclement weather during the months of August and September. The Engineer advised that this job was delayed by inability of the material contractors to furnish concrete aggregate as soon as was anticipated because of defense paving contracts at the Portland Airport and at Tongue Point Naval Base. He also said that there was a shortage of skilled concrete workers which prevented the carrying on of the work under additional shifts. He verified the contractor's statement as to encountering bad weather. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty notwithstanding that he has not as yet received a letter from the Public Roads Administration expressing its attitude with respect thereto. The Commission approved the recommendation. (A letter was received from W. H. Lynch, District Engineer, Public Roads Administration, subsequent to this meeting, concurring in the recommendation.)

Trowbridge and Flynn Electric Company, contract No. 2465, for the installation of a traffic signal system in the city of Klamath Falls, requested an extension of time, from October 31, 1941, to February 2, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays in securing priorities for steel poles and laytex wire. The Engineer advised that the reason given by the contractor for overrun of the time limit is correct. The installation, he said, was completed and put into operation on December 16, 1941, but at that time there were two minor items which remained to be taken care of, consisting of the waterproofing of the base of one pole to stop leakage into an under-sidewalk basement and the

replacement of one bracket arm signal head which had been broken by a truck. These items, he said, were satisfactorily completed by February 2, 1942, and the entire project has been approved by the city officials as well as by the owner of the under-sidewalk basement whose property was being damaged by the leak at the pole. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Porter W. Yett, contract No. 2531, for grading and paving of North Burgard Street in the city of Portland, Multnomah County, requested an extension of time, from January 31 to February 20, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to orders from the Engineer who would not permit paving work to be carried on except when weather conditions were favorable and who directed that certain paving work be deferred until it could be done in connection with paving work that was to be done on the same street by the City of Portland. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2221, 2300, 2405, 2454, 2465, 2531, and 2561, for the construction of state highway projects, have been completed, according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2221, with J. W. and J. R. Hillstrom, for construction of the Coalbank Slough Bridge near Marshfield, on the Oregon Coast Highway, in Coos County. Completed January 20, 1942.

Contract No. 2300, with Roy L. Houck, for 1.74 miles grading and paving on the Tigard Section of the Pacific Highway West, in Washington County. Completed November 6, 1941.

Contract No. 2405, with L. B. James, for construction of the Testing Laboratory Building, in Salem, Marion County. Completed March 13, 1942.

Contract No. 2454, with Roy L. Houck, for 0.76 mile grading and paving on the Onion Flat Section of the Pacific Highway West, in Washington County. Completed November 5, 1941.

Contract No. 2465, with Trowbridge & Flynn Electric Company, for installing traffic signal system in the city of Klamath Falls, Klamath County. Completed February 2, 1942.

Contract No. 2531, with Porter W. Yett, for 0.72 mile grading and paving on the North Burgard Street Section, City of Portland, in Multnomah County. Completed February 20, 1942.

Contract No. 2561, with Porter W. Yett, for 0.72 mile paving, on the North Burgard Street Section, City of Portland, Multnomah County. Completed February 20, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreements with the following cities and towns, covering improvements of city streets that are not on state highway routes:

West Salem	Yamhill	Arlington
Newberg	Athens	

Agreement with the Colonial Construction Company disposing of its claim for extra compensation arising out of state highway contract No. 2357, for grading the Forest Boundary-Warm Springs River Section of the Warm Springs Highway, in Wasco County.

Agreement with the South Umpqua Telephone Company covering re-establishment of certain telephone poles on the Tiller-Trail Secondary Highway, in Douglas County, necessitated by the reconstruction of the Wright Ranch-Milo Section of said highway.

Stipulations relative to the acquisition of right of way that will be needed for the Boardman-Stanfield Highway across government-owned lands near Stanfield, and for The Dalles-California Highway in the vicinity of Algona, Klamath County.

The Commission discussed the setting of a date for its next meeting for the receiving of bids for construction work, and decided to hold such meeting on Thursday, April 23, 1942, in Portland. (This was later changed to Thursday, April 30.) The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building for this meeting.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:45 p. m.

D. Baldock
State Highway Engineer

Henry F. Cabell
Chairman

H. B. Glaisyer
Secretary

Huron W. Clough
Commissioner

Harmon Oliver
Commissioner

Portland, Oregon, April 30, 1942

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Bids, as follows, for highway construction work and for the sale of buildings were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards would be made at 2:15 p. m. in the same room:

THREE STATE HIGHWAYS
BAKER ROCK PRODUCTION

\$15.00

County Judge Nelson B. Higgs, Harney County, was present in regard to the closing of a portion of the Rome-Princeton Secondary State Highway No. 442, particularly between milepost 29.5, near Follyfarm, and its junction with the I.O.N. Secondary State Highway No. 456 at milepost 62.4, near Rome, which section is in Malheur County, in order to accommodate the United States Army which is establishing an aerial gunnery range, to be known as the South-eastern Oregon Aerial Gunnery Range, in this vicinity.

In this connection the Secretary presented a letter from Lieut. Philip H. Pitman of the Army Engineers in which the Commission was asked to take steps as may be necessary to close this section of highway each year during the period commencing March 15 and ending October 1, which would allow the area to be used as a stock range for the rest of the year. Judge Higgs asked the Commission to approve such request and advised there would be no objections from the county's standpoint. The Commission, after discussion, approved the closing of this highway between May 1 and October 1, 1942, and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the United States War Department has established for the purpose of National Defense an area to be known as the South-eastern Oregon Aerial Gunnery Range; and

APR 30 1942

WHEREAS, a section of the Rome-Princeton Secondary Highway, which is Secondary Highway No. 442, is within or passes through the said gunnery range, and the War Department for the protection and safety of members of the general public has requested that said section of said secondary highway be closed to public traffic; and

WHEREAS, it appears that the use of said range by the War Department for the purposes for which the same has been established will create a hazard to members of the public traveling said highway, and therefore it appears to the Highway Commission to be in the best interests of the general public to close said section of said highway during the period specified in this resolution;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission as follows:

1. The Commission does hereby declare its purpose to cooperate with the United States Government in every plan for and in every effort made toward National Defense in so far as the Commission may do consistent with the best interests of the State and the Commission's fixed authority.
2. That the section of the Rome-Princeton Secondary Highway, which is Secondary Highway No. 442 and which section begins at mile point 29.50, which is near Follyfarm in Malheur County, and terminates at the junction of the Rome-Princeton Secondary Highway with the I. O. N. Secondary Highway, which is Secondary Highway No. 456, at a point designated as mile point 62.40 near Rome in said County shall be and said section of said highway hereby is closed to traffic from the date of this resolution to the first day of October, 1942.
3. That the War Department representatives in charge of said gunnery range are hereby authorized and required to erect and maintain proper and appropriate barricades at the termini of said section of said road and such signs as may be necessary to adequately and effectively warn and inform the traveling public.
4. That other than the adoption of this resolution the Highway Commission shall be under no obligation to barricade the said section of said highway at either of the points of entrance to said range, and the delivery of a certified copy of this resolution to Philip H. Pitman, First Lieutenant, Corps of Engineer, shall constitute the Commission's full responsibility with respect to the closing of said road as between this Commission and the United States War Department.
5. It is urgently recommended that entrance to said gunnery range over any other road, county or otherwise, be adequately barricaded against traffic during the period beginning May 1, 1942, and ending October 1, 1942.

6. That the Secretary of the Commission be and he hereby is instructed to deliver by mail to Philip H. Pitman, First Lieutenant, Corps of Engineers, c/o Office of the Division Engineer, Federal Building, Burns, Oregon, a certified copy of this resolution, and request from him an acknowledgment of its receipt and acceptance.

The Secretary was instructed to forward a copy of this resolution to Lieut. Pitman and to ask him to acknowledge the same and to state whether or not it is acceptable. He was further instructed to point out to Lieut. Pitman that, whereas the period of closing specified in the resolution expires on October 1, 1942, the Commission would be pleased to extend the privilege from March 15 to October 1, 1943, and between such dates in subsequent years, upon request of the army authorities.

Judge Higgs also inquired whether or not the Commission has taken any action with respect to the county's request for the improvement of the road leading to the airport east of Burns. He was informed that there are no state funds available for such project and the Commission cannot undertake the improvement unless it is financed with federal access funds of which there are none available at the present time. Furthermore, the federal authorities have not, to the knowledge of the Commission, approved the project for such class of funds.

Judge Higgs also asked the Commission to oil the footpath that was constructed last year along the Central Oregon Highway, between Burns and Hines Mill, for the benefit of bicyclists as well as pedestrians. He advised that oiling work is quite important from the safety standpoint because the path, in its present condition, is not suitable for bicyclists who are obliged, under the circumstances, to ride on the pavement. He gave as his understanding that the oiling work was included in the original project but was not done last year on account of the lateness of the season and for the further reason that the amount budgeted for the project was insufficient to pay for this item. The Engineer pointed out the difficulties the Commission is experiencing with oiling work and suggested that it might be satisfactory if a coating of fine rock were placed on the present surfacing which would at least take care of the situation for the duration. Judge Higgs advised that that might be a satisfactory solution, whereupon he was asked to consult District Maintenance Superintendent J. D. Walker in regard thereto. The Engineer was instructed to advise Mr. Walker of the circumstances for his guidance, and to proceed with the work if it can be accomplished at nominal expense.

The Commission discussed the cancellation of several contracts that are affected by the War Production Board's recent ruling, being Conservation Order L-41, issued by the Division of Industry Operations, deferring for the duration of the emergency all construction which is not essential, directly or indirectly, to the successful prosecution of the war. The Engineer advised that there are five contracts affected by this ruling, viz., Contract No. 2528, with Rogers Construction Company, for grading, surfacing and oiling the Diversion Canal-Midland Overcrossing Section of the Midland Secondary Highway, in

Klamath County; No. 2552, with A. H. Saxton & Son, for grading, surfacing and oiling the Campbell Bridge-Hazeldale Section of the Farmington Secondary Highway, in Washington County; No. 2553, with Norris Brothers, for grading and topping the Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, in Wheeler County; No. 2555, with Rogers Construction Company, for grading, surfacing and oiling the South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Walla Walla County; and No. 2556, with M. L. O'Neil & Son, for regrading, surfacing and oiling the Soda Mountain-Silvies Section of the John Day-Burns Highway, in Grant County.

The Commission decided that it has no alternative but to cancel these contracts and to reimburse the contractors for expense that they have already incurred in connection therewith, other than for materials, which the Commission thought the contractors could dispose of without loss, such termination of contracts to be covered by appropriate written agreements between the Commission and the contractors. The final decision in the matter, however, was deferred until the afternoon session. The Engineer was instructed in the meantime to contact Commissioner Oliver at his home and secure his reaction to the same inasmuch as it will affect several projects in his district. (See ahead for final decision.)

The Commission discussed a request from the County Court of Sherman County for the improvement of the Fulton Canyon Secondary State Highway where it connects with the Columbia River Highway near Miller Station. The Engineer advised that the present connection is not on permanent alignment and that to provide a permanent connection would cost about \$6,000. To construct a temporary new approach east of the present connection, utilizing the old railroad grade, he said, would cost about \$4,000; whereas, it would cost only about \$400 to improve the present connection so as to eliminate the conditions that are causing complaint. If times were normal, he said, he would recommend construction on permanent basis; however, on account of the present war emergency he believed the expenditure should be kept at a minimum and, accordingly, recommended the improvement of the present connection. The Commission approved the recommendation; however, authorized an expenditure of \$2,000 as cooperation with the county in constructing the temporary connection, using the old railroad grade, if the county insists and will contribute county funds to make up the difference. (See final decision when County Judge George A. Potter appeared later in this session.)

The Engineer reported the result of a survey conducted for the improvement of the Pacific Highway West, U. S. Highway 99W, between Corvallis and Monmouth. (See report dated April 29, 1942, in general files.) This report covers surveys on several alternate routes preliminary to the preparation of plans for an access road to the military cantonment, known as Camp Adair, north of Corvallis and describes each alternate route from various standpoints, including cost of construction, benefits to traffic, et cetera. The Engineer recommended the adoption of the so-called "green" route which is the most direct route from a point near the Polk-Benton County line to Monmouth and connects with the Monmouth-Independence Highway near the intersection of East and Main Streets. The matter was discussed at some length but a definite decision thereon was deferred until the evening session.

In this connection the Engineer reported receipt of a petition from property owners on East Main Street (Monmouth-Independence Highway), Monmouth, requesting the widening and improvement of East Main Street between Broad Street and the east city limits, and that such work be included in the major highway construction south of Monmouth. Mr. W. H. Lynch, District Engineer, Public Roads Administration, who was present, advised that this project could not be included in the contract for the Monmouth-Corvallis improvement. The Commission thereupon denied the request; however, agreed to give the matter further consideration at a later date.

A delegation from Monmouth appeared before the Commission at this time relative to the proposed Monmouth-Corvallis improvement of the Pacific Highway West. Dr. F. R. Bowersox, Mayor, headed the group which included Messrs. F. E. Chambers, Howard Moreland, George Cooper, and Guy Demming. The Engineer explained the alternate routes under consideration for this improvement. Mayor Bowersox explained that it would be to the city's best interests if the Commission would adopt the route which intersects the present highway a short distance south of the city limits and connects with the present highway on Monmouth Avenue. He explained that such routing would be a convenience to people residing in the Monmouth trade area south of their town. He pointed out that the town's business houses are centered around the intersection of Main Street and the present highway and that all of the businessmen are in favor of the adoption of the route that he has suggested. He presented a resolution adopted by the Monmouth City Council in support of his oral arguments. He also presented a statement signed by numerous businessmen of Monmouth endorsing the resolution. After considerable discussion Chairman Cabell thanked the delegation for its appearance and stated that the Commission is not ready as yet to make a definite decision but expects to do so in the near future. (See ahead for resolution adopting permanent route.)

County Judge George A. Potter, Sherman County, came before the Commission in regard to the improvement of the present intersection of the Fulton Canyon Secondary State Highway with the Columbia River Highway near Miller Station. He advised that a new grain elevator has been constructed next to the Columbia River Highway at Biggs and wheat farmers, who patronize this elevator, are obliged to use the Fulton Canyon Road which has a very bad connection with the Columbia River Highway. He suggested the construction of a new connection, using the old railroad grade which intersects the highway about a quarter of a mile east of the present connection, which would not only provide a better entrance to the highway but would also reduce haul mileage and conserve truck tires and gasoline. Chairman Cabell advised that the Commission has already discussed this matter and decided, inasmuch as the estimated cost to construct a permanent connection is more than the Commission can spend for construction on any one project under the new rule of the War Production Board, that it would be best to improve the present connection which could be done at considerably less expense and would serve the purpose until the Commission can see its way clear to build the permanent connection. He added that if such solution will satisfy the county court, the Commission will authorize the Engineer to proceed with the work. Commissioner Clough concurred. Judge Potter expressed satisfaction of such an arrangement; however, requested a letter setting forth the reasons for the same. The

APR 30 1942

Commission thereupon instructed the Engineer to proceed with the improvement of the present connection and to write the letter requested by Judge Potter.

The Assistant Attorney requested instructions relative to the disposal of buildings situate on the right of way acquired for the Oregon Coast Highway between Marshfield and North Bend. He said that there is a dearth of residence buildings in Marshfield and that the buildings owned by the state could be used to very good advantage for such purposes. He recommended in view of the fact that the contemplated highway improvement may not go forward for some time, that the buildings be rented until such time as the right of way is needed for construction and that the handling of the rentals be placed in the hands of a local realtor. The Commission indicated approval of the suggestion; however, deferred a definite decision until its next meeting which was tentatively set for Thursday, May 7, in Portland.

The Commission adjourned at 12:15 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Mr. T. B. Watters, Chairman of the Roads and Highways Committee of the Klamath County Chamber of Commerce, was present in regard to the further improvement of The Dalles-California Highway north of Klamath Falls. Chairman Cabell explained the status of the Commission's funds and the difficulties that the Commission is facing with respect to highway improvements, particularly as to the securing of governmental approval of projects and necessary priorities for equipment, materials and supplies, all of which lead the Commission to believe that The Dalles-California Highway project cannot go forward as originally planned. He pointed out that the Commission is now endeavoring to secure approval of several projects, including a new bridge over the Coast Fork of the Willamette River on the Willamette Highway a short distance east of Goshen, which is a very badly-needed structure from a military standpoint, it being the only bottleneck on the Willamette Highway, and advised that if the Commission receives any encouragement in connection with this project, it will then give further consideration to additional improvements on The Dalles-California Highway north of Algoma, although there is a question whether or not the Commission's efforts in that regard will produce the desired results. Mr. Watters expressed his approval of the explanation, in view of the circumstances, and requested that he be kept advised as to the status of the Algoma project. The Engineer was instructed to keep Mr. Watters informed.

At 2:30 p. m. Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were received at the morning session, such disposition having been previously approved by the Commission:

"Baker Rock Production Project on three state highways, in Baker County. D. C. and A. L. Williams, La Grande, submitted the only bid for this project, in the amount of \$15,550.00. The Commission awards the contract to D. C. and A. L. Williams at their bid of \$15,550.00.

"Lewisburg-Corvallis Section of the Pacific highway West, in Benton County. 5.56 miles grading and paving. No bids were received for this project.

"Reconstruct Blodgett Overcrossing on the Corvallis-Newport Highway, in Benton County. Four bids were received for this project, the low one being that of J. F. Johnston, Newberg, at \$13,010.00. and the second-low bid being that of Averill & Corbin, Portland, at \$14,044.00. The Commission awards the contract to J. F. Johnston at his low bid of \$13,010.00.

"Construct North Dillard Bridge over the South Umpqua River on the Pacific Highway, in Douglas County. C. J. Eldon, Portland, submitted the only bid for this project, in the amount of \$190,235.00. The Commission has rejected this bid.

"Buchanan Rock Production Project on the Central Oregon Highway, in Harney County. No bids were received on this project.

"Lebanon-Sweet Home Rock Production Project on the Santiam Highway, in Linn County. A. H. Saxton & Son, Corvallis, submitted the only bid for this project in the amount of \$32,100.00. The Commission awards this contract to A. H. Saxton & Son at their bid of \$32,100.00.

Building at Eugene

"Building No. 8787, formerly owned by Albert Larsen. Kenneth Dodd, Eugene, submitted the only bid received for this building, in the amount of \$25.00. Action on the sale of this building has been deferred until May 7, 1942.

Buildings at North Bend

"Building No. 9532, formerly owned by Clara Bustrin. Five bids were received for this building, the high one being that of Harold Potts, Eastside, at \$101.00, and the second-high bid being that of Kenneth Dodd, Eugene, at \$63.00. The Commission deferred action on the sale of this building until May 7, 1942.

"Building No. 9517, formerly owned by Nancy Jane Johnson. Atwell T. Andrews, North Bend, submitted the high bid for this building, in the amount of \$40.00. The only other bid received was submitted by Kenneth Dodd, Eugene, at \$15.00. The Commission deferred action on the sale of this building until May 7, 1942.

"Building No. 9559, formerly owned by R. L. Cavanaugh. Four bids were received for this building, the high one being that of Harold Potts, Eastside, at \$101.00, and the second-high bid being that of Kenneth Dodd, Eugene, at \$55.00. The Commission has deferred action on the sale of this building until May 7, 1942.

"Building No. 9491, formerly owned by Coos Bay Longshoremen Benefit Association. Kenneth Dodd, Eugene, submitted the only bid

received for this building, in the amount of \$21.00. The Commission has deferred action on the sale of this building until May 7, 1942.

"Building No. 9501, formerly owned by Ira L. and Grace E. Goodlin. Three bids were received for this building, the high one being that of Kenneth Dodd, Eugene, at \$178.00, and the second-high being that of Harold Potts, Eastside, at \$176.00. The Commission has deferred action on the sale of this building until May 7, 1942.

"Building No. 9498, formerly owned by Cora Swanson Coyle. Harold Potts, Eastside, submitted the high bid for this building, in the amount of \$65.00. Kenneth Dodd, Eugene, submitted the second-high bid in the amount of \$56.00. There were three lower bidders. The Commission has deferred action on the sale of this building until May 7, 1942.

"Building No. 9499, formerly owned by John Sandine. Kenneth Dodd, Eugene, submitted the only bid for this building in the amount of \$15.00. The Commission has deferred action on the sale of this building until May 7, 1942.

"Building No. 9560, formerly owned by John H. Tewsley. Kenneth Dodd, Eugene, submitted the only bid for this building, in the amount of \$15.00. The Commission has deferred action on the sale of this building until May 7, 1942."

Mr. M. L. O'Neil, contractor for regrading, surfacing and oiling the Soda Mountain-Silvies Section of the John Day-Burns Highway, in Grant County, Contract No. 2556, appeared before the Commission in regard to the cancellation of his contract as is contemplated under the War Production Board's Order L-41. The Engineer explained the situation and advised that, if Mr. O'Neil wants to take a chance in securing priorities so he can proceed with the job, that would be satisfactory with the Commission; however, the Commission prefers cancellation of the project outright, and will reimburse Mr. O'Neil for expense already incurred including materials and supplies, if Mr. O'Neil is unable to dispose of them. Mr. O'Neil expressed his approval of such arrangement whereupon the Commission authorized the cancellation of the contract, which matter is to be covered by appropriate agreement among the parties concerned.

Mr. A. H. Saxton of the firm of Saxton and Son, contractors for grading, surfacing and oiling the Campbell Bridge-Hazeldale Section of the Farmington Secondary Highway, in Washington County, Contract No. 2552, was present in regard to cancellation of this contract in view of the recent ruling of the War Production Board, Order L-41. The Engineer explained the War Production Board's ruling and advised that the Commission prefers to cancel the contract, if that is agreeable to Mr. Saxton, with the understanding that Mr. Saxton would be reimbursed for expense that he has incurred in connection therewith to date. Mr. Saxton agreed to the cancellation of the contract under such condition. The Commission thereupon ordered that the matter be covered by appropriate written agreement.

The same understanding was reached with Mr. Rogers of the Rogers Construction Company with respect to two contracts that are in the same category, being contract No. 2528, for grading, surfacing and oiling the Diversion Canal-Midland Overcrossing Section of the Midland Secondary Highway, in Klamath County; and Contract No. 2555, for grading, surfacing and oiling the South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County. The Commission ordered that these arrangements also be covered by appropriate written agreement.

The Engineer was also instructed to discuss the matter with Morris Brothers, contractors for grading and topping the Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, in Wheeler County, Contract No. 2553, and, if they approve cancellation of the contract, to have the matter covered by appropriate written agreement on the same basis.

A delegation from Milwaukie, consisting of Mesdames Marie Harlow, George H. Cooper, E. Kleinhaus, and C. B. Bussey, representing the Parent-Teachers Association, came before the Commission and requested the installation of a traffic signal over the Pacific Highway East at its intersection with the Island Station Road, just south of Milwaukie. Mrs. Harlow headed the group. She advised that many children who reside in the Island Station district attend the schools in Milwaukie and are obliged to cross the highway at least twice daily, and while the schoolboy patrol is maintained at this intersection for the benefit of such children that is not sufficient and they are asking for the installation of a traffic signal that is operated by a push button so as to require traffic on the highway to come to a stop when children or other pedestrians are crossing the highway. This situation, she said, is particularly hazardous at the present time in view of daylight saving. Chairman Cabell explained the difficulties in securing traffic lights during the present emergency, also the policy of the Commission with respect to such installations. The Engineer suggested perhaps the matter could be solved by hanging a footbridge on the railroad trestle which is situate nearby and the use of the same by school children. The suggestion was approved by the delegation, whereupon the Commission instructed the Engineer to take the matter up with the railroad company officials. The Secretary was instructed to inform Mrs. Harlow when the Commission has reached a final decision.

Messrs. E. K. Knutson and Phil Berthiaume, representing the California Western States Life Insurance Company, appeared before the Commission in regard to furnishing group life insurance for state highway department employees. Mr. Knutson advised that they have already signed up some 462 employees who are paid on an hourly-basis, such signatures being acquired by their agent during the progress of the canvass of employees who are now receiving benefits under the group accident and health insurance contract, which canvass they make at regular intervals as a matter of service and to bolster up the company's account. He said they had no idea that the Highway Commission would object to the soliciting of its employees for life insurance at the same time. He asked the Commission to approve the solicitation and to authorize deductions of the life insurance premiums from its monthly pay rolls.

Chairman Cabell advised that the Commission has no criticism to offer with respect to the accident and health insurance that is now being written by the California Western States Life Insurance Company covering certain highway department employees, but the furnishing of group life insurance is a new matter which the Commission wants to investigate thoroughly before making a decision. The Commission wants to make definitely certain, he said, that it is doing the right thing by the employees in authorizing the writing of group life insurance and, if its decision in that regard is favorable, then the Commission wishes to know definitely whether or not other insurance companies have any better proposition to offer. Inquiries have already been directed to other companies, he added, and when answers are received the Commission's decision will be based on a scrutiny of the same. In the event the Commission receives no better proposition than its offer from the California Western States Life Insurance Company, then it will accept the plan of this company if, in the meantime, it is decided to approve the deductions from the department's pay rolls. Commissioner Clough concurred. Chairman Cabell then stated that he would give this matter his personal attention and expedite the Commission's decision as much as possible.

The Commission approved the minutes of the meetings held on August 14 and 15, September 4 and 5, October 16 and 17, November 6, and November 17 and 18, 1941. (All of the above minutes were later approved and signed by Commissioner Oliver, signifying unanimous approval.)

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway

Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to institute condemnation proceedings to acquire other properties that are needed for highway improvements. He submitted the following list of such properties with offers that he recommended in condemnation:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9311	E. F. Judkins	Right of way	\$8,000.00
9424	Vernon R. Olsen, et ux.	" " "	3,000.00

After due consideration the Commission approved the offers and authorized condemnation in each instance. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter

expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Edward F. Judkins, which property is located in the Zara Sweet D.L.C.No.68, situated in Section 33, Township 17 South, Range 3 West, and in Sections 3 and 4, Township 18 South, Range 3 West, and in the Daniel McVey D.L.C.No.63 in Section 3, Township 18 South, Range 3 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2 and is further identified in the records of the Highway Commission as file R 9311, and which property is being acquired for right of way purposes in connection with the Willamette Highway;*

Real property owned by Vernon R. Olsen, et al., which property is located in the Zara Sweet D.L.C.No. 68 in Section 33, Township 17 South, Range 3 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 9424, and which property is being acquired for right of way purposes in connection with the Pacific Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said real property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is

hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 24, under the heading "Real Property Condemnation Resolutions," and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Commission considered and denied, as a matter of policy, a request from the Western Lane County Chamber of Commerce for authority to use certain state property situate adjacent to the Oregon Coast Highway at Florence, over which to construct a roadway leading from the highway to a tourist park in this town.

A letter was presented from Mr. Earl K. Nixon, Director of the State Department of Geology and Mineral Industries, inquiring as to the status of the agreement between the Highway Commission and the Krome Mining Corporation relative to a Port Orford Cedar State Park, in Curry County, in which the corporation desires to conduct mining operations. The Secretary was instructed to inform Mr. Nixon that this agreement has been consummated and that the corporation has paid into the state highway fund its initial payment of \$2,400; further, that the Commission has received no information whatsoever as to abandonment of the mining venture by the corporation.

The Attorney brought up for discussion a pending suit, being the case of ~~Lester~~ Wilkins versus the Highway Commission, involving real property in Gilliam County. He advised that this suit is of long standing and particularly concerns the destruction of a well. He also advised that the land on which the well is located was acquired by condemnation for use as right of way for a highway improvement and during the course of construction of the highway the well was filled in, there having been no agreement or understanding with Mr. Wilkins with respect to his continued use of the well. He gave as his opinion that the state is not liable to Mr. Wilkins in any way and recommended that the Commission stand suit notwithstanding that Mr. Wilkins is willing to accept \$150 as payment in full for his claim. The Commission decided to let the courts pass judgment in the matter.

The Commission adjourned at 4:30 p. m. and reconvened at 8:00 p. m. in Room 515, Imperial Room, Imperial Hotel, with the same persons present and participating.

The Attorney reported that, due to the closing down of construction work by reason of the War Production Board's order freezing funds, there is a dearth of projects to which to assign his right-of-way men and unless new assignments are provided in the near future it may be necessary to dispense with the services of some of these men which he is very reluctant to do, inasmuch as they are all well trained in the purchase of real properties and could not conveniently be replaced upon resumption of right-of-way buying activities. He inquired if it would be possible to select new projects at this time so as to keep the men busy. The Engineer pointed out that undoubtedly there will be a big demand for highway work as soon as the war is over, and suggested the making of surveys and the acquisition of right of way at this time for preference projects which would make it possible to retain the nucleus of the engineering and right-of-way organizations and to have the jobs ready for construction within the shortest possible time, when needed. He presented a list of projects, as follows, in this category and recommended that he be authorized to make surveys as may be necessary in connection with each, and that the right-of-way department be authorized to conduct negotiations for needed right of way:

<u>Section</u>	<u>Highway</u>
Parkrose-Troutdale-Bonneville	Columbia River
John Day River-Quinton	" "
Wolf Creek-Grave Creek	Pacific
Halsey-Harrisburg	Pacific Highway East
Kernville-Newport	Oregon Coast
Seaside-Arch Cape	" "
Milton-Washington State Line	Oregon-Washington
Malloy Ranch-Hooker Creek	I.O.N.
Judkins Point-Goshen	Willamette
Juniper Butte-Terrebonne	The Dalles-California
Crescent	The Dalles-California
Madras-Prineville	Warm Springs Secondary
Burns North	John Day-Burns
Taylor Creek West	Ochoco

After considerable discussion the Commission authorized the Engineer to conduct surveys of these projects and the Attorney to conduct right-of-way negotiations for the same. Responsibility for the selection of the projects in the order of their importance was delegated by the Commission to the Engineer personally, it being understood that the projects along the Coast would be deferred until later in the year. The Attorney was instructed to report the estimated cost to purchase the right of way needed for each project.

In this connection the Attorney requested instructions relative to the securing of options for right of way needed for the improvement of the Oregon Coast Highway through the town of Gold Beach, Curry County. The Commission, after discussion, authorized the securing of such right of way provided the state by so doing would not be obligated to spend any money at the present time for the moving of buildings or for construction, it being the

thought of the Commission that the prospects for early construction of the project are not good. The Attorney was instructed to so inform the local citizens.

The Attorney reported receipt of an offer from Mr. George Asper, Lyons, Oregon, to pay \$10 annually for a five-year lease of certain property that the Commission acquired from Marion County as a gravel pit and stock-pile site, being situate adjacent to the North Santiam Highway near Mill City and referred to as file R-6448. He advised that Mr. Asper owns the adjacent property and wishes to use the state's property for pasture purposes and has agreed to fence the same to keep out trespassers who are now using the property as a garbage dump. The Commission decided, as a matter of policy, not to lease the property to Mr. Asper. The Engineer was instructed to inspect the premises and to construct a fence around the property if, in his opinion, that is necessary in order to properly protect the same.

The Commission approved and signed an agreement with the City of Portland and the Public Market Company of Portland with respect to highway construction along Front Avenue, Portland, past the Public Market building.

The Attorney requested instructions relative to the settlement with Jurgen La Frenz for right of way needed for the Wolf Creek Highway, in Washington County. He advised that he has been unable to reach a satisfactory arrangement with Mr. La Frenz and recommended, in view of the federal government's orders closing down construction work, that further negotiations be discontinued until the property is actually needed. The Commission approved the recommendation.

A letter was presented from Harrison E. Devereaux, State Administrator, Works Projects Administration, advising that, due to inability to obtain skilled workmen, it will be necessary in the near future to close down all WPA work on the Wolf Creek Highway unless the Highway Commission is able to provide such skilled and key personnel and desires that this work be continued. The Engineer advised that the Highway Department does not have extra personnel available for this work, so many men having been inducted into the army and others having quit to obtain better-paid employment elsewhere. In view thereof, the Commission decided to discontinue this WPA work. The Engineer was instructed to convey such information to Mr. Devereaux by letter and to express the Commission's thanks for the cooperation that it has received from the WPA in the construction of the Wolf Creek and Wilson River Highways. The Engineer was also instructed to have Construction Engineer H. G. Smith inspect the Wolf Creek Highway project in company with Mr. Devereaux with a view in mind of closing down all work in connection therewith as gracefully as possible.

In this connection the Engineer advised that, as a result of closing down this project, there will be available for disposal several pieces of road-construction equipment which are of no particular value to the state. He recommended the sale of this equipment to the highest bidder for the same. The Commission approved the recommendation and authorized the Engineer to advertise the equipment for sale at the next meeting. (It was later decided to rent the equipment rather than sell it.)

The Attorney presented an offer from H. E. Weir to purchase lumber salvaged from property acquired by the Commission from Christian Ramseyer for right of way for the improvement of the Pacific Highway East south of Salem. He advised that there are about 1.33 M-FBM of lumber for which Mr. Weir has offered to pay \$10. He also stated that, since receipt of this offer, he has received another in the same amount. He recommended acceptance of the offer of Mr. Weir, the first one received, because the lumber is of no value to the state and it would cost more than \$10 to clean up the premises. The Commission approved the recommendation.

In this connection the Attorney also reported receipt of an offer from Mr. A. Schweinfurth to lease this property, which contains about 70 acres, on a yearly basis for pasture. Mr. Schweinfurth, he said, is willing to pay \$1.00 per head of stock that he runs on the property and will do the necessary spraying of the orchard on the property provided that he is allowed to have the fruit. He recalled that the Commission some time ago received an offer from Mr. Schweinfurth to lease a portion of this property at \$150 a year and agreed to construct a fence between the leased property and the right of way provided he would be allowed to remove the fence at the termination of the lease, which offer the Commission refused as a matter of policy. After discussion the Commission indicated a favorable attitude thereto and instructed the Attorney to contact Mr. Schweinfurth and ascertain whether or not his first offer is still good.

The Commission had under discussion the question of reconstructing the H. L. Claycomb property in Ashland which is necessary in order to accommodate the proposed highway improvement at the Plaza Corner in this town. The Attorney advised that the original estimated cost to remodel the structure was \$19,500; however, since this estimate was made, it has been necessary to revise it in view of rising prices so the work is now estimated to cost \$23,384 although Mr. Claycomb is ready and willing to settle on the basis of the original estimate. He suggested, in view of the fact that the highway work cannot proceed as planned because of inability to secure governmental approval of the same, that it would be best to defer such remodeling work and to let Mr. Claycomb continue to operate his business in the present building until the property is actually needed by the state. The Engineer concurred in the recommendation. After discussion the Commission approved the recommendation.

The Commission also discussed the matter of disposal of other buildings in Ashland which have to be removed to accommodate the Plaza improvement. The Attorney advised that all of the buildings affected have been purchased by the state and the question now arises whether or not the Commission wants to dispose of them at this time and clear the properties or let them remain as is until the highway improvement is undertaken. He suggested that the Commission do nothing whatsoever to the buildings until the properties are needed in connection with the highway improvement and that in the meantime the buildings be rented. The Engineer suggested that the Commission inspect the properties before taking definite action. Such suggestion was approved by the Commission, it being understood, however, that the Attorney would go to Ashland prior to the Commission's visit and make the best possible tentative arrangements for the disposal of the buildings.

The Attorney reported briefly on the form of permit required by the federal government in order to secure right of way over and across certain irrigation canals for the improvement of the Klamath Falls-Lakeview Highway near the fair grounds in Klamath County. He advised that he wrote Counsel for the Bureau of Reclamation for an interpretation of the clause which has to do with labor restrictions and hours of labor and received a reply to the effect that this particular clause simply follows the wording of the federal law and it appears to cover laborers and mechanics of the state or any contractor or subcontractor doing work for the state; further, that the work contemplated by the contract is the work to be accomplished by the state at the crossing in question and applies only to work performed within the area of the government right of way. The meaning of this interpretation, he said, is that the permit applies only to work that is done by the state in the area described in the permit, which was the point that the Commission questioned when the matter was first brought up for discussion. The Commission approved the report.

The Attorney reported on the sale of two small tracts of land on the Warm Springs Highway at the Madras Overcrossing, Jefferson County. He advised that he contacted the parties that made both offers and has received a reply from one of them, The Deschutes Grain & Feed Company, to the effect that they are still willing to pay \$50 for one of the tracts. He also said he has not as yet heard from Howard F. Turner relative to the other tract. He recommended acceptance of the offer of The Deschutes Grain & Feed Company. The Commission approved the recommendation.

The Attorney also reported on recent investigations relative to the request of Emil Henskie for fence construction along the Warm Springs Secondary Highway in front of his premises. He recalled that the Highway Commission acquired right of way at this point from Jefferson County, free of cost, and so far as the records show nothing was said at the time about constructing the fence. However, Ex-County Judge W. R. Cook, who was in office at the time, advises that the county expected the state to construct the fence in front of this property as it did along the adjoining properties and the county sold certain land to Mr. Henskie under that assumption, although there is nothing in the record as evidence to that effect. The Engineer recommended, in view of the circumstances, that the state do not build the fence. The Commission approved the recommendation.

The Commission had under discussion a request from the War Industries Company, Portland, for permission to use certain state-owned property at the intersection of Lincoln and First Streets, Portland, as a storage site in connection with its contract with the federal government for the construction of engines. The Engineer advised that the company wants to lease a 40-foot strip on the west side of the highway right of way across Block A, during the period of the present war emergency to facilitate the operations of its foundry which is located on property immediately adjacent thereto. He recommended approval of the request provided the company will pay a reasonable rental for the same inasmuch as the area cannot be used for state purposes until the war is over. The Commission approved the recommendation and ordered that the matter be discussed with the Portland city officials and a reasonable rental

figure arranged. It was decided that moneys received from the company as rentals shall be credited to the city and state on the same basis that the city and the state are paying for acquisition of right of way for the Front Avenue project; viz., 60 per cent city and 40 per cent state.

The Commission considered and approved the following county resolutions with respect to sections of old state highways that have been abandoned by the Highway Commission:

Resolution from Deschutes County with respect to the abandonment of a portion of the Century Drive Secondary Highway

Resolution from Polk County relative to the abandonment of three parcels of land within the old right of way of the Dallas-Coast Secondary State Highway, between Buell and the old Wallace Bridge, in Polk County

Resolution from Polk County with respect to the abandonment and retention of certain sections of the Dallas-Coast Secondary State Highway between engineer's stations 403+00 and 444+50, particularly between Buell and Salt Creek School

Resolution from Polk County with respect to the abandonment of a section of the old right of way of the Dallas-Coast Secondary State Highway between engineer's stations 248+60 and 253+20, near Mill Creek

Resolution from Polk County relative to the abandonment of a portion of the old right of way of the Independence Secondary State Highway between Brunks Corner and Oak Point

Resolution from Polk County retaining on the county road system the following sections of old right of way of certain secondary state highways which have been abandoned by the state: portion of the Dallas-Coast Secondary State Highway between engineer's station 437+00 and the foot of Butler Hill opposite engineer's station 403+00; portion of Dallas-Coast Secondary State Highway from its intersection with the McMinnville-Tillamook Highway to engineer's station 66+00; section of the Dallas-Coast Secondary Highway between engineer's stations 132+00 and 169+00; portion of the Brunks Corner-Independence Secondary State Highway between its intersection with the Salem-Dallas Highway and Rickreall Creek

Resolution from Polk County relative to the abandonment of a section of the Dallas-Coast Secondary Highway between engineer's stations 314+18 and 335+83

The Commission discussed and upon recommendation of the Engineer adopted the following resolution with respect to the abandonment of a portion of the Lost River Section of the Klamath Falls-Malin Highway, in Klamath County, such section being no longer of value from the state highway standpoint:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Klamath Falls-Malin Highway in Klamath County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section, which section is more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way heretofore designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Lost River Section of the Klamath Falls-Malin Highway in Klamath County, but is no longer a part of the right of way of said highway as the same has been relocated and constructed, be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Klamath County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Lost River Section of the Klamath Falls-Malin Highway in Section 34, Township 40 South, Range 10 East and in Section 3, Township 41 South, Range 10 East, W. M., Klamath County, and lying on the westerly side of the right of way required for the reconstructed Klamath Falls-Malin Highway, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 818+15 on the northerly end and Station 42+20 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference

to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated April 21, 1942, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Klamath County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said Klamath Falls-Malin Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Klamath County and beyond any responsibility or supervision by the State Highway Commission.

The Commission had under discussion the setting of a date for a special meeting of the Commission to receive bids for the sale of buildings that are to be removed from new right of way acquired at Medford. It was decided definitely to hold such meeting in Portland on Thursday, May 7, commencing at 10:00 a. m. The Secretary was instructed to arrange to hold this meeting in the Imperial Hotel, if possible. Commissioner Clough expressed doubt that he could attend this meeting, whereupon Chairman Cabell was authorized to conduct the meeting and to act for the Commission in the disposal of the building matters that would come up at that time, including the question of rental of buildings in North Bend.

Chairman Cabell reported receipt of information to the effect that the Ross Motor Building, which is located near the highway department's maintenance site at Multnomah Station, is for sale and the suggestion has been

*Map filed Right of Way Abandonment and Retention File - No. 103.

offered that it would make a good building for highway maintenance forces operating in that vicinity, if additional building facilities are needed. The Engineer was instructed to investigate the matter.

Chairman Cabell also brought up for discussion the matter of purchase of the Moser gravel pit on Grave Creek, in Josephine County, concerning which a controversy exists as to the amount that the state should pay for this property. It appears that Mr. Moser is demanding an exorbitant sum. The Commission indicated that it would condemn the property, if necessary, but deferred a definite decision in regard thereto, pending further consultation with Neil Allen who is Mr. Moser's attorney. The Attorney was instructed to discuss the matter personally with Mr. Allen.

The Engineer reported on the cost to maintain the Independence-Wells-Granger County Road, in Polk and Benton Counties, particularly between Independence and Camp Adair. He estimated that it would cost about \$20,500 to repair the road, including reinforcement of two bridges, and to maintain it for the remainder of the year. He recommended that the Commission assume this responsibility in view of the large volume of traffic the road carries. After discussion the Commission approved the recommendation and thereupon signed an agreement with the Polk and Benton County Courts relative thereto.

Consideration was given by the Commission to a request from the United States War Department for the closing of a section of the Sams Valley Secondary Highway, in Jackson County, as an accommodation to the Medford Army Cantonment known as Camp White. The Engineer advised that, in his estimation, the Commission has no alternative but to approve the Army's request; further, that arrangements have been made for the detouring of traffic during the time that the road is closed. The Commission approved the request and thereupon adopted the following resolution relative thereto on the condition that the same meets with the approval of Jackson County Court:

WHEREAS, the United States War Department has established for the purpose of national defense an area to be known as Camp White Military Cantonment; and

WHEREAS, a section of the Sams Valley Secondary State Highway in Jackson County is within or passes through the said military cantonment, and the War Department for the protection and safety of the general public and for convenience and the efficient use of said army cantonment has requested that a certain section of said secondary highway be closed to public traffic; and

WHEREAS, it appears that the use by the War Department of the area within the army cantonment for the purpose for which the same has been established will create a hazard to members of the public traveling said section of said highway and that the use of said highway by the traveling public will interfere with the efficient and proper use of the cantonment area; and

WHEREAS, it appears to the Highway Commission to be in the best interests of the general public to grant the request of the United States War Department and close for the duration said section of said secondary highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission as follows:

1. That the Commission does hereby declare its purpose to cooperate with the United States Government in every plan for and in every effort made toward national defense in so far as the Commission may do consistent with the best interests of the State and the Commission's fixed authority.

2. That the section of the Sams Valley Secondary Highway in Jackson County defined as:

"Beginning at a road intersection at mile point 8.98 easterly from Gold Hill, and extending easterly and north-easterly to mile point 15.35 approximately one-half mile west of Dodge Bridge over the Rogue River, which point is also approximately 1.9 miles westerly from the Crater Lake Highway, being a distance of 6.37 miles,"

shall be and said section of said secondary highway hereby is closed to public traffic from the date of June 30, 1942, for the duration; provided, however, that upon advice in writing by the proper officer in charge of said cantonment that the closing of said section of said highway to public traffic is no longer in the interests of the United States War Department, then said section of said secondary highway shall be by resolution of this Commission declared open again for public traffic.

3. That the War Department representatives in charge of said army cantonment are hereby authorized and required to erect and maintain proper and appropriate barricades at the termini of said section of said road and in addition thereto such signs as may be necessary to adequately and effectively warn and inform the traveling public.

4. That other than the adoption of this resolution the Highway Commission shall be under no obligation to barricade the said section of said highway at either of the points of entrance to said cantonment, and the delivery of a certified copy of this resolution to Major Theron W. Bean, Quartermaster Corps, Construction Division, United States Army, Camp White Military Cantonment, Medford, Oregon, shall constitute the Commission's full responsibility with respect to the closing of said road as between this Commission and the United States War Department.

SEP 30 1942

5. It is urgently recommended that entrance to said army cantonment over any other road, county or otherwise, be adequately barricaded against traffic for the duration.

6. That the Secretary of the Commission be and he hereby is instructed to deliver by mail to Major Theron W. Bean a certified copy of this resolution, and request from him an acknowledgement of its receipt and acceptance.

Reconsideration was given by the Commission to the question whether or not to pay the federal tax that is being charged by power companies in connection with payments to them for service rendered. A tabulation was presented showing the amounts that have been paid during the year 1941 to the several power companies throughout the state, aggregating \$28,333.28. The Commission considered it inadvisable to withhold payments of accounts as they become due for such service, and accordingly authorized the release of the warrants, subject to the condition, however, that each company be informed that the Commission is paying the federal tax in connection therewith under protest.

Reconsideration was also given by the Commission to the matter of contributing funds this year in connection with the KOAC "Oregon on Parade" program as has been done the past two years. In this connection a report was presented from Ben E. Titus, Acting Director of the Travel and Information Department, giving as his thought, in view of the present war emergency, that the college's radio program would be of greater value to the state this year than in the past, and recommending an appropriation for this purpose. The Engineer concurred in the recommendation, whereupon the Commission, by unanimous vote, approved an expenditure of \$1,500 to assist in this undertaking.

The Commission considered and ordered filed a letter from Thomas H. MacDonald, Commissioner, Public Roads Administration, Washington, D. C., relative to the availability of 1941 federal aid funds, in which Mr. MacDonald advises that such funds would normally remain available for expenditure until June 30, 1942, but under the provisions of Section 5 of the Defense Act of 1941 such period of availability has been extended to June 30, 1943, in view of which any 1941 funds remaining unobligated on June 30, 1942, will not lapse.

The Engineer brought up for discussion matters pertaining to the highway department's finances (see Engineer's letter directed to Oregon State Highway Commission, dated March 31, 1942, in general files) and in connection therewith presented a statement, as follows, showing the status of projects that have been tentatively approved for construction this year:

<u>Project</u>	<u>Federal Funds</u>	<u>Total Estimate</u>	<u>Status</u>
1943 F. A. Projects (Fed. funds available \$810,000)*			
Boardman-Umatilla County Line	\$ 115,000	\$ 143,000	Contracted

	\$ - -	\$ 155,100	

It appeared to the Commission that some of the federal aid projects listed may have to be withdrawn from the program because of inability to secure army approval or to make a saving of funds. The Commission decided not to delete any of the projects unless army approval cannot be obtained or unless it becomes necessary to do so in order to make a definite saving of funds. The Engineer was instructed to discuss the matter further with T. M. Davis, Senior Highway Engineer, Public Roads Administration, with a view in mind of rearranging the program, if necessary, in order to effect the greatest possible savings.

The Commission had under consideration the approval of a program for federal forest highway funds for the fiscal year ending June 30, 1943, amounting to \$109,800, of which amount \$45,000 is recommended for improvement of drainage and correction of slide conditions on the Santiam Highway, the balance for administration, surveys, and plans. The following program letter relative thereto was approved and signed by the Commission:

APR 30 1942

Chief, Forest Service
Commissioner, Public Roads Administration
Washington, D. C.

April 22, 1942

Gentlemen:

In accordance with the regulations for carrying out the provisions of Sec. 23 of the Federal Highway Act, it is recommended that the following estimated expenditures for the Fiscal Year ending June 30, 1943, be authorized out of available Forest Highway funds for the State of Oregon.

Administration	\$49,800
Surveys & Plans	15,000
Emergency Post Const. (Slide Correction)	
SN 23-K4, L3, Santiam Hwy. .7 mi.	<u>45,000</u>
TOTAL	\$109,800

These expenditures are for necessary administration of incomplected major construction projects, emergency post construction, preparation of P.S. & E. on approved routes and discharging the maintenance obligations of the Federal Government on completed projects.

Proj. SN 23-K4, L3, Santiam Highway, Slide Correction, involves the drainage and correction of several serious slides on Sections K and L which have occurred within the last year. There is approximately 0.7 of a mile of the highway affected by the slides, and an estimated amount of \$45,000 will be required to drain and correct the conditions. Repair and reconstruction of the roadway are contemplated under future projects.

A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, advising receipt of advice that the War Department has recommended disapproval of the Grants Pass-Roseburg Project on the Pacific Highway and two sections of the Columbia River Highway Project, between Troutdale and Corbett, as they are not considered by the Army authorities indispensable to the war effort. The Engineer was instructed to bring this information to the attention of R. E. Koozer, President of the Oregon Pacific Highway Association, and Charles H. Reynolds, President of the Oregon Trail Association, which groups are particularly interested in these projects.

The Attorney requested instructions relative to the renewal of the insurance in connection with the Commission's agreement with the O.W.R. & N.

APR 30 1942

Company and the Union Pacific Railroad Company covering snow removal operations in the Columbia Gorge. He advised that the present policy expires on October 1, 1942, and that the matter comes up at this time because Underwriters at Lloyd's London, the only company which is in position to write a satisfactory policy covering such operations, has offered to rewrite the insurance at this time on a three-year basis at a reduced premium, in view of the Commission's experience rating, and will allow a credit for the unused portion of the premium paid for the old policy. In order to secure such concession, he said, it is necessary to file a certificate with the State Insurance Commissioner. The Commission considered it advisable to take advantage of this offer, and thereupon approved the securing of the new policy.

The Commission also discussed the matter of placing the State Highway Engineer's bond for the fiscal year commencing June 15, 1942, in the amount of \$200,000. The question arose whether to give this business to the several companies that enjoyed it the past year or to conduct a drawing to determine to whom the business should be given. A decision in the matter was deferred by the Commission until the next meeting. The Secretary was instructed in the meantime to secure suggestions from the State Insurance Commissioner.

A resolution was presented from the Salem City Council requesting the widening of South Twelfth Street between the first alley south of Ferry Street and Mill Street in connection with the resurfacing work on Twelfth Street which the Commission proposes to do this year, such widening work being necessary in order to eliminate a jog in the street alignment. The Commission denied the request.

Reconsideration was given by the Commission to the adoption of a permanent route for the Pacific Highway West between Monmouth and Corvallis. Chairman Cabell stated that he favored the adoption of the plan previously recommended by the Engineer at this meeting. Commissioner Clough also stated his preference for such line. The following resolution relative thereto was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the United States has selected a site upon which to construct an army cantonment to be known as Camp Adair and is now engaged in the construction and development of the same; and

WHEREAS, the development of said camp and thereafter the use of the same by the United States War Department will impose on the Pacific Highway West between Monmouth and Corvallis a volume and kind of motor traffic which because of the width of surface and the numerous curves which characterize said highway render the same inadequate for Army transport purposes and civilian uses; and

WHEREAS, said highway between said termini cannot be properly improved on the present alignment and location, and therefore the Highway Commission has found it necessary and advisable after careful surveys and studies to relocate said highway in places between said termini; and

WHEREAS, the Commission's Chief Engineer, pursuant to instructions given by the Commission, has made necessary surveys to determine the best and most feasible route between said termini and has filed with the Commission the field notes and other engineering data with respect to each of said surveys; and

WHEREAS, the Commission's Chief Engineer has recommended the adoption of the route referred to among the several surveys as the most easterly route.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the location and route of the Pacific Highway West between Monmouth and Corvallis shall be relocated and constructed along the alignment hereinafter expressly defined.

2. That the route, location and alignment described as

Beginning at the intersection of North Ninth Street with Harrison Street in the City of Corvallis, which intersection is also a point on the Pacific Highway West; thence northerly along North Ninth Street to the north city limits of Corvallis, and continuing northerly following approximately the present constructed route of the Pacific Highway West to a point approximately two miles north of the Benton-Polk County Line in the north half of Section 31, Township 9 South, Range 4 West, W. M.; thence continuing in a northerly direction, on the easterly side of and approximately one-half mile distant from the present highway, to the junction with the Monmouth-Independence Highway near the intersection of East Street with Main Street in the Town of Monmouth, said intersection being in the Southeast quarter of the Northwest quarter of Section 30, Township 8 South, Range 4 West, W. M.,

shall be and the same hereby is designated and adopted as the route, location and alignment of the Pacific Highway West between Monmouth and Corvallis.

3. That the field notes, records and other engineering data developed and assembled by the Chief Engineer in connection with the survey made for the purpose of determining said route and location be and the same hereby are adopted as the field notes, data and survey of the said newly established route and location, and said data, field notes and other information shall be filed in the office of the Highway Commission at Salem, Oregon.

4. That if and when the said highway is reconstructed between Monmouth and Corvallis such construction shall follow the said route and location hereby adopted.

5. That until a highway along said newly adopted alignment, route and location is constructed and made available to the general public, the existing section of the Pacific Highway West between Monmouth and Corvallis shall continue to be the route of the Pacific Highway West between said termini.

The Secretary presented a petition signed by numerous residents of Sweet Home requesting the widening of two cuts on the Santiam Highway about one mile east of Sweet Home so as to provide greater safety to school children who are obliged to walk on the highway in attending the schools in Sweet Home. The Engineer estimated that it would cost about \$2,300 to do such widening work. The Commission denied the request on account of the expense involved.

The Commission discussed briefly matters pertaining to the construction of the Sprague River County Road in Klamath County and decided not to undertake this project at the present time in view of the war emergency.

Consideration was given by the Commission to a request from Earl C. Reynolds, Secretary of the Klamath County Chamber of Commerce, and Brady Marey, Klamath Falls, for the construction of guard fence along The Dalles-California Highway between Midland and Worden where the highway follows along an irrigation ditch for about five miles and where it is alleged numerous accidents occur. The Engineer advised that it would cost about \$26,000 to construct such guard fence and that he has informed Mr. Reynolds that he could not recommend this expenditure in view of the shortage of highway funds, and for the further reason that this condition has existed for many years during which the number of accidents that have occurred as compared to the total volume of traffic that uses the road is not excessive. The Commission approved the Engineer's report.

The Commission discussed and denied a request from the Weston Chamber of Commerce for the improvement of a five-mile section of the Weston-Elgin Secondary State Highway between McDougall and Weston because of lack of funds with which to finance the work and the freezing of funds by the War Production Board. The Commission ordered that hereafter requests for highway improvements costing in excess of \$5,000 be given a stock answer; viz., that the war situation has stopped all new construction work costing in excess of \$5,000 except those that are approved by the Army or Navy authorities as essential to the war efforts.

A letter was presented from C. H. Watsek, President of the Roaring River Logging Company, requesting the improvement of a three-mile section of the Albany-Lyons Secondary Highway south from the town of Scio to facilitate logging operations and suggesting, if the State Highway Commission cannot see its way clear to make such improvement, that it might take over as a temporary secondary highway route, the Richardson Gap county road, most of which, he said, is in pretty fair condition. This road extends southerly from the Albany-Lyons Secondary Highway for about three miles, commencing at a point about two miles east of Scio and then turns west to a connection with the

Albany-Lyons Secondary Highway about three miles south of Scio. The Engineer advised that to improve the secondary highway south of Scio is quite an expensive proposition and in his estimation the work could not be undertaken at this time in view of the Army regulations. He questioned the advisability of rerouting the highway through Richardson Gap because the highway is now properly routed through the town of Scio which is the trading center of this district. The Commission decided not to place the Richardson Gap route on the state secondary system; however, instructed the Engineer to arrange with Mr. Watsek for a joint inspection of the present route, and to maintain this route in the best possible condition under existing circumstances.

The matter of renewing the center stripe on state highways was discussed by the Commission. It was pointed out that the purchase of traffic paint is becoming increasingly difficult on account of war conditions and a considerable saving in paint might be effected if the stripe were painted in dashes rather than in a continuous line as is now being done. The Commission decided to try out such method on one of the secondary highways to see how it works. The Engineer was thereupon instructed to make over one of the paint-stripping machines for such experiment.

The Engineer reported the award of the following contracts as previously authorized by the Commission, the conditions of the awards having been satisfied:

Grading and paving Section "A" of the South Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County. Bids taken April 2; contract awarded April 3, 1942, to Berke Brothers, low bidders;

Grading and paving Section "B" of the South Unit, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. Bids taken April 2; contract awarded April 3, 1942, to Jacobsen-Jensen Company, low bidder;

Structures on the South Unit, Antelope Creek-Medford Section of the Crater Lake and Pacific Highways, in Jackson County. Bids taken April 2; contract awarded April 3, 1942, to Tru-Mix Concrete Company, low bidder;

Surfacing and bituminous macadam construction on the Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County. Bids taken March 19; contract awarded April 14, 1942, to McNutt Brothers, low bidders.

The Commission confirmed such awards as reported.

The matter of prohibiting bonfires and fireworks on the ocean beaches during hours of darkness was discussed by the Commission. It was decided that such activities should not be permitted during the present war emergency. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the shore of the Pacific Ocean between ordinary high tide and extreme low tide and from the Columbia River on the north to the Oregon and California State Line on the south, excepting such portion or portions of such shore as may have heretofore been disposed of by the State, has been declared by the provisions of Section 100-1001, O.C.L.A., to be a public highway and by said law it is provided that said highway shall forever remain open as such to the public; and

WHEREAS, by the provisions of Section 100-1005, O.C.L.A., the rules of the road and regulations governing motor vehicles have been extended to and made applicable to that part of the shore of the ocean which has been by law declared to be a public highway; and

WHEREAS, the promiscuous building of bonfires on the shore of the ocean interferes with defense measures and regulations, thereby necessitating some regulatory measures, to the end that the value of necessary safeguards imposed by the Federal Government may not be dissipated.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION as follows:

1. That no bonfire shall be started on the shore of the ocean after the hours of darkness nor shall any bonfire started during daylight hours be left burning after the hours of darkness.
2. Any and all persons who may start or keep burning a bonfire on the shore of the ocean shall be responsible for and shall be required to extinguish same before the hours of darkness.
3. The use on the shore of the ocean of fireworks and any other article or thing likely to produce a flare, fire or light hereby is prohibited during the hours of darkness.
4. Copies of this resolution and regulation shall be posted at conspicuous places along the various parts of the shore of the ocean where people are accustomed to congregate and the State Highway Engineer hereby is instructed to take the necessary steps and do the necessary things to carry this provision into effect, and the newspapers throughout the State shall be requested to give due publicity to this rule and regulation of the Commission.
5. Any persons knowing of a violation of this rule or regulation are earnestly requested to report the same to the nearest state highway employe or to the nearest member of the State Police force, or if there be no such employe or officer available, then by letter to the State Highway Commission.

APR 30 1942

6. This rule and regulation is promoted by the Highway Commission for the protection not only of individuals along the coast but in an effort to cooperate with the Government officials as a part of defense measures and activities.

7. The Commission is confident that complete and wholehearted cooperation as a patriotic duty will be given by all in this effort to help the Federal Government.

8. This resolution shall be entered in the minutes and records of the Commission and the Secretary is instructed to deliver a duly certified copy thereof to Lieutenant General J. L. DeWitt, Commanding General, Western Defense Command and Fourth Army.

9. This ruling and regulation shall be in full force and effect for the duration of the present war emergency.

The Commission discussed a letter from Mr. J. Arthur Berg, Attorney, Coquille, directed to Governor Charles A. Sprague, suggesting the relaxation of the weight regulations which now control logging operations over state highways so as to facilitate moving of logs to the mills and the filling of defense orders for lumber. The Commission decided not to change the regulations as that could not be done without overstressing highways and bridges.

In this connection the Engineer recommended the moving of the truck scales which have been installed on the Santiam Highway just east of Sweet Home. The scales as previously located, he said, appear to be on the wrong place and many of the log haulers are required to drive their trucks a considerable distance out of their way in order to be weighed, whereas, if the scales were relocated at the top of the hill about four-tenths of a mile west of Foster Bridge such condition would not obtain. The Commission authorized the moving of the scales and ordered that, until the scales are moved, weighmasters discontinue weighing trucks that are obliged to travel the extra distance to the present scale site. The weights of such loads are to be determined by inspection.

The Engineer reported on the complaint that log haulers are being unnecessarily delayed by weighmasters at the scales located at Skipanon, Clatsop County. He advised that Chief Weighmaster Loran L. Spaulding recently spent three days at these scales and observed that when trucks are running normally they are held up only a very short time by the weighing process; furthermore, even when the loads bunch up, there is no appreciable delay in the weighing and everything possible is being done to expedite the logging movements, all of which indicates that the allegations are untrue. The Commission approved the report.

The question whether or not to require logging operators to deposit with the Commission a surety bond or certified check when their operations are

simply across a state highway and not along the highway was discussed by the Commission. The Commission decided not to demand such deposit although the operators shall be required to furnish public liability and property damage insurance in the amounts required by the Public Utilities Commission, as a public protection. The Engineer was instructed to carefully watch the highway at such points and, if he finds that the highway is being excessively damaged, to bill the logging operator for the cost of the repairs.

The Engineer brought up for discussion the penalty to be imposed on log haulers who are operating under the new law which allows 68,000 pounds gross load and who, upon having loads weighed, are found to be transporting loads in excess of 68,000 pounds but under 71,400 pounds, which is the five per cent tolerance allowed by the Commission. He advised that, under present ruling, PUC plates are not requested if the gross load does not exceed 71,400 pounds; however, citations are made to the Justices of the Peace for all gross loads in excess of 68,000 pounds. He recommended that these cases be not cited to the Justices if the overload is within the five per cent tolerance allowed by the Commission or unless the gross load exceeds by more than ten per cent the allowable gross load as determined by formula. The Commission approved the recommendation.

The Secretary requested instructions as to the penalty to be imposed on log haulers for a fourth offense for overloading. The Commission decided that the penalty for the fourth offense shall be the same as for the first three offenses, which is four days' suspension of the permit under which they are operating. However, upon commitment of the fourth offense the operator is to be notified by letter that his permit will be cancelled in the event of a further violation.

Reconsideration was given by the Commission to the matter of maintaining the Gales Creek Road, in Washington County, as a temporary state highway pending completion of the Wilson River Highway between Washburn and North Plains. The Commission voted unanimously to assume jurisdiction over this road during such period and thereupon signed an agreement with the Washington County Court pertaining thereto. (See agreement for details)

The Commission considered and ordered filed the following communications:

Circular from W. C. Markham, Secretary, American Association of State Highway Officials, re Senate Resolution 2208 covering emergency powers of Interstate Commerce Commission over motor and water carriers.

Article from Engineering News-Record re "Construction Machinery Purchases to be Placed on A-1 Priority Basis by WPB."

Resolution from City Council, Oakland, California, suggesting that the Pacific Highway be renamed MacArthur Boulevard in honor of General Douglas A. MacArthur.

Request of Professor Alfred Jensen, Engineering Department, University of Washington, for permission to take pictures of bridges, dams and other structures along Oregon highways.

A letter was presented from Honorable Clinton Hurd, County Judge, Lane County, transmitting a letter from Elisha Large, Mayor of Eugene, in which Mayor Large advises that the Eugene City Council has designated the alley east of High Street, between Sixth and Eighth Streets, as a one-way alley for the purpose of relieving traffic congestion on High Street when the canning season opens at the Eugene Fruit Growers Association. In view of this information the Commission decided to proceed with the reconstruction of the Sixth Avenue-High Street intersection in conformity with plans previously approved. The Engineer was thereupon authorized to spend an amount not to exceed \$5,000 for such purpose.

The Commission considered the following requests for extensions of time within which to complete highway construction contracts:

F. C. Feldschau and Son, contract No. 2371, for the Tillamook Rock Production Project on the Oregon Coast and Wilson River Highways, in Tillamook County, requested an extension of time, from June 1, 1941, to January 10, 1942, within which to complete this job. They alleged that the original contract was completed within the specified time limit but they were required to furnish additional materials from time to time which work was paid for as a contract item. The Engineer advised that the reason given by the contractor for overrun of the time limit in connection with this contract is correct and recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Frank Watt Construction Company, contract No. 2494, for construction of a bridge over the North Fork of the Necanicum River on the Wolf Creek Highway, in Clatsop County, requested an extension of time, from January 31 to April 7, 1942, within which to complete this job. It alleged that its failure to complete the project within the specified time limit was due to difficulties in securing steel and in obtaining trucks to haul away the old bridge and clean up the site. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct, further, that highway traffic has not been interfered with nor inconvenienced on account of the delay in completion of the job, neither has the state incurred any extra expense for engineering supervision. In view thereof, he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

J. F. Johnston, contract No. 2525, for construction of a bridge over the Rogue River on the Salmon River Highway near Grand Ronde, Polk County, requested an extension of time, from January 31 to April 30, 1942, within which to complete this job. He attributed

his failure to complete the project within the specified time limit to inability to secure delivery of steel. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2494, 2540, 2546, 2558, and 2562, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2494, with Frank Watt Construction Company, for construction of a bridge over the North Fork Necanicum River on the Wolf Creek Highway, in Clatsop County. Completed April 6, 1942.

Contract No. 2540, with Blair T. Alderman, for roadside improvement on the Tigard Section of the Pacific Highway West, in Washington County. Completed April 1, 1942.

Contract No. 2546, with A. H. Saxton & Son, for the Halsey Rock Production Project on the Pacific Highway East and Halsey-Sweet Home Secondary State Highway, in Linn County. Completed April 1, 1942.

Contract No. 2558, with A. T. Fox, for construction of a shed for storage of highway maintenance equipment at Alsea, in Benton County. Completed April 6, 1942.

Contract No. 2562, with A. T. Fox, for construction of a shed for storage of highway maintenance equipment at Tillamook, in Tillamook County. Completed April 20, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Washington County relative to maintenance of the Gales Creek Road.

Agreement with the City of Portland relative to the construction and maintenance of a portion of North Burgard Street.

Agreement with W. W. Harris covering hauling of logs across Van Duser Corridor adjacent to the Salmon River Highway.

Agreement with the City of Portland and the Public Market Building Company relative to the construction of the Front Avenue Project in front of the Public Market Building.

Agreement with the City of Hermiston relative to the maintenance of a city street that is not on a state highway route.

Agreement with J. L. Wooden renewing the lease of property used as a highway maintenance headquarters in the town of Clatskanie.

Agreement with Eugene F. Hug, Sr., renewing the lease of property used as a maintenance headquarters site in the city of Elgin.

Agreement with Hunt Livestock Company relative to the lease of a maintenance headquarters site at Maupin.

Agreement with W. G. Hellier covering the sale of mineral deposits on Port Orford Cedar State Park, in Curry County.

Agreement with Benton County, Polk County, and the City of Independence relative to the maintenance of the Independence-Wells-Granger County Road.

Easement granting to one Emil Duyck right and permission to enter upon certain state property adjacent to the Wolf Creek Highway in order to repair and maintain two drainage ditches located thereon.

Bargain and sale deed conveying unto Norman F. Berg, et al, 1.03 acres of land in Columbia County. Real property files 8963 and 9862-A.

Bargain and sale deed conveying unto J. B. Johnson property situate in Lots 2, 3 and 4, Block 32, Coos Bay Plat "B" Addition to North Bend, Coos County, being real property files 9522 and 9556.

Quitclaim deed conveying unto Vincent L. Moore 0.047 acre of land situate in the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 8, Township 11 South, Range 10, West, W. M., near Toledo, in Lincoln County.

The Commission discussed the setting of a date for its next regular meeting and decided to hold such meeting in Portland on Thursday, June 4, 1942, and to hold an interim meeting at a convenient date to be set later. (Special meeting held on May 7 in Portland. Interim meeting held on May 19 enroute Marshfield to Ashland.)

There being no further business to come before the Commission at this time the meeting adjourned at 10:30 p. m.

Proctor
State Highway Engineer

Henry F. Cabell
Chairman

H. B. Claisyer
Secretary

Huron W. Clough
Commissioner

Portland, Oregon, May 7, 1942

The State Highway Commission met in special session at 10:00 a. m. in Room 515, Imperial Room, of the Imperial Hotel. Present were:

Henry F. Cabell, Chairman
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Claisyer, Secretary

Commissioners Huron W. Clough and Herman Oliver were excused from attending this meeting, having previously authorized Chairman Cabell to act for them in the disposal of building matters at Eugene, North Bend, and Medford.

Bids, as follows, for the purchase of buildings and a tract of land at Medford were opened and read in conformance with previously published notice:

Building No. 10145 (Former owner Medford Corporation)

No Bids Received

Building No. 10082 (Former owner J. E. Sollis)

F. A. Spitsmiller	\$150.00
Kenneth Dodd	102.00
Allen M. Clark, Medford	80.00
Tru-Mix Concrete Company	25.00

Building No. 10067-A (Former owner C. M. Parker)

J. S. Lydiard	\$75.00
Herbert Hartle	50.00
Kenneth Dodd	31.00
Tru-Mix Concrete Company	25.00

Building No. 10067-B (Former owner C. M. Parker)

Tru-Mix Concrete Company	\$25.00
Kenneth Dodd	21.00

Tract of Land (Former owner J. E. Sollis)

Herbert Hartle	\$200.00
Tru-Mix Concrete Company	125.00
J. S. Lydiard	75.00

The bids received were given very careful consideration. All were rejected except that submitted for Building No. 10067-A, formerly owned by C. M. Parker, which building was sold to J. S. Lydiard, Medford, the high bidder, at his offer of \$75.00.

Mr. Kenneth Dodd of Eugene, one of the bidders, was present and discussed matters pertaining to his bids, particularly that in connection with Building No. 10067-B, formerly owned by C. M. Parker. Mr. Dodd's offer was \$21.00 for this building but he qualified it by stating that he would not accept it alone. Mr. Dodd requested a few days time within which to discuss the bid with his partner as there is a possibility that they will make a higher offer. The request was granted.

The Attorney advised that Berke Brothers, contractors, are interested in the purchase of Building No. 10082, formerly owned by J. E. Sollis, and the tract of land on which the house is situate, in fact have offered, orally, to pay \$1,500 for this property. He was instructed by Chairman Cabell to contact Berke Brothers and ascertain if they still want this property. He was authorized to sell it to them for \$1,500 if they want it.

In regard to Building No. 10145, formerly owned by the Medford Corporation, on which no bids were received, Chairman Cabell decided that this building should be wrecked by the state's contractor as part of the highway project in Medford.

Consideration, as follows, was next given to the bids received by the Commission on April 30 for the purchase of buildings at Eugene and North Bend, action on which was deferred by the Commission at that time:

The matter of sale of Building No. 8787, in Eugene, formerly owned by Albert Larsen, was discussed with Mr. Dodd who submitted the only bid therefor at \$25.00. The Commission rejected this bid,

whereupon Mr. Dodd made an oral offer of \$40.00 for the same. The Attorney reported receipt of an oral offer of \$75.00 from Mr. Larsen, the former owner of the building, and recommended acceptance of such offer in the event that Mr. Larson is still willing to pay that much for it. Chairman Cabell approved the recommendation; however, authorized the sale of the building to Mr. Dodd at \$40.00 in the event that Mr. Larsen does not want it.

The following action was taken on the bids received for the purchase of the buildings in North Bend:

All bids received for the purchase of Building No. 9532, formerly owned by Clara Bustrin; for Building No. 9559, formerly owned by R. L. Cavanaugh; for Building No. 9501, formerly owned by Ira L. and Grace E. Goodlin; for Building No. 9498, formerly owned by Cora Swanson Coyle; for Building No. 9499, formerly owned by John Sandine; and for Building No. 9560, formerly owned by John H. Tewsley, were rejected and the Attorney was instructed to rent these buildings. He was authorized to make arrangements with a local realtor to handle the rentals.

Building No. 9517, formerly owned by Nancy Jane Johnson:- This building was sold to Atwell T. Andrews, North Bend, at his offer of \$40.00.

Building No. 9491, formerly owned by Coos Bay Longshoremen Benefit Association:- The bid of Kenneth Dodd, Eugene, at \$21.00, which was the only bid received for this building, was accepted. However, Mr. Dodd was allowed the privilege of either taking the building or withdrawing his bid, in view of the fact that this is the only building on which he was the successful bidder and he undoubtedly would lose money on the transaction if the Commission held him to his offer.

The Engineer brought up for discussion the matter of sale of construction equipment that has been used on the Wolf Creek Highway WPA project. He advised that he has given this matter further study since the Commission authorized the sale of this equipment at the previous meeting and is now of the belief that it would be better to rent the equipment, and he so recommended. Chairman Cabell approved the recommendation and authorized the advertising of the equipment for rental at the next meeting.

The question whether or not to allow log hauling on the Oregon Coast Highway between Cannon Beach and Wheeler was discussed and it was decided to permit such hauling under the standard rules and regulations notwithstanding that some of the loads may have to be transported through Arch Cape Tunnel.

Messrs. C. A. Hancock and C. H. Radloff, representing the Shell Oil Company, were present and requested permission to transport tank trucks, containing gasoline and weighing in excess of the legal limits, over certain state highways enroute from California to Junction City, particularly over the Pacific Highway, and over The Dalles-California Highway and the Willamette

Highway. Mr. Radloff stated that their equipment is 50 feet overall in length but the tanks were constructed extra large so as to provide for the carrying of legal-weight loads in California which are greater than those allowed in the state of Oregon, and the company wants authority to bring a few full capacity loads into this state, notwithstanding the excess weight, so as to help out in relieving the present gasoline shortage. He particularly asked for the privilege of increasing the gross load of such equipment from 61,000 pounds to 64,400 pounds, which is represented by 380 gallons of gasoline. The Engineer pointed out that the existing Dillard Bridge over the Umpqua River is in bad state of repair and would not stand up under the excess load, although between that point and the California state line there would be no objections to allowing the extra weight. He further stated that there are no objections to authorizing the extra weight on The Dalles-California Highway between the California state line and Bend, and over the Willamette Highway to Eugene, were it not for the fact that there is a very weak bridge on the Willamette Highway a short distance east of Goshen.

Mr. Radloff stated that it would help a lot if they were permitted to transport such loads over the Pacific Highway as far as Dillard Bridge, and over The Dalles-California Highway, and the Willamette Highway as far as the bridge east of Goshen; and, if granted such privilege, they would arrange some other route into Eugene and Junction City. The Engineer recommended the granting of a permit on such basis, provided the loads do not exceed those allowed by the formula $W = 800 (L + 40)$, wherein W represents the total gross weight in pounds, and L represents the distance in feet between the first and last axles of the vehicle or combination of vehicles; and by the formula $W = 675 (L + 40)$ in case of group-axle spacing of 18 feet or less. Chairman Cabell approved the recommendation and authorized the Secretary to issue permits in conformance therewith.

Following this conference, the matter of inspection of the Plaza project in Ashland was discussed and it was decided to make such inspection on Tuesday, May 19, 1942. It was also decided to motor to Marshfield on May 18 for a conference with the Chamber of Commerce that evening, driving to Ashland on the following day.

The meeting was adjourned at 12:30 p. m.

State Highway Engineer

Chairman

Secretary

Marshfield, Oregon, May 19, 1942

The State Highway Commission disposed of the following matters en-route from Marshfield to Ashland. Present and participating in the discussions were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

The Engineer reported the status of all construction jobs as of May 2, 1942, giving information as to the type of work involved, the percentage of work completed, and the estimated date of completion. A typewritten list of the projects was given to each Commissioner. After discussion of the same, during which the question arose as to the plans of the contractors to complete their work, the Engineer was instructed to write each contractor and secure such information.

The Engineer also reported on the matter of allowing Mr. D. F. Moehnke to make certain improvements to the Alsea-Deadwood Secondary State Highway beyond the limits of the improved section, in order to facilitate his logging operations. He recalled that Mr. Moehnke appeared before the Commission at its meeting on March 19 and asked the Commission to construct a $1\frac{1}{4}$ -mile section of this road between Batdorf's place and the foot of Alsea Mountain, but the Commission denied the request because of the expense involved, whereupon Mr. Moehnke asked the privilege of improving this section with his own forces and equipment and at his own expense. He further stated that Mr. Moehnke was contacted by Division Engineer F. D. Eason who advises that Mr. Moehnke has evidently changed his mind with respect to paying for the work, and, whereas he is willing to furnish the equipment to carry on the work, he expects the state to pay the other costs which he estimated would amount to \$1,000. The Commission refused to assume such expense; however, authorized the granting of a permit to Mr. Moehnke to do the work, provided he furnishes satisfactory public liability and property damage insurance as a protection to the public while the work is under way.

A letter was presented from A. Z. Barnard, Condon, requesting the improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary State Highway in Gilliam County, so as to facilitate the truck hauling of wheat from Gilliam County to the Port of The Dalles by cutting down the mileage of such hauling. Mr. Barnard alleges that the improvement of the Cottonwood Grade would reduce the mileage of the haul some 50 to 65 miles. The Engineer estimated that it would cost about \$772,000 to construct this road to proper standards between Condon and Wasco, approximately 45 miles. He pointed out that this highway is not on the strategic network and that under the ruling of the War Production Board the Commission is limited to an expenditure of \$5,000 for work of this kind. In view of the circumstances, the Commission denied the request.

A letter was also presented from the Jefferson County Chamber of Commerce, urging the surfacing of the newly constructed section of The Dalles-California Highway south of Madras, which improvement, in their estimation, is of vital importance in the defense effort. The Engineer was instructed to make such investigations as are necessary and to render a report at the next meeting on the cost involved.

A request was presented from the City of Ontario for the oiling of one block on South First Avenue West between Oregon Street and West First Street, such work to be done this year when the state's oiling crew is improving other city streets that are not on state highway routes. The city agrees to pay the costs involved which is estimated at about \$715.00. The Engineer recommended approval of this project in view of the fact that the Commission previously approved it for state forces, in the event that the city could not arrange to have it done by one of the highway contractors working in that vicinity and it being unlikely that the Commission will undertake any convenient contract work here this year on account of war restrictions. The Commission approved the recommendation subject to the condition that the city will deposit in advance its certified check in the amount of the estimated cost of the work.

The Commission discussed briefly and ordered filed a newspaper item from the Daily Journal of Commerce, Portland, indicating that the United States Indian Service intends to proceed immediately with the improvement of the Sprague River County Road in Klamath County between the towns of Sprague River and Chiloquin, notwithstanding the inability of the State Highway Commission to cooperate in the improvement.

The Engineer reported the necessity to place a 10-ton load limit on the Umatilla River Bridge at milepost 11.84 on the Hermiston Secondary Highway, in Umatilla County, which has been rendered unsafe for legal weight loads by heavy hauling to the army ammunition depot during the last few months. The Commission approved such reduction of load limit and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the road or highway hereinafter named has been designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon, as a state highway;

AND WHEREAS, on the said state highway there is located a certain bridge structure, known as the "Umatilla River Bridge", which, in the judgment of the State Highway Commission, is incapable of safely carrying the traffic to which it is being subjected, and, in order to protect said bridge structure against damage and injury and in order to safeguard traffic over said bridge structure, it is deemed and is the judgment of the State Highway Commission and said Commission finds that it will be for the best interest of the said bridge structure and of the traffic which uses the said bridge structure that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of the said structure at any time shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having, as a result of due investigation, found that the bridge structure above referred to and hereinafter designated is incapable of safely sustaining or supporting a total gross load in excess of that specified hereinbelow:

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the said bridge structure shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

HERMISTON SECONDARY STATE HIGHWAY, No. 333, Umatilla County

Milepost 11.84	Umatilla River Bridge	10 tons
----------------	-----------------------	---------

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O.C.L.A., shall be in full force and effect until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structure, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND IT IS FURTHER ORDERED, that a certified copy of this resolution be furnished the County Clerk of Umatilla County, in which county the said bridge structure is located, and to the Superintendent of the Department of State Police for his information.

In this connection the Engineer also reported that the county road leading from Hermiston to the ammunition dump and which was oiled by the state last year as a federal aid secondary highway project is in need of repair. He recommended, in view of the fact that Umatilla County is not in position to maintain the road and for the further reason that the road is carrying a large volume of state highway traffic, that it be maintained by the state at state expense for the duration of the war emergency. The Commission approved the

recommendation and ordered that the matter be covered by appropriate agreement between the state and the county.

The Engineer brought up for discussion the matter of performing jobs for counties and cities and particularly questioned the advisability of performing such work, notwithstanding that the work would be paid for by the counties and cities, in view of the difficulties in obtaining necessary materials and supplies. He recommended that all of such work, other than the small city jobs that already have been approved by the Commission for construction this year, be deferred until the return of normal times. The Commission approved the recommendation.

The Commission discussed a letter from General Robert Lee Bobbitt, member of the Texas State Highway Department, and President of the Western Association of State Highway Officials, suggesting that the highway authorities in each state adopt a policy with respect to cooperating with the War Production Board in its recent L-41 Order, which halted various construction activities; also advising that the Texas Highway Department has adopted such a resolution. The Engineer advised that he has given this matter serious thought and the policy adopted by the Texas Highway Department coincides exactly with his views. He read aloud a suggested press release for approval by the Commission, as follows:

On April 9 the War Production Board issued order L-41 prohibiting starting any highway and street construction unless specifically approved by it as essential to the war effort. A few days ago a new order was sent out by the War Production Board permitting highway and street construction jobs to start provided the construction does not require the use of steel and provided no priority rating for repair parts to equipment and for materials and tires is required to perform the work. The order further provides that the War Production Board may order suspension of the work at any time if in the judgment of the War Production Board the prosecution of the war requires more urgently the use elsewhere of the labor, materials or construction machinery needed to complete the road or street project previously authorized.

In case priorities are required to secure materials, parts for equipment, or tires, the priorities may be granted if, in the opinion of the War Production Board, the proposed work is considered by the War Production Board to be essential to the war effort.

Provision is made for the State Highway Department to serve as an agency of the War Production Board in the transmission of required monthly estimates of materials needed to complete all projects under way and carried on pursuant to this order not only for state highway work but also for road and street projects carried on by the several counties and the municipalities of Oregon.

At first glance it would appear that the bars are let down and any road or street work may proceed as in peacetime, but careful review of the order discloses the following features:

1. The agency sponsoring the road or street project, be it federal, state, county or city, is given the responsibility for the selection of such work as is actually needed and such work as will actually aid the war effort in the phase of transportation. Failure to act with discretion and good judgment will in all probability result in the loss of this authority.

2. Very little work can actually be performed without the constructor having the necessary priority to secure repair parts for equipment, certain critical materials other than steel, and tires. To assume otherwise evidences "wistful thinking." In order to secure the necessary priorities and actually obtain the required materials, it is necessary to have the specific approval of the War Production Board and its certification that the work is essential to the war effort. This actually places the status of the work in practically the same category as the original order No. L-41 of April 9.

Unquestionably this more recent order will cause a great deal of confusion and misunderstanding. The Commission firmly believes, however, that it has a definite responsibility to conduct its work in such manner as to aid and to assist and not to detract from the very essential war effort of this country. Accordingly the Commission proposes, in the expenditure of its own funds, to confine such expenditures to administration, to surveys and preparation of plans for post-war work, and to essential maintenance and restoration in order that the movement of goods and services for the war effort and civilian life may proceed with the minimum of delay and the maximum of economy in the use of equipment and tires. The Commission feels that there is a definite shortage of labor, materials and construction machinery and that road construction that is not essential to the war effort should be suspended for the duration and that only road projects which are essential to the war effort should be carried on at this time. The curtailment of the use of motor vehicular equipment, due to the tire and gasoline restrictions, will materially and drastically reduce the revenues accruing to the state highway fund and there will be little, if any, surplus for state construction, regardless of the above features. Therefore, the Highway Commission believes that it should promote only such road construction projects as are considered to be essential to the war effort by the War Production Board, the Army or the Navy. Such construction funds will in the main be federal funds and, of course, subject to the control of the federal authorities, including the War Production Board.

After discussion of the same the Commission approved it by unanimous vote and instructed the Engineer to forward a copy of the same to each county court. He was also instructed to rearrange the statement in a few words for release to the press. A formal resolution outlining the Commission's policy is to be prepared and adopted by the Commission at its next regular meeting.

In this connection the Engineer brought up for discussion the matter of cancellation of five contracts which are affected by the War Production

MAY 19 1942

Board Order L-41, being contract No. 2528, with Rogers Construction Company, for grading, surfacing and oiling the Diversion Canal-Midland Overcrossing Section on the Midland Secondary Highway, in Klamath County; contract No. 2552, with A. H. Saxton & Son, for grading, surfacing and oiling the Campbell Bridge-Hazeldale Section of the Farmington Secondary Highway, in Washington County; contract No. 2553, with Norris Brothers, for grading and topping the Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, in Wheeler County; contract No. 2555, with Rogers Construction Company, for grading, surfacing and oiling the South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County; and contract No. 2556, with M. L. O'Neil and Son, for regrading, surfacing and oiling the Soda Mountain-Silvies Section of the John Day-Burns Highway, in Grant County. He particularly pointed out that the War Production Board's order has been amended so that it is now possible under certain conditions to proceed with the construction of such projects (Reference WPB Order L-41-600), although such authorization assigns no preference rating to delivery of materials and provides that the inability of the highway department to procure materials without priority assistance will not of itself be considered adequate grounds for the issuance of a preference rating. Furthermore, the War Production Board may, at any time, order cessation of the work if in its opinion the prosecution of the war requires more urgent use elsewhere of the labor, materials and construction machinery that are being employed on the project.

The Commission decided, in view of this ruling, to leave it up to the contractors whether or not to proceed with their work. It was the thought of the Commission that the contractors would not wish to take a chance on securing a satisfactory preference rating and would prefer cancellation of the contract in each instance. The Engineer was instructed to contact the several contractors relative thereto and to secure Commissioner Oliver's reaction to the plan. (The Engineer telephoned to Commissioner Oliver upon arrival in Ashland and secured his approval of the action taken by Chairman Cabell and Commissioner Clough.)

A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, in which, among other things, Mr. Lynch requested the adoption of a 35-mile-per-hour speed limit on the Pacific Highway East at the Pudding River Bridge just north of Aurora. The Engineer recommended adoption of such speed limit. The Commission approved the recommendation and thereupon adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway East

Highway number: 1E Route number: 99E

	Location of Termini	Established Speed
M. P. <u>25.73</u>	to M. P. <u>26.54</u>	: <u>35</u> miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Commission discussed a letter from the Attorney, Mr. Devers, with respect to the insurance to be furnished in connection with the agreement with the O.W.R. & N. Company, covering snow removal operations on the Upper Columbia River Highway adjacent to the railroad tracks. Mr. Devers pointed out that the present insurance expires in October of this year and that there has been considerable difficulty in getting any company to write the policy because of the severe burdens in the contract; however, Lloyd's London, which is represented by Hansen & Rowland Insurance Agency, has agreed to take the risk, in fact Mr. Rowland of this company has offered to

rewrite the present policy with a 10 per cent reduction in the premium. Furthermore, he has agreed to revise the language so as to clarify an ambiguity in the present policy with respect to protection for which the state is paying. He suggests that the Commission renew the policy with Lloyd's, rather than to advertise the business for bids, in order to realize the 10 per cent reduction in premium and to secure the clarification of the uncertainties. He also suggested, in view of the fact that it requires about 90 days to effect the change, that the procedure be started at once to obtain a new policy, notwithstanding that the present policy will not expire until October. The company, he said, will give the state credit for the unearned portion of the premium paid for the old policy. The Commission approved the Attorney's recommendation and authorized the rewriting of the policy at once in Lloyd's London.

The Secretary presented a resolution from the County Court of Klamath County in which the county elects to maintain as a county road a portion of the Lost River Section of the Klamath Falls-Malin Highway, in Klamath County, which has been abandoned by the State Highway Commission in view of the fact that the highway has been reconstructed on other alignment. The Commission approved the resolution and ordered it filed.

The Commission discussed a proposed agreement with Clatsop County relative to the maintenance of the Elsie-Jewell County Road. This agreement was prepared to clarify jurisdiction over the road, which is now being used as a state highway detour, and provides that the road will be turned back to the county for maintenance when the Fishhawk Falls Secondary State Highway is constructed and open to public use. The Engineer advised that the county court objects to the clause which provides for the return of the road to the county upon completion of the secondary highway and wants this particular clause rewritten to read that "the road shall be maintained by the state until such time as the county court and the State Highway Commission jointly approve such disposition of the road." The Commission considered that such change is inadvisable because it appears that the state would have to maintain the road indefinitely regardless of whether or not the Fishhawk Falls Secondary State Highway was available for public use, if the county refused to consent to assume such maintenance. The Engineer was instructed to rewrite the paragraph but to retain the privilege of the State Highway Commission to turn the road back to the county when the Fishhawk Falls Secondary State Highway has been constructed.

The Commission adopted the following resolution confirming oral authority heretofore given, authorizing the hauling of logs over state highways during Saturday afternoons and Sundays:

WHEREAS, because of the large volume of motor vehicle traffic which uses the public highways of the state on Saturdays and Sundays it has been the adopted rule and policy of the Highway Commission that all state highways shall on Saturday afternoon and Sunday be kept free from log hauling; and

WHEREAS, because of the national emergency which exists and the inadequacy of existing motor transportation to move logs

from forest to mill in sufficient quantity or volume to satisfy emergency needs, it is deemed in the interests of the State and Nation that the Commission modify its rule and policy with respect to log hauling on Saturday afternoons and Sundays.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission as follows:

1. That for the duration of the present emergency trucks engaged in the transportation of logs will be permitted to use the state highways for such purpose on Saturday afternoons and Sundays; provided, however, that this rule of the Commission may be rescinded or modified with respect to any particular state highway or highways if and when conditions develop which warrant such change or modification.

The matter of permitting log hauling to be carried on under the Commission's special war emergency transportation permit had the attention of the Commission. The Commission decided not to grant such privilege inasmuch as the emergency transportation permit was prepared particularly to cover the movement of out-of-state equipment over Oregon highways, involving loads 60 feet overall in length and gross weights of 68,000 pounds, if provided with proper axle spacing, and was not intended to cover the truck hauling of logs, inasmuch as there is a special Oregon statute covering such movements. The Secretary was instructed to prepare an appropriate stamp to be affixed on each emergency permit, prohibiting the hauling of logs under the provisions thereof.

The matter of penalizing log haulers for violation of the rules and regulations of their permits, other than for violations of the gross weight provisions, was discussed by the Commission. Action on the matter was deferred until the next meeting. The Secretary was instructed in the meantime to ascertain from the several companies that write insurance covering such movements whether or not they check up on their assured and what, if any, action they take against the assured if they find that the provisions of the permits under which the assured is operating are being violated.

The Commission discussed a request from Mr. E. A. Borel, Purchasing Agent, R.F.C., Coquille, that the highway traffic scales now installed on the Coos Bay-Roseburg Highway, about three-fourths of a mile east of Coquille, be moved to a point near the north city limits of Coquille so as to facilitate the weighing of chrome ore which is to be stock-piled adjacent to the highway at this point. The Engineer recommended denial of the request because only very few loads of logs that have not already been weighed pass this point, and in his estimation if the scales are to be moved at all they should be moved to some other locality where there is a large volume of log hauling with no scales available to weigh the loads. He suggested that it would be advisable for the chrome interests to purchase their own portable scales which could be moved from one locality to another as occasion arose, inasmuch as the ore is being

secured and stock-piled at several different places in this district. The Commission approved the Engineer's recommendation and discussed the matter with Mr. Borel from that standpoint at Coquille while inspecting the site.

The Commission had under discussion the applications of the Bekins Moving & Storage Company and the Pacific Express Company for permission to operate over state highways trains of vehicles, consisting of truck tractor, semitrailer, and full trailer, 60 feet overall in length. The Engineer advised that he knows of no reason why the request should not be granted if the several units track properly and if the brake equipment on the rear unit functions satisfactorily, so as to avoid the "jackknifing" of the combination. The trucks of the Pacific Express Company, he said, are equipped with air brakes throughout and he recommended the granting of a permit for the operation of the equipment of this company on the highways of this state if the braking apparatus meets with the approval of the Highway Department's Master Mechanic. The Commission approved the recommendation and also authorized the granting of permits to other companies for like privilege if the equipment to be used is supplied with satisfactory air brakes. (Braking device was approved by Master Mechanic later and permit granted.)

In this connection the Secretary was instructed to notify permittees that the privilege granted is of a temporary nature only, and may be cancelled at any time, so large investments in new equipment should not be made with the idea in mind that the privilege would be extended indefinitely.

A letter was presented from County Judge C. D. Nickelsen, Hood River County, requesting additional construction work on the new Columbia Gorge Highway and urging the Commission to make strenuous attempts to secure federal access road moneys to finance the work. The Secretary was instructed to invite Judge Nickelsen to the next meeting of the Commission for a full discussion of this matter, inasmuch as an explanation as to the Commission's finances can be explained to him much better personally than by letter.

A letter was presented from Norman G. Fuller, Real-Estate Project Manager for the United States War Department Army Engineers, Medford, transmitting deed forms for the purpose of conveying to the United States of America title to a section of the Sams Valley Secondary State Highway, in Jackson County, which is contained within the boundaries of Camp White Army Cantonment, and for conveying unto the United States of America title to a certain stock-pile site situate within the same area. Mr. Fuller explained that the property is needed in connection with the proper functioning of the cantonment and to avoid accidents that might occur in the event that the road is left open for general public use. The Secretary recalled that the Commission, at a previous meeting, adopted a resolution authorizing the closing of the Sams Valley Secondary Highway through the cantonment area and that by such resolution the War Department is given full charge of the highway and is authorized and required to erect and maintain proper and appropriate barricades at the termini of the section that is to be closed to public use. A certified copy of this resolution, he said, was sent to Major Bean who is in charge of the cantonment, which copy has been acknowledged by Major Bean, who advises that it suits their purposes satisfactorily. The Engineer advised that Mr. Fuller

MAY 19 1942

has offered \$45 for the stock pile site which, in his estimation, is not enough considering that the state paid \$100 for it and also expended \$75 in fencing the site; furthermore, it will be put to considerable expense in removing the materials that have been placed on the area. He suggested, if the War Department is willing to accept an easement on the site for artillery range purposes during the present emergency, that the Commission grant the easement without cost, provided the Army will pay for moving the stock-piled materials to another site to be designated by the Highway Department outside of the cantonment area. On the other hand, if it is necessary that fee title be given, that the Commission convey the same to the Army for \$175 under the same condition with respect to the moving of the stock-piled materials.

The Commission considered, in view of Major Bean's letter accepting the resolution with respect to the closing of the highway, that it would not be necessary to deed the right of way to the government.

As to the stock-pile site, the Commission approved the Engineer's suggestion by unanimous vote and ordered that such information be transmitted to Mr. Fuller.

The Engineer brought up for discussion General Orders Nos. 3, 4 and 5 recently adopted by the Office of Defense Transportation, relative to the loading of trucks in order to conserve tires during the present war emergency. He pointed out that, if truckers are required to load their equipment in conformity with such orders, it would not be possible for them to conform with the Oregon statutory requirements; furthermore, such loads would overstress highways and bridges and would probably cause failure so that eventually the trucking industry would be much worse off than it is at the present time. He suggested that the governmental authorities be urgently requested to revise these orders so as to conform with the legal weight requirements of this state which would not only preserve the highways for general public use and for the movement of army troops but would also conserve the equipment of the trucking industry. He read aloud a copy of a letter that he directed to Mr. John L. Rogers, Director, Division of Motor Transportation, Washington, D. C., and telegrams to Mr. Rogers and Mr. MacDonald, Commissioner of Public Roads, Washington, D. C., requesting such changes. (See letter dated May 16 and telegrams dated May 14, 1942, in general files) The Commission approved the same by unanimous vote and authorized the Engineer to follow up the matter in an endeavor to secure the desired results.

The Commission discussed a letter from County Judge F. E. Gilkey, Lincoln County, requesting that truck owners be allowed the use of the Highway Department's scales near Newport for the weighing of trucks in connection with the securing of licenses. Judge Gilkey advised that the nearest commercial scale is located in Corvallis and truck owners at Newport and Toledo now have to drive their equipment some 60 miles or more to have it weighed for licensing purposes, whereas, if the Highway Commission would allow the use of the state's scales at Newport, this could be avoided and considerable saving in tires and gasoline would be realized, which is an important item during the present emergency. The Commission approved the request and referred the matter to the Engineer to work out the details for handling the scales for this purpose.

A letter was presented from Morrow County Court in which the Commission was requested to authorize one of the state's oiling crews to patch and otherwise repair the Ione-Beckner Section of the Ione-Gooseberry County Road, which was oiled by the state in the summer of 1941 and is now in need of attention. The request is made because Morrow County has no oiling or patching equipment and is unable to purchase same, and the county agrees to pay for the work upon being billed for the same by the state. The Engineer advised that Morrow County made provision in its budget last fall to purchase equipment needed for patching of oiled surfaces but has been unable to obtain the equipment due to priorities. He recommended approval of the county's request provided the county will deposit with the Commission its certified check in the amount of the estimated cost of the work before the work is done. The Commission approved the recommendation.

The Commission discussed a request from the County Court of Deschutes County for the oiling of a 3.9-mile section of the Cline Falls Secondary State Highway and a 3.6-mile section of the Tumalo-Deschutes Secondary State Highway. The Commission expressed regrets that it cannot approve this request. The Secretary was instructed to convey such information to the county court and to advise the court further that the outlook for doing this work before the end of the war emergency is not very promising.

Consideration was given to a request from Colonel Clifton M. Irwin, C.A.C., Commanding, Office of the Harbor Defense, Fort Stevens, for the improvement of the Fort Stevens Road between Warrenton and Fort Stevens Post, particularly two sections which are narrow and dangerous to travel, the first of which is just north of the Oregon Coast Highway where it skirts the city limits of Warrenton and the other begins at Alder Creek Bridge and ends at the entrance to Fort Stevens. The matter was referred to the Engineer for investigation, it being the intention of the Commission to authorize the improvement for federal aid secondary highway funds if not too costly an undertaking.

The Commission discussed and approved a request from City Engineer W. C. Clubb, Eugene, for a revision in the "stop-signing" on Broadway Street, route of U. S. Highway 99, in Eugene. Mr. Clubb suggests that a stop sign be installed on Broadway at Pearl Street to stop both eastbound and westbound traffic on Broadway and that the stop sign be removed from Pearl Street permitting traffic to flow on Pearl Street without stopping. The Engineer was instructed to make changes in conformity therewith.

The Commission arrived in Ashland at 5:00 p. m. and immediately conferred with the following city officials relative to the proposed improvement of the Pacific Highway at the Plaza Corner in Ashland: Mayor T. S. Wiley, R. E. Koozer, councilman, and G. M. Green. Joint inspection of the project was made, during which the Engineer presented a plan for a temporary improvement that would take care of the local situation until such time as the Commission is able to do a permanent job. Such plan consists of demolition of all of the buildings involved except the Claycomb Garage near the north end of the project and three small buildings next to the alley at the south end of the project, the filling in of the area vacated so it can be used for parking cars, construction of temporary wooden sidewalks and curbs and a traffic

island to guide traffic, and the oiling of the area between the present pavement and the new timber curb lines. The Engineer estimated that the street work could be done at a cost not to exceed \$5,000. The delegation expressed its entire satisfaction with such an improvement whereupon the Commission authorized the Engineer to proceed with the same.

The matter of demolition of the buildings was then discussed. Mayor Wiley advised that the city is in position to raze the buildings, in fact has already made tentative arrangements to proceed with the work upon approval of the State Highway Commission, and that the work will be done at no cost to the state except that the city would like to have the benefit of any salvage that might accrue. In this connection the Secretary presented a letter from R. E. Koozer, Acting Mayor, outlining the city's proposition in detail. (See letter dated May 6, directed to the State Highway Commission, in general files). The Engineer and the Assistant Attorney, who was present, both recommended acceptance of the city's offer. The Commission approved the arrangement unanimously.

The matter of disposal of the buildings next to the alley which are now occupied by the Postal Telegraph Company, G. H. Billings, and J. D. Mars, was next discussed and it was decided to let the present occupants continue tenancy of the buildings at an agreed rental rate, which is to be decided later, until the property is needed for the highway improvement.

The following matters were disposed of by the Commission in the city council chambers:

Reconsideration was given to the sale of buildings in Medford for which bids were taken by the Commission at its meeting on May 7:- Building No. 10145, formerly owned by the Medford Corporation:- no bids were received by the Commission at the May 7 meeting for the purchase of this building and the Commission at that time ordered that it be turned over to the contractor on the highway improvement at Medford. The Assistant Attorney advised that the contractor doesn't want the building; however, an offer has been received from a Mr. Johnson of Medford who has agreed to wreck the building and remove the debris without cost to the state if he can have the benefit of the salvage. The Commission approved the arrangement.

Building No. 10082, formerly owned by J. E. Sollis:- It was recalled that the Commission rejected all bids received for this building and ordered that the contractor, Berke Brothers, be contacted relative to their previous oral offer to pay \$1,500 for the building with the tract of land that was offered for sale at the same time. The Assistant Attorney advised that the contractor was approached relative thereto and has agreed to pay \$1,500 for the building and the tract of land provided the Commission also gives them Building No. 10067-A, formerly owned by C. M. Parker. He pointed out that the Commission sold Building No. 10067-A to J. S. Lydiard for \$75, which was the high bid received on May 7; however, Mr. Lydiard has since changed his mind and is willing to relinquish his interest in favor of the contractor if the Commission will return his bid deposit. He recommended

acceptance of the offer of Berke Brothers and the return of Mr. Lydiard's check. The Commission approved the recommendation.

Building No. 10067-B, formerly owned by C. M. Parker:- The Assistant Attorney recalled that the Commission received two bids for this building on May 7, that of the Tru-Mix Concrete Company, Medford, being high at \$25 and the other being that of Kenneth Dodd, Eugene, at \$21, but the Commission rejected both of them; however, gave Mr. Dodd an opportunity to submit a special bid after consulting with his partner. He further stated that Mr. Dodd has failed to submit a new proposal but an offer has been received from Mr. E. J. McPhee to pay \$50 for the same. He recommended acceptance of this bid. The Commission approved the recommendation and instructed the Secretary to return Mr. Dodd's deposits.

The Commission discussed a request from the Farm Security Administration for approval of a resolution with respect to certain lands that the Commission is purchasing from A. L. Daugherty and wife as right of way for the improvement of the revised location of the Crater Lake Highway, in Jackson County. The Assistant Attorney advised that this apparently is a legal requirement in connection with federal farm loans. The Commission thereupon by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, A. L. Daugherty and Lucille Daugherty, husband and wife, have executed a certain right-of-way deed covering lands in Jackson County, Oregon, in favor of the State of Oregon acting by and through its State Highway Commission; and,

WHEREAS, the United States of America has executed a certain subordination agreement subordinating its lien by virtue of a real estate mortgage upon the premises described in said deed to the interest of the State of Oregon by virtue of said right-of-way deed; and,

WHEREAS, delivery of said deed and subordination agreement has been tendered to the State of Oregon and copies thereof were presented at the meeting of the State Highway Commission.

NOW, THEREFORE, BE IT RESOLVED by the State Highway Commission of the State of Oregon that the said right-of-way deed be and hereby is in all respects accepted by the State Highway Commission for and on behalf of the State of Oregon; and,

BE IT FURTHER RESOLVED, that in consideration of the delivery of said instruments, the said State of Oregon, acting by and through its State Highway Commission, does hereby agree to be, and hereby is, bound by all of the conditions and covenants set forth therein.

The Commission discussed a request from the United States Bureau of Reclamation for a roadway easement in the Cove State Park, Jefferson County, which road is to be used in connection with the construction of a new unit to the power plant of the Pacific Power and Light Company situate at this place. A letter was presented from the State Parks Superintendent advising that the roadway will not injure the park, and recommending approval of the request. The Commission approved the recommendation and thereupon signed a "termination easement" conveying unto the United States of America the privilege requested.

Mr. H. L. Claycomb was present and discussed with the Commission the matter of revising his service station which is located just north of his garage in conformity with the plans for the permanent improvement at the Plaza Corner. He stated that the service station will have to be moved back to fit the highway improvement and, while it is not absolutely necessary that this be done at the present time in view of the Commission's decision to defer the permanent improvement of the highway at this place, he would like to make considerable alterations in his property at this time in order to take advantage of special opportunities which have developed. He pointed out that the Commission has agreed to pay him \$2,500 to move the service station, and that the Commission now has the deed to the land, and asked the Commission to pay the consideration at this time so he can proceed with his plans. The Assistant Attorney advised that such arrangement would be satisfactory except that the canopy on the service station would still project over the highway. He estimated that it would cost not to exceed \$200 to remove the canopy. Mr. Claycomb agreed to remove it any time when the right of way is necessary for construction. After discussion the Commission approved payment to Mr. Claycomb, except approximately \$200 which is to be withheld until the canopy has been removed and the right of way cleared. It was understood that, if Mr. Claycomb does not completely clear the right of way upon notice from the State Highway Commission, the Commission should have the right to do so without liability to Mr. Claycomb and should charge the cost thereof to Mr. Claycomb to be paid either direct or as a deduction of any future payments which might become due him under the total right-of-way settlement. The matter is to be covered by supplemental agreement between the Commission and Mr. Claycomb.

The matter of authorizing the California Western States Life Insurance Company to furnish group life insurance to state highway department employees was discussed. The Commission authorized acceptance of the plan proposed by the company for the furnishing of group insurance of the term type to hourly-rate employees only, subject to the following conditions: (1) that the terms of the agreement to be entered into with the Commission be as stated in the sample agreement previously furnished by the company; (2) that the agreement be made effective as of June 1, 1942, and that none of the insurance furnished thereunder be made effective prior to that date; (3) that the premium payments for coverage of a given month be deducted from the employee earnings of the same month, the deductions to be made at the regular pay-roll payment dates for the earnings of that month; (4) that the certificate to be furnished the insured employee be the same as the sample certificate heretofore submitted by the company except that it have incorporated in it the schedule of premium rates and the agreement provision reserving to the company the right to increase the premium rates under certain conditions. The Engineer

was instructed to discuss the matter with Office Engineer S. H. Probert and have the agreement ready for execution by the Commission at its meeting on June 4, 1942.

The Assistant Attorney requested authority to institute condemnation proceedings to acquire right of way needed for the construction of the Willamette Highway across lands owned by Frank A. Moore between Goshen and Pleasant Hill in Lane County. He recommended an offer of \$4,250 in connection therewith. After due consideration the Commission approved the offer and authorized such condemnation. The following resolution with respect thereto was adopted by the Commission unanimously:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the parcels of land hereinafter described are necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described, owned by Frank A. Moore and Opal F. Moore, are necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties are described as follows, to wit:

Parcel No. 1

A parcel of land lying in the northeast quarter and the southeast quarter of Section 29 and in the southwest quarter of Section 28, Township 18 South, Range 2 West, W. M., Lane County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Frank A. Moore and

Opal F. Moore recorded in Book 131, Page 485, of Lane County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 70 feet in width, on the northerly side of the center line of the Willamette Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 235+58.1 to Station 259+27.9, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 235+58.1, opposite and 70 feet distant from which point the northerly line of the said strip of land intersects the west line of the M. Shelly D.L.C. No. 76, said point being 627 feet north and 22 feet west of the northwest corner of the Wm. Bristow D.L.C. No. 77, Township 18 South, Range 2 West, W. M.; thence South 59° 59' East a distance of 1060.5 feet; thence on a spiral curve left (the long chord of which spiral bears South 60° 11' 30" East 250.0 feet) a distance of 250 feet; thence along the arc of an 11,459.2 foot radius curve left (the long chord of which curve bears South 61° 10' 30" East 226.66 feet) a distance of 226.67 feet; thence along the arc of a spiral curve left (the long chord of which curve bears South 62° 09' 30" East 250.0 feet) a distance of 250.0 feet; thence South 62° 22' East a distance of 582.60 feet to center line station 259+27.9, at which station the said highway center line intersects the east line of said property.

The parcel of land to which this description applies contains 3.75 acres, of which 1.86 acres lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 1.89 acres lie outside of the existing right of way.

Parcel No. 2

A parcel of land lying in Sections 28 and 29, Township 18 South, Range 2 West, W. M., Lane County, Oregon, the said parcel being a strip of land 20 feet in width for detour road and lying northerly of and parallel to the northerly line of the proposed right of way of the Willamette Highway, the northerly line of which strip is 90 feet north of and parallel to the following described center line of said highway:

Beginning at Engineer's Station 239+65; said station being 425 feet north and 325 feet east of the southwest corner of D.L.C. No. 76; thence South 59° 59' East 653.6 feet to Station 246+18.6 P. S.; thence on a spiral curve left 250 feet to Station 248+68.6 P.S.C.; thence on an 11,459.2 foot radius curve left 226.7 feet to Station 250+95.3 P.C.S.; thence on a spiral curve left 250

feet to Station 253+45.3 P. T.; thence South 62° 22' East 254.7 feet to Station 256+00 and the easterly end of said strip of land.

2. The Commission does hereby further find and declare that the above described Parcel No. 1 is necessary and is required for right of way purposes in connection with the construction of said highway, and that the above described Parcel No. 2 is needed and is required for an easement for the construction of a temporary detour road for the accommodation of traffic while the new highway is under construction and until the same is made available for public highway travel. After said new highway has been completed and is thrown open to public traffic the said easement shall terminate and the road constructed over the land covered by said easement may and shall remain as a service road for the use and benefit of the owner of the property.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission set Thursday, June 4, and Thursday, June 25, as dates for its next two regular meetings for the receiving of bids; and instructed the Secretary to make the usual arrangements to hold such meetings in the auditorium of the Public Service Building, Portland.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the City of Forest Grove relative to the maintenance of certain city streets over which is temporarily being routed Wilson River Highway traffic.

Agreement with the City of Lakeview providing for the maintenance of certain city streets that are not on state highway routes.

Agreement with Sweet Home Warehouse Company providing for the renewal of a lease for the Sweet Home maintenance headquarters.

Agreement with A. T. Dolan and wife providing for the lease of a maintenance headquarters site at Seaside.

Modification of lease agreement with Syneva Lindberg relative to the Port Orford maintenance headquarters site.

Agreement with the Great Northern Railway Company covering the reconstruction of the railway company's overpass on the Klamath Falls-Malin Highway east of Merrill.

Agreement with radio station KOAC providing for contribution of \$1500 of state highway funds to assist in financing of the "Oregon on Parade" program during the summer of 1942.

Agreement with Crook County relative to the oiling of 0.7-mile section of the county road known as Hardin County Road from its junction with the Ochoco Highway, about one-half mile east of Prineville, southerly about 0.7 mile.

Agreement with Deschutes County relative to the construction of a portion of the Terrebonne-Lower Bridge Federal Aid Secondary Highway.

Petition for the exclusion of state property from the Rogue River Valley Irrigation District so as to avoid payment of annual fees and assessments.

There being no further business to come before the Commission at this time the meeting was declared adjourned at 6:15 p. m.

State Highway Engineer

Chairman

Secretary

Commissioner

Portland, Oregon, June 3, 1942

The State Highway Commission met in regular session at 8:00 p. m. in room 234, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were W. H. Lynch, District Engineer, and T. M. Davis, Senior Highway Engineer, of the Public Roads Administration. Commissioner Clough was excused from attending this meeting.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties, together with offers that he recommended be made in connection with each. After careful consideration the Commission approved the request and thereupon by unanimous vote adopted the following resolution relative thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

In connection with the above Mr. Lynch approved the settlements for properties needed for access road improvements, it being understood that the properties would not be purchased unless the contracts for the road improvements, for which bids are to be taken on the following day, are awarded.

Also, in connection with such list of properties, the State Parks Superintendent, Mr. S. H. Boardman, who was present, advised that, as previously instructed by the Commission, he has made an endeavor to purchase outright Camas Mountain State Park adjacent to the Coos Bay-Roseburg Highway, in Douglas County, which property is now under lease from the Federal Government. According to the lease, he said, the state has the prerogative to purchase the property if it so desires, before the expiration of the lease; however, the federal authorities now rule that the state cannot purchase it outright. He suggested, as an alternative, that an arrangement be made with Douglas County to acquire the property by exchange for comparable county property, then the state can negotiate with the county for acquisition of the area. The Commission

JUN 5 1942

approved such arrangement and instructed the Parks Superintendent to follow the matter through, not only with respect to this parcel but also with respect to other park properties that are in the same category. The Commission approved the payment of the lease amounts for another year but decided not to purchase outright any of the park areas from the government until the war is over.

The Attorney brought up for discussion the matter of acquiring right of way needed for the Swan Island and North Portland Access Roads across properties owned by the City of Portland and Multnomah County. He advised that the city has stated its willingness to donate right of way across the city-owned property but the county has indicated a reluctance to do so and it may be necessary to pay the county about \$1,000 for its land. The Attorney was instructed to contact the Board of County Commissioners again relative to the matter and, if possible, secure this right of way free of cost. (The Attorney reported later in the session that the county will donate the right of way)

The Engineer requested approval of a change in the plans for the improvement of the intersection at Sixth and High Streets, Eugene, which improvement is needed to facilitate the movement of traffic to the Eugene Fruitgrowers Cannery. He advised that the original plan included acquisition of additional right of way which would have cost the state approximately \$3500 but such expense can be avoided under the new plan which reduces the area required for right of way although it involves the cutting back of the curbs on both sides of High Street for one block north of Sixth Street and for a distance of one block on the north side of Sixth Street west of High Street. The estimated cost of the entire project, he said, will still be within the \$5000 heretofore approved by the Commission for this work. The Commission approved the revised plan subject to the condition that it is satisfactory with the city officials.

The Attorney requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended be made for each in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
10354	Prudential Insurance Company of America	R/W	\$ 650.00
10355	George L. Fullington	R/W	1500.00
10357	Prudential Insurance Company of America	R/W	650.00
10365	A. F. Elkins	R/W	(Amount of offer to be fixed by Mr. Devers and Mr. Cabell after further investigation)
10386	Electro Metallurgical Company	R/W	650.00

JUN 5 1942

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
10390	Fritz Bikjan	R/W	\$ 500.00
10392	Peter J. Lyski	R/W	3000.00
10393	Marie Mullen, et al	R/W	200.00
10398	Jessie I. Gentzkow	R/W	1450.00
10407	Leland Field Maybach, et al	R/W	625.00
10419	Clifford L. Dye	R/W	10.00
9527	J. D. Bergen	R/W	15,000.00

After careful consideration the Commission approved the offers and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by The Prudential Insurance Company of America, a corporation, which property is located in the southwest quarter (SW $\frac{1}{4}$) of Section 31, Township 8 South, Range 4 West, W. M., in Polk County, Oregon, and is more

JUN 3 1942

particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 10354, and which property is being acquired for right of way purposes in connection with the Pacific Highway West;*

Real property owned by George L. Fullington, et ux., which property is located in the northwest quarter (NW $\frac{1}{4}$) of Section 6, Township 9 South, Range 4 West, W. M., in Polk County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 10355, and which property is being acquired for right of way purposes in connection with the Pacific Highway West;*

Real property owned by The Prudential Insurance Company of America, a corporation, which property is located in the southwest quarter of Section 6, Township 9 South, Range 4 West, W. M., in Polk County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 10357, and which property is being acquired for right of way purposes in connection with the Pacific Highway West;*

Real property owned by A. F. Elkins, et al., which property is located in the east half of the northwest quarter of Section 19, Township 9 South, Range 4 West, in the Joseph W. Suver D. L. C. No. 44, situated in Section 19, Township 9 South, Range 4 West, and in the J. W. Suver D. L. C. No. 44 in Sections 29 and 30, Township 9 South, Range 4 West, W. M., in Polk County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 4, 5, and 6 and is further identified in the records of the Highway Commission as file R 10365, and which property is being acquired for right of way purposes in connection with the Pacific Highway West;*

Real property owned by Electro Metallurgical Company, a corporation of West Virginia, which property is located in the Wm. Gatton D. L. C. and the James Loomis D. L. C. in Sections 35 and 36, Township 2 North, Range 1 West, W. M., in Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 10386, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by Fritz Birkjan, which property is located in Lots 1, 2, 3, and 4, Block 30, and Lots 22 to

JUN 3 1942

28, inclusive, Block 30, East St. Johns Addition to Portland, in Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 8 and 9 and is further identified in the records of the Highway Commission as file R 10390, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by Peter J. Lyski, which property is located in Lots 18, 19, 20, and 21, Block 32, East St. Johns Addition to Portland, in Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10 and is further identified in the records of the Highway Commission as file R 10392, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by Marie Mullin, et al, which property is located in Lots 1, 2, and 3 of Block 34, East St. Johns Addition to Portland, in Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 11 and is further identified in the records of the Highway Commission as file R 10393, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by Jessie I. Gentzkow, which property is located in Lots 38 to 44, inclusive, Block 34, East St. Johns Addition to Portland, in Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 12 and is further identified in the records of the Highway Commission as file R 10398, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by Leland Field Maybach and Mary Christina Maybach Summers, et vir., which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 6, Township 1 North, Range 1 East, W. M., in Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 13 and is further identified in the records of the Highway Commission as file R 10407, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by Clifford L. Dye, which property is located in Lot 11 of Block 1 of Palm's 2nd Addition to

JUN 3 1942

the City of Medford in Jackson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 14 and is further identified in the records of the Highway Commission as file R 10419, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by John D. Bergen, which property is located in Lots 3, 4, 5, 6, 7, 8, and 9, Block 31, Plat "B" Coos Bay Addition to North Bend, in Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 15 and is further identified in the records of the Highway Commission as file R 9527, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

JUN 3 1942

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 26, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

In this connection the Attorney brought up for discussion acquisition of right of way needed for the improvement of the Benton County Line-Monmouth Section of the Pacific Highway West across lands owned by Mr. A. F. Elkins. He advised that the property has been appraised by three different appraisers who value the property at \$5,000, \$6,000 and \$5,800, respectively, and gave as his thought that Mr. Elkins would not settle for less than \$10,000 or \$12,000 because he has a very nice piece of property which will be severely damaged by the highway improvement. He requested authority to condemn this property, if necessary. The Commission approved the request but left it with Chairman Cabell to specify the amount of the offer that is to be used in condemnation.

The matter of purchase of the greenhouse property in North Bend, which is needed in connection with the improvement of the Marshfield-North Bend Section of the Oregon Coast Highway was also discussed by the Commission. The Attorney advised that this property has been appraised by four different appraisers at \$14,320, \$13,190, \$12,500 and \$16,000, respectively; also that Mr. J. D. Bergen, the owner of the property, is demanding \$15,000 for the same and that he be allowed to keep the greenhouses, which he wants the state to move to a new location at state expense. He gave as his thought that Mr. Bergen is asking an excessive amount for the property. He recommended payment of \$15,000 for the property, including the greenhouses, and that the greenhouses be advertised for sale later when Mr. Bergen can submit a bid for them if he so desires. The Commission approved the recommendation. The Attorney was authorized to condemn the property, if necessary.

The Attorney brought up for discussion the acquisition of right of way needed for the Wolf Creek Highway through property owned by Ernest and Fred Zurcher, in Washington County. He advised that the right of way on both sides of the Zurcher property has already been acquired but negotiations with Zurcher Brothers were discontinued on orders from the Commission when it was decided to defer construction of this section for the duration of the war. Zurcher Brothers, he said, are quite anxious to consummate the sale because they are about to construct a new barn and it appears that the right-of-way matter must be decided before they can proceed. It also appears that the price they are asking for the property is considerably in excess of the appraised value. The Commission decided, in view of the fact that the right of way on both sides of the Zurcher property has already been acquired, to resume negotiations with Zurcher Brothers, it being understood that the property will be purchased if it can be acquired at a reasonable cost, otherwise acquisition will be deferred until the property is actually needed for construction.

JUN 3 1942

The Commission discussed the controversy with the Postal Telegraph Company with respect to the removal of some of its poles from right of way recently acquired for the Medford improvement of the Pacific Highway. The Attorney advised that the company is willing to move its poles but wants the state to pay the costs involved, and alleges that it is occupying the right of way under authority of a federal statute so the state cannot make the company move its poles at its own expense. The Attorney read aloud the federal statute referred to and pointed out particularly that it refers to poles that are used solely for telegraph purposes, whereas the poles under discussion carry power wires of the Mountain States Power Company in addition to the telegraph company's wires, and there is a question as to the ownership of the poles. After considerable discussion the Attorney was instructed to study the contract between the Postal Telegraph Company and the Mountain States Power Company with respect to the joint use of the poles. He was also authorized and instructed to try the case out in court in the event that a satisfactory agreement cannot be reached with the Postal Telegraph Company.

The Engineer brought up for discussion the matter of moving the poles of the Portland Traction Company from Greeley Street, Portland, to facilitate the construction of the Swan Island Access Road Project. He advised that the Traction Company wants the state to pay for moving the poles, which is estimated to cost in excess of \$5,000, whereas in his estimation it is not the state's obligation. Furthermore, the Public Roads Administration will not approve federal funds to pay this expense. He pointed out that the company is operating under franchise from the city and that the provisions of the franchise call for the company to remove its poles when requested to do so by the city. It was his thought that the Traction Company should be required by the city to move the poles under the provisions of the franchise and that the city should adopt an ordinance to that effect. The Commission indicated concurrence in the Engineer's viewpoint and thereupon referred the matter to the Attorney to discuss with City Commissioner Bowes.

The Engineer reported a request from the Krome Mining Corporation for the construction of a roadway leading to a chrome ore deposit, in Coos County. He advised that the deposit is located on Three Mile Creek north of Bandon, and it is proposed to construct an inexpensive roadway with bulldozer equipment from the mine to a connection with the North Bank County Road on Coos River near a place called Randolph, a distance of about seven miles, and to finance the work, if possible, with Federal Access Road Funds. He requested authority to make a survey for the roadway, which is estimated to cost about \$300, and to advertise the construction project for bids to be received at the next meeting of the Commission, if the project is approved for access moneys. The Commission approved the request.

The Commission adjourned at 11:00 p. m. to reconvene on the following morning in the Public Service Building.

JUN 3 1942

Portland, Oregon, June 4, 1942

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was absent.

Bids, as follows, for highway construction projects, sale of timber, rent of state-owned heavy construction equipment, and sale of obsolete equipment and scrap materials located at the four highway department equipment plants, were opened and read in conformance with previously published notices, following which Chairman Cabell announced that the awards would be made at 3:30 p. m. in the same room:

PACIFIC HIGHWAY WEST

OBSOLETE EQUIPMENT AND SCRAP MATERIALS

Bids received for obsolete equipment and scrap materials at the highway department shops at Salem, Klamath Falls, Coquille and LaGrande. (For details see blueprint tabulation of bids filed in general files.)

JUN 4 1942

Mr. Burton Hutton, Director "Oregon on Parade", KOAC, appeared before the Commission in regard to the Commission's offer to cooperate with the State Board of Higher Education during the summer of 1942 in its KOAC "Oregon on Parade" radio program. Chairman Cabell explained that the Commission's previous offer was made in good faith but the Commission now questions whether the promotion of travel by automobile is the proper thing to do because it seems to the Commission to be in contradiction to the efforts that are being made by the federal authorities to curtail travel as much as possible in order to preserve automobile tires. He pointed out that the rationing of tires and gasoline is bound to reduce travel which in turn will reduce the highway department's revenues, and there is a question whether or not the Commission has legal authority to spend state money for a program of this kind if it does not provide revenues for the state highway fund. He also pointed out that there is a question of diversion of funds and the loss of federal aid funds as a result thereof. It was his thought that it would be proper to cancel the Commission's previous arrangement in view of the circumstances. Commissioner Oliver concurred. Mr. Hutton expressed his appreciation of the Commission's attitude and stated his approval of the Commission's action. The Secretary was thereupon instructed to notify Dr. V. V. Caldwell and secure the return of the agreements heretofore executed.

In this connection the Commission ordered the curtailment of advertising expense by the Travel and Information Department in so far as is possible.

Mr. E. L. Gray, President, Salem, Monmouth, Independence, and Kings Valley Highway Association, was present and presented a petition signed by the City of Independence, City of Monmouth, Independence Chamber of Commerce, Monmouth Chamber of Commerce, Independence City Planning Board, and the Salem, Independence, Monmouth, Kings Valley Highway Association, in which the Highway Commission is requested to authorize surveys as may be necessary to establish a permanent site for a proposed bridge across the Willamette River at Independence and a permanent location for the Monmouth-Independence State Highway. After discussion the Commission authorized the Engineer to make a preliminary reconnaissance survey of the situation, the results of which are to be reported to the Commission at its next regular meeting when the Commission will decide whether or not to authorize definite surveys.

Mr. George W. Gleeson, Professor of Chemical Engineering, Oregon State College, discussed with the Commission the matter of conducting chrome mining operations on the Oregon beaches in Coos and Curry Counties. Professor Gleeson advised that the beach sands contain chrome ore which is of great value at the present time in the manufacture of war equipment and is easily recoverable with new machinery that has been developed for this particular purpose. He requested exclusive authority to operate this equipment on the beach areas in the recovery of chrome so that mining interests will be justified in going to the expense of erecting a chrome concentration plant. He pointed out that the beach sands contain from one to six per cent chromite, and advised that the removal of the sand from the beach areas will not permanently destroy the beaches because practically 90 per cent of the sands removed would be returned. The Attorney pointed out that there is a question which state department has

jurisdiction over such beach activities, the State Highway Commission or the State Land Board, and it was his thought that any arrangement that is made authorizing the removal of sands from such areas should be approved jointly by both departments.

Professor Gleeson advised that, in his estimation, the mining people should pay a royalty for the privilege of operating on the beach area and suggested a five per cent royalty where the operations are on the fore beach and ten per cent on other locations. He mentioned a number of locations where operations would probably take place, as follows: (1) between Cape Arago and the mouth of the Coquille River at Bandon; (2) between Floras Lake and Cape Blanco; (3) between Cape Blanco and the Rocks at Port Orford; and (4) on the beach at Euchre Creek; also on the beaches north and south of the Rogue River, Pistol River and at Brookings. The sands at these locations, he said, contain approximately six per cent chromite. He said that his sole interest in the matter is from the standpoint of the State College and the recovery of chrome for use in connection with war efforts. The Commission indicated a favorable attitude toward granting private capital limited use of the beaches at a fair royalty but deferred a definite decision in regard thereto pending a conference with the State Land Board. The Engineer was thereupon instructed to secure an appointment for the Commission with the State Land Board for a discussion of the matter prior to the next regular meeting of the Commission.

Mr. H. R. Williams, representing the Arrow Transportation Company, was present and asked the Commission to improve the ION Highway between Jordan Valley and the Idaho state line. He advised that a recent ruling of the Office of Defense Transportation requires them to route their trucks over the shortest route between points which means the use of the ION Highway between California and points in Idaho, in order to conserve tires and gasoline, but they cannot very well comply with the rule in view of the bad condition of the highway north of Jordan Valley. It was his thought that the Highway Commission would be willing to cooperate in view of the government's order and the fact that the road is a state highway. The matter was referred to Commissioner Oliver and the Engineer to investigate, the results thereof to be reported to the Commission at its next meeting.

The Commission adjourned at 11:30 a. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

A delegation consisting of the following members appeared before the Commission in regard to the improvement of a county road in Linn County as a temporary detour for the Albany-Lyons Secondary State Highway in the vicinity of Scio: C. H. Watzek and F. L. Thompson, representing the Roaring River Logging Company; Neil Malarkey and Henry Sauve, representing the Albany Plylock Corporation; Bruce Hoffman, representing the Avery, Richardson and Green Timber Company; Judge J. J. Barrett and Commissioners H. A. Renninger and Claude G. Smith, representing the Linn County Court, and County Engineer Walter E. Larsen. Mr. Watzek advised that the Roaring River Logging Company has acquired a large timber tract about ten miles southeast of the town of Scio and that it is necessary to truck-haul the logs over a portion of the Albany-Lyons Secondary State

Highway, three miles of which highway south of Scio is in bad condition. He gave as his understanding that the Commission is not in position to improve this three-mile section at the present time and suggested in view thereof that the Commission temporarily reroute state highway traffic over a county road which begins at a point on the present highway about two miles east of Scio and extends southerly about three miles, thence westerly two miles to a connection with the present highway. This route, he said, contains fewer hills than the state highway and is much better suited for truck-hauling of logs than the other. Furthermore, the north and south portion has a good oiled surface and all that is needed is to improve the two-mile section at the south end which, in his estimation, would not be a costly undertaking. He suggested an arrangement with the county court to maintain the five miles of state highway adjacent to and through Scio if the state would improve and maintain the county road. Judge Barrett stated that the county would appreciate the Commission's doing what it can to help out in the situation but is not in favor of changing the status of the present highway. The State Highway Engineer suggested that the trade in highways could be made for the duration of the war only. The Attorney advised that the Commission has legal authority to make such a trade if it so desires.

County Engineer Larsen pointed out that Linn County now has arrangements with other logging companies to maintain certain county roads and if the county would consent to Mr. Watzek's suggestion it would mean that these arrangements would have to be revised. Judge Barrett then advised that the county has no objections to the state taking over and maintaining the county road but not on the premise that the county would have to assume the maintenance of the state highway south of Scio. If the logging company would maintain the state highway south of Scio relieving the county of such expense, then that would be agreeable to the county court. The matter was discussed further but definite action was deferred until a future meeting of the Commission.

A delegation from Eugene, consisting of R. W. Buford, Secretary of the Lane County Electric Association, and A. R. Hamilton and Clarence Belknap, members of the Association, and F. F. Northrop, representing the Eugene Water Board, conferred with the Commission in regard to the construction of a power pole line on the McKenzie Highway in the vicinity of Leaburg Dam. Mr. Buford was spokesman. He advised that the Electric Association has maintained a low-voltage power line along the north side of the highway at this location for some time but it has become necessary to increase the voltage which requires the reconstruction of the pole line and the installation of new poles; further, that they wanted to place the new pole line on the north side of the highway but were denied a permit for this privilege in view of the fact that this side of the highway was occupied by a telephone pole line and it being contrary to the established policy of the Highway Commission to allow two pole lines on either side of the highway, in view of which they asked the privilege of establishing their line on the south side of the highway which was also denied because it was alleged that the pole line would detract from the scenic view of the McKenzie River. He further stated that he has been in consultation with the Highway Department Engineer for some time in an endeavor to arrive at a satisfactory solution of the problem but has been unable to meet any satisfactory agreement although the last suggestion made was that they overbuild the

telephone line and allow the telephone company the joint use of the poles, which arrangement was satisfactory to the Electric Association but did not meet with the approval of the Telephone Company.

The matter was discussed at some length during which the Commission's policy with respect to pole-line construction on state highways was explained by Chairman Cabell. Chairman Cabell suggested, in view of the fact that the power company has maintained its pole line on the north side of the highway for many years, that it would be satisfactory to allow the company to rebuild its line on that side of the highway notwithstanding the telephone company's objections. It appeared to him that this is the only solution to the problem in order to maintain the scenery on the south side of the highway in an unmarred condition, and it was his thought that the Commission is justified in deviating from its established policy in this instance because of the unusual conditions obtaining. Commissioner Oliver concurred and the Secretary was thereupon authorized to issue a permit in conformity therewith.

A delegation from Parkrose, including J. C. Strudgeon, R. A. Freeman and Harry Pearce, was present and asked the Commission to oil the shoulders adjacent to the pavement on Sandy Boulevard (Columbia River Highway) through the Parkrose District. They were informed that the Commission has already approved such project and that the oiling work will be done as soon as possible.

The Commission approved the minutes of the meetings held on December 18, 1941, January 5, January 21, and February 13, 1942. (Commissioner Clough approved and signed the minutes later.)

The Commission discussed a proposed press release prepared by the Engineer concerning the War Production Board's Order L-41 and Amendment thereto, having to do with highway construction work. The Commission approved the release and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, because of the national emergency the United States Government has deemed it essential to national defense that all industrial and commercial activities, including state, county and municipal activities, be brought within the reach and control of the Federal sovereignty and its created agencies; and

WHEREAS, on April 9, 1942, the War Production Board made and issued Order No. L-41, by which the commencement of any highway and/or street construction is prohibited unless such work has been specially approved by the War Production Board as essential to the war effort; and

WHEREAS, subsequent to the action of the War Production Board as disclosed in its said order L-41, dated April 9, 1942, the War Production Board made and issued an order designated as Serial No. L-41-600, dated May 8, 1942, which last order, among other things, contains these provisions:

JUN 4 1942

"(B) Pursuant to paragraph (b) (7) (ii) of Conservation Order No. L-41, you are hereby authorized to Begin Construction on Road Projects under your jurisdiction, provided, however, that you:

- "(1) Prepare and file by the 10th day of each month, with the District Engineer of the U. S. Public Roads Administration through the State Highway Department of the State in which the Road Department is located, a report showing 'Estimate of Materials' required in order to complete all projects to which this Authority, No. L-41-600, applies and for which work orders were issued during the preceding calendar month. (Use Public Roads Administration Form PR-46.)
- "(2) Shall not under this Authority No. L-41-600 Begin Construction on a Road Project which requires the incorporation of any steel reinforcing bars, steel culverts or structural steel, unless such steel is owned, or has been ordered, on or before the date of this Authority, by the Road Department or the contractor engaged to construct the Road Project.

"(C) This authorization assigns no preference rating to deliveries of materials to be used in the construction of any Road Project. Inability of the Road Department to procure without priority assistance material to complete any Road Project will not of itself be considered adequate grounds for issuance of a rating.

"(D) The Director of Industry Operations of the War Production Board may at any time order the Road Department to cease work upon any Road Project, construction of which has been begun pursuant to this Authority, if he determines that the prosecution of the war requires more urgently the use elsewhere of the labor, materials and construction machinery needed to complete the road construction previously authorized."

AND, WHEREAS, nearly all public highway and/or street construction, improvement and/or maintenance involves the use of materials, supplies and/or equipment needed for the war effort, and therefore it is practically impossible to carry on any highway or street work free of priority requirements and War Production Board restrictions; and

WHEREAS, in all instances where such work falls within the reach of War Production Board orders priority ratings with respect to

JUN 4 1942

materials, equipment, parts, tires or other things may be obtained only if the proposed work is deemed by the Board to be essential to the war effort; and

WHEREAS, in order to secure the necessary priorities and thus obtain the required materials, equipment or supplies the specific approval of the War Production Board and its certification that the work is essential to war effort must first be obtained; and

WHEREAS, because of the confusion which is shared by the general public with respect to the projects which may or may not be promoted and with respect to Federal approval which may or may not be granted for any particular project, it is deemed by the Highway Commission prudent that its policy and purpose concerning future highway projects be made known; and

WHEREAS, it is also the belief of the Commission that it should declare its policy with respect to full cooperation with the war effort, its purpose to promote and conduct every feasible highway project within the reach and control of the priority ruling consistent with sound business judgment and the best interests of the state at large;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY the Oregon State Highway Commission, all members being present and voting affirmatively;

1. That the Commission hereby offers, to the extent of available funds, resources, equipment and personnel, full cooperation with the Federal Government for the construction, improvement, and/or maintenance of highways--strategic, access or civilian--which in the judgment of the War Production Board are essential to or will aid the war effort.

2. That to the end that civilian life and activities may go forward without unnecessary interruption or inconvenience, the Commission will, with respect to disbursements of state funds on state projects which are beyond the zone or reach of priority requirements or War Production Board orders, confine such disbursements to administration costs, surveys, and the preparation of plans for post-war projects, including the acquisition of necessary rights of way, and to essential maintenance, restoration or emergency requirements;

3. That the Commission recognizes a severe and definite shortage of labor, materials, supplies, machinery, equipment and repair parts and therefore all road work not actually important in the all-out war effort shall be and is suspended for the duration; and

JUN 4 1942

4. That the Commission recognizes that curtailment of motor equipment, restrictions on the sale of gasoline and other enforced inhibitions will result in a material reduction in highway revenues and therefore it is the declared purpose and policy of the Commission to use and employ highway revenues for cooperation with the Federal Government in the building of road or street projects deemed by the Army, Navy or War Production Board to be essential to the war effort, for emergency purposes, for the maintenance and restoration of the present highway system, for the preparation of detail, plans and surveys for post-war projects, including where feasible the acquisition of rights of way, and for administration costs in the maintenance of a necessary departmental organization.

At 3:30 p. m. Chairman Cabell announced the awards of contracts, and made statements relative to sale of timber, rent of state-owned heavy construction equipment, and sale of obsolete equipment and scrap materials, as follows:

"Lewisburg-Corvallis Section of the Pacific Highway West, in Benton County. 5.56 miles grading and paving. E. C. Hall Company and J. C. Compton, McMinnville, submitted the only bid for this project, in the amount of \$236,925.00. The Commission awards this contract to E. C. Hall Company and J. C. Compton at their bid of \$236,925.00.

"Widen three bridges on the Lewisburg-Corvallis Section of the Pacific Highway West, in Benton County. The only bid received was that of J. F. Johnston, Newberg, at \$16,373.00. The Commission awards this contract to J. F. Johnston at his bid of \$16,373.00.

"Port Orford Rock Production Project on the Oregon Coast Highway, in Curry County. Requires approximately 23,100 cu. yds. crushed gravel in stock piles. Only one bid was received, being that of A. H. Saxton & Son, Corvallis, at \$53,455.00. The Commission refers the bid to the Engineer with power to award the contract when certain conditions have been fulfilled.

"Belknap Springs-Fourmile Butte Rock Production Project on the McKenzie Highway, in Deschutes and Lane Counties. Requires approximately 11,400 cu. yds. crushed rock in stock piles. No bids were received for this project.

"Buchanan Rock Production Project on the Central Oregon Highway, in Harney County. Requires approximately 7,000 cu. yds. crushed rock in stock piles. No bids were received for this project.

"Goshen-Pleasant Hill Section of the Willamette Highway, in Lane County. 3.98 miles grading, surfacing and bituminous macadam, also furnish 6,100 cu. yds. crushed gravel in stock piles. C. J. Eldon, Portland, submitted the low bid at \$273,015.50, based on the use of

asphalt, and \$272,845.50, based on the use of tar. The only other bid received was that of McNutt Brothers, Eugene, at \$279,629.00, based on the use of asphalt. They did not submit a bid based on the use of tar. The Commission refers the bids received to the Engineer with power to award the contract to C. J. Eldon at his low bid of \$272,845.50, using tar, when certain conditions have been fulfilled.

"Construction of a bridge over the Coast Fork Willamette River and three pile trestle bridges on the Goshen-Pleasant Hill Section of the Willamette Highway, in Lane County. Three bids received for this project, that of Tom Lillebo, Reedsport, at \$53,774.00 being the low bid, and the second-low bid being that of C. J. Eldon, Portland, at \$67,097.50. The Commission has referred the bids to the Engineer with power to award the contract to the low bidder, Tom Lillebo, when certain conditions have been fulfilled.

"Twelfth Street Section, in the city of Salem, Marion County. 1.26 miles pavement resurfacing. The only bid received for this project was that of Warren Northwest, Inc., Portland, at \$20,600.00. The Commission awards the contract to Warren Northwest, Inc., at their bid of \$20,600.00.

"North Portland Shipyard Access Road Project on three access roads, in Multnomah County. 2.6 miles grading and paving. Two bids were received for this project, the low one being that of Parker-Schram Company, Portland, at \$168,746.00, and the other bid being that of Porter W. Yett, Portland, at \$172,168.00. The Commission has referred the bids to the Engineer with power to award the contract to Parker-Schram Company, the low bidder, when certain conditions have been fulfilled.

"Widen existing bridge over O.W.R.&N. Company tracks on North Burgard Street in Portland, Multnomah County. O. N. Pierce, Portland, submitted the low bid for this project at \$10,890.00. Lindstrom Brothers, Portland, submitted the only other bid in the amount of \$12,055.00. The Commission awards this contract to O. N. Pierce at his low bid of \$10,890.00.

"Swan Island Shipyard Access Road Project on four access roads, in Multnomah County. 1.9 miles grading and 2.0 miles paving. Porter W. Yett, Portland, submitted the only bid for this project in the amount of \$170,742.50. The Commission has referred this bid to the Engineer with power to award the contract to Mr. Yett, the low bidder, when certain conditions have been fulfilled.

"Construct timber overcrossing structure over Union Pacific Company tracks on Northeast Going Street in Portland, Multnomah County. Tower Sales & Erecting Company, Portland, submitted the

JUN 4 1942

low bid in the amount of \$23,080.00, and the only other bid received was that of Lindstrom Brothers, Portland, at \$25,226.00. The Commission has rejected both of the bids received for this project.

"North Unit, Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. 6.56 miles grading. Three bids were received for this project, the low one being that of E. C. Hall Company & J. C. Compton, McMinnville, at \$264,935.00. The second-low bid was submitted by McNutt Brothers, Eugene, at \$274,491.50. The Commission has referred the bids received for this project to the Engineer with power to award the contract to E. C. Hall Company & J. C. Compton, the low bidders, when certain conditions have been fulfilled.

"Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. 2.52 miles grading and 9.08 miles paving. The only bid received for this project was that submitted by McNutt Brothers, Eugene, at \$522,918.50. The Commission has rejected this bid.

"Construct two pile trestle bridges on the Monmouth-Suver Section of the Pacific Highway West, in Polk County. Five bids were received for this project, the low one being that of J. F. Johnston, Newberg, at \$14,051.00, and the second-low being that of O. N. Pierce, Portland, at \$15,935.00. The Commission has referred the bids received for this project to the Engineer with power to award the contract to J. F. Johnston, the low bidder, when certain conditions have been satisfied.

"Widen three bridges on the Suver-Lewisburg Section of the Pacific Highway West, in Polk County. J. F. Johnston, Newberg, submitted the low bid in the amount of \$22,140.00, and the only other bid received was submitted by Averill & Corbin, Portland, at \$22,850.00. The Commission has referred both bids to the Engineer with power to award the contract to J. F. Johnston, the low bidder, when certain conditions have been fulfilled.

"Construct undercrossing near Helmick Park on the Monmouth-Suver Section of the Pacific Highway West, in Polk County. Two bids were received for this project, the low one being that of Averill & Corbin, Portland, at \$9,642.00, and the other bid was that of McNutt Brothers, Eugene, at \$24,354.00. The Commission has referred both bids to the Engineer with power to award the contract to Averill & Corbin, the low bidder, when certain conditions have been fulfilled.

Sale of Timber

"Timber on tract near Oregon Coast Highway, north of Nehalem, in Tillamook County. No bids were received for the purchase of this timber. The Commission has ordered the timber readvertised for sale.

Rent of State-Owned Heavy Construction Equipment

"Lorain 1½-yard gas shovel. R. E. Rush, Seattle, Washington, submitted the only bid at a monthly rate of \$400.00.

"P & H 1½-yard Diesel shovel. Two bids were received, the low one being that of Walter Butler Company, Bayview, Idaho, at \$950.00, based on a monthly rate, and the other bid being that of R. E. Rush, Seattle, Washington, at \$750.00 per month.

"Bay City 1½-yard Diesel shovel. R. E. Rush, Seattle, Washington, submitted the low bid at \$1,001.00, monthly rate, and the only other bid received was that of Walter Butler Company, Bayview, Idaho, at \$950.00 per month.

"RD-7 Diesel tractor with logging drum. The only bid received was that of R. E. Rush, Seattle, Washington, at \$300 per month.

"Allis-Chalmers tractor with drum and bulldozer. R. E. Rush, Seattle, Washington, submitted the only bid at \$300 per month.

The Commission has referred all bids received for the rent of this equipment to the Engineer with power to award to the high bidder after investigation.

Obsolete Equipment and Scrap Materials

"Sale of obsolete equipment and scrap materials at Salem, Klamath Falls, Coquille and LaGrande. All bids received for the purchase of this material has been referred to the Engineer with power to sell the material to the high bidder in each instance if the bids compare favorably with the appraised value of the items."

The Assistant Attorney requested instructions relative to the rental of buildings acquired with right of way for the Marshfield-North Bend Project, in Coos County. He advised that, as previously authorized by the Commission, arrangements were made with a local realtor to handle the rentals and two of the buildings have been rented; however, the arrangement was terminated when information was received that governmental approval had been secured for the highway construction work which indicated that a clear right of way would be needed much sooner than was anticipated. The question now arises, he said, how to dispose of the tenants, both of whom have paid their first month's rent. After considerable discussion the Commission ordered that the tenants be given formal notification at once to vacate the premises within thirty days and that the rent moneys paid by them be returned in full. The Commission thereupon authorized the Engineer to advertise the Marshfield-North Bend Project for bids to be received as soon as possible.

The Attorney presented an offer from Mrs. Mary Andes to purchase for the sum of \$650 certain property adjacent to the Pacific Highway at the

JUN 4 1942

Ox-Yoke Service Station, Josephine County. He advised that this is part of a service station property for which the Commission paid the former owner, Mr. Henry C. Webb, the sum of \$4,000, and that the portion desired by Mrs. Andes was originally appraised at \$1,500; however, the state has recovered therefrom equipment valued at \$465 which, taken together with Mrs. Andes' offer of \$650 for the remaining property, makes a total recovery of \$1,115 from property appraised at \$1,500. He recommended acceptance of the offer. The Commission approved the recommendation.

The Attorney also brought up for discussion the question whether or not to permit a Mr. R. T. Johnson, Troutdale, to maintain a barbecue stand on certain state highway property near the Sandy River Bridge at Troutdale, which property was acquired by the state for use in connection with the construction of a new highway up the Columbia Gorge. He advised that Mr. Johnson paid the previous owner of the property \$10.00 per month for the privilege of occupying this land and would like to continue to operate there on the same basis if the Highway Commission will let him. The Commission decided to let Mr. Johnson use the property at the same rate until it is needed for state highway purposes.

The matter of purchase of right of way for the permanent location of the Santiam Highway through property owned by L. W. Hill, in Linn County, and wayside strips adjacent thereto, was discussed by the Commission. The State Parks Superintendent, who was present, advised that Mr. Hill is asking \$20.00 per acre for the land less the timber which he wants to keep. The Commission considered such price exorbitant and refused to consider purchase of wayside strips unless the purchase price is reduced. The Engineer was instructed to prepare descriptions for the right of way only for use by the Attorney in securing options from Mr. Hill for the same. The matter of the purchase of the wayside strips was deferred for future consideration.

The Attorney reported receipt of a letter from Leslie O. Tichenor, Port Orford, inquiring what disposition the Commission expects to make of the old Knapp Hotel building in Port Orford because he would like to secure the lumber salvaged therefrom, if possible. He was instructed by the Commission to inform Mr. Tichenor that the Commission intends to keep this building, at least for the time being.

The Commission discussed a controversy with Jurgen La Frenz with respect to right of way needed in connection with the Vadis-Gardiner Ranch Section of the Wolf Creek Highway, Washington County. The Attorney advised that Mr. La Frenz owns a service station on property that the Highway Commission needs for highway purposes and that some time ago he commenced negotiations for the acquisition of the right of way, which negotiations were discontinued, upon instructions of the Commission, when it was decided not to undertake any future construction on this highway for the duration of the war. It now appears that, with the prospects of the sale of a portion of his property in mind, Mr. La Frenz paid \$250 for an option on other land and that the woman from whom he secured the option has also incurred expense amounting to \$300. It also appears that each of these parties is now seeking payment from the state for such expense, claiming that an injustice has been committed by the State

Highway Department. The matter was discussed at some length during which the Attorney recommended the resumption of negotiations for the purchase of the La Frenz property to ascertain if a satisfactory settlement can be reached in view of the present and probable future service station conditions. The Commission approved the recommendation.

The Commission considered and approved an arrangement with H. L. Claycomb, Ashland, relative to the advancement of funds in connection with the revision of his property, a portion of which is needed in connection with the proposed Plaza Corner improvement of the Pacific Highway in Ashland. (See agreement signed later in session for details.)

The Commission discussed a letter from the Attorney concerning the Commission's authority to assume maintenance of Champoeg State Park, in which letter the Attorney points out that jurisdiction over this park has been placed, by special statute, with the Provisional Government Park Board whereas the statute which gives the State Highway Commission certain authority in dealing with state parks is general in character. He gave as his opinion, in view of the conflict in jurisdiction, that the Park Board, the Governor and the Highway Commission should join in asking the Attorney General of the State to construe the statute so that the authority of the Highway Commission may be determined. The matter was discussed at some length and as a result thereof the Commission instructed the Attorney to secure such opinion from the Attorney General if such method of procedure meets with the approval of Mr. Oscar C. Spencer, Chairman of the Provisional Government Park Commission.

The Attorney reported receipt of a request from the National Hospital Association for permission to increase the rate that it is now charging state highway department employees, in connection with its hospitalization contract with the Commission, from \$2.00 to \$2.50 per month commencing on the first of July. He advised that such change in rates is provided for in the agreement between the Commission and the company and recommended approval of the request. The Commission approved such change subject to the condition that the employees affected shall be given the opportunity to withdraw from the company if they so desire.

The Engineer reported results of investigations to determine the necessity for installation of truck scales on the Pendleton-John Day Highway near Seneca. He advised that this matter was investigated by Mr. W. W. Stiffler, Assistant Maintenance Engineer, who found that there has been no log hauling over this highway for several months and inquiry of the Hines Lumber Company, which has been conducting logging operations in this vicinity, indicates that the company will not need to use the highway in the future because it plans to extend its spur railroad into this district so, from the logging standpoint, the scales are not needed. Commissioner Oliver advised that plans are now being formulated to develop the chrome ore deposits in Grant County and when the operations get under way it will be necessary to weigh this material as it is taken to the stock piles, one of which is to be located near Seneca. It was his thought that there is justification for the scale installation in view of this activity and the fact that log-hauling operations undoubtedly will be resumed at some future date. In view of

Commissioner Oliver's statements the Commission instructed the Engineer to select a suitable scale site so that the installation of scales may be expedited in the event that chrome mining and logging operations justify the same.

The Engineer also reported that, in accordance with authority previously granted him by the Commission, he has arranged to place a fine rock surfacing on the pedestrian pathway that was constructed last year along the Central Oregon Highway between Burns and Hines Mill, as a substitute for oiling that was requested by Judge Nelson B. Higgs of Harney County at a previous meeting. It was his thought that such surfacing would prove satisfactory, at least until the present war emergency is over when no doubt it will be much easier to obtain asphalt than it is at the present time. The Commission approved the report.

The Engineer reported briefly on the damage that was caused by a cloudburst on the Little Sheep Creek Secondary Highway, in Wallowa County. He exhibited pictures showing the extent of the damage and advised that repairs would cost about \$20,000. The Commission approved the expenditure, it being necessary in order to maintain travel over this road.

The Commission approved a report from the Engineer showing the reduced travel mileage of highway department automobiles as the result of curtailment of the use of such equipment during the present emergency. The report indicates that there has been a reduction of 36 per cent in travel mileage.

The Engineer reported the cost to surface the Madras-Juniper Butte Section of The Dalles-California Highway, 10.4 miles in length. He estimated the work would cost about \$230,000. Action on this matter was deferred by the Commission until the next meeting.

Similar action was taken with respect to the surfacing of the Smith Hill Section of the Pacific Highway, in Josephine County.

The Engineer requested authority for the Traffic Engineer and himself to attend at state expense the national meeting of representatives of the Office of Defense Transportation which is to be held in Seattle on June 5, 1942. The Commission approved the request subject to concurrence by Governor Sprague.

The Engineer also requested authority for the Traffic Engineer to attend a meeting of the Joint Committee on Uniform Traffic Control Devices which is to be held in Chicago on June 24 to 27, 1942, inclusive. He estimated the expense would not exceed \$200.00. The Commission approved the request provided Governor Sprague authorizes the out-of-state travel expense.

The Commission approved the purchase of three small shop air compressors at \$140 each which the Engineer advised are needed and can be purchased without a priority rating.

Reconsideration was given by the Commission to the renewal of the State Highway Engineer's bond, amounting to \$200,000. The Engineer recommended

that the bond be renewed with the same companies that participated therein during the past year. The Commission approved the recommendation and so ordered.

A communication was presented from Robert E. Warren, Director, Colorado Advertiser and Publicity Committee, suggesting the issuance of vacation priority cards as a solution for the vacation-travel problem. The Commission considered that such procedure is not in conformity with the desires of the Federal Government to curtail highway travel in order to conserve automobile tires and, accordingly, refused to endorse the suggestion.

Messrs. De Martini and Ralph Collett of the Oregon Shipbuilding Corporation came before the Commission in regard to the award of contracts for grading and paving the North Portland Shipyard Access Road Project and for grading and paving the Swan Island Shipyard Access Road Project, bids for which were received by the Commission at the morning session. They urged the Commission to award the contracts at the earliest possible time in the interests of relieving traffic congestion on the streets leading to the shipyards. They were informed that bids submitted are considerably higher than the estimated cost of the projects and the moneys available to finance them, although efforts are now being made by Mr. Lynch, District Engineer, Public Roads Administration, to obtain additional funds; further, that the Commission will probably award the contracts if satisfactory arrangements can be made for financing the work, otherwise, it may be necessary to reject the present bids and readvertise the projects. (Federal approval was obtained and contracts awarded on June 9, 1942.)

A petition was presented from the Franklin Road Committee of Franklin Grange, Lane County, requesting the oiling of the Territorial Secondary Highway between Elmira and Wyper's Corner. The Engineer advised that the section commences at the end of the completed work north of Elmira and extends north-erly about 7.4 miles to a junction with the Siuslaw Highway, and that it would cost about \$45,000 to strengthen the roadway and construct an oiled surface thereon for light traffic. The Commission denied the request in view of the War Production Board's order limiting construction on roads of this kind to a maximum of \$5,000 and instructed the Secretary to so inform the Grange.

The Commission also considered and denied a request from the Lower Klamath Lake Grazing Association for the widening of a dike, that is being constructed by the Federal Fish and Wild Life Service across Lower Klamath Lake, to accommodate a two-lane highway.

A resolution was presented from Deschutes County Pomona Grange No. 25 in which the Commission was requested to take action as may be necessary to remove restrictions which place a limit on trucking that a farmer may do for other farmers. The Attorney advised that the Commission does not have legal authority to act in the matter which, in his opinion, comes under the jurisdiction of the Public Utilities Commissioner. The Secretary was instructed to so inform the Grange.

The Commission considered and adopted by unanimous vote the following resolution lifting the reduced load limit heretofore in effect on the

JUN 4 1942

Yaquina River Bridge on the Eddyville-Blodgett Secondary State Highway, Lincoln County, upon advise from the Engineer to the effect that a new bridge has been constructed at this location:

WHEREAS, on the 27th day of September, 1932, at a meeting of the State Highway Commission, a majority of the members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following, to-wit:

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY No. 180

180-12.3 Covered wooden truss over Yaquina River, 7 tons
Lincoln County

and

WHEREAS, subsequent to the passage of said resolution, the said above-named bridge has been repaired so that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the following bridge, to-wit:

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY No. 180

180-12.3 Yaquina River Bridge, Lincoln County,

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridge shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished the County Clerk of Lincoln County, in which county said bridge is located, and the Superintendent of the Department of State Police for his information.

The Engineer requested instructions with reference to the installation of additional markers along the Old Oregon Trail. He advised that ten markers have already been installed and recalled that the Commission some time ago authorized the installation of ten additional markers when the locations had been selected and approved by the marker committee. He also recalled the Commission's recently-established policy with respect to curtailment of expenditures which are not absolutely necessary to the war effort. He estimated the cost of the ten additional markers at approximately \$3,000.00. The Commission decided to wait until the war is over before making additional expenditures for this purpose.

JUN 4 1942

The matter of purchasing insurance covering the major bridges on the Oregon Coast Highway had the attention of the Commission. In this connection the Attorney reported receipt of a suggestion offered by Coos County Court that such insurance should be provided so as to minimize the state's loss in the event of destruction of any of the bridges by sabotage. The Commission appeared favorably inclined to the purchase of such insurance if it is not too costly but deferred definite action on the matter pending further investigation and report by the Attorney.

A resolution was presented from Umatilla County Court in which the Commission was requested to assume jurisdiction over and maintain the county road that extends from Hermiston to the Umatilla Ordnance Depot, for the duration of the war or until December 31, 1943, unless the period is extended by mutual agreement between the county and the state. The Commission approved the resolution and instructed the Engineer to maintain the road during the period stated. The Commission thereupon signed an agreement with the county covering the matter.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Report on expenditures:-The Parks Superintendent advised that of the amount of \$52,400 budgeted by the Commission for 1942 expenditures, disbursements to April 30 amount to \$16,571.57, of which amount \$1,941.71 was for acquisition, \$3,535 was for betterment, and \$11,094.86 was for operation and maintenance. The Commission approved the report.

Purchase of tract owned by George W. Joseph, Jr.:--The Parks Superintendent advised that Mr. Joseph owns a 40-acre tract of land situate in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 32, Township 1 North, Range 5 East, W. M., and being adjacent to the Upper Columbia River Highway near Latourell Falls. The tract, he said, is valuable from the park standpoint as it controls a portion of the watershed which supplies the Falls. He further advised that there is an accumulation of \$70.17 delinquent taxes against the property which Mr. Joseph does not intend to pay, in fact he is going to let the property revert to the county for the unpaid taxes. The Parks Superintendent recommended purchase of the property for recreational purposes. The Commission approved the recommendation.

Water rights in Peter Skene Ogden State Park:-The Parks Superintendent advised that the Highway Commission is the owner of a water right in this park, covering 19 acres, for which the Commission has been paying from \$32 to \$40 annually for a number of years. He gave as his thought that the Commission does not need this entire water right because the park is naturally a desert type and any greenery that might be brought therein through irrigation would be out of place. He recommended the sale of the rights covering 14 acres, for which he has received an offer of \$30 per acre or \$420, and that the Commission retain the rights on the remaining five acres for future development of the park. The Commission approved the recommendation.

JUN 4 1942

Concession at Silver Creek Falls State Park:-The Parks Superintendent reported receipt of an application from Harry C. Corn for the privilege of operating a concession in this park during the ensuing year. The Commission discussed the advisability of opening the concession house in view of the restrictions on travel during the present war emergency and decided to do so if a satisfactory caterer can be found so as to accommodate the large population contiguous to the park.

Occupancy of Harris Beach State Park by Mrs. Anna Barclay:-The Parks Superintendent advised that Mrs. Barclay has been conducting a restaurant business in this park for a number of years under oral approval of the former park owner, Mr. Carl Bauers, and that, when the state acquired the property from Mr. Bauers, Mrs. Barclay agreed to vacate the premises by December 25, 1941; however, on December 12, 1941, she asked the state for a year's lease of the property on which her building is located so as to give her time in which to dispose of her holdings. Her request was denied by the Commission but she was given an extension of time of six months or until June 18, 1942, to vacate, which time is almost up and there is no evidence that she intends to move, in fact she has asked for the privilege of remaining until December 15 of this year. Furthermore, she wants the state to buy her restaurant building for \$1,500 which the Parks Superintendent considers is far more than the place is worth. He recommended payment of \$250 for the building, if the Commission feels so inclined, although in his estimation the Commission is not obligated in any way and could evict her from the premises if it so desires. This matter was discussed at some length during which the Commission expressed the thought that if there is any moral obligation to Mrs. Barclay because of her investment it is an obligation of Mr. Bauer's rather than of the state. The Commission took no definite action on the matter.

Sale of timber in Short Sand Beach State Park:-The Commission ordered the sale of this timber readvertised for bids to be received at the next meeting of the Commission in view of the fact that no bids for the same were received at this meeting.

The Commission had under consideration the following request for an extension of time within which to complete highway construction work:

Lindstrom Brothers, contract No. 2455, for reconstruction of an approach to the Hawthorne Street Bridge over the Willemette River on the Pacific Highway West, in Portland, Multnomah County, requested an extension of time, from September 30, 1941, to April 7, 1942, within which to complete this job. They alleged their failure to complete the project within the specified time limit was due to extra work ordered by the Engineer. The Engineer advised that, during the construction of the bridge, settlement of two of the piers took place and corrective measures were undertaken by the contractor under force account order; further that it was necessary that the equipment used in raising the structure be left in place for a considerable length

of time as a guard against further settlement. He also advised that the project was completed on April 7, 1942, and that careful inspection of the structure since then reveals that there has been no further settlement. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2455, 2475, 2495, 2499, 2506, 2519, 2525, 2536, and 2550, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2455, with Lindstrom Brothers, for reconstruction of the Hawthorne Bridge approaches on the Pacific Highway West, in Portland, Multnomah County. Completed April 7, 1942.

Contract No. 2475, with Warren Northwest, Inc., for grade widening and paving the Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County. Completed May 8, 1942.

Contract No. 2495, with E. L. Gates, for grading and surfacing the Kimberly-Simas School Section of the Kimberly-Long Creek Secondary State Highway, in Grant County. Completed April 24, 1942.

Contract No. 2499, with The United Contracting Company, for paving the Independence (B Street-Monmouth Street) Section of the Independence Secondary State Highway, in Polk County. April 17, 1942.

Contract No. 2506, with Warren Northwest, Inc., for grade widening and paving the Middle Unit, Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County. Completed May 8, 1942.

Contract No. 2519, with Norris Brothers, for surfacing and oiling the Salt Creek-Hanley Ranch Section of the Little Butte Secondary State Highway, in Jackson County. Completed May 7, 1942.

Contract No. 2525, with J. F. Johnston, for construction of the Rogue River Bridge near Grand Ronde on the Salmon River Highway, in Polk County. Completed April 28, 1942.

Contract No. 2536, with Colonial Construction Company, for construction of rock toe embankment on the Corbett Section of the Columbia River Highway, in Multnomah County. Completed May 21, 1942.

Contract No. 2550, with E. C. Hall Company, for the Sisters Rock Production Project on state highways near Sisters, in Deschutes County. Completed April 3, 1942.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with H. L. Claycomb, Ashland, with respect to a revision of his service station site necessitated by the improvement of the Pacific Highway, in Ashland.

Agreement with the California Western States Life Insurance Company with respect to the furnishing of group life insurance to state highway department employees.

Agreements with the following contractors canceling certain state highway contracts in view of the War Production Board's ruling, Order L-41: Rogers Construction Company, contract No. 2528, Diversion Canal-Midland Overcrossing on the Midland Secondary Highway, in Klamath County; A. H. Saxton & Son, contract No. 2552, Campbell Bridge-Hazeldale Section of the Farmington Secondary Highway, in Washington County; Norris Brothers, contract No. 2553, Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, in Wheeler County; Rogers Construction Company, contract No. 2555, South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County; and M. L. O'Neil & Son, contract No. 2556, Soda Mountain-Silvies Section of the John Day-Burns Highway, in Grant County.

Agreement with Umatilla County providing for state maintenance of the county road which extends from Hermiston to the Umatilla Ordnance Depot, for the duration of the war.

Agreement with the City of Oakland, Oregon, providing for the improvement of Locust Street between First Street and Second Avenue, which street is not a state highway route.

JUN 4 1942

Agreement with the Union Pacific Company and the O.W.R.&N. Company relative to the lease of certain railroad property at Burns for installation of radio wires under ground.

Application directed to Nehalem Valley Cooperative Electric Association for the furnishing of electrical service for the state truck scales near Olney.

"Certificate of Termination" of insurance policy furnished in connection with the snow removal agreement with the Union Pacific Company and the O.W.R.&N. Company, being policy CA 66355 of Underwriters at Lloyd's London and Certificate No. 1528 issued by Hansen and Rowland, Inc., of Oregon. New insurance has been furnished in lieu thereof.

Lease agreement with Southern Pacific Company providing for use of railroad property in North Bend for storage purposes.

Bargain and sale deed conveying unto the Deschutes Grain and Feed Company certain property at the Madras Overcrossing on the Warm Springs Highway, Jefferson County. Real property file No. 3189.

Bargain and sale deed conveying unto the City of Albany five parcels of land in Albany. Real property file No. 7389.

Bargain and sale deed conveying unto H. L. Beardsley 3308 square feet of land situate in Block 242, Mills Second Addition to Klamath Falls. Real property file No. 9598.

Bargain and sale deed conveying unto Mabelle de Young and Walter C. de Young property situate in Lots 2 and 3 of Block 2, Sixth Street Addition to the City of Klamath Falls. Real property files No. 9625 and No. 9625-A.

Bargain and sale deed conveying unto Mary F. Parks property situate in Block 242, Mills Second Addition to Klamath Falls. Real property file No. 9596.

The Commission discussed dates for its next two regular meetings for the receiving of bids and decided to hold such meetings in Portland on Thursday, June 25, and on Thursday, July 16, 1942. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:45 p. m.

William H. Sealey
State Highway Engineer

William H. Sealey
Secretary

Henry F. Cabell
Chairman

Herman Oliver
Commissioner

JUN 1942

Portland, Oregon, June 24, 1942

The State Highway Commission met in regular session at 8:00 p. m. in Room 515, Imperial Room, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused. However, he attended the meeting on the following day at which time he approved the action taken by Chairman Cabell and Commissioner Clough at this session.

The Commission conferred with Burwell Bantz, Director of Highways, and O. R. Dinsmore, Construction Engineer, of the State of Washington, who were present, with respect to the granting of permits authorizing the transportation of commodities over state highways involving gross weights in excess of the Oregon statutory weight limits, particular reference being given to Orders 3, 4 and 5, recently issued by the Office of Defense Transportation relative thereto. The Engineer pointed out that the laws of Oregon limit the overall length of combination of vehicles to 50 feet and the gross weight to 54,000 pounds, whereas, the adjoining states permit combinations of vehicles 60 feet long and gross weights of 68,000 pounds and, as a consequence, a bottleneck situation exists in Oregon, which is working adversely to the best interests of the country in the war effort. He explained the order made by the Office of Defense Transportation which, he said, was amended to limit gross weights of motor carriers to those which may be moved over public highways without overstressing highway surfaces and bridges, and suggested that the Commission take action permitting the longest and heaviest vehicles to operate over Oregon highways with reasonable protection to the traveling public and consistent with the carrying capacity of road surfaces and bridge structures as evidence of full cooperation with the aims and objectives of the Office of Defense Transportation.

He further suggested the classification of the roads in Oregon into three groups: Group No. 1 to include those roads, having strong bridges, that are wide and straight enough to accommodate 60-foot length vehicles without any portion of the same encroaching on the opposite traffic lane. Group No. 2 to include those roads which are not wide and straight enough to accommodate 60-foot length vehicles but whose road surface and bridges are strong enough to withstand loads weighing more than the limits provided by the Oregon statutes. Group No. 3 to include those roads which are neither wide enough nor straight enough to accommodate vehicles having an over-all length in excess of 50 feet and whose pavements and bridges are not capable of standing up under gross loads in excess of those authorized by statute.

He further suggested that the maximum load permitted on Group No. 1 highways be limited to that determined by the formula $W = 750(L+40)$, wherein W equals the gross weight in pounds and L equals the distance in feet between

the first and last axles of the combination of vehicles with provision that the maximum weight on any group of axles spaced 18 feet or less apart shall not exceed that determined by the formula $W = 650 (L+40)$, wherein L equals the distance between the first and last axles of the group in question. This would permit a maximum load of 71,250 pounds for large trucks equipped with sufficient axles and adequately sized tires; and would provide a maximum load of 63,750 pounds on a combination of vehicles 50 feet long operating over Group 2 highways. The maximum weight of load that could be transported over Group 3 highways, he said, would be 54,000 pounds, which is the gross weight permitted by statutory provision under the formula $W = 700 (L+40)$.

He further suggested the adoption of a rule permitting over-all heights of 12 feet 6 inches for movements over Group 1 highways and over-all heights of 12 feet over Group No. 2 highways, and permitting a gross weight of 32,000 pounds on any set of tandem axles spaced more than 3 feet 4 inches apart, notwithstanding that the allowable weight on tandem axles so spaced, as determined by formula, might be less than 32,000 pounds.

The matter was discussed at considerable length and as a result thereof the Engineer's recommendations were approved by Mr. Bantz and by the Commission subject to concurrence by Commissioner Oliver, and it was agreed that the highway departments of both states would confine the issuance of permits in accordance therewith. The Commission's action was confirmed by Commissioner Oliver on the following day at which time the Commission adopted a resolution covering the matter.

A letter from Donald M. Nelson, Chairman of the War Production Board, directed to Governor Sprague, in which request was made for liberalization of the restrictions on log hauling, was also discussed.

The Engineer suggested that it would be proper to give log haulers the benefit of the increase in weights granted other truckers so as to provide a uniform rule covering all classes of truck hauling. He pointed out that the law now allows a 68,000-pound gross load on logging equipment, consisting of a tandem-axle truck and tandem-axle semitrailer, subject to the application of the formula $W = 750 (L+40)$, and of the formula $W = 650 (L+40)$ for groups of axles spaced 18 feet or less apart; but gross loads on a combination of vehicles, consisting of a single-axle truck and tandem-axle semitrailer, are limited to 54,000 pounds, plus a 10 per cent tolerance or 59,400 pounds, based on the formula $W = 700 (L+40)$. He recommended increasing the tolerance allowed on the last-mentioned combination of vehicles from 5,400 pounds to 7,000 pounds, if the over-all axle spacing is 40 feet or more, which would permit a gross load of 61,000 pounds; and a tolerance of 5 per cent on the gross load permitted on the first above-mentioned combination of vehicles which would permit a gross load of 71,400 pounds. Such increases, he said, would provide for uniformity of loadings and would be in compliance with the order of the Office of Defense Transportation. He further recommended that weighmasters be instructed not to request the surrender of the PUC plates carried on single-axle logging equipment with axle spacing of 40 feet or more, unless the gross weight exceeds 61,000

pounds and, unless the gross weight exceeds 71,400 pounds in the case of tandem-axle truck combinations. The Commission approved the recommendation subject to concurrence by Commissioner Oliver. (Mr. Oliver stated his approval on the following day)

The Commission also considered the matter of permitting log haulers to truck haul logs on state highways during holidays. It was the Commission's decision that such movements should be authorized in view of the present war emergency and it was thereupon ordered that the present rules and regulations be modified to permit log hauling on state highways at all times, both day and night, except during the three-hour period between 9:00 p. m. and midnight.

The matter of insuring highway department properties against damage which might result from enemy attack had the consideration of the Commission. The Commission decided, subject to Commissioner Oliver's approval, to accept the offer of the Federal Government through its War Damage Corporation with respect thereto, and thereupon authorized and instructed the Engineer to make provision at once for such insurance coverage on the following properties: Interstate Bridge over the Columbia River between Portland and Vancouver, Washington; numerous other important bridges throughout the state; automobiles in dead storage; and certain buildings, storehouses, and the highway department laboratory building in Salem. Such insurance is estimated to cost approximately \$22,000.00. Mr. Bantz stated that the Washington Highway Department had not intended to take out insurance on the Interstate Bridge between Portland and Vancouver; however, inasmuch as the Oregon Highway Commission wants to insure this structure, he will discuss the matter again with Governor Langlie of Washington and advise whether or not the State of Washington would participate in the cost thereof. (He later advised that the State of Washington would participate in the cost of insuring this structure. Commissioner Oliver approved the Commission's action on the following day)

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended be made in connection with each. After careful consideration the Commission approved the request and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be

declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Engineer brought up for discussion the sale of scrap tires for which bids were received by the Commission at the previous meeting. He recalled that the bids were referred to him to sell to the high bidder after investigating the prices; however, the Federal Government's call for scrap rubber was received before he was ready to make the awards and, upon telephonic authority received from the Commission, he sold the tires to the Federal Government at one cent a pound which is one-half cent higher than the highest bid received by the Commission, thus realizing approximately \$500 more than would have been received if the material had been sold to the junk dealers. The Commission approved such arrangement.

JUN 21 1942

In this connection the Engineer suggested that it would be helpful to the government, during the present rubber shortage, if a thorough canvass were made of highway premises for worn out rubber casings which could be sold to the government at one cent a pound, also if maintenance men were authorized to pick up rubber accumulations deposited on the highway right of way by private parties, or otherwise, and to deliver the same to the nearest service station, provided it is to be donated to the government. This could be done, he said, by the maintenance men in the performance of their regular duties. The Commission approved the suggestion and so ordered.

The Commission had under consideration the controversy pending between the Commission and Dr. C. J. Moser of Grants Pass concerning real property which the state seeks to acquire for highway purposes, and which controversy is now the subject of a condemnation action instituted in the Circuit Court of the State of Oregon for Josephine County. The property had been previously viewed by Chairman Cabell and Commissioner Clough as members of the Highway Commission, and later, at the request of Dr. Moser, was viewed again by Commissioner Clough in company with Dr. Moser. After a report made by Commissioner Clough with respect to his view of the property and his conference with Dr. Moser on the ground, and after thorough discussion and deliberation, the Commission adopted the following resolution with regard thereto:

RESOLVED that as a compromise offer only, and for the purpose of avoiding the trial of the pending case, the Commission's Attorney be and he hereby is instructed to make the following alternate offers to Dr. Moser or his attorney, Mr. Niel Allen: that the state accept a ten-year lease covering the property and the roadway described in the condemnation complaint and the consideration be based on a royalty of two cents per cubic yard, truck measure, for all materials placed on the road, or that the state pay as a cash consideration \$2,250 for title to the property described in the complaint, and that if neither of said offers is accepted the Attorney be instructed to proceed with the trial of the condemnation action; the foregoing offers to include necessary fencing of either roadway or property.

(See following day for Attorney's report and additional resolution)

The Attorney brought up for discussion the controversy with Mr. A. F. Elkins with respect to the acquisition of right of way needed for the revision of the Pacific Highway West, south of Monmouth. It appears that Mr. Elkins is asking \$15,000 as settlement, alleging special damage to his property by reason of severance and the cutting up of his property in an undesirable way. It also appears that three different appraisals have been made of the property, ranging from \$4,900 to \$6,200.00. Chairman Cabell advised that he has inspected the property and is convinced that Mr. Elkins has just cause for special complaint. He gave as his thought, however, that the Commission is not justified in paying

Mr. Elkins more than \$10,000 and he recommended an offer in such amount. Commissioner Clough concurred. The Attorney was thereupon authorized to negotiate further with Mr. Elkins on such basis.

The Attorney also brought up for discussion the acquisition of the Zurcher property, in Washington County, a portion of which is needed as right of way for the Wolf Creek Highway. He reported a conference with Mr. Patterson, attorney for the Zurchers, at which Mr. Patterson made two alternate offers of settlement, one of which involves purchase of 25.36 acres needed for right of way and 136.8 acres, situate on the north side of the highway, at \$185 per acre or a total of \$30,314.60; and the other involves the purchase of all of the Fred Zurcher holdings, in addition to the right of way, approximately 222 acres, at \$175 per acre or a total of \$38,878.00. Should the Commission elect to settle on the basis of the second offer, he said, land not needed could be sold at approximately \$150 per acre so that the state's final investment in the right of way, including 5 per cent commission to the real estate agent, would actually amount to \$10,334, compared with \$11,174 for right of way alone with damages and fencing. The Commission declared that it is not interested in any transaction that involves the acquisition of land other than right of way. The Attorney was instructed to so inform Mr. Patterson and to advise him further that the Commission is ready and willing to purchase the right of way only, if it can be obtained at reasonable cost.

The Commission adjourned at 11:00 p. m. to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, June 25, 1942

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction, sale of timber, sale of buildings in North Bend, and rental of state-owned heavy construction equipment were opened and read in accordance with previously published notices, following which Chairman Cabell announced that the awards would be made at 2:30 p. m. in the same room:

\$100.00

The Engineer brought up for discussion the following projects which were advertised for bids to be received at this meeting but in connection with which no bids were submitted: surfacing and oiling the Prairie City-Dads Creek Section of the John Day Highway, in Grant County, and the North Dillard Bridge Section of the Pacific Highway, in Douglas County. He advised that the Prairie City-Dads Creek Section is in extremely bad condition and must be improved. He recommended that the work be done with state forces because it is apparent that contractors are not interested in the job as they have submitted no bids, so if the work is done this year it will have to be as a state force project. The Commission approved the recommendation.

As to the North Dillard Bridge, the Engineer pointed out that this project has been advertised for bids on two occasions, the first time was on the basis of concrete construction when only one bid was received, which bid was rejected as being too high. The project was readvertised on the basis of

JUN 24 1942

construction of a wooden bridge but no bids were received. He pointed out that the bridge is in very bad condition and must either be replaced by a new structure or undergo extensive repairs. He recommended, in view of the seriousness of the situation and the necessity to provide a suitable structure within the shortest possible time, that the Commission authorize repairs to the existing structure with state forces as a minor betterment project. The Commission approved the recommendation.

Mr. James Frankland, Regional Engineer, United States Forest Service, was present and asked the Commission to reconsider the action recently taken permitting the construction of a power pole line over the Forest Service telephone line on the McKenzie Highway near Leaburg Dam. He advised that for many years the Forest Service has maintained a telephone line along the north side of the highway at this point and, in their estimation, the overbuilding of the same with a high voltage power line will create a very undesirable hazard which they wish to avoid, if possible. He suggested that the power company be permitted to build its pole line along the south side of the highway, notwithstanding that the McKenzie River is in close proximity to the highway at such point. It was pointed out to Mr. Frankland that this location is one of the fine beauty spots along the McKenzie Highway which the Commission wants to preserve and that in the Commission's estimation a pole line along the south or river side of the highway would detract greatly from the aesthetic features; also, that it has been the policy of the Highway Commission for many years to deny requests for pole line construction on highways under such circumstances, which policy, according to the Commission's understanding, coincides with that of the United States Forest Service, hence the Commission cannot grant the request. Mr. Frankland accepted the Commission's decision in the matter.

Mr. Phil Berthiaume of the California Western States Life Insurance Company was present in regard to the furnishing of group life insurance to highway department employees. Mr. Berthiaume recalled that the Commission recently authorized his company to secure applications for such insurance from the hourly-paid men only, and advised that they have run up against difficulties with respect to including certain employees who work part time on an hourly basis and part time on monthly-salary basis. He asked the Commission for instructions as to how to handle such employees and suggested that it might be satisfactory to include in the arrangement all maintenance and shop men, regardless of whether or not they are employed on the hourly or salaried basis, which would make it a clean-cut proposition. The Commission took the matter under advisement.

The Engineer presented a report on estimated motor vehicle use for the next several years, together with a statement of estimated revenues from such source, which discloses a possible serious shrinking of income and the need to conserve every dollar possible. The Commission approved the report and ordered it filed.

The Attorney presented an offer from Mr. A. T. Andrews, North Bend, to purchase, for the sum of \$123, certain state-owned property in North Bend,

particularly described as being a portion of Lots 29 and 30 of Block 34, Plat "B" Coos Bay Addition to North Bend. He advised that this property is of no value from the state highway standpoint and recommended acceptance of Mr. Andrew's offer. The Commission approved the recommendation.

The Attorney also presented the offer of Mr. Chester H. Hamaker to pay \$30 per month rental for certain state-owned property adjacent to South Sixth Street, Klamath Falls. He advised that Mr. Hamaker is the original owner of this property and is now maintaining certain buildings thereon; further, that he has agreed to vacate the premises immediately upon 30-days' notice. He recommended acceptance of the offer. The Commission approved the recommendation.

The Attorney requested instructions relative to the collection of rentals on buildings that were acquired by the Commission in connection with the proposed improvement of the Pacific Highway at the Plaza Corner in Ashland. He recalled that, at the request of the people of Ashland and because war conditions have postponed construction of the Plaza project, the Commission decided not to wreck the buildings now occupied by the Postal Telegraph Company, G. H. Billings and J. D. Mars, who are paying rental for the same. However, the question arose, in view of the fact that the buildings have been sold and the state now simply owns the land on which the buildings stand, how much the state should benefit in the rental payments. He recommended the splitting of such payments on a 50-50 basis with G. S. Butler, the present owner of the buildings, to whom they were sold for wrecking. After discussion the Commission approved the recommendation.

Reconsideration was given by the Commission to the matter of participating in the maintenance of Champoege State Park. The Attorney questioned the legal authority of the Highway Commission to spend state highway funds for such purpose. The Commission indicated a desire to cooperate with the Provisional Government Park Commission in this undertaking and authorized an advancement of state highway funds to pay for the work if done by state highway forces, provided the Provisional Government Park Commission will agree to reimburse the State Highway Commission in full later. The Attorney was instructed to discuss the matter with Mr. Omar C. Spencer, Chairman of the Provisional Government Park Commission, from that standpoint.

The Commission had under discussion the matter of permitting Mr. John H. Shively, Elsie, and several other parties to continue to maintain their residence buildings on state highway property adjacent to the Wolf Creek Highway near Humbug Creek. The Engineer advised that these parties are all employed on logging operations in the nearby vicinity and for some time past have been maintaining their residences in small shacks located on the state's property, notwithstanding that they had no authority to do so; further, that they have been ordered on several occasions to vacate the premises but are reluctant to do so, stating that they have no convenient place to move to and would like to stay where they are, at least until their garden truck has been harvested. He pointed out that it is strictly contrary to the policy of the Commission to permit such encroachments and recommended that they be required to move off the

JUN 24 1942

state's property at once. The matter was discussed at some length during which the Attorney suggested that these people be forced to vacate the state's property but that they be allowed to harvest their garden truck when it is ready. The Commission approved the suggestion and so ordered.

The Attorney brought up for discussion matters pertaining to the acquisition of the State Game Commission property at Union, in Union County. He recalled that, at a recent meeting of the Commission, he was instructed to investigate title to the property and to suggest a way that the Highway Commission could acquire it, if it wants the property, without evicting the Union County Gun Club, which for a number of years has been making use of a portion of the property under special arrangement with the State Game Commission. He gave as his opinion that the proper way to conclude this matter would be to secure a deed from the Game Commission and to lease to the Gun Club, for a specified length of time, the area that it is now using under its arrangement with the Game Commission. The Engineer advised that the property can be used to very good advantage in connection with highway maintenance work and recommended purchase of the property at \$5,500 and that the Gun Club be given a lease on the portion that it is now using until such time as the property is needed for state highway purposes. The Commission approved the recommendation and thereupon authorized the inclusion of this item in the real property resolution adopted on the previous evening.

The Commission approved and signed a deed of easement conveying unto the City of Redmond a strip of land 20 feet wide off the west side of Block 71, original townsite of Redmond, which property is being conveyed unto the City of Redmond in exchange for city property needed by the state.

A letter was presented from Frank Branch Riley in behalf of a client who wishes to purchase a portion of the old United States Spruce Production Railroad right of way, in Lincoln County, that was acquired by the Highway Commission some time ago from the Southern Pacific Company, so as to fill out her present holdings at this location. The Engineer advised that the old railroad right of way was acquired by the Commission as a part of its general plan for the acquisition of an ocean-side freeway and could not be disposed of without defeating the purpose for which it was obtained; further, that it was intended at some future time to purchase, if possible, private property situate between the old railroad and the highway which would include certain land owned by Mr. Riley's client. The Commission decided in view of the circumstances not to dispose of the property at this time and instructed the Engineer to so inform Mr. Riley.

The Commission discussed a letter from Mrs. Kate MacDonald, Dayville, Oregon, requesting the repair of an irrigation ditch on her property located adjacent to the Ochoco Highway near milepost 101.2, Wheeler County, which she alleges was damaged by the state's contractor during construction of the highway. The Engineer advised that the highway was built in 1930 on right of way purchased by the county and that the alteration of irrigation ditches, removal of buildings, construction of cattle passes, et cetera, were considered at that time a part of the right-of-way purchase, and ordinarily arrangements for

such changes were provided for in the right-of-way settlements. He further advised that no complaint was filed as to the functioning of Mrs. MacDonald's ditch until July of 1941, at which time investigation was made and it was ascertained that it would cost between \$1,500 and \$2,000 to alleviate the damage. It appeared to the Commission that the state assumed responsibility for the damages at the time that it took over this highway as a state highway in which case it probably is the state's obligation to make the repairs. However, a definite decision in the matter was deferred pending a report as to what actually has to be done to satisfy Mrs. MacDonald and how much it will cost to do the work. The matter was referred to the Engineer for investigation and report.

The Commission discussed the advisability of abandoning a portion of the Eagle Point-McAllister Springs Section of the Little Butte Secondary Highway, in Jackson County, and of abandoning a portion of the Dee-Parkdale Section of the Hood River Secondary Highway, in Hood River County. The Engineer recommended abandonment of both sections because the highway alignment has been revised in both instances and the old right of way is no longer of value from the state's standpoint. The Commission approved the recommendation and by unanimous vote adopted the following resolutions relative thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Eagle Point-McAllister Springs Section of the Little Butte Highway in Jackson County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there were eliminated and made unnecessary as parts of the permanent highway certain sections or parts thereof, which sections are more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragments or portions of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments of land confined within the areas of land hereinafter designated, which fragments or parcels of land were formerly within the limits of the right of way of the Eagle Point-McAllister Springs Section of the Little Butte Highway in Jackson County but are now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragments or parcels of land or portions of the old right of way are

JUN 24 1942

abandoned as parts of the right of way of said highway, and said fragments or parcels of land or old right of way are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Jackson County for highway or other public purposes as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain parts of the old right of way of the Eagle Point-McAllister Springs Section of Little Butte Highway in Sections 19, 20, 21 and 22, Township 35 South, Range 2 East, W. M., Jackson County, lying on the southerly and northerly side of the right of way required for the reconstructed Little Butte Highway, the beginning and ending points with reference to the engineer's stations of the said reconstructed highway being station 548+40 on the westerly end and station 691+30 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated May 29, 1942, upon which map or exhibit there are reflected the above described parcels of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragments of land, and should said abandoned sections of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson County and beyond any responsibility or supervision by the State Highway Commission.

*Map Filed Right of Way Abandonment and Retention File - No. 104

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Hood River Highway in Hood River County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there were eliminated and made unnecessary as parts of the permanent highway certain sections, which sections are more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragments or portions of right of way hereinafter designated and which were heretofore included within the area of the right of way of said highway as formerly located, but which are now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragments of land confined within the area hereinafter described, which fragments or parcels of real property were formerly within the limits of the right of way of the Dee-Parkdale Section of the Hood River Highway, but are no longer parts of the right of way of said highway as the same has been relocated and constructed be and said parcels of real property are abandoned as parts of the right of way of said highway, and said parcels of land are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Hood River County for highway or other public purposes as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain parts of the old right of way of the Dee-Parkdale Section of the Hood River Highway, in Section 19, Township 1 North, Range 10 East, W. M., Hood River County, lying on the easterly and westerly side of the right of way required for the reconstructed Hood River Highway.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer,

H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated May 29, 1942, upon which map or exhibit are reflected the above described parcels of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Hood River County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned sections of the right of way of said Hood River Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Hood River County and beyond any responsibility or supervision by the State Highway Commission.

The Attorney presented a request from Mr. H. E. Penrod, Salem, to harvest wild hay growing on a 25-acre tract of land acquired by the Commission from a Mr. Ramseyer in connection with a settlement for right of way for a revision of the Pacific Highway East, a short distance south of Salem. He advised that Mr. Penrod has offered to pay the state \$1.00 per acre for this privilege, or a total of \$25, and recommended acceptance of the offer in order to get rid of the grass and weeds. The Commission approved the recommendation.

The Attorney brought up for consideration the question of occupancy by Dant and Russell of property owned by the State of Oregon and the City of Portland, in Blocks 4 and 21, on the Front Avenue Project, it appearing that public property has been occupied by Dant and Russell since April 1, 1941, without payment of any rentals thereon. The Commission expressed itself favorable to the collection of payment for use of the property by legal action, if necessary. The matter was referred to Chairman Cabell for discussion with the City of Portland before any further action is taken.

The Engineer reported that the Oregon Shipbuilding Corporation has filed its application with the Portland City Council for permission to use certain water-front areas extending from the Steel Bridge southerly to a point about two blocks south of the Burnside Bridge, Portland, in connection

Map Filed Right of Way Abandonment and Retention File - No. 105

JUN 24 1942

with its proposed ferry terminal, to facilitate the transportation of shipyard workers to the shipbuilding plants at Swan Island, St. Johns, and Vancouver, and that the city has adopted an ordinance, being Ordinance No. 77372, granting such privilege until such time as the property is needed in connection with the construction of the Front Avenue project (U. S. Highway 99W), provided the corporation will vacate the premises on 90-days' notice and will restore the area to substantially its present condition when the Oregon Shipbuilding Corporation's use of the property is terminated. The Engineer recommended approval of the city's action as an emergency war measure inasmuch as the highway improvement at this location has been indefinitely postponed and that no charge be made for the use of the property. The Commission approved the recommendation.

Messrs. Clifford Wilson and Charles Kingsley, representing Pope and Talbot Logging Company, came before the Commission and requested relief from the furnishing of two flagmen in connection with the transportation of long poles and piling over state highways. They particularly requested authority to eliminate the rear flagman or pilot car in view of the fact that it is extremely difficult under present war conditions to secure men to perform this duty. They also asked the Commission to modify the requirements of its present log-hauling permits so as to do away with any flagman whatsoever along sections of highways where sight distance is good for a considerable distance in front of and behind the loads, such request being made in the interest of conservation of tires. The Commission denied the request for the elimination of flagmen as a general rule; however, instructed the Secretary, as a trial proposition, to prepare permits so as to eliminate flagmen except along those sections where sight distance is not good and an extreme hazard would be created for other traffic if flagmen did not accompany the movements.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Monthly report on park expenditures:-The Parks Superintendent reported an expenditure of \$37,790.17 from the 1942 budget of \$52,400, up to May 31, leaving an unexpended balance of \$14,609.83. The Commission approved the report.

Sheep grazing in Humboldt Mountain State Park, Curry County:-The Parks Superintendent reported a request from Robert Fromm for a one-year's renewal of the permit granted him last year to graze one hundred sheep in this park at 50¢ per head per year. He recommended approval of the request. The Commission approved the recommendation and thereupon signed an agreement covering the matter.

Hay cutting in Cascadia Park and Neptune Park:-The Parks Superintendent recommended approval of the request of Wm. Munkers to cut the natural grass growing in Cascadia State Park, as fire protection. He also recommended approval of the request of Mr. Bert Stonefield to cut grass in Neptune Park, as a similar precaution. Further, that no charge be made for the grass in either instance. The Commission approved the recommendation.

Acquisition of juniper wayside strips between Bend and Burns:- Upon recommendation of the State Parks Superintendent the Commission approved the form of agreement with the Department of the Interior, Grazing Service, dated March 20, 1942, providing for the protection of juniper wayside strips between Bend and Burns, as the form of agreement to be used in connection with the protection of similar juniper waysides owned by the federal government between Sisters and Redmond and between Redmond and Prineville.

Sale of logging railroad trestle near Vernonia:-The Parks Superintendent reported an offer from a Mr. Elmer Bergerson, Vernonia, to purchase an abandoned logging railroad trestle adjacent to the Wolf Creek Highway, in Tillamook County, particularly in the NE $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 1, Township 3 North, Range 6 West, W. M., which trestle was acquired by the state in connection with acquisition of right of way and wayside strips from the Sunset Logging Company. He advised that Mr. Bergerson wants to salvage the lumber from this trestle and would like two years' time in which to pay for it if the Commission will sell it to him. Action on the matter was deferred by the Commission pending investigation and report by the Engineer as to whether or not the timber in this trestle can be used to advantage by the State Highway Department.

Final report on Silver Creek Falls CCC Camp:-The Parks Superintendent submitted a final report on this project which he advised has been closed down under government orders. (See report in general files for details) The Commission approved the report and ordered it filed.

Report on Collins Estate property at Short Sand Beach:-The Engineer advised there is a question in his mind whether or not the income tax report on the Collins Estate property, which the Commission previously asked him to inspect, is available for public review. The matter was referred by the Commission to the Attorney to investigate the tax report, if possible.

Sale of timber at Short Sand Beach:-The Parks Superintendent requested instructions relative to readvertising this timber for sale inasmuch as it has been advertised on two different occasions but no bids were received. The Commission decided to take no further action at this time.

The Engineer submitted a brief report on the operation on state highways of a train of vehicles consisting of a truck tractor and two semi-trailers. He advised that, under previous authority granted by the Commission, a temporary permit was issued to the Bekins Moving and Storage Company and to the Pacific Motor Trucking Company to operate such combinations over all highways authorized under the emergency permit approved by the Commission on February 13, 1942, subject to the condition that all three units of each combination are equipped with satisfactory air brakes in good working condition.

The movements, he said, are being observed by the Traffic Engineer in company with a representative of the Washington Highway Department, and a complete report in regard thereto will be rendered at a future date.

The Engineer also submitted a report on the cost of highway construction work performed by contractors during the year 1941. The report indicates that the contractors observed made a profit of \$196,216, which is approximately 4 per cent on the gross income of \$4,911,469. The percentage of profit, he said, over the nine-year period, from 1933 to 1941, is approximately 2.86 per cent. The Commission ordered the report filed.

Mr. E. L. Gray, Independence, President of the Kings Valley Highway Association, came before the Commission relative to the survey to determine a definite location for the proposed bridge across the Willamette River at Independence and a permanent location for the state highway between Monmouth and Independence. The Engineer advised that investigations reveal that the logical site for the bridge at Independence is on an extension of Monmouth Street, and that the logical location for the permanent highway between Independence and Monmouth is approximately on the present route with certain revisions to eliminate two right angle turns. Mr. Gray asked the Commission to adopt such alignment in order to facilitate the development of properties in Independence and between Independence and Monmouth. The Commission declined to establish a definite location at this time in view of prevailing conditions.

The Engineer rendered a status report on the proposed purchase of three new paving plants, such report indicating that the plants are almost completed by the Dallas Locomotive and Iron Works but delivery of the same cannot be made because of difficulties in securing the proper governmental priority rating. He further stated that he has made every effort to secure the plants but up to the present time has been unable to secure any satisfaction. He was instructed by the Commission to keep on trying because the paving plants are needed badly in order to efficiently maintain the state highway system.

Reconsideration was given by the Commission to the matter of exchange of roads in Linn County, particularly the exchange of a five-mile section of the Albany-Lyons Secondary Highway adjacent to Scio for a five-mile section of the Richardson Gap County Road which by-passes Scio. The Engineer advised receipt of a letter from the Roaring River Logging Company, which has requested such exchange of roads to facilitate the truck hauling of logs, advising that the company is willing to contribute \$1,000 annually, in advance, for two or three years to pay for maintaining the present secondary highway if the Highway Commission will improve and maintain the Richardson Gap Road.

The Engineer recalled that this matter was the subject of discussion at the previous meeting when the Linn County Court and representatives of the Roaring River Logging Company were present at which time the county court refused to approve such exchange of roads, because of its agreements with other logging companies for the maintenance of other county roads, although the county court at that time offered no objections to the state maintaining the Richardson Gap Road if it did not necessitate the rerouting of the secondary

highway. After some discussion the Commission by unanimous vote approved the offer of the Rouring River Logging Company subject to the condition that the arrangement is satisfactory to the Linn County Court. The Engineer was instructed to consult the county court relative thereto.

A letter was presented from County Judge D. N. Busenbark, Douglas County, requesting the widening of the Elkton-Sutherlin Secondary State Highway at its junction with the county road about midway between Elkton and Sutherlin so as to facilitate the transportation of long poles and piling from the county road onto the secondary highway. Judge Busenbark stated that there is insufficient room at the present time for poles and piling to enter the secondary highway from the county road because of the close proximity of the county bridge over the Umpqua River and the narrowness of the approach to the bridge. He suggested widening on the east side of the secondary highway from 12 feet to 16 feet and the wasting of the excavated materials along the shoulders on the westerly side of the highway. Division Engineer Lytle, who was present, advised that this improvement would benefit only one man. The State Highway Engineer suggested an investigation to determine how much it will cost to do what Judge Busenbark requests and, if the work is not too costly, that it be done with state forces if the man who is to be benefited will assume the expense and will maintain flagmen on the secondary highway at all times when log and piling operations are underway at this point. The Commission approved the suggestion and ordered that Judge Busenbark be advised of the action taken, it being understood that if the offer is accepted the party benefiting thereby will deposit a certified check with the Commission, in the amount of the estimated cost of the work, before any work is done. The Engineer was also instructed to check into the necessity for maintaining flagmen at the junction point.

Reconsideration was given by the Commission to the matters discussed with Mr. Burwell Bantz, Director of Highways of the State of Washington, on the previous evening. Chairman Cabell explained for the benefit of Commissioner Oliver, who was absent from such meeting, the action taken at that time. Commissioner Oliver stated his approval of the same whereupon the Commission by unanimous vote approved the following statement and adopted the following resolution with respect thereto:

In response to an order made by the Office of Defense Transportation, this Commission on the 13th day of February, 1942, adopted a resolution liberalizing the rules and regulations with respect to the movement of both war and civilian materials and commodities over the public highways of the State of Oregon. Subsequent to the date of the order by the said Office of Defense Transportation, and subsequent to the adoption of said resolution by the Oregon State Highway Commission the Office of Defense Transportation issued other orders disclosing the need for increased privilege and more severe requirements with respect to transportation by motor carrier over the public highways of the State. The adoption of this resolution shall, therefore, constitute a repeated and further declaration of the purpose and policy of the Oregon State Highway Commission to cooperate with the Federal Government in general and the

War Department in particular to the fullest extent possible consistent with highway preservation and public interests.

WHEREAS, because of the movement of large quantities of war materials and because of other conditions and imposed inhibitions made necessary by and for the war effort, there exists a real emergency in the transportation systems of the State of Oregon, both with respect to transportation by rail and by motor vehicle; and

WHEREAS, such emergency is increased by reason of the fact that under the laws of the State of Oregon the normal and usual movement of property by motor vehicle over the public highways of the State is limited to a combined weight of vehicle and load or vehicles and load of not to exceed 54,000 pounds and to an over-all length of not to exceed fifty feet; and

WHEREAS, a great volume of the war materials moved by motor vehicle through or into the State of Oregon moves in interstate commerce between the states of Oregon, California, Washington, Nevada and Idaho; and

WHEREAS, in each of said states except Oregon motor vehicles of longer length and greater weight are permitted by law to operate over the public highways; and

WHEREAS, if the laws of the State of Oregon with respect to the normal movement of commodities under normal conditions are rigidly applied to motor vehicles entering the State of Oregon from the State of Washington, the State of Idaho, the State of Nevada or the State of California, a bottleneck will be created and the transportation of war materials by motor vehicle will be seriously impaired; and

WHEREAS, the Office of Defense Transportation has recently issued Orders Nos. 3, 4 and 5 relating to maximum and minimum weights to be carried by motor trucks engaged in both intrastate and interstate commerce, which orders limit both the maximum and minimum loads to the tire capacities given in the appendix to the orders except when, in the opinion of the authority in charge of the state or local highways, such weights are in excess of the carrying capacity of the bridges and/or pavements; and

WHEREAS, it is the opinion of the Oregon State Highway Commission that during this present emergency means should be found, if possible, to permit the maximum dimensions and weights of motor vehicles consistent with reasonable safety to the public and with the ability of the pavements and bridges to withstand the loads; and

WHEREAS, after consultation, it is the opinion of the Public Utilities Commissioner and of the State Highway Commission that by

cooperative effort the laws of the State can be properly and efficiently administered and enforced, and at the same time the interests of the war effort be given the necessary consideration and the delays which prevail with respect to the movement of civilian goods relieved to a considerable extent; and

WHEREAS, Section 115-393, O. C. L. A., vests in the Highway Commission authority to issue a permit or permits for the movement over the public highways of the State of any vehicle, article or property having a combined weight in excess of that permitted under the provisions and the laws of the State or having a size not permitted by law if after investigation and examination the Commission shall find that the movement of such vehicle or property is in the interest of the public or that the public will be served thereby; and

WHEREAS, the Commission has caused an examination and inspection to be made of the highways under its jurisdiction and, as a result of such investigation and inspection, the Commission has classified the state highways into three groups: Group 1, those highways whose geometric design is such that a vehicle having an over-all length not to exceed sixty feet and a width not in excess of eight feet can be operated in such manner that at all times both vehicle and load can be kept on the right-hand side of the center line of the traveled way, and the Commission has found from investigation and examination that the structures on the highways in Group 1 may, without serious impairment, carry a gross load not in excess of the amount in pounds as determined by the formula $W = 750 (L+40)$, wherein W equals the gross weight in pounds and L equals the distance, in feet, between the first and last axles of the combination of vehicles; with the further provision that the gross weight, in pounds, on any group of axles spaced 18 feet or less apart shall not exceed that determined by the formula $W = 650 (L+40)$, wherein W equals the gross weight in pounds and L equals the distance in feet between the first and last axles of such group, except, however, that when L is less than sufficient to provide a gross weight of 32,000 pounds, the gross weight may equal but shall not exceed 32,000 pounds. In all cases the weight on any single axle is limited to 18,000 pounds. Group 2 includes the highways whose geometric design will not permit vehicles of more than fifty feet in length but whose structures will withstand the same gross loads as are permissible on the highways listed in Group 1. The same formulas as given under Group 1 shall apply to total gross loads and axle concentrations. The reduction in vehicle length from sixty to fifty feet will reduce the gross load proportionately. Group 3 includes all the other highways not listed in Group 1 or Group 2 and whose examination discloses that the statute dimensions and weights as given in the present Oregon laws must control in the interest of safety; and

WHEREAS, for the purpose of affording a measure of relief to the transportation of both materials for war and civilian goods, it is the considered judgment and opinion of the Highway Commission

JUN 24 1942

that the interests of the general public will be served by the adoption of a policy which will permit the movement over public highways listed in Group 1 of vehicles of a longer dimension and transporting a greater gross load than is now permitted under the statute and the movement of vehicles traversing highways in Group 2 to exceed the present statute weights to the amounts as herein given, such policy to be in effect for the duration of the war and while this emergency continues, unless otherwise modified by the action of this Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The Commission does hereby find and declare that an emergency exists in the State of Oregon with respect to the transportation of war materials, both with respect to rail transportation and motor transportation, and that such emergency is increased by reason of the statutory limits with respect to weight of vehicle and length of vehicle and load.
2. The Commission does further find and declare that in its opinion the national emergency justifies the Commission in the adoption of a policy authorizing the issuance of permits under the provisions of Section 115-393, O.C.L.A., which permits may authorize the movement of a combination of vehicles within, into and through the State of Oregon over the Group 1 highways hereinafter designated with a maximum over-all length of sixty feet and with a gross weight of not to exceed that determined by the formulas as hereinbefore given; vehicles operating over Group 2 highways are limited to fifty feet in over-all length and are controlled with respect to maximum gross weights by the formulas as hereinbefore given; vehicles operating over all other state highways are controlled with respect to gross weights by the present Oregon statutes; namely, 54,000 pounds. In addition to the control provided for in said formula, no vehicle shall be permitted to operate under any permit issued pursuant to this resolution with an axle weight in excess of 18,000 pounds, nor shall any truck train, consisting of a truck-tractor and semitrailer, have a total length in excess of fifty feet. Axles spaced closer than three feet four inches shall be considered a single axle.
3. In all cases the maximum weight on any one tire should not exceed the amount specified in Orders 3, 4 and 5 issued by the Office of Defense Transportation.
4. Any permit issued pursuant to this resolution may be cancelled by the Commission at any time for cause or when in the opinion of the Commission the cancellation of such permit is required in the interests of the general public.
5. For the purpose of this resolution state highways are classified as Group 1, Group 2 and other highways not included in

JUN 24 1942

Group 1 or Group 2 highways constitute Group 3. The list of highways in Group 1 and in Group 2 are shown on attached sheets. (See list of highways on back of Emergency Transportation Permit forms for Group 1 and Group 2 highways, in General Files)

6. From time to time, as conditions and circumstances disclose and warrant, other and additional highways may be designated by the Highway Commission and thereby brought within the scope and reach of this resolution. Any additional highways so designated shall automatically be available to carriers holding permits for the operation of vehicles over the highways selected and designated by the Commission and listed on the attached sheets. (See lists on back of printed permit forms)

7. The forms of permit which are hereto attached hereby are approved as the forms of permit to be issued for the operation of vehicles over the highways listed on the attached sheets, subject, however, to such modifications or additions as may be necessary to conform to particular circumstances and conditions. (See printed Emergency Transportation Permit forms, in General Files, Nos. E-242 and E-243)

8. The Secretary of the Commission, upon application by any qualified operator, hereby is authorized and directed to issue a permit to such applicant. All permits issued shall conform substantially to the form approved by the Commission.

9. Such permits shall contain proper and appropriate instructions and conditions and must at all times be carried in the cab of the motor vehicle while in operation on the highways of the State of Oregon.

10. Permits are issued for the remainder of the calendar year and will be renewable in the discretion of the Commission. Each permit shall contain not only the date of issuance but its expiration date.

11. Any permit issued pursuant to the policy and authority of this resolution shall be subject in all respects to all regulatory powers vested by federal law in the Interstate Commerce Commission and Office of Defense Transportation, and shall be subject also to the regulatory powers vested by the laws of the State of Oregon in the Public Utilities Commissioner, but any such regulatory power or any order of any federal or state office, board or commission having regulatory power over transportation shall not be construed as permitting the operation of vehicles exceeding in any respect the provisions of this permit in regard to weight and/or dimensions.

12. The sole purpose and object of this resolution is to provide for the existing emergency and for the duration of the war,

and therefore all persons are expressly warned against the purchase of equipment or the making of investments on the theory or assumption that the policy which by this resolution is established will in any sense become permanent or be extended beyond the duration or that the privileges provided will be continued beyond the period of the emergency.

13. In addition to issuance of permits for the transportation of property over the highways listed on the attached sheets, it is recognized that there are other highways in the State over which it may become necessary in national defense to transport defense materials. With respect to such highways a permit or permits may be issued for a single or isolated movement under the conditions and requirements which now prevail for similar movements in connection with which permits are now, under the existing policy of the Commission, issued. (See Transportation Permit, Form E-250).

In this connection the Commission also approved the following press release prepared by Chairman Cabell:

Henry F. Cabell, Chairman of the Oregon State Highway Commission, announces the recent State Highway Commission action with relation to its cooperation with the Office of Defense Transportation in regard to the present war emergency. Acting jointly with the Director of Highways of Washington, the Oregon State Highway Commission plans to cooperate fully with the aims and objectives of the Office of Defense Transportation. The maximum weights permitted on trucks will be the same in both Oregon and Washington.

The Office of Defense Transportation recently issued directives to the truck industry requiring the hauling of maximum loads based upon tire capacities and further conditioned upon the ability of the bridges and pavements to withstand the loads. This order will tend to increase the weights carried by the larger trucks having larger tires and to decrease the weights carried by the smaller trucks having smaller tires. The larger tires would permit weights beyond the safe carrying capacity of bridges and would cause material destruction to light pavements. In consequence, the Office of Defense Transportation will accept the judgment of the State Highway Commission, in the case of state roads, and the county courts, in the case of county roads, with respect to the maximum loads carried by the larger trucks.

The Oregon State Highway Commission has classified the roads of Oregon in three groups. Group No. 1 includes those roads, having strong bridges, that are wide and straight enough so that 60-foot vehicles may at all times stay on the right-hand side of the center line. The maximum loads are controlled by formulas for both total gross loads and axle concentrations. The heaviest load permitted on

large trucks equipped with sufficient axles and adequately sized tires is about 71,250 pounds. Group No. 2 includes those roads which are not wide and straight enough to operate 60-foot vehicles but whose pavements and bridges are strong enough to withstand greater than the present statute loads. The maximum load permitted upon a 50-foot vehicle, properly tired and with sufficient axles, is 63,750 pounds. Group No. 3 includes those roads which are neither wide nor straight enough for the longer vehicles and whose pavements and bridges will not withstand greater than the present statute loads. Special blanket permits will be issued for vehicles traveling on highways in Groups No. 1 and No. 2. Full information on this subject can be secured from the office of the State Highway Commissioner at Salem, from the offices of the Public Utilities Commissioner at Salem and the Oregon Building in Portland, from the office of Defense Transportation, Herman Sites, Director, Bedell Building, Portland, and from the office of Tom Shea of the Oregon Motor Transport Association, Weatherly Building, Portland.

The present laws permit greater axle weights on logging trucks than other equipment. The State Highway Commission, announces Mr. Cabell, is very anxious to cooperate in every way with the lumber industry in this state and with the War Production Board, but cannot permit loads in excess of the safe carrying capacity of the bridges.

Careful computations disclose that slight increases can be made in loads carried by certain types of logging trucks. Present state laws limit the loads carried by single-axle truck-tractor units to 54,000 pounds, with a tolerance of ten per cent, which permits a total gross load of 59,400 pounds. When the distance between the first and the last axles is 40 feet or more, the Highway Commission will increase this tolerance to 7,000 pounds, permitting a total gross load on such equipment of 61,000 pounds before lifting the PUC plates. The larger trucks, having two driving axles, are permitted to carry 68,000 pounds, plus a five per cent tolerance, or a total of 71,400 pounds, when the distance between the first and the last axles of the combination of vehicles is 55 feet or more. These weights permitted by the Highway Commission on small trucks are in excess of the tire capacities and may be required to be further reduced through the action of the Office of Defense Transportation.

The Engineer was instructed to inform Mr. Herman Sites, Regional Director, Office of Defense Transportation, of the action taken by the Commission on this matter. (See letter dated June 26, 1942)

Chairman Cabell also explained to Commissioner Oliver the action taken by the Commission on the previous evening with respect to the insuring of properties, including bridges, buildings, cars in storage, et cetera, against damage caused by enemy attack. Commissioner Oliver approved the Commission's action.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p. m. in the office of Chairman Henry F. Cabell, 1107 Failing Building, for a conference with Senator F. M. Franciscovich, Astoria, and Mr. James Elliott, County Commissioner of Clatsop County, with respect to log-hauling matters. All members of the Commission were present at such meeting as were also the State Highway Engineer, the Attorney and the Secretary. Log hauling matters in general were discussed during which Senator Franciscovich asked the Commission to modify its ruling with respect to the penalty for overloading. Chairman Cabell explained the action taken by the Commission with respect to overloads and advised that the Commission is granting log haulers an extra tolerance of 1600 pounds under certain conditions which should relieve the situation considerably if the log haulers will make an honest effort to cooperate. The Commission refused to modify the present ruling with respect to four-days' suspension of PUC permits for violations of the weight restrictions.

This meeting was concluded at 2:30 p. m. following which the Commission continued its session in the auditorium of the Public Service Building with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present and participating.

The County Court of Marion County, represented by County Judge Grant Murphy and County Commissioners Jim Smith and Ralph Girod, and County Engineer N. C. Hubbs were present. Judge Murphy presented the oral request of the county court for the rerouting of the North Santiam Secondary State Highway in the vicinity of Sublimity and Stayton. He pointed out that the secondary highway is now routed through Sublimity which is hilly and circuitous, whereas the county road which extends northwesterly from Stayton to a connection with the secondary highway about 1½ miles west of Sublimity is nearly level throughout its entire length and is much straighter than the other road. He advised that this county road now has a good oiled surface and carries nearly all of the North Santiam Highway traffic because it is shorter and more direct. The Engineer advised that the county road has been investigated by Assistant Staff Engineer Oscar Cutler who reports that it has a good oiled surface and that all bridges on the same are in first class condition although the right of way for the most part is only 50 feet wide which is 10 feet narrower than the width required by the Commission for new secondary highways. After discussion the Commission approved the exchange of roads subject to investigation of the right-of-way width and on the condition that the county will furnish 60-foot right of way throughout.

At 3:45 p. m. Chairman Cabell announced the following awards of contracts, rental of state-owned heavy construction equipment, sale of buildings in North Bend, and sale of timber, bids for which were received by the Commission at the morning session, such awards and sales having previously been approved by the Commission by unanimous vote:

"North Dillard Bridge Section of the Pacific Highway, in Douglas County. Construction of untreated wood bridge over the South Umpqua River, and grading and surfacing road approaches thereto. There were no bids received for this project.

"Prairie City-Dads Creek Section of the John Day Highway, in Grant County. 3.79 miles surfacing and oiling; also furnishing 2,000 cu. yds. crushed gravel in stock piles. There were no bids received on this project.

"Buchanan Rock Production Project on the Central Oregon Highway, in Harney County. There were no bids received on this project.

"Judkins Point Section of the Pacific Highway, in Lane County. 1.08 miles grading and paving. McNutt Brothers, Eugene, submitted the only bid for this project, in the amount of \$360,708.50, using tar, and a bid in the same amount using asphalt. The Commission awards this contract to McNutt Brothers, at their bid of \$360,708.50, based on the use of tar.

"Judkins Point Overcrossing, near Eugene, on the Pacific Highway, in Lane County. Construction of untreated frame trestle overcrossing with 52-foot roadway and two 5-foot walks, and 70 feet of concrete retaining wall. Barham Brothers, Salem, submitted the low bid for this work, in the amount of \$78,192.50. The second-low and only other bid was that of McNutt Brothers, Eugene, in the amount of \$84,080.00. The Commission awards this contract to Barham Brothers at their low bid of \$78,192.50.

"Construction of timber overcrossing structure over Union Pacific tracks on Northeast Going Street, Portland, in Multnomah County. Tower Sales & Erecting Company, Portland, submitted the low bid for this work, in the amount of \$23,980.00. The second-low and only other bid was submitted by Lindstrom Brothers, Portland, in the amount of \$27,855.00. The Commission awards this contract to the Tower Sales & Erecting Company on the basis of its bid submitted June 4, 1942, in the amount of \$23,080.00, in accordance with an agreement reached with the Tower Sales & Erecting Company.

"Section 'A' of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. 4.15 miles paving. Edlefsen-Weygandt Company, Portland, submitted the low bid for this project, in the amount of \$219,510.00. McNutt Brothers, Eugene, submitted the second-low and only other bid, in the amount of \$237,053.00. The Commission refers this bid to the Engineer with power to award the contract to Edlefsen-Weygandt Company, when certain conditions have been fulfilled.

"Section 'B' of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. 2.52 miles grading and 4.94 miles paving. McNutt Brothers, Eugene, submitted the only bid for this project, in the amount of \$278,603.50. The Commission rejects this bid.

"Construct Luckiamute River Bridge on the Monmouth-Lewisburg Section of the Pacific Highway West, in Polk County. Untreated timber bridge with 24-foot roadway. Averill and Corbin, Portland, submitted the low bid for this work, in the amount of \$15,313.00, and J. F. Johnston, Newberg, submitted the second-low bid, in the amount of \$16,535.00. There were two higher bidders. The Commission awards this contract to Averill and Corbin, at their low bid of \$15,313.00.

Rent of State-Owned Heavy Construction Equipment

"Lorain 1½-yard gas shovel. No formal bids were received for this shovel.

"RD-7 diesel tractor with logging drum. No formal bids were received for this tractor.

"Allis-Chalmers diesel tractor with logging drum and bulldozer attachments. No formal bids were received for this tractor.

Sale of Residence Buildings in North Bend

"Building No. 9559. Former owner R. L. Cavanaugh. Hillar & Eickworth, Empire, submitted the only bid for this building, their bid being in the amount of \$30.00. The Commission rejects this bid. (Building later disposed of by private sale to Edwin E. Sprague, North Bend, for \$100.00.)

"Building No. 9491. Former owner Coos Bay Longshoremen Beneficial Association. No bids were received for the purchase of this building.

"Building No. 9486-A. Former owner Coos County. J. J. Borchert, Marshfield, submitted the high bid for this building, in the amount of \$50.00. A. H. Pressnall, Marshfield, submitted the second-high bid, in the amount of \$20.00. There was one other bid. The Commission refers these bids to the Engineer. (Building sold on June 30, 1942, to J. J. Borchert, at his high bid of \$50.00.)

"Building No. 9498. Former owner Cora Swanson Coyle. No bids were received for this building.

"Building No. 9501. Former owner Ira L. Goodlin. Hillar & Eickworth, Empire, submitted the only bid for this building, in the amount of \$58.00. The Commission rejects this bid.

"Building No. 9560. Former owner J. H. Tewsley. No bids were received for this building.

"Building No. 9499. Former owner John Sandine. No bids were received for purchase of this building.

JUN 24 1942

"Building No. 9493-A. Former owner Independent Stevedoring Company. No bids were received for purchase of this building.

"Building No. 9486-B. Former owner Coos County. No bids were received for this building.

"Building No. 9506. Former owner John McNabb. No bids were received for this building.

"Building No. 9486-C. Former owner Coos County. No bids received for this building.

"Building No. 9510. Former owners C. B. and M. Flock. Margaret Flock, Marshfield, submitted the only bid for this building, in the amount of \$25.00. The Commission refers this bid to the Engineer. (Building sold on June 30, 1942, to Margaret Flock, at her bid of \$25.00.)

"Building No. 9513. Former owner Ada Hartley Lee. The only bid received for the purchase of this building was that of Mrs. Ada Hartley Lee, North Bend, in the amount of \$135.00. The Commission refers this bid to the Engineer. (Building sold to Mrs. Ada Hartley Lee, North Bend, on June 30, 1942, at her bid of \$135.00.)

"Building No. 9516. Former owner A. T. Andrews. Atwell T. Andrews, North Bend, submitted the only bid for this building, in the amount of \$20.00. The Commission refers this bid to the Engineer. (Building sold on June 30, 1942, to Atwell T. Andrews, at his bid of \$20.00.)

"Building No. 9518. Former owner P. M. Ross. No bids were received for the purchase of this building.

"Building No. 9519. Former owner J. H. McDonald. Hillar & Eickworth, Empire, submitted the only bid for the group of buildings, consisting of a frame house, auto court cabins and garage, in the amount of \$15.00. Jack McDonald, North Bend, submitted a bid of \$176.50 for the auto court cabins only; and W. H. Kennedy, Marshfield, submitted a bid in the amount of \$44.00 for the garage only. These bids were referred to the Engineer. (The auto court cabins were sold to Jack McDonald on June 30, 1942, at his bid of \$176.50; the garage was sold to W. H. Kennedy on June 30, 1942, at his bid of \$44.00; and the bid on the frame house was rejected and the building ordered re-advertised.)

"Building No. 9520. Former owner H. D. Harris. H. D. Harris, North Bend, submitted the only bid for this building, in the amount of \$100.00. The Commission refers this bid to the Engineer. (Building sold to H. D. Harris on June 30, 1942, at his bid of \$100.00.)

"Building No. 9521. Former owner K. Horn. No bids were received for this building.

"Building No. 9522. Former owner J. Gildersheim. No bids were received for purchase of this building.

"Building No. 9524. Former owner Iva B. Butcher. Hillar & Eickworth, Empire, submitted the only bid for this building, in the amount of \$31.50. The Commission rejects this bid.

"Building No. 9486-D. Former owner Coos County. No bids were received for this building.

"Building No. 9528. Former owner H. W. and Jessie Lee Clark. No bids were received for this building.

"Building No. 9524-A. Former owner Clyde and Iva Butcher. No bids were received for this building.

"Building No. 9529. Former owner Luella Butcher. Kittel Ness, North Bend, submitted the high bid for this building, in the amount of \$65.00. Hillar & Eickworth, Empire, submitted the second-high bid, in the amount of \$45.50. There were two lower bids. The Commission refers these bids to the Engineer. (Building sold to Kittel Ness, for \$65.00, on June 30, 1942.)

"Building No. 9530. Former owner R. M. Hazelton. No bids were received for this building.

"Building No. 9532. Former owner Clara Bustrin. Kittel Ness, North Bend, submitted the high bid for this building, in the amount of \$160.00. Hillar & Eickworth, Empire, submitted the only other bid for this building, in the amount of \$34.50. The Commission refers these bids to the Engineer. (Building sold to Kittel Ness, on June 30, 1942, at \$160.00.)

"Building No. 9646. Former owner A. M. Haley. No bids received for this building.

"Building No. 9534. Former owner Elma Moss, et al. Roy T. Douglas, Marshfield, submitted the only bid for the purchase of this building, in the amount of \$100.00. The Commission rejects this bid.

Sale of Timber

"Timber on tract near Oregon Coast Highway, north of Nehalem, in Tillamook County. No bids were received for the purchase of this timber."

The Attorney brought up for discussion matters pertaining to the rebuilding of the Algoma dike and reclamation of lands adjacent to The Dalles-

California Highway at Algoma which were flooded when the dike broke some two years ago. He advised that this matter is now coming up for discussion and the Highway Commission has been requested to participate in the repair of the dike and the reclamation of the flooded lands. The question has arisen whether or not the Commission should be represented in the discussion by either the Attorney or the Engineer. The Engineer recommended that the Commission have nothing whatsoever to do with the restoration of the dike or the land in question because in his estimation the Commission is not obligated in any way inasmuch as the dike is privately-owned and is situated a considerable distance from the highway; also that the Commission concern itself only with the securing of reimbursement for the cost of repairing the damage caused the highway by reason of the breaking of the dike. The Commission approved the recommendation.

The matter of deeding to the federal government a stock-pile site recently acquired adjacent to the Pacific Highway West, south of Monmouth, had the attention of the Commission. It appears that the stock-pile site is located within the borders of Camp Adair Army Cantonment and is needed in connection with the stock-piling of road material for construction and maintenance of this highway; also that the army authorities wish to acquire this tract for use in connection with the development of the cantonment and have indicated that they will condemn the property if the state will not or cannot deed it. The Engineer suggested that it would be satisfactory to deed the property to the government if the government will furnish the state with a comparable tract. The Attorney pointed out that the Commission does not have legal authority to sell property that is needed for highway purposes. He was instructed by the Commission to so inform the army authorities.

The Commission had under discussion a request from the Siuslaw Forest Products, Inc., for permission to construct a spur railroad track at grade across the Siuslaw Highway near Mapleton and extending from the Southern Pacific railroad to the company's mill; also to widen the highway grade for a short distance at this point to facilitate the truck hauling of logs to the mill site. The Engineer recommended approval of the request subject to the condition that the company will secure an order from the Public Utilities Commissioner authorizing construction of the spur railroad track, and subject also to the condition that the company will maintain flagmen and install traffic signals and short-arm barriers properly to protect highway travel during the time that logs are being transported across the highway either by train or truck, and will furnish public liability and property damage insurance indemnifying the State Highway Commission or any officer or agent of the State Highway Commission from liability in the event of occurrence of accidents from the company's operations. He presented a form of permit covering the matter. After discussion the Commission approved the request and authorized the company to proceed with its construction operations when it has signed the permits and has furnished the required insurance. (See permit for detailed conditions)

The Attorney reported that a telegraphic reply has been received from Mr. Niel R. Allen, as attorney for Dr. C. J. Moser, to the telegraphic offer made by the Commission with respect to the pending controversy between the Commission and Dr. Moser involving property now covered by condemnation action.

After careful consideration of the said reply and all matters connected therewith, the following resolution was adopted by the Commission:

RESOLVED that in the judgment and opinion of the Commission the counter or amended offers of settlement made by Attorney Allen for Dr. Moser by telegram are not in the interests of the state and are not adequate to meet the needs and requirements of the state, and such counter or amended offers are therefore rejected.

RESOLVED, further, that for the purpose of avoiding further delay in the accomplishment of the said highway project and for the purpose, also, of avoiding possible damage to the state occasioned by delay, the Commission does hereby direct that possession of the real property described in the complaint be now taken and the Engineer be and he hereby is instructed to order and direct the contractor to go upon the premises and commence and thereafter prosecute to completion the work specified in the contract between the contractor and the state.

A letter was presented from M. G. Pillette, City Recorder of Madras, requesting, in behalf of the City Council, additional improvements on the recently constructed section of The Dalles-California Highway in the southern part of Madras, particularly requesting construction of footpaths and oiling full width between curbs for a distance of some four blocks just north of the south city limits. The Commission approved the Engineer's reply to this communication in which he advises that the Commission is without authority to undertake any highway construction work unless it is approved by the Army, the Navy, or the War Production Board, and that the present forecast indicates a major reduction in highway revenues which may prevent the state from matching federal funds and the carrying on of projects even if such governmental approval is obtainable.

Reconsideration was given by the Commission to the matter of improving the Lower Columbia River Highway in front of the school grounds in Deer Island by the elimination of a curve which it is alleged creates a considerable traffic hazard. It was recalled that the Commission last fall approved this project for 1942 construction, the estimated cost of the same being \$15,000, and that such information was conveyed to Honorable J. D. Perry, Deer Island, who presented the request for the improvement in behalf of local citizens. The question arose whether or not it would be advisable to undertake this project in view of existing governmental restrictions and the falling off of highway revenues because of war conditions. The Commission decided to defer the project until the present war emergency is over and instructed the Secretary to so inform Mr. Perry, giving the reasons for such action.

A request was presented from the City of Lebanon for additional improvements to certain city streets that are not on state highway routes. The Engineer advised that the Commission authorized an expenditure of \$1,096.00 in this town and that a standard form of agreement was presented to the city

council providing for work to be done this year. However, this was returned by the city with a request for an additional expenditure of \$4,400, which is far more than the city is entitled to under the formula adopted by the Commission with respect to such matters. He inquired whether or not the Commission wishes to perform the additional work. The Commission decided to limit its expenditure in this town to the original budgeted amount and instructed the Engineer to so inform the city, giving reasons for such action which may necessitate the postponement of a number of the city projects this year.

The Engineer requested authority to make location surveys for a number of projects, which are of major importance and will be needed immediately after the present war emergency is over, so as to provide steady employment for the engineering personnel. He submitted a list of surveys in this category from which the Commission selected and approved surveys, as follows, provided federal funds can be obtained to finance the same:

<u>Highway</u>	<u>Section</u>
Columbia River Highway	Cascade Locks to Hood River
" " "	Mosier to Rowena
" " "	Rowena to The Dalles
" " "	Arlington to Boardman
Pacific Highway	Walker to Rice Hill
" "	Green Station to Canyonville
Wilson River Highway	Washburn to North Plains

The Engineer was authorized to submit such survey projects to the Public Roads Administration for approval in the event that has not already been done by previous authorization.

The Engineer requested authority to transfer federal aid funds heretofore programmed for financing a new bridge over the Pudding River, on the Pacific Highway East at Aurora, from such project to other federal aid projects, in view of the fact that it is now practically certain that the War Department will not approve an expenditure of funds for a standard type of bridge structure at this place, and there seems to be no reason for continuing this project as a part of the present federal aid program inasmuch as it ties up federal funds which could be allocated to other projects. The Commission approved the withdrawal of this project from the federal aid program and authorized the Engineer to file an appropriate request with the Public Roads Administration to that end.

The Commission considered and deferred until some future date resolutions from the County Court of Malheur County requesting the designation of certain county roads as secondary state highways, same being described as follows:

Enterprise County Road, beginning at the junction of the Nyssa-Adrian Secondary State Highway No. 450 with Enterprise Avenue at the northeast corner of Section 12, Township 20 South, Range 46 East, W. M., thence westerly to the junction of Enterprise Avenue and the Vale-Owyhee Road, in Cow Hollow, a distance of approximately four miles;

Quaker Corner County Road, beginning at a point on the Old Oregon Trail, approximately 0.6 mile north of the Malheur River Bridge, thence westerly and northwesterly to a place known as Quaker Corner, a distance of approximately three and one-half miles;

Valley View County Road, beginning at the junction of Alameda Drive with the Old Oregon Trail near the west city limits of Ontario, thence southerly via Alameda Drive and Valley View Road to the south line of Section 29, Township 18 South, Range 47 East, W. M., thence west to the southwest corner of Section 25, Township 18 South, Range 46 East, W. M., thence north to the John Day Highway at a point approximately one mile west of Cairo Junction, a distance of about eight miles.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has awarded contracts, as follows, bids for which were taken by the Commission at its meeting on June 4, 1942, the conditions of the awards having been satisfied:

Grading and paving Swan Island Shipyard Access Road. Bids taken June 4; contract awarded June 9, 1942, to Porter W. Yett, low bidder.

Grading and paving North Portland Shipyard Access Road. Bids taken June 4; contract awarded June 9, 1942, to Parker-Schram Company, low bidders.

The Commission confirmed the awards as reported.

The Commission discussed, approved, and signed a proposed agreement with the Public Roads Administration covering the Oregon state-wide planning project, which agreement is based on the estimate of May 12, 1942, and provides for the obligation of one and one-half per cent of Oregon's share of the 1943 apportionment of federal aid, federal aid secondary, and federal aid grade crossing funds, totaling \$32,491, for such purpose.

The Commission approved a revised agreement with the Union Pacific Railroad Company with respect to a railroad warning sign which has been attached to the company's freight house on Front Avenue, Portland. This agreement is to be signed by the Commission later when the approved revision has been made by the Attorney.

The Engineer reported an offer from a Mr. William Dye, Hillsboro, to purchase trees that have fallen on the right of way of the Wolf Creek Highway at the Clatsop-Washington County line west of the Wolf Creek WPA Camp. He stated that Mr. Dye wishes to cut these trees into cordwood and has offered to pay the state 65¢ for each cord salvaged. The Commission approved the offer provided the trees are not saw logs, and referred the matter to the Engineer for investigation.

JUN 21 1942

A letter was presented from R. C. Kuehner, Executive Secretary of the "Keep Oregon Green Association", in which request was made for permission to erect and maintain "Keep Oregon Green" signs along state highways. The Engineer recommended approval of the request subject to the condition that the signs are furnished by the organization and are erected by employees of the State Highway Department, and provided further that the design of the sign is satisfactory. The Commission approved the recommendation and referred to the Engineer the matter of passing on the type of signs.

A request was presented from the City of Pendleton for the establishment of a 10-mile-per-hour speed limit along a portion of S. W. Twentieth Street, Pendleton. The Commission considered that jurisdiction in this matter rests with the Speed Control Board established by the 1941 Legislature, consisting of the Secretary of State, the Superintendent of the Department of State Police, and the Chairman of the State Highway Commission, or their duly designated representatives. It was decided, therefore, to defer action on the request pending a meeting of such Speed Control Board. The Engineer was instructed to ask the Secretary of State to call a meeting of such Board at a convenient time in the near future.

The Engineer requested authority to purchase the following parts for traffic signals which, he said, are obtainable from the Graybar Electric Company, Portland, without the necessity of securing a priority rating:

4 TRP223D WG comb. lens HL6254 glass refl. KL 2413 slip fitter at \$97.75 each, total \$391.00

2 TSO 111D less lens with HL6254 refl. HL6788 recept. at \$14.45, total \$28.90. Grand total cost \$419.90.

The Commission approved the purchase of this material.

The Engineer brought up for discussion the controversy with the County Court of Klamath County with respect to the taking of materials from a county-owned gravel pit known as the "Merrill Pit". He advised that the gravel taken by the state was used in connection with the construction of the state highway between Klamath Falls and Merrill, and when this job first came up for construction in 1939, it was originally proposed to purchase a one-half interest in this gravel pit. However, the county court preferred not to sell but agreed to let the state use the pit at an agreed price per cubic yard for the material taken therefrom. It now so happens that the county has submitted its bill for this material, in the amount of \$542.65 which is at the rate of 4¢ per cubic yard, whereas, the standard price that the Commission has always paid is 3¢ per cubic yard, there being some misunderstanding as to the rate. He suggested approval of the 4¢-rate in this particular instance in order to maintain friendly relations with the county court. The Commission approved the recommendation in view of the misunderstanding.

The matter of re-establishing the telephone pole line of the Mountain View Cooperative Telephone Association on the right of way of the Pacific Highway

West, north of Corvallis, which is necessary in connection with the rebuilding of the highway at this location, was discussed by the Commission. The Engineer reported receipt of a letter from the telephone company to the effect that "the association does not have equipment, funds or men to re-establish the pole line at this time, hence is not in position to comply with the Commission's request in that regard". The Engineer advised that, upon receipt of such information, he made arrangements with the Pacific Telephone and Telegraph Company to reset the poles at state expense, it being his intention to secure reimbursement from the Mountain View Telephone Company for the cost thereof, if possible, when the work is completed. The Commission approved the action taken by the Engineer.

The Secretary reported that the Secretary of State has refused to accept continuation certificates renewing the \$200,000 bond heretofore furnished by the State Highway Engineer and has requested an entirely new bond, in view of the fact that the Engineer is now serving under reappointment and the Attorney General has ruled that the Engineer must furnish a new bond each time he is reappointed and that the bond must run concurrently with the appointment. He further stated that ten new bonds, in the amount of \$20,000 each, have been furnished by companies that wrote the previous bond but each company has asked for a statement terminating its obligation under the old bond, as of the date of cancellation of the same, and that they be relieved from the obligation subsequent to such date. The Commission authorized the Secretary to sign such termination statements in behalf of the Commission.

The Commission considered a request from the Shell Oil Company for an extension of its permit authorizing the transportation of full loads of gasoline over certain Oregon highways involving gross weights as determined by the formula $W = 800 (L+40)$. The Engineer advised that the excess load would not be particularly harmful to the highways mentioned in the permit, and that he would have no objections to the granting of the request were it not for the fact that the Commission, on the previous evening, agreed with Mr. Bantz, Director of Highways of the State of Washington, not to permit gross weights in excess of those determined by the formula $W = 750 (L+40)$. The Commission instructed the Engineer to discuss the matter with Mr. Bantz. In the event Mr. Bantz has no objections, then the permit, as requested, is to be granted for 90 days. (Mr. Bantz approved the granting of the permit by telephone on July 6, 1942.)

Similar action was taken by the Commission on the request of A. L. Vincze, common carrier of petroleum products, Klamath Falls, who has requested permission to truck overloads of gasoline over the Pacific Highway from the California state line to Medford, over The Dalles-California Highway from the California state line to Klamath Falls, over the Fremont Highway from the California state line to Lakeview, and occasionally over the Klamath Falls-Lakeview Highway between Klamath Falls and Lakeview.

The Commission considered and denied a request from the Shell Oil Company for an emergency transportation permit to transport overloads of gasoline over the Wallowa Lake Highway between Elgin and Enterprise, there being

JUN 24 1942

a bridge on this section of the highway which, according to the Engineer, will not bear up under the excess load.

The Secretary presented a letter from the County Court of Crook County requesting that payment by the county, for oiling of an 0.7-mile section of the Hardin County Road by state forces, be deferred from the July apportionment of motor vehicle funds by the Secretary of State to the December apportionment of such funds because bad weather conditions indicate that the oiling work will not be completed before August 15 and the county in the meantime can use its money to good advantage for other purposes. The Commission approved deferment of the payment and instructed the Secretary to so inform the Secretary of State.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - -	202-1431	- Albany-Corvallis North Section, County Road, Benton County	1st authorization -	\$1,350
Quarry- - - -	2-1432	- Various Sections, Various Highways, Benton County	1st authorization -	\$300
Engineering -	209-1501	- Terrebonne-Lower Bridge Section, County Market Road, Deschutes County	1st authorization -	\$750
Park - - - -	16-1411	- Peter Skeens Ogden Park, The Dalles-California Highway, Jefferson County	1st authorization -	\$75
Plans - - - -	19-1427	- Alkali Lake Section, Lakeview-Burns Highway, Lake County	1st authorization -	\$100
Quarry - - - -	21-1461	- Various Sections, Various Highways, Lincoln County	1st authorization -	\$300
Plans - - - -	22-1448	- Lebanon-Sweet Home Section, Santiam Highway, Linn County	1st authorization -	\$150
Quarry - - - -	22-1449	- Various Sections, Various Highways, Linn County	1st authorization -	\$300
Location - - -	25-1410	- Columbia River Crossing Section, Columbia River Highway, Morrow County	2nd authorization -	\$500
		Total to date		\$1,250
Plans - - - -	-26-1444	- Front Avenue-West End Steel Bridge Section, Pacific Highway West, Multnomah County	7th authorization -	\$2,000
		Total to date		\$18,000
Location - - -	-130-1439	- Union Pacific Undercrossing Section, Hermiston Highway, Umatilla County	2nd authorization -	\$300
		Total to date		\$600
Plans - - - -	-34-1432	- North Plains Flight Strip Section, Wolf Creek Highway, Washington County	1st authorization -	\$400
Plans - - - -	218-1458	- Sprague River-Klamath Falls Junction Section, County Road, Klamath County	3rd authorization -	\$600
		Total to date		\$4,300

Quarry - - - - 2-1433 - Monmouth-Corvallis Section, Pacific Highway West,
 Benton County 1st authorization - \$50
 Flight Strip - 6-1427 - Bandon Section, Oregon Coast Highway, Coos County
 1st authorization - \$100
 Flight Strip -108-1418 - Cape Blanco Section, Cape Blanco Highway, Curry
 County 1st authorization - \$100
 Gravel Pit - - 12-1428 - Grant County Rock Production Project, Pendleton-
 John Day, John Day-Burns, and Beach Creek Hwys.
 Grant County 1st authorization - \$200
 Slide - - - - 15-1440 - N. Unit, Bear Creek-State Line Section, Pacific
 Highway, Jackson County 1st authorization - \$600
 Flight Strip - 17-1418 - Rough and Ready Section, Redwood Highway, Josephine
 County 1st authorization - \$100
 Flight Strip - 18-1460 - Odell Butte Section, Willamette Highway, Klamath
 County 1st authorization - \$100
 Flight Strip - 20-1451 - Lane County Section, Various Highways, Lane County
 1st authorization - \$200
 Plans - - - - 226-1459 - Oregon Shipyard-Columbia Blvd. Section, Portland City
 Street, Multnomah County 1st authorization - \$2,000
 Plans - - - - 226-1460 - Interstate Avenue-Swan Island Section, Portland City
 Street, Multnomah County 1st authorization - \$1,000
 Reconnaissance 28-1413 - Madras-Columbia River Section, The Dalles-California
 and Sherman Highways, Sherman County
 3rd authorization - \$1,000
 Total to date \$5,500
 Quarry - - - - 30-1443 - Nye Junction-Long Creek Section, Pendleton-John Day
 Highway, Umatilla County 1st authorization - \$300
 Flight Strip - 30-1444 - Boardman-Stanfield Section, Boardman-Stanfield
 Highway, Umatilla Co. 1st authorization - \$300
 Stock Pile & - 32-1408 - Rock Creek-Joseph Section, Wallowa Lake Highway,
 Quarry Wallowa County 1st authorization - \$300
 Prospect - - - 9-1445 - Vicinity of Brothers, Central Oregon Highway, Des-
 chutes County 1st authorization - \$200
 Prospect - - - 18-1461 - Crescent-Chemult Section, The Dalles-California
 Highway, Klamath Co. 1st authorization - \$300
 Prospect - - - 21-1462 - Toledo-Blodgett Section, Corvallis-Newport Highway,
 Lincoln County 1st authorization - \$50
 Scales - - - - 22-1450 - Foster Section, Santiam Highway, Linn County
 1st authorization - \$150
 Plans - - - - 230-1445 - Umatilla Ordnance Access Road #2, Umatilla County
 1st authorization - \$350
 Prospect - - - 1-1430 - Richland-Halfway Section, Baker-Homestead & Halfway
 Hwys., Baker County 1st authorization - \$400
 Plans - - - - 101-1422 - Consuelo Oregon Mines Sec., Sumpter Valley Highway,
 Baker County 2nd authorization - \$400
 Total to date \$650
 Quarry - - - 104-1465 - Fishhawk Falls Section, Fishhawk Falls Highway,
 Clatsop County 1st authorization - \$300
 Plans - - - - 9-1446 - North Canal Section, The Dalles-California Highway,
 Deschutes County 1st authorization - \$200

Location - - - 10-1431 - Canyonville-Glendale Jct. Section, Pacific Highway,
Douglas County 2nd authorization - \$5000
Total to date \$22,000

Location - - - 10-1431 - Canyonville-Glendale Jct. Section, Pacific Highway,
Douglas County 2nd authorization - \$2500
Total to date \$24,500

Test Pits - - - 17-1417 - Sexton Mountain Section, Pacific Highway, Josephine
County 2nd authorization - \$750
Total to date \$1650

Quarry - - - - 27-1421 - Various Sections, Various Highways, Polk County
1st authorization - \$300

Right of Way - 2-1434 - Alsea Mountain Section, Alsea Highway, Benton County
1st authorization - \$100

Location - - - 206-1428 - Chrome Mine-North Bank Section, County Road, Coos
County 1st authorization - \$700

Location - - - 14-1420 - Cascade Locks-Viento Section, Columbia River Highway,
Hood River Co. 1st authorization - \$11,500

Plans - - - - 18-1428 - Crescent Section, The Dalles-California Highway,
Klamath County 2nd authorization - \$200
Total to date \$600

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
6 B 3-10)				Antelope Creek-Medford	Crater Lake
6 B 3-11)	15-1431	Jackson	Location	Sprague River-Lakeview	
6 B 4-4	218-1458	Klamath	Location	Junction	County Road
5 B 32-22	24-1436	Marion	Location	Illahee School-Steiwer Hill	Pacific East Access Road
6 B 3-19	226-1458	Multnomah	Location	Columbia Airport	
6 B 3-4)					
6 B 3-5)	32-1407	Wallowa	Location	Enterprise-Forest Boundary (S. Unit)	Enterprise-Lewiston
5 B 21-22	233-1413	Wasco	Location	Forest Boundary-He He Butte	Warm Springs
6 B 3-6	12-1426	Grant	Location	Soda Mountain-Silvies	John Day-Duns
1 A 2-39	3-1432	Clackamas	Location	Pudding River Bridge Approaches	Pacific Hwy. East
6 B 4-4)	218-1458	Klamath	Location	Sprague River-Ely Mt.	Sprague River County Road
6 B 4-6)					
6 B 4-8 & 9	123-1428	Malheur	Location	Malloy Ranch-Hooker Creek	I.O.N.
6 B 4-11	226-1459	Multnomah	Plans	Oregon Shipyards	Portland City Streets
6 B 4-10	2-1430	Polk	Location	Monmouth-Suver	Pacific West

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Robert Fromm covering grazing of sheep in Humbug Mountain State Park, Curry County.

Agreement with Public Roads Administration covering the Oregon state-wide planning project, obligating $1\frac{1}{2}$ per cent of Oregon's share of the 1943 apportionment of federal aid, federal aid secondary, and federal aid grade crossing funds.

Agreement with the City of Salem covering installation of a traffic signal at the intersection of North Capitol Street and Center Street, in Salem.

Blanket permit issued by Mountain States Power Company granting State Highway Commission the use of the company's poles in connection with installation of traffic signals, flood lights, et cetera.

JUN 24 1942

Blanket permit issued by Pacific Power and Light Company granting State Highway Commission the use of the company's poles in connection with installation of traffic signals, et cetera.

Deed of Easement conveying unto the City of Redmond a strip of land 20 feet wide off of the west side of Block 71 of the Original Townsite of Redmond, Deschutes County. Right of way file Nos. 10100A and 10180.

Bargain and sale deed conveying unto John H. Andes and wife and G. V. Howard 1.60 acres of land situate in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 2, Township 35 South, Range 6 West, W. M., Josephine County. Right of way file No. 9344.

Bargain and sale deed conveying unto the Southern Pacific Company various parcels of real property at Eugene, Lane County. Right of way file No. 9775.

Bargain and sale deed conveying unto Vera Caul 0.15 acre of land situate in the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 18, Township 37 South, Range 1 West, W. M., Jackson County. Right of way files Nos. 10062 and 10062-A.

Bargain and sale deed conveying unto J. C. Endicott 285 sq.ft. of land situate in Lot 5, Block 10, McClures Astoria, in the City of Astoria, Clatsop County. Right of way files No. 5870 and 5871.

Quitclaim deed conveying unto the Southern Pacific Company 38,175 sq.ft. of property in the City of Eugene, and 576 sq.ft. and a slope easement containing 0.10 acre situate in Section 33, Township 17 South, Range 3 West, W. M., Lane County. Right of way file No. 9775.

The Commission confirmed Thursday, July 16, 1942, as the date for its next regular meeting for the receiving of bids. This meeting is to be held in Portland, and the Secretary was instructed to make the usual arrangements for the use of the auditorium of the Public Service Building. (The meeting was later postponed one week, to Thursday, July 23, 1942.)

There being no further business to come before the Commission at this time the meeting was adjourned at 6:00 p. m.

James H. ...
State Highway Engineer

W. B. ...
Secretary

Henry F. Cabell
Chairman

John M. ...
Commissioner

James Oliver
Commissioner

JUN 24 1942

Portland, Oregon, July 23, 1942

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Bids, as follows, for highway construction projects and sale of buildings in North Bend were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts and sale of buildings would be made at 3:00 p. m. in the same room:

SEVEN DEVILS CHROME MINE ACCESS ROAD PROJECT
WEST OF COQUILLE - GRADING AND PAVING

Tru-Mix Concrete Company
Coos Bay Dredging Company

No bids received

Building No. 9646 (Former owner A. M. Haley)

No bids received

Prior to the opening of bids the Engineer discussed with the Commission the merits of the use of bituminous type pavement, as compared with Portland cement concrete pavement in connection with the construction of Unit "A" of the Monmouth-Benton County Line Section of the Pacific Highway West. He recalled that the only bid received by the Commission at the previous meeting for concrete pavement on Unit "B" was so high that it was rejected, but the bids on Unit "A" were held for further consideration. He advised that the Portland cement concrete pavement will provide a more permanent wearing surface and in his estimation the Commission could well afford to accept the offer of Edlefsen-Weygandt Company, submitted at the meeting on June 25, 1942, for such type of pavement on Unit "A", if the cost per mile does not exceed that for the

JUL 23 1942

bituminous type pavement, for which bids are to be received at this meeting, by more than \$12,000 per mile, and he so recommended.

The Engineer further stated that bids recently received on both types of pavement were approximately twice the amount prevalent two years ago and it was his opinion that, while the costs had unquestionably advanced due to the increase in the costs of labor, materials, and supplies, and the difficulty of securing competent skilled labor, there did not appear to be this difference in cost and that he believed highway construction work should be confined to the necessary jobs required by the war effort, on account of the lack of competitive bidding.

After considerable discussion, the Commission decided to award the contract for Unit "A" on the basis of concrete pavement, if the cost per mile for this type of pavement does not exceed the amount to be bid for bituminous macadam pavement by more than \$10,000 per mile. (Later bids were opened and it was found that the cost of the concrete type pavement actually exceeded the cost of the bituminous macadam type pavement by \$11,300 per mile and, in view of the Commission's predetermined decision, the award was made on the basis of bituminous macadam pavement because the cost of the concrete pavement exceeded the cost of the bituminous macadam pavement by more than \$10,000 per mile.)

Mr. Jessup, representing the Contractors Equipment Corporation, came before the Commission in regard to his offer to rent two tractors which were advertised by the Commission for bids to be received at the meeting held on June 25, 1942. Mr. Jessup stated that his offer was submitted in behalf of Norris Brothers, road contractors, and that he has no particular interest in the same only as an accommodation to his client; further, that as protection for himself, he has asked Norris Brothers to furnish a bond which they have been unable to do up to the present time. He asked the Commission to relieve the Contractors Equipment Corporation of its obligation in the event that Norris Brothers cannot purchase the bond. After some discussion the Commission approved the request and authorized the Secretary to return the certified check deposited by the Contractors Equipment Corporation in connection with its offer in the event that Norris Brothers cannot meet the requirements. Mr. Jessup stated that he would advise the Commission definitely later in the day. (The Attorney reported during the afternoon session receipt of information from Mr. Jessup that Norris Brothers have been successful in securing a bond and that he, Mr. Jessup, would execute the rental agreement shortly.)

County Judge Nelson B. Higgs of Harney County was present and inquired as to what plans, if any, the Highway Commission has for construction of the Burns airport road. He was informed that the Commission has no plans for such road and, if any work is done, the project must be initiated by federal authorities; further, that, if such federal authorities approve the project as essential in connection with the war effort and will authorize federal access moneys to pay the costs involved, the Highway Commission will be pleased to arrange for a contractor to do the work.

Judge Higgs also inquired as to the status of the oiling of the Hanley Lane Project. The Engineer advised that the road was not in shape to receive the light oil treatment proposed, so it was necessary to cancel that part of the contract; however, the road will be maintained in the best possible condition until such time as the Commission can see its way clear to do a first-class job. (See ahead for Engineer's detailed report to the Commission)

Judge Higgs also brought up for discussion the matter of providing surfacing materials for strengthening the Buchanan Section of the Central Oregon Highway. He advised that the contractor for the construction of the Burns airport has indicated a desire to submit a bid for this project if the Commission will readvertise it. In view of Judge Higgs's statement, the Commission authorized readvertising the job, which is known as the Buchanan Rock Production Project, for bids to be received at the next meeting.

The following persons were present in regard to the O. C. Yocom subcontract under Leonard & Slate for the oiling of the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway, in Union County, contract No. 2483: Eugene Marsh, attorney for Mr. Yocom, O. C. Yocom, Fred Slate, and Fred Reed, representing the surety on Leonard & Slate's bond. Mr. Marsh was spokesman. He advised that Mr. Yocom is ready and willing to proceed with the work under his subcontract but is unable to do so on account of difficulties in securing needed repair parts, accessories, et cetera, for his equipment, it being impossible for him to secure a priority rating which would enable him to purchase such materials. In view thereof, he is asking the Highway Commission to approve the termination of the project. The Engineer advised that this is a very important project and must be completed in order to maintain travel in a satisfactory manner between Enterprise and LaGrande. He recommended to the Commission that the contractor be required to complete the job and if he cannot do it that the contractor's surety be called upon to do the work or that the work be done with state forces, the cost thereof to be charged against the contractor. Chairman Cabell pointed out that there are a number of projects throughout the state that are in the same category and that the Commission is requiring the contractors to do everything possible to complete their jobs; further, that most of the contractors are going ahead with their work notwithstanding the difficulties and worries with respect to priorities. He said that, in his estimation, the Highway Commission could not relieve Mr. Yocom or Leonard and Slate from their responsibility in connection with the job under discussion unless and until they have made an honest effort to do the work in accordance with the contractual obligations. The matter was discussed at considerable length but definite action thereon was deferred until the afternoon session.

Following the departure of this group and the disposal of other matters, the Attorney reported the following offer from Mr. Yocom: Mr. Yocom will ship his crushing equipment to the job and will install the same for operation if the state will advance the cost involved which is estimated at \$5,000; but he will not guarantee to finish the job unless he can secure necessary repair parts for his equipment. The Commission agreed to pay Mr. Yocom for the materials placed in stock pile but not to advance any funds for the

JUL 23 1942

setting up of his plant. It was also decided to require the contractor to complete the project in accordance with the specifications. (See ahead for additional paragraph)

Mr. E. H. Lindsey, County Commissioner of Tillamook County, was present and asked the Commission to reconstruct the Oregon Coast Highway on permanent alignment southerly from Tillamook, a distance of about three miles, to the new Army and Navy blimp base that is being constructed at such location. He suggested the application of federal access road moneys to finance the improvement. The Engineer advised that permanent alignment for the highway has been agreed upon with the Army and Navy authorities but so far as securing the access road moneys to pay for the work is concerned that is a matter that must be initiated either by the Army or the Navy through the Public Roads Administration. Mr. Lindsey asked the Commission to take the initiative. Chairman Cabell replied that the Highway Commission is interested in any project that is wanted by the Army, the Navy, or the War Production Board but not to the extent of selecting the projects that are to be financed with the access road moneys; further, that the Commission will do anything that the Army or the Navy wants done but cannot undertake work other than the projects approved by the Army and the Navy because of lack of funds and governmental restrictions. He suggested that the county court contact the Army and Navy authorities. Mr. Lindsey then suggested that it would be advisable for the Commission to at least acquire right of way on the new alignment so as to avoid delay on that account, if the project is approved for construction. The Commission took the matter under advisement.

Following Mr. Lindsey's departure the matter was reconsidered and the Engineer at that time was authorized to make a definite location survey of the three-mile section between Tillamook and the blimp base, and the Attorney was authorized to negotiate options for the right of way.

The Assistant Attorney was present and reported orally on expenditures made this year for right of way and other real property purchases. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each. The Commission, after careful consideration of each item, approved the request and thereupon by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which

options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to institute condemnation proceedings to acquire certain other properties which he has been unable to

JUL 23 1942

acquire by negotiation. He submitted a list of such properties, together with offers that he recommended in connection with each in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
10500	Fahy and Muir	Right of Way	\$500.00
10498	W. M. Muchow (contract purchaser, Geo. K. Taggart)	Right of Way	15.00
10498A	Griffin and Jorgensen (contract purchaser, W. M. Muchow)	Right of Way	10.00
10499	Coos Bay Lumber and Coal Company (Frank Boutin)	Right of Way	\$55.00 to \$60.00
9690	Nelse Johnson	Right of Way	30.00
10378	Western Loan and Investment Co. (Dr. S. A. Swayne, contract purchaser)	Right of Way And Gravel Pit	1400.00 600.00

After discussion the Commission approved the offers and the Attorney's request. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each

JUL 23 1942

and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Nelse Johnson and Inez Johnson, husband and wife, which property is located in the northeast quarter (NE $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 25, Township 1 North, Range 2 West, W. M., Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9690, and which property is being acquired for right of way purposes in connection with the Wolf Creek Highway;*

Real property owned by Western Loan and Investment Company (S. A. Swayne, contract purchaser), which property is located in the west half (W $\frac{1}{2}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 36, Township 27 South, Range 46 East, W. M.; in the west half (W $\frac{1}{2}$) of the southeast quarter (SE $\frac{1}{4}$) and in the northeast quarter (NE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) and in the southwest quarter (SW $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 25, Township 27 South, Range 46 East, W. M., and in the northeast quarter (NE $\frac{1}{4}$) of Section 36, Township 27 South, Range 46 East, W. M., all in Malheur County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2, 3, and 4 and is further identified in the records of the Highway Commission as file R 10378, Parcels Nos. 2 and 3 being acquired for right of way purposes and Parcel No. 4 being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the I.O.N. Highway and the South Mountain Chrome Mine Access Road.*

Real property owned by William M. Muchow (George K. Taggart, contract purchaser), which property is located in the south half (S $\frac{1}{2}$) of Section 10, Township 27 South, Range 14 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 10498, and which property is being acquired for right of way purposes in connection with the Seven Devils Chrome Mine Access Road;*

Real property owned by H. L. Griffin and J. Jorgensen (William M. Muchow, contract purchaser), which property is located in the northeast quarter (NE $\frac{1}{4}$) of Section 15, Township 27 South, Range 14 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file R 10498A, and

JUL 23 1942

which property is being acquired for right of way purposes in connection with the Seven Devils Chrome Mine Access Road;*

Real property owned by Coos Bay Lumber and Coal Company (Frank Boutin) which property is located in the west half ($W\frac{1}{2}$) of Section 14, and in Sections 23, 24, and 25, Township 27 South, Range 14 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 10499, and which property is being acquired for right of way purposes in connection with the Seven Devils Chrome Mine Access Road;*

Real property owned by Beulah Fahy and Ruby E. Muir and Andrew Muir, which property is located in the south half ($S\frac{1}{2}$) of Section 30, Township 27 South, Range 13 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 10500, and which property is being acquired for right of way purposes in connection with the Seven Devils Chrome Mine Access Road;*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission,

be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 27, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported on the contemplated sale of Building No. 9534, in North Bend, situate on property formerly owned by Alma Moss, et al. He advised that, following the previous meeting of the Commission, he received a telephone call from Captain M. G. Albey of the Coast Guard, Marshfield, who agreed to pay \$250 for the building and who advised that the Coast Guard wanted the building at once and would move it by July 15, if the purchase was approved by his superior officer. He further advised that he brought the facts to the Attention of Chairman Cabell who agreed to the sale of the building to the Coast Guard for the sum of \$250, which was the value placed on the building at the time it was advertised for sale at the previous meeting. Such offer, he said, was made to Captain Albey who indicated that it was entirely reasonable and advised that he would make a definite commitment to purchase the same after contacting his superior officer. It now appears, he said, that Captain Albey was unable to secure approval of the purchase; however, such information was received too late to include this building in the Commission's call for bids to be received at this meeting so the Commission is still the owner of the building and has no sale to confirm. He requested instructions. The Commission ordered that this building and others remaining unsold as a result of the taking of bids at this meeting be turned over to the state's contractor for wrecking and removal from the highway right of way in the event that they cannot be sold privately before the highway project is advertised for bids.

The Attorney requested instructions whether or not to proceed with the taking of options for right of way on the revised location of the Columbia River Highway between Portland and the Sandy River at Troutdale. He recalled that the Commission gave him such authority at one time but stopped negotiations later because of war conditions. The Engineer advised that this is one of the projects that is planned for post-war construction and in his estimation the right of way should be obtained so there will be no delays from that standpoint when construction is ready to go forward. He explained that the right of way as laid out provides for four lanes of traffic throughout the entire

JUL 23 1942

distance. After some discussion the Commission decided that the right of way should be obtained and thereupon authorized the Attorney to proceed with the taking of options for the same.

The Attorney brought up for discussion the matter of acquiring a gravel pit that is needed as a source of materials for the surfacing of the Seven Devils Chrome Mine Access Road, for which bids were taken at this meeting. He advised that the owner of the gravel pit resides in California and that Coos County Court, which is interested in the project, has arranged for the use of the pit on certain conditions and has stated its willingness to let the state have the benefit of the same under the same conditions which include, among other things, the building of cattle guards for the owner, graveling of private roadways, and disposal of overburden so that it will not interfere with the use of adjacent private land. The county's arrangement, he said, also provides for the use of the gravel pit for five years with right of renewal for an additional three years; further, that the county must pay five cents per cubic yard for the material taken from the pit and must remove at least 7,000 cubic yards of material annually. Furthermore, the county must pay the owner the sum of \$300 if for any reason the arrangement is terminated before the expiration date. The Commission considered such conditions altogether too drastic and that its obligation with respect to the use of the pit should be limited to the county, particularly in view of the fact that the county is securing considerable benefit by reason of the improvement of the county road, including the repair of the bridges on the same. After considerable discussion of this matter, the Attorney was instructed to point out to the county court that this road improvement is being undertaken at the request of the Army authorities who want it in connection with the war effort, and that the Commission is willing to pay not to exceed five cents per cubic yard for the material taken from the pit, but does not wish to assume the county's obligation to the owner of the pit. He was further instructed to prepare a written agreement between the county and the state covering the best arrangement that can be effected and to submit the same to Chairman Cabell for his approval. It was decided to hold up the award of the contract for the Seven Devils Chrome Mine Access Road until this matter has been satisfactorily adjusted.

The Commission discussed briefly a letter from the Oregon Railroad Association requesting the adoption of an order requiring all traffic to come to a complete stop before crossing main-line railroad tracks at grade in Oregon. The Engineer advised that there are approximately 32 grade crossings on state highways that will be affected by such an order. In the discussion of this matter it was brought out that so far as can be learned people of the state are in favor of such an order, such information having been obtained by oral contact, newspaper reports, and letters. In this connection Chairman Cabell reported receipt of numerous letters from members of the State Legislature and a letter from the Attorney General, all of whom recommend the adoption of such an order by the Highway Commission. He indicated his approval of the same, as did also Commissioner Clough, and it was decided to convey such information to a delegation representing the Oregon Railroad Association which is to appear before the Commission during the afternoon session. (See final action and resolution ahead.)

The Commission adjourned at 12:20 p. m. and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Engineer reported the need to provide a separation of vehicular traffic at the intersection of Union Avenue and Denver Avenue, Portland, just south of the Interstate Bridge where traffic congestion is very severe at certain times of the day due to changing of shifts at the shipbuilding plants. He submitted a drawing showing a proposed layout and requested authority to make a detailed location survey to ascertain how much it will cost to construct the same. After discussion the Commission approved the request; however, instructed the Engineer not to submit the project to the Public Roads Administration until the Commission has had an opportunity to inspect the final plans, or at least until he has been authorized so to do by each member of the Commission over the telephone.

The Attorney requested instructions relative to the leasing of a duck lake in Umatilla County that the Commission acquired from Mr. W. P. Smith in connection with the acquisition of right of way needed for the construction of the Boardman-Stanfield Highway. He advised that the former owner previously rented this lake to sportsmen from Pendleton who paid him approximately \$300 annually for the use of the same, and that Mr. Sam R. Thompson of Pendleton, who was one of the former lessees, is now inquiring whether or not the Commission will lease the lake to him. Mr. Thompson, he said, will pay \$100 for a one-year lease of the lake which will give him sufficient time to ascertain whether or not the lake is still good for hunting purposes in view of its proximity to the new highway. The Commission authorized the Attorney to accept Mr. Thompson's offer as an experiment for one year only, the idea being that the Commission may wish to charge more for this privilege if the lake is still good for duck-hunting purposes.

The Attorney requested instructions relative to paying Mr. L. E. Stafford the sum of \$650 for the moving of a barn from right of way acquired from him in connection with the revision of the Goshen-Pleasant Hill Section of the Willamette Highway, it appearing that the barn was destroyed by fire before the moving operations were commenced. He advised that Mr. Stafford is demanding payment for the moving of the barn notwithstanding that the barn was burned and could not be moved. The Commission took the attitude that it has no ethical or moral obligation to pay Mr. Stafford; however, deferred a decision until the next meeting. The Attorney was instructed in the meantime to look into the legal features involved.

Consideration was given by the Commission to a request from Mr. Louis Enard Abrams for permission to perform certain landscaping work on property that the Commission is acquiring from him for slide protection purposes at the north end of the Coos Bay Bridge. The Attorney advised that Mr. Abrams plans to landscape his own private property and wants the privilege of extending the work onto the state's land so as to eliminate any possible eye sore. He was instructed to inform Mr. Abrams that the Commission has no objection to his landscaping the state's property provided he does so at his own risk

and with the understanding that the state retains the privilege, without obligation to him, of doing its own landscaping work at any time in the future when the Commission feels so inclined.

The Attorney reported receipt of a communication from Mr. E. M. Peck, Division Real Estate Project Manager of the United States War Department, with respect to a state-owned stock pile site located within the borders of Camp Adair Cantonment near Corvallis, which site is needed by the Army in connection with the development of this cantonment. He advised that he tried to satisfy the War Department's requirements with respect to this site by preparing a resolution for adoption by the Commission, giving to the Government complete control over the tract of land for the duration of the present emergency but, according to Mr. Peck, this method is not satisfactory because the rules and regulations by which those in charge are governed make absolute acquisitions of the property imperative, in view of which he is submitting the tract for condemnation. The Commission took no action on the matter.

The matter of leasing to the United States War Department a certain stock pile site situate within the borders of Camp White Cantonment near Medford was also discussed by the Commission. The Attorney advised that the War Department is willing, in this instance, to accept a lease of the stock pile site and has submitted a standard form of lease covering the matter for execution by the Commission; however, has asked that the Commission adopt a resolution authorizing the members of the Commission to sign the same. He pointed out that no mention is made whatsoever in the lease for the moving of the materials that have been stock-piled on the area in question and gave as his thought that the Commission should not execute the lease or adopt a resolution until that particular feature has been disposed of. The Commission concurred and thereupon deferred action on the matter until the next meeting.

The Commission had under consideration the matter of damage to The Dalles-California Highway in Klamath County caused by the breaking of a dike and the consequent flooding of the highway to the damage of the state in a sum in excess of \$50,000. The Attorney reported that he, in response to instructions from the Commission, had submitted to the power companies, and to the railroad companies involved, statements of the state's claim, and requests that the claim be paid, but it appears that both the power companies and the railroad companies have rejected the claims. After due consideration, the following resolution was unanimously adopted:

WHEREAS, upon information made available to the Commission by members of its engineering staff and by its Chief Counsel, the Commission is of the opinion that the California-Oregon Power Company, The California Oregon Power Company, and/or the Southern Pacific Company and the Central Pacific Railway Company are responsible, jointly or otherwise, for the damage done to The Dalles-California Highway as a result of the flood which occurred in May, 1940: and

WHEREAS, since the said power companies and railroad companies have each and all refused to reimburse the State Highway

JUL 23 1942

Commission for expenditures made in connection with the reconstruction and restoration of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, that I. H. Van Winkle, Attorney General of Oregon, and J. M. Devers, Chief Counsel for the Highway Commission, be and they hereby are requested to institute and prosecute such action or actions as they may deem necessary and advisable to recover from the said parties the loss sustained by the state by reason of said flood.

The Engineer reported that the following sections of old state highway routes are no longer of value from the state highway standpoint in view of the fact that the sections have been reconstructed on revised alignment, and recommended that the Commission abandon these sections in favor of the counties in which they are situate: portion of Scappoose-Multnomah County Line Section of the Columbia River Highway; portion of the Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway; and a portion of the Clackamas Overcrossing Section of the Cascade Secondary Highway. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolutions:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Scappoose-Multnomah County Line Section of the Columbia River Highway in Columbia County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Scappoose-Multnomah County Line Section of the Columbia River Highway in

JUL 23 1942

Columbia County but is now without the limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Columbia County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Scappoose-Multnomah County Line Section of the Columbia River Highway, in Sections 13 and 24, Township 3 North, Range 2 West, W. M., Columbia County, lying on the westerly side of the right of way required for the reconstructed Columbia River Highway, the beginning and ending points with reference to the engineers' stations of the said reconstructed highway being Station 35+50 on the southerly end and Station 101+25 on the northerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. C. Williams, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated July 10, 1942, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Columbia County, together with a copy of said map or exhibit, for such action as said County Court may desire to

*Map filed Right of Way Abandonment and Retention File - 106.

take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Columbia County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway in Baker County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section which is more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way hereinafter designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway, but is no longer a part of the right of way of said highway as the same has been relocated and constructed be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Baker County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Flagstaff Hill-Ruckles Creek Section of the Baker Homestead Highway in Sections 4, 5, 9, 10, 11, 13 and 14,

JUL 23 1942

Township 9 South, Range 41 East and in Sections 5, 7, 8 and 18, Township 9 South, Range 42 East, and in Sections 29 and 32, Township 8 South, Range 42 East, W. M., Baker County, lying on the southerly side of the right of way required for the reconstructed Baker-Homestead Highway, said section also lying between Mile Post 6.91 and Mile Post 17.37 of said highway, the beginning and ending points with reference to the engineer's stations of the said old highway being Station 278+00 on the westerly end and Station 833+00 on the easterly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of Paul Van Scoy, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant Highway Engineer, and is dated July 3, 1942, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Baker County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said Baker-Homestead Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Baker County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Clackamas Overcrossing Section of the Cascade Highway in Clackamas County; and

*Map filed Right of Way Abandonment and Retention File - 107.

JUL 23 1942

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section, which section is more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way hereinafter designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Clackamas Overcrossing Section of the Cascade Highway, but is no longer a part of the right of way of said highway as the same has been relocated and constructed be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Clackamas County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Clackamas Overcrossing Section of the Cascade Highway in Section 4, Township 2 South, Range 2 East, W. M., Clackamas County, lying on the easterly side of the right of way required for the reconstructed Cascade Highway; the beginning and ending points with reference to the engineers' stations of the said reconstructed highway being Station 456+05 on the northerly end and Station 482+07 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. C. Williams, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State

JUL 23 1942

Highway Engineer, and is dated July 17, 1942, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Clackamas County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said Cascade Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Clackamas County and beyond any responsibility or supervision by the State Highway Commission.

The Commission discussed the advisability of acquiring right of way needed for the revised location of the Oregon-Washington Highway between Milton and the Washington state line, in Umatilla County. The Engineer estimated that such right of way would cost about \$20,000 and advised that the project is high on the Commission's priority list, having been promised at one time, and the probabilities are that it will be one of the first projects constructed when the war is over. He recommended approval of negotiations to provide the right of way now. The Commission approved the recommendation and authorized the Attorney to proceed with the securing of options, it being understood that the Commission would order the negotiations discontinued if future circumstances deem that advisable.

The Engineer reported an inquiry from the Work Projects Administration whether or not the State Highway Commission has use for the buildings that were erected at Camp Manning, Camp Wolf Creek and Camp McNamars on the Wolf Creek and Wilson River Highway WPA projects, such camps having been abandoned by the Work Projects Administration. He advised that the Work Projects Administration has authority to transfer materials in these camps to other public agencies for use by such agencies or for wrecking and salvaging of materials.

*Map filed Right of Way Abandonment and Retention File - 108.

The State Highway Department, he said, could make good use of these buildings and he recommended that the Work Projects Administration be requested to turn them over to this department without cost which is in conformity with his understanding of the original arrangement when the buildings were constructed. The Commission approved the recommendation and instructed the Engineer to do what may be necessary to secure control of the buildings.

The Attorney reported the status of acquisition of right of way needed for the Sunderland Access Road, Portland, for which bids were taken at this meeting. He advised that all of the right of way is clear, except one parcel between stations 4+65 and 7+65 with respect to which possession cannot be given to the contractor prior to August 5, 1942, and a parcel between stations 78+56 and 101+27.5 on which the United States Government has a lease and which is being used in connection with the Army airbase at this location. With respect to such property, he advised that the Army engineers are endeavoring to secure the release of the portion that is needed for right of way although it appears that it is necessary to secure a special order from the Secretary of War in order to make the same available. This matter, he said, has been discussed with Lt. Colonel Kelly, who is in charge of the airbase, who advised that the taking of this small area will not interfere in any way with the airbase operations and, in his opinion, the highway work should proceed as planned. In view of this report, the Commission decided to award the contract for the improvement as soon as the financing of the same can be effected.

The matter of performing certain maintenance work in Champoe Park was reconsidered by the Commission. The Engineer advised that he contacted Mr. Omar Spencer, Chairman of the Provisional Park Board which has jurisdiction over this park, and ascertained that what they really want at this time is the mowing of grass and weeds so as to reduce as much as possible the fire hazard in the park, and that he told Mr. Spencer that the Highway Department would perform such service, which is estimated to cost \$30 or \$40, if the Provisional Park Board would reimburse the state for the cost involved. The Commission approved such arrangement. The State Parks Superintendent, who was present, expressed a reluctance to perform general maintenance operations in the park unless the Provisional Park Board would pay the expense, it being his understanding that the Board's budget contains no amount for this purpose but is limited to the expense of a caretaker. He was instructed by the Commission to ascertain from Mr. Spencer just what the Provisional Park Board desires in the way of general maintenance. He was authorized by the Commission to perform such work if a nominal expense is involved.

Mr. Elmer Bankus, Brookings, was present in regard to the sale to the state of some 8,000 acres of timbered land situate adjacent to the Oregon Coast Highway north of Brookings. He advised that this property has been placed with him for liquidation and that he wants the state to have first refusal of the property before advertising it for general sale inasmuch as the property contains about twenty million feet of timber and in his estimation would make a valuable addition to the state park system. The property, he said, is situate on both sides of the Oregon Coast Highway, between Colgrove Butte and Brookings, a distance of about twelve miles; further, that he is in position to sell this

JUL 03 1942

property, including both land and timber, to the state at the rate of \$0.50 per M-FBM if the state wants it. Furthermore, if the state doesn't want all of the property, he is authorized to sell as much of it as the state wants at the same price.

The Engineer pointed out that the highway is not presently located on permanent alignment and suggested a reconnaissance survey along the proposed new location to ascertain just what portion of the timbered area offered by Mr. Bankus it would be desirable to acquire. It was his thought that a strip one-half mile wide on each side of the new highway location should be acquired if the Commission decides to accept Mr. Bankus's offer, and that the purchase should be made now as undoubtedly it would cost considerably more later on. In reply to an inquiry from Chairman Cabell, the Attorney advised that the price quoted by Mr. Bankus, in his estimation, is fair and reasonable and, if the Commission wants to buy the property, it would make no mistake in paying such amount. The matter was discussed at considerable length during which the Commission tentatively approved the purchase in principle but deferred a definite action until the next regular meeting. The Engineer was instructed in the meantime to have an inspection of the property made by the State Parks Superintendent, Mr. S. H. Boardman, and Locating Engineer J. F. Waller to ascertain just how much of the property it would be desirable to acquire from the state parks' standpoint.

Mr. Frank J. Lonergan, Attorney, Portland, appeared before the Commission in behalf of his client, Mr. Paul Gilbaugh, with respect to Mr. Gilbaugh's property adjacent to the Upper Columbia River Highway near Crown Point. Mr. Lonergan recalled that Mr. Gilbaugh sold to the state a portion of his property which was needed for right of way for the new highway location, but still owns 65 acres on the north side of the railroad which is isolated and is of practically no value because he has no outlet for the timber and the rock located thereon. Mr. Gilbaugh, he said, wants to market the timber and the only way for him to do this is to dump the logs into the river which he is unable to do under present circumstances. He presented two propositions; first, allow the construction of an underpass under the highway which would give Mr. Gilbaugh access to the river, and, second, that the state purchase the balance of Mr. Gilbaugh's holdings. He recited other features of the state's transaction with Mr. Gilbaugh and urgently requested favorable action by the Commission on one of these propositions. Chairman Cabell remarked that the Commission was of the opinion that the controversy with Mr. Gilbaugh was consummated by the suit for right of way and there is a question in his mind whether the case should be reopened. Notwithstanding the situation, he said, the Commission would give the matter further thought and will advise Mr. Lonergan definitely as soon as possible.

At 3:00 p. m. Chairman Cabell announced the awards of contracts and sale of buildings, as follows, bids for which were taken by the Commission at the morning session, such awards and sales having previously been approved by the Commission by unanimous vote:

"Seven Devils Chrome Mine Access Road Project west of Coquille, in Coos County. 5.99 miles grading and topping. Tru-Mix Concrete Company, Medford, submitted the low bid on this project, in the amount of \$34,034.60. The only other bid submitted was that of the Coos Bay Dredging Company, Marshfield, in the amount of \$54,887.75. The Commission refers all bids for this project to the Engineer with power to award the contract to the low bidder, when certain conditions have been satisfied.

"Lower Bridge-Terrebonne Section of the Lower Bridge-Terrebonne County Road, in Deschutes County. 6.5 miles oiling. The only bid received on this project was that of Babler Brothers, Portland, in the amount of \$13,856.00. The Commission awards this contract to Babler Brothers, at their bid of \$13,856.00.

"South Mountain Mine Access Road Project on the I.O.N. Secondary State Highway, in Malheur County. 18 miles surfacing. O. C. Yocom, McMinnville, submitted the low bid on this project, in the amount of \$38,730.00, and the second-low bid was that of A. H. Saxton & Son, Lebanon, in the amount of \$51,270.00. There was one other bidder. The Commission refers all bids for this project to the Engineer with power to award the contract to the low bidder, when certain conditions have been satisfied.

"Sunderland Avenue Access Road Project on N. E. Sunderland Avenue and N. E. Elrod Road near Portland, Multnomah County. 1.88 miles grading and paving. The only bid submitted on this project was that of Porter W. Yett, Portland, in the amount of \$98,853.00. The Commission refers this bid to the Engineer with power to award the contract to Porter W. Yett, when certain conditions have been satisfied.

"Construct two pile trestle bridges on Sunderland Avenue at Portland, in Multnomah County. Lindstrom Brothers, Portland, submitted the low bid on this project, in the amount of \$11,645.00. The only other bid submitted was that of the Tower Sales & Erecting Company, Portland, in the amount of \$11,960.00. The Commission refers all bids for this project to the Engineer with power to award the contract to the low bidder, when certain conditions have been satisfied.

"Section "A" of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. 4.15 miles bituminous macadam surfacing. The only bid received for this project is that of E. C. Hall Company & J. C. Compton, Eugene and McMinnville, in the amount of \$172,647.50. In considering bids received for this project, the Commission also considered the bid submitted on June 25, 1942, by Edlefsen-Weygandt Company, for the construction of this project, on the basis of concrete pavement. The Commission has decided to award the contract to E. C. Hall Company and J. C. Compton at their bid of \$172,647.50. The bid of Edlefsen-Weygandt Company has accordingly been rejected.

JUL 23 1942

"Section "B" of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. 2.52 miles grading and 4.93 miles bituminous macadam surfacing. E. C. Hall Company, J. C. Compton and McNutt Brothers, Eugene and McMinnville, submitted the only bid for this project, in the amount of \$229,153.00. The Commission refers this bid to the Engineer with power to award the contract when certain conditions have been satisfied.

Sale of Residence Buildings in North Bend:

"Building No. 9491. Formerly owned by Coos Bay Longshoremen Beneficial Association. No bids were received for this building.

"Building No. 9498. Formerly owned by Cora Swanson Coyle. School District #26-C, North Bend, submitted the high bid for this building, in the amount of \$56.00. W. H. Eickworth, Empire, submitted the second-high bid, in the amount of \$51.00. There were two lower bidders. The Commission considers the bid of School District #26-C satisfactory, and accordingly sells the building to it at its high bid of \$56.00.

"Building No. 9501. Formerly owned by Ira L. Goodlin. W. H. Eickworth, Empire, submitted the high bid for this building, in the amount of \$152.00. M. Jorgenson, Marshfield, submitted the only other bid, in the amount of \$100.00. The Commission considers the bid of W. H. Eickworth satisfactory and accordingly sells the building to him at his high bid of \$152.00.

"Building No. 9560. Formerly owned by J. H. Tewsley. No bids were received for this building.

"Building No. 9499. Formerly owned by John Sandine. No bids were received for this building.

"Building No. 9493-A. Formerly owned by Independent Stevedoring Company. Mrs. A. T. Lee, North Bend, submitted the only bid for this building, in the amount of \$32.00. The Commission considers the bid of Mrs. A. T. Lee satisfactory and accordingly sells the building to her at her bid of \$32.00.

"Building No. 9486-B. Formerly owned by Coos County. No bids were received for this building.

"Building No. 9506. Formerly owned by John McNabb. Raymond Clair, Dellwood, submitted the only bid on this building, in the amount of \$41.00. The Commission considers the bid of Raymond Clair satisfactory and accordingly sells the building to him at his bid of \$41.00.

"Building No. 9486-C. Formerly owned by Coos County. M. Jorgenson, Marshfield, submitted the only bid for this building, in the amount of

\$100. The Commission considers the bid of M. Jorgenson satisfactory and accordingly sells the building to him at his bid of \$100.00.

"Building No. 9518. Formerly owned by P. M. Ross. No bids were received for this building.

"Building No. 9519. Formerly owned by J. H. McDonald. Mrs. Leo LaBranch, North Bend, submitted the high bid for this building, in the amount of \$45.00, being her first choice. Guy A. Cutlip, Marshfield, submitted the second-high bid, in the amount of \$42.50, being his second choice. There was one other bidder. The Commission sells this building to Guy A. Cutlip, the second-high bidder, at his bid of \$42.50, as Building No. 9524 was sold to Mrs. LaBranch.

"Building No. 9522. Formerly owned by J. Gildersheim. M. Jorgenson, Marshfield, submitted the only bid for this building, in the amount of \$22.00. The Commission considers the bid of M. Jorgenson satisfactory and accordingly sells the building to him at his bid of \$22.00.

"Building No. 9524. Formerly owned by Iva B. Butcher. Mrs. Leo LaBranch, North Bend, submitted the high bid for this building, in the amount of \$45.00. George H. Bessey, North Bend, submitted the only other bid, in the amount of \$41.00. The Commission considers the bid of Mrs. Leo LaBranch satisfactory and accordingly sells the building to her at her high bid of \$45.00.

"Building No. 9486-D. Formerly owned by Coos County. No bids were received for this building.

"Building No. 9527. Formerly owned by J. E. Bergen. John D. Bergen, Marshfield, submitted the only bid for this building, in the amount of \$1,275.00. The Commission considers the bid of John D. Bergen satisfactory and accordingly sells the building to him at his bid of \$1,275.00.

"Building No. 9528. Formerly owned by H. W. and Jessie Lee Clark. W. H. Eickworth, Empire, submitted the only bid for this building, in the amount of \$24.00. The Commission considers the bid of W. H. Eickworth satisfactory and accordingly sells the building to him at his bid of \$24.00.

"Building No. 9524-A. Formerly owned by Clyde and Iva Butcher. George H. Bessey, North Bend, submitted the only bid for this building, in the amount of \$21.00. The Commission considers the bid of George H. Bessey satisfactory and accordingly sells the building to him at his bid of \$21.00.

"Building No. 9530. Formerly owned by R. M. Hazelton. No bids were received for this building.

JUL 23 1942

"Building No. 9646. Formerly owned by A. M. Haley. No bids were received for this building.

A delegation representing the Oregon Railroad Association and consisting of the following members was present and asked the Commission to adopt an order requiring all vehicles traveling on state highways to come to a full stop before crossing any main-line railroad track at grade: Roy Shields, Chairman, and Harold J. Turner, Secretary, of the Oregon Railroad Association; Paul Farrons, E. L. King and George Fair, representing the Southern Pacific Company; Charles A. Hart, representing the Northern Pacific Railway Company, Great Northern Railway Company and Spokane, Portland and Seattle Railway Company; F. N. Finch, H. M. Turner and S. S. Murray, representing the Union Pacific Railway Company; and Messrs. Crawley and McKenna, representing the Employees Brotherhood. Mr. Shields was spokesman. He presented arguments in favor of this request, particularly pointing out that train movements have increased tremendously since war was declared, that these movements are intermittent, and that the railroad companies are now doing more than twice as much business as they did in 1929 which was the year in which train movements reached its peak. He pointed out that the railroads are carrying vast quantities of war equipment that must be moved without delay; furthermore, they are required to transport army personnel in large numbers and anything that can be done to expedite and to safeguard such movements would be particularly helpful in the carrying out of the war program. He referred to the Association's letter of July 3, 1942, (see letter in general files) directed to the members of the Highway Commission, in which the Commission was asked to take appropriate action, in conformity with their oral request, and declared that sentiment of the general public, as expressed by newspapers and by communications that have been received, is favorable to such action by the Commission. In support thereof, he presented photostatic prints of articles that have appeared in the press throughout the state, all of which endorse the proposal of the Railroad Association. He urged favorable consideration by the Commission in this matter.

Chairman Cabell replied that the Commission has given this matter serious study and is favorably inclined toward the adoption of such an order which it has legal authority to do. He pointed out that there are two arguments which might be presented against the proposition, first is the argument of logging interests that, if heavy loads of logs are required to come to a complete stop before crossing a railroad track at grade, a more serious hazard than now exists would be created. These interests, he said, feel that the slowing down of the logging equipment to approximately 10 miles per hour would satisfactorily meet the situation. Mr. Shields stated that the argument appeared to him to be sound.

Chairman Cabell then stated that the question has arisen whether or not the stop order should apply to crossings that are now protected by wigwag signals. Mr. Shields stated that they prefer that the order apply to all crossings regardless of whether or not they are protected by such signals, and in this connection referred to the 1941 report of the Public Utilities Commissioner in which it is stated that 23 per cent of the accidents that have occurred at railroad crossings were at the crossings where wigwag signals had been installed.

JUL 23 1942

Mr. Crawley, speaking in behalf of the railroad employees, urged the adoption of the order for all crossings. Senator F. M. Franciscovich, Astoria, who was present, questioned the advisability of adopting a blanket order covering all main-line crossings. He suggested that the order specify definite crossings and strict enforcement of the order by state police. In reply thereto, Chairman Cabell advised that the Commission is now considering some thirty-five crossings, and, if the Commission adopts this ruling, each of these crossings will be definitely specified in the order. He further stated that, while the Highway Commission has legal authority to make such a stop order, it does not have the authority to enforce it, that being the function of the Department of State Police.

Mr. Farrens presented a list of main-line railroad tracks which, he said, the association deems should be covered by the order. The list was referred to the Engineer to compare with his list and to iron out any differences with the railroad company, if such exist.

Chairman Cabell concluded the conference by stating that the Commission is not in position at this time to definitely pass on the matter but hopes to do so at this meeting.

Following the departure of the group, the matter was reconsidered by the Commission at which time the Engineer recommended the adoption of stop orders for thirty-five crossings on the following main-line railroad tracks: Southern Pacific between Eugene and the California state line via Medford; Southern Pacific between Eugene and the California state line via the Natron Cutoff; Union Pacific between Portland and the Idaho state line via Messner, Hermiston, Pendleton and Nyssa; Union Pacific between Messner and Wallula, and between Umatilla and Hermiston; Great Northern and Oregon Trunk between Fall Bridge and Klamath Falls. He presented a list of crossings which, he said, is subject to change after consultation with the railroad officials and inspection on the ground. The Commission approved the list of main-line railroads and thirty-five crossings thereon, subject to the ironing out of any difficulties with the railroad company officials. The crossings include twelve which are now protected by wigwag signals. The following order with respect thereto was adopted and signed by the Commission:

BEFORE THE OREGON STATE HIGHWAY COMMISSION

In the Matter of the Petition of the Oregon
Railroad Association for an order designating
particularly dangerous highway-railroad grade
crossings.

ORDER

This matter came on to be heard on the twenty-third day of July, 1942, on the petition of the Oregon Railroad Association for an order requiring all drivers of vehicles to come to a complete stop before crossing

JUL 23 1942

a railroad at grade; whereupon, the Commission heard oral argument by Roy F. Shields on behalf of the petitioner and also heard oral argument by other persons present and interested, and upon due and careful consideration of said petition and all matters pertaining thereto finds:

1. That because of the war and the emergency created by the war the movement of persons and property by rail has, with respect to all of the railroads operating in the State of Oregon, been greatly increased, not only with respect to volume of tonnage and passengers, but likewise increased in number and length of trains operated.

2. That a very large part of the tonnage moved and the passengers carried consists of military troops and war materials, including explosives.

3. That because of troop movements and the large volume of war materials transported by rail and because of the fact that all transportation by rail is confined to single-track operation there are made necessary train schedules which must, so far as possible, be kept free from every possible hazard and interruption.

4. That crossings of highway and railroad at grade, which under the most favorable conditions possess potential hazards to both highway and railroad traffic, become and are far greater and more serious hazards when there is involved the movement of military forces and war materials, including explosives.

5. That Section 115-349, O.C.L.A., vests in the Commission authority with respect to state highways to designate railroad grade crossings which in the opinion of the Commission are particularly dangerous, and said section also vests in the Commission authority to erect and thereafter maintain at said crossings signs notifying drivers of vehicles to come to a complete stop before crossing any such railroad.

6. That it is the judgment of this Commission that public interests will be served and public welfare promoted by the granting of said petition.

NOW, THEREFORE, BE IT AND IT HEREBY IS ORDERED by this Commission as follows:

1. That the petition of the Oregon Railroad Association be and the same hereby is granted, subject, however, to further action by this Commission when in the judgment of the Commission such further action is appropriate and proper.

2. That the following highway crossings at grade of the tracks of the Southern Pacific Company hereby are designated as particularly dangerous crossings, to wit:

JUL 23 1942

Railroad Crossing Number	Road Number	Mile Post	Highway Route Number	Highway	Location

10B-0.3	420	2.00	--	Midland	Near Klamath Falls

5. That the following highway crossings at grade of the tracks of the Oregon Trunk Railroad Company hereby are designated as particularly dangerous, to wit:

Railroad Crossing Number	Road Number	Mile Post	Highway Route Number	Highway	Location
28T-134.6	41	0.25	US28	Ochoco	E St., Redmond
28T-131.8	370	0.33	--	O'Neil	Prineville Junction, near Terrebonne

6. That the Chief Engineer of the Oregon State Highway Commission hereby is directed to procure, place and thereafter maintain suitable and appropriate signs notifying drivers of vehicles on any of the above named highways to come to a complete stop before crossing any of the above named railroad tracks at any of the above named railroad crossings.

7. That said signs shall be constructed of suitable materials and shall be the usual conventional type of "stop" sign now in use on other highways for like purpose.

8. This order shall be in full force and effect for the duration of the war unless sooner revoked by order of this Commission, and said order may from time to time be modified or amended as in the judgment of the Commission may seem appropriate and proper.

9. This order shall be entered in the records of the Commission and a duly certified copy thereof delivered by the Secretary of the Commission to the following named persons and/or officials: Earl Snell, Secretary of State; Ormond R. Bean, Public Utilities Commissioner; Charles P. Pray, Superintendent of State Police; William H. Lynch, District Engineer, Public Roads Administration; Roy F. Shields, Chairman, Oregon Railroad Association; and Harold F. Turner, Secretary, Oregon Railroad Association; and the original shall be filed in the records of the Commission at Salem, Oregon.

Dated this twenty-third day of July, 1942.

ATTEST:

(Sgd.) H. B. Glaisyer
Secretary

(SEAL)

JUL 23 1942

OREGON STATE HIGHWAY COMMISSION

By (Sgd.) Henry F. Cabell
Chairman

By (Sgd.) Huron W. Clough
Commissioner

By (Sgd.) Herman Oliver
Commissioner

Messrs. Eugene Marsh, O. C. Yocom and Fred Slate reappeared before the Commission in regard to the cancellation of Mr. Yocom's subcontract under Leonard & Slate for oiling the Boswell Ranch-Follett Ranch Section of the Wallows Lake Highway, in Union County, contract No. 2483. Mr. Marsh advised that they have discussed this matter at considerable length since their appearance before the Commission at the morning session and that Mr. Yocom is inclined to set up his plant on the job, which will cost him about \$5,000, if the Highway Commission will reimburse him for the expense thereof if it is found that he cannot proceed with the work on account of the priority situation. He was informed by Chairman Cabell that the Commission must keep its expenditures within the legal limitations and so far as advancing funds or paying out moneys, as now requested by Mr. Yocom, is concerned, that is something that the Commission does not feel inclined to do at the present time. However, an allowance will be made to Mr. Yocom for materials furnished and placed in stock piles. Mr. Marsh stated that, in view of the Commission's action, they would give the matter further study, and would let the Commission know their decision within the next few days.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Juniper wayside strips:-The Parks Superintendent presented a form of agreement with the United States Department of Interior, providing for the preservation, on a yearly basis, of juniper waysides along the McKenzie Highway between the towns of Sisters and Redmond and along the Ochoco Highway between Redmond and Prineville. The agreement was approved and signed by the Commission.

Proposed park at Sutton Lake, Coos County:-The Parks Superintendent advised that the Dowell Estate owns a 60-acre tract situate just north of Sutton Lake, which parcel is about to be sold by the county court for delinquent taxes, and it has been suggested to him by the Honorable Earl Hill, Cushman, that this area might fit in nicely with the state parks' program. He advised that the tract adjoins national forest property that has been developed by the U. S. Forest Service for recreational purposes and in his estimation there is no need for further recreational acquisitions by the state in this vicinity. In view of this report the Commission decided not to purchase the 60 acres.

Proposed purchase of additional land at Cascadia:-The Parks Superintendent advised that the right-of-way department has for some time past endeavored to acquire 1.27 acres on the south side of the Santiam Highway at Cascadia so as to secure complete control of the south border of Cascadia Park where it fronts on the highway, but the owner of the property, a Mr. Jacob Stocker, will not sell unless the state will purchase all of his holdings which consists of seven acres of land for which he is asking the sum of \$1,200, so if the Commission wishes to obtain this land now it will have to resort to condemnation. The Commission decided to defer this acquisition for the duration of the present war emergency.

JUL 23 1942

Acquisition of O & C lands, in Douglas and Jackson Counties:- The Parks Superintendent recalled his report at the previous meeting of the Commission to the effect that, because of adverse rulings by the United States General Land Office, the Highway Commission is unable to purchase outright certain O & C lands that are now being leased from the Federal Government for recreational purposes, and that the Commission at that time instructed him to contact the several county courts and ascertain whether or not the counties would be willing to acquire the O & C lands for exchange of county lands, which is an approved procedure, and to then sell the O & C lands to the state. In conformity with such instructions, he said that he has contacted the County Courts of Douglas and Jackson Counties, and both courts have signified a willingness to cooperate with the Commission in that regard and have agreed to commence negotiations with the O & C Administration at once on the proposed exchange. The Commission approved the report; however, instructed the Parks Superintendent to ascertain from both courts just how much they will expect the state to pay for the properties before they consummate their negotiations with the O & C Administration.

Temporary closing of Ecola State Park:- The Parks Superintendent suggested that it might be advisable to temporarily prohibit the use of Ecola Park by the general public as a protection against fire, particularly as a precaution against sabotage. The Commission took the attitude that all state parks have been purchased for general public use and enjoyment and that such use of these areas should not be prohibited unless the Army authorities request such action as a defense measure, and it was so ordered.

The Attorney reported briefly that, in conformity with instructions received from the Commission at the previous meeting, he again ordered Mr. John H. Shively and several other parties to remove their residence buildings from state property adjacent to the Wolf Creek Highway near Humbug Creek, and that recent inspection of the premises reveals that all of the buildings either have been removed or are now in the process of being removed, which indicates full compliance with the Commission's ruling. The Commission approved the report.

The Engineer brought up for discussion the matter of preparation of designs for projects that are contemplated for post-war construction. He recalled that the Commission, at the previous meeting, authorized certain location surveys but did not authorize him to prepare plans. It was his thought that the preparation of the plans for the road and bridge projects should be gotten underway in the near future so as to avoid unnecessary delays on that account when the Commission is ready to contract the work, and in order to keep the engineering force busy. He submitted a list of projects, including city projects, projects on interregional highways and on the strategic highway network, (see list in letter dated July 10, 1942, from G. S. Paxson, Bridge Engineer, to C. B. McCullough, Assistant Chief Engineer) and asked the Commission to approve preparation of designs for the same and submission of the projects to the Public Roads Administration for approval in the securing of federal

JUL 23 1942

funds to finance them. The matter was discussed by the Commission at considerable length and as a result thereof the Commission approved the preparation of plans for the following city projects and projects that are on the inter-regional highway system:

BRIDGE PROJECTS

City Projects

Front Avenue, Portland

	<u>Estimated Cost</u>
1. Barbur Boulevard Traffic Interchange	\$ 1,500
2. Duniway Park Traffic Interchange	2,000
3. West Approach to Steel Bridge	12,000
4. East Approach to Steel Bridge	8,000
5. Broadway Traffic Interchange	1,000
6. Tacoma Street Traffic Interchange	2,000

Inter-Regional Highways

Columbia River Highway

1. Portland-Cascade Locks	
(a) Union Pacific Undercrossing	\$ 1,000
(b) Sandy River	1,500
(c) Troutdale Overcrossing	2,000
(d) Bridal Veil Overcrossing	2,500
(e) Moffat Creek, McCord Creek, Tanner Creek and minor structures	2,500 500
2. Cascade Locks-Viento	
(a) Minor structures	\$ 500
3. Viento-Hood River	
(a) Mitchell Point Tunnel	\$ 500
(b) Minor structures	500
4. Hood River-Mosier	
(a) Hood River Bridge and Overcrossing	\$ 2,000
(b) Mosier Overcrossing	1,000
(c) Mosier Creek	800
(d) Minor structures	500
5. Mosier-The Dalles	
(a) Minor structures	\$ 1,000

JUL 23 1942

Pacific Highway

Walker-Rice Hill	28	\$28,000
Green Station-Canyonville	25	25,000

The Engineer was thereupon authorized to present such projects to the Public Roads Administration for approval with request for federal funds with which to finance them.

Reconsideration was given by the Commission to the matter of permitting the Nehalem Telephone and Telegraph Company to maintain its existing

JUL 23 1942

pole line along the westerly side of the Oregon Coast Highway between Fishers Point and Brighton, a portion of which was installed beyond the limits specified in its permit from the State Highway Commission. The Engineer recalled that, in conformity with the Commission's instructions, the company was ordered to remove the unauthorized poles and to arrange for the joint use of the Mountain States Power Company's poles on the easterly side of the highway, or to re-establish its pole line in some other location that would not interfere with the scenic views on the westerly side of the highway. However, the order has not been complied with, and it now appears from information recently obtained that the company cannot comply with the order at the present time because the War Production Board's regulation will not permit the company to secure the required materials and the company couldn't pay for the materials even if it could get them. The company, he said, is now serving one or two airplane observation posts in the Brighton District which requires continuous service so it appears necessary to let the company operate on the westerly side of the highway until the present war emergency is over. The Commission approved such arrangement and instructed the Secretary to so inform the company.

The matter of salvaging of materials from an abandoned railroad pile trestle adjacent to the Wolf Creek Highway was discussed by the Commission. The Engineer advised that, as instructed by the Commission at the previous meeting, he had an investigation made of this material with the idea that it might be used to good advantage in connection with highway maintenance work and, according to reports from the Bridge Engineer and the Maintenance Engineer, the material is of no value to the state for such purpose; in fact, the cost of dismantling the structure would be considerably more than its value as salvage. He recommended, in view of the circumstances, that the material be sold. The Commission approved the recommendation and ordered that the sale of the material be advertised for bids to be received at the next meeting of the Commission.

The Engineer reported that the County Court of Linn County has been contacted relative to the improvement of the Richardson Gap county road near Scio to facilitate log-hauling traffic, and that it is agreeable with the county court that the state assume responsibility for such improvement provided the secondary highway is not rerouted so as to bypass the town of Scio, and provided further that the state will continue the maintenance of the present highway through Scio. He further advised that the Roaring River Logging Company, which is interested in this improvement, has agreed to assume a portion of the expense of maintaining the present highway route if the Commission will improve the Richardson Gap Road, and as evidence thereof has submitted its certified check in the amount of \$3,000 to cover such expense. He recommended approval of the arrangement with the county court and with the Roaring River Logging Company. The Commission approved the recommendation and thereupon authorized the Engineer to advertise the Richardson Gap Road project for bids to be received at the next meeting. The Commission also signed an agreement with Linn County Court covering the matter.

The Commission discussed the Engineer's report on the proposed widening of a curve on the Oregon Coast Highway south of Gold Beach,

JUL 23 1942

particularly a 72° curve at milepost 357.36, which improvement has been requested by Mr. Collier H. Buffington of Gold Beach, as a traffic safety measure. The report indicates that it will cost about \$3,600 to construct a roadbed 28 feet wide. The Commission decided not to undertake this improvement at the present time in view of the need of the funds for other purposes.

The matter of constructing a sidewalk on the Rogue River Bridge on the Pacific Highway at Gold Hill was discussed by the Commission. The Engineer reported that application was filed with the Lumber Branch of the War Production Board for permission to purchase material needed to build this sidewalk but the application was denied, so it appears necessary to defer the work until the present emergency is over. The Commission approved the report; however, instructed the Engineer to build this sidewalk just as soon as he is able to obtain the materials.

A letter was presented from the City of Central Point requesting an additional expenditure for the improvement of Pine Street in Central Point between its junction with the Pacific Highway and the city limits. The city alleges that this street is being badly damaged by heavy hauling in connection with Camp White Cantonment construction, and advises that the city is financially unable to assume the cost of repairs, hence its request for state aid. The Engineer advised that investigations reveal that it will cost about \$17,000 to put the street in first-class condition, although for a comparatively nominal sum it could be restored to as good condition as it was before construction of the cantonment was commenced. The Commission denied the request for a major improvement; however, authorized a nominal expenditure for repairs.

The Commission discussed a complaint from Lois M. Muzzy, Acting Postmaster, Cloverdale, relative to the condition of the Little Nestucca Secondary Highway between what is known as Nufer's Corner and Mrs. Clem Hurliman's place. Mrs. Muzzy alleges that the road is being severely damaged by logging trucks, and requests repairs and certain widening work to provide longer sight distance at curve points as a traffic safety measure. The Engineer advised that to improve the road as requested, would require the reconstruction of a two-mile section extending easterly from the Little Nestucca River Bridge, such being estimated to cost about \$200,000. He recommended indefinite deferment of the project unless the improvement is needed in connection with the war effort and request for the same is made by the Army authorities. The Commission approved the recommendation.

The Engineer requested authority to increase the yardage of rock to be furnished by contractor A. S. Wallace, under contract No. 2520 for the Pendleton-Meacham Rock Production Project, from 9,300 cubic yards to 13,000 cubic yards. He explained that the additional materials are needed at the Meacham end of the project and, unless an arrangement can be made with Mr. Wallace to furnish the materials at this time, it probably will be difficult to secure them at some future date, because contractors are not particularly interested in such small jobs. He advised that the extra material would be paid for at the unit prices contained in Mr. Wallace's original contract. The Commission approved the request.

JUL 23 1942

A letter was presented from Charles H. Reynolds, President of the Oregon Trail Association, in which the Commission is urged not to relieve contractors Leonard & Slate from their contract to complete, this year, the reconstruction of the Wallowa Lake Highway between Elgin and Minam, as they have requested, because the additional work is needed in order to provide a passable road this coming winter. Mr. Reynolds also inquired as to the status of location surveys that have been authorized for various contemplated improvements along the Columbia River Highway and the Old Oregon Trail through-out eastern Oregon. The Commission approved the Engineer's reply to this communication in which he advised that he is recommending to the Commission that Leonard & Slate be not relieved of their obligation; also, in which he states that efforts are being made to secure federal funds to finance surveys for post-war projects, that the survey between Hood River and Mosier is finished and that a start has been made on the survey between Cascade Locks and Hood River.

The Engineer brought up for discussion a letter from Mr. Jerrold Owen, Coordinator of the Oregon State Defense Council, relative to the establishment of dim-out zones along the Oregon Coast line, and particularly requesting the erection of appropriate signs along the highways in this vicinity where headlights of vehicles traveling at night are visible from off-shore. The Engineer advised that the Oregon Coast Highway and the principal side roads have been logged by Mr. W. O. Widdows, Assistant Maintenance Engineer, in company with Army officers, and an agreement has been reached with respect to the sections where the dimming of automobile lights should be made effective. He exhibited a map showing the proposed dim-out sections and a blue-print drawing of the types of signs that it is proposed to use. He requested instructions from the Commission whether or not to proceed with the erection of the signs. The question arose under whose authority the dim-out zones were ordered, it being the thought of the Commission that a request for the establishment of such zones should come from either the Army or the Navy authorities before definite action is taken with respect thereto. Accordingly, the Commission's decision was deferred pending consultation with Mr. Owen, who was thereupon requested to appear before the Commission later in the session. (See ahead for further action.)

A letter was presented from the Honorable Leslie M. Scott, State Treasurer, advising receipt of information from the National City Bank of New York, fiscal agency of the State of Oregon, that on and after July 1, 1943, it will act as the state's agent in the handling of bonds and bond interest coupons only if compensated at the rate of four cents for each coupon paid and one-twentieth of one per cent of the par value of each bond paid. Mr. Scott suggests that the Commission include in its budget for the biennium beginning July 1, 1943, an amount to take care of these contemplated charges. The Commission approved the suggestion and so ordered.

The Engineer requested authority to revise the 1941 federal aid grade crossing program by eliminating therefrom an item of \$150,000 originally provided for the proposed overcrossing structure at Troutdale, and reallocating such funds to the Eugene grade separation project, which would release a like amount of state funds now allocated to that project. It was his thought

JUL 23 1942

that such transfer of funds is advisable in view of the fact that it appears improbable that the Troutdale overcrossing project can be constructed until the present war emergency is over. The Commission approved the request and authorized the submission of such change to the Public Roads Administration for confirmation.

The Engineer reported the award of the following contracts and sale of buildings, as previously authorized by the Commission, the conditions of the awards having been satisfied:

Helnick Undercrossing on the Monmouth-Suver Section of the Pacific Highway West, Polk County. Bids taken June 4, contract awarded June 26, 1942, to Averill & Corbin, low bidders.

Widen three bridges on Suver-Lewisburg Section of Pacific Highway West, Polk County. Bids taken June 4, contract awarded June 26, 1942, to J. F. Johnston, low bidder.

Construct two pile trestle bridges on Monmouth-Suver Section of the Pacific Highway West, Polk County. Bids taken June 4, contract awarded June 26, 1942, to J. F. Johnston, low bidder.

Grading of North Unit, Monmouth-Benton County Line Section of the Pacific Highway West, Polk County. Bids taken June 4, contract awarded June 26, 1942, to E. C. Hall Company and J. C. Compton, low bidders.

Grading, surfacing and bituminous macadam on the Goshen-Pleasant Hill Section of the Willamette Highway, Lane County. Bids taken June 4, contract awarded July 1, 1942, to C. J. Eldon, low bidder.

Construction of a bridge over the Coast Fork Willamette River and three pile trestle bridges on the Goshen-Pleasant Hill Section of the Willamette Highway, Lane County. Bids taken June 4, contract awarded July 1, 1942, to Tom Lillebo, low bidder.

Sale of buildings in North Bend:-The following disposition, upon recommendation of the Engineer, was made of the buildings for which bids were received June 25, 1942:

Building No. 9559, sold at private sale to Edwin E. Sprague for \$100.00

Building No. 9486-A, sold to J. J. Borchers for \$50.00.

Building No. 9510, sold to Margaret Flock for \$25.00.

Building No. 9513, sold to Mrs. Ada Hartley Lee for \$135.00.

Building No. 9516, sold to Atwell T. Andrews for \$20.00.

Building No. 9519 (auto court cabins only) sold to Jack McDonald for \$176.50.

Building No. 9519 (garage only) sold to W. H. Kennedy for \$44.00.

Building No. 9520, sold to H. D. Harris for \$100.00.

Building No. 9529, sold to Kittel Ness for \$65.00.

Building No. 9532, sold to Kittel Ness for \$160.00

JUL 23 1942

Buildings Nos. 9491, 9498, 9501, 9560, 9499, 9493-A, 9486-B, 9506, 9486-C, 9518, 9519 (frame house only), 9522, 9524, 9486-D, 9528, 9524-A, 9530, 9646, and 9534, were ordered readvertised.

The Commission confirmed the awards and sales, as presented.

The Engineer requested authority to purchase two truck loaders from the Willamette Hyster Company at an estimated cost of \$760, and authority to investigate the possibility of purchasing from the Federal Government thirty two-ton dump trucks at approximately \$1,100 each, it appearing from information received from the American Road Builders Association that such equipment may be made available for distribution to state, county and municipal agencies. The Commission approved the purchase of the loaders and also authorized the Engineer to file an application for the trucks after first consulting the State Purchasing Agent.

The Attorney brought up for discussion the question of rental to be charged Mr. H. J. Williams, a highway department employee, for use of one of the residence buildings owned by the Highway Department in Pendleton. He advised that up to now Mr. Williams has been charged \$20.00 per month; however, upon recommendation of the Commission's agent in Pendleton, the rental was recently raised to \$25.00 per month; also, that Mr. Williams objects to the increased rate because he alleges it does not comply with the new Federal Rent-Freezing Act which freezes rentals as of the amounts charged on March 1, 1942. The Attorney recommended that Mr. Williams be required to pay \$25.00 per month if he desires to continue occupancy of the building, which amount, in his estimation, is at least \$10.00 under what the building should really rent for. The Commission approved the recommendation.

The Commission discussed the application of the United Railway Company for a permanent easement to maintain its railroad tracks on the right of way of the Lower Columbia River Highway (St. Helens Road). The company alleges that the existing tracks were installed originally as a part of the main line of the United Railway Company pursuant to a franchise granted by Multnomah County when this road was outside of the Portland city limits, and explains that the instant request is made because its franchise expired on August 20, 1940, and the company has need for the continuance of the track in its present location. The Engineer advised that the section of highway covered by this request is between the Montgomery Ward plant and the oil tank farm which section was a county road at the time the company secured its franchise. He gave as his opinion that this district, at some future time, will become Portland's great industrial area, in which event the entire highway right of way will be needed to handle the traffic that the industries will generate. He recommended, in view thereof, that the company be not granted a permanent easement to occupy the right of way but that it be allowed to maintain and use its facilities along this road for the duration of the war, after which time the tracks are to be removed. The Commission approved the recommendation.

A letter was presented from Mr. Mic W. Monte, Regional Grazier of the United States Department of Interior, Grazing Service, in which the Commission was requested to authorize highway department forces to burn dry

JUL 23 1942

grass adjacent to certain state highways in Eastern Oregon as an accommodation to the Grazing Service so as to minimize the possibility of fire being started by cigarette stubs carelessly thrown by motorists. The Engineer advised that it is becoming more and more difficult to secure men to work on maintenance crews and in many instances the crews are working short-handed, so it does not seem advisable or possible to comply with Mr. Monte's request in its entirety. He gave as his thought, however, that the highway department should cooperate with the Grazing Service in so far as is possible under the circumstances, so long as it does not interfere with the regular duties of the crews and if the Grazing Service will relieve the state from any liability for damage that might occur to adjacent private property. He recommended cooperation with the Grazing Service on such basis. The Commission approved the recommendation.

Reconsideration was given by the Commission to the suggestion offered at the previous meeting by Mr. Phil Berthiaume, of the California Western States Life Insurance Company, that the Commission authorize the company to extend its coverage to include highway department employees who work part time on the hourly basis and part time on the monthly-salaried basis, so as to avoid confusion in the auditing office. It was Mr. Berthiaume's suggestion that the confusion could be remedied by extending the coverage to include all maintenance and shop men. The Engineer advised that the matter has already been corrected by authorizing the auditing department to make deductions from the pay rolls during the period that the hourly-paid men are working on the monthly-salaried basis. The Commission approved such procedure.

In this connection the question arose whether or not to extend the group life insurance privileges to all employees who are paid on the monthly-salaried basis. Commissioner Clough gave as his opinion that monthly-salaried employees in the lower brackets should have the benefit of such insurance if they so desire. Chairman Cabell concurred and it was thereupon decided that all employees who receive salaries not in excess of \$200 per month should be given the benefits of such insurance if they want it.

The Commission discussed an offer from Mr. P. A. Peterman of the Peterman Manufacturing Company, Portland, to purchase a $1\frac{1}{2}$ -yard No. 75 Lorain gas shovel which the highway department has stored at Garibaldi. The Commission decided that it was to the state's advantage not to sell the shovel. The Secretary was instructed to convey such information to Mr. Peterman and to inform him that the Commission would be pleased to consider his offer to rent the shovel if he wishes to use it on such basis.

A letter from Mr. Richard G. Montgomery, State Director, Office of Price Administration, was presented, in which the suggestion was made that it would be helpful to the Office of Price Administration in the carrying on of its activities if the Highway Commission would authorize its weighmasters to weigh gravel trucks that are being operated in connection with army cantonment work. It appears from the information given that the operators of such trucks are taking undue advantage of operating leniencies and are overloading their equipment, and as a result there is an unnecessary waste of truck tires. The Commission indicated a desire to cooperate with the Office of Price Administration in the matter, provided the gravel trucks pass highway department

JUL 23 1942

scales, but questioned whether or not the adoption of an order would secure the desired results, inasmuch as neither the Commission nor the weighmasters have any legal way to force the truck drivers to come to the scales. The Engineer was instructed to bring such information to the attention of Mr. Montgomery.

The Commission discussed a letter from the E. K. Wood Lumber Company, Reedsport, directed to Mr. Earl Snell, Secretary of State, in which the company requests modification of the penalty imposed on log haulers for overloading their trucks. The Commission refused to modify its present rulings because it felt that the limit has been reached in the granting of concessions to operators in this service. The Engineer was instructed to prepare a "stock" letter for use in replying to such communications, for Chairman Cabell's approval.

A letter was presented from Mrs. Elizabeth Salway Ryan, Oswego, requesting the designation of a highway route leading from Portland to Champoege Park, and the naming and signing of such route as the "Champoege Highway", in order to facilitate travel to the park by motorists who are unfamiliar with roadway connections. In the discussion of this matter it was brought out that the highways leading to Champoege Park are not all state highways; hence the Highway Commission does not have full jurisdiction; also, that the present policy of the State Highway Commission is to follow the recommendations of the Public Roads Administration and the American Association of State Highway Officials with respect to highway designations, which is to designate highways by number rather than by name. The Secretary was instructed to convey such information to Mrs. Ryan.

The Commission discussed a request from Mr. W. L. Arant, Forest Greve, for permission to maintain a number of beehives on state-owned land adjacent to the Wolf Creek Highway about four miles west of Sunset Camp. The request was denied by the Commission as a matter of policy.

The Commission also discussed a letter from the Honorable F. C. McKenzie, Mayor, Hermiston, relative to the oiling of certain city streets in Hermiston that are not on state highway routes, for which work the Commission has budgeted the sum of \$554 for this year's expenditure. Mr. McKenzie points out that the city is now constructing a new water system which necessitates the opening up of the streets which the state intends to improve and asks the Commission to pay over to the city the \$554 that the state contemplated spending in this town so they can arrange for the oiling work to be done by the city's contractor when the water system has been completed. The Commission denied the request, it being contrary to the Commission's policy to advance funds in such manner and there being a question whether or not the Commission has legal authority to do so. The Secretary was instructed to convey such information to Mayor McKenzie and to assure him that the state would do the oiling work this year after the city's water system has been completed if it is not then too late in the season.

The Engineer brought up for discussion the matter of filing with the Selective Service Board requests for the deferment from the draft of certain State Highway Department employees whose loss would seriously cripple or

JUL 23 1942

impede the activities of the organization. He reported the result of a conference with Colonel Elmer V. Wooten, State Director of Selective Service, stating that during such conference Colonel Wooten suggested that the Highway Commission file requests for exemption in the case of each or any employee whose loss would seriously cripple or impede the activities of the Department. After considerable discussion the Commission approved this policy and instructed its Chairman to request deferment in the case of those employees certified by the Chief Engineer to be necessary or indispensable.

The Engineer reported that the United States Army had requested the Department to cooperate in the plans which were being made against a possible invasion by installing at certain bridges and at other points on certain highways located in the coastal area suitable receptacles for the placement of explosives and suitable ladders and runways leading thereto. He reported that in addition to the points selected on the state highway system it would also be necessary to perform similar work on certain railway structures designated by the United States Army. He recommended that the cooperation requested by the army officials be granted in view of the fact that an efficient and effective defense of this area might well operate to avoid millions of dollars' worth of destruction to the highway system of the state. After due consideration the Commission unanimously approved the recommendation of the Engineer and instructed him to proceed with such work as had been ordered by the United States Army officials and to do and perform all other acts and things necessary in connection with this phase of the defense effort. In reference to the work contemplated on railway structures he was authorized to proceed with this work provided permission to do the same was secured from the railway officials.

Mr. Jerrold Owen, Coordinator, Oregon State Defense Council, was present and discussed with the Commission the matter of establishing dim-out zones along the Oregon coast line. Chairman Cabell explained that the Commission has previously discussed this matter at this meeting and tentatively approved the establishment of such zones and the signing of the same but decided, before taking definite action, that it should have some evidence to show the Commission's authority to make the dim-out order so as to obviate any questioning by the general public. Mr. Owen advised that requests for the establishment of dim-out zones were made by Vice Admiral C. S. Freeman, Commander of the Northwest Sea Frontier, in a wire to Governor Sprague, in which wire Admiral Freeman states that conditions along the coast line are such as to deem it advisable to establish such zones and asked the Governor to provide them through the office of the Oregon State Defense Council. The Office of Civilian Defense, he said, contemplates adopting regulations with respect thereto in conformity with the desires of the Army and Navy authorities. Chairmah Cabell thanked Mr. Owen for the information and the Commission thereupon approved the locations submitted by the Engineer and authorized the Engineer to post the zones in conformity therewith. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, in response to and in compliance with Public Proclamation No. 10, issued August 5, 1942, by Lieutenant General John L. DeWitt, Commanding General of the Western Defense Command and Fourth Army, the Oregon State Defense Council has established regulations governing vehicular lights on those portions of the Oregon Coast Highway

JUL 25 where such lights may be visible from the sea; and

WHEREAS, the State Highway Commission has been requested by said State Defense Council to place and maintain along approximately 150 miles of the Oregon Coast Highway, being Federal Highway No. 101, certain warning or directional signs, which signs are to be placed at or in areas where lights are restricted and otherwise regulated. The purpose of said signs is to caution and advise motorists to dim their lights and reduce their speed when entering and while passing through dim-out zones; and

WHEREAS, in further effort to cooperate with and aid the United States military forces and the State Defense Council in all war and defense activities, it is the judgment of this Commission that the furnishing, placing and maintaining of necessary and appropriate warning and informational signs should be done by the State Highway Commission.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, as follows:

1. That the Chief Engineer be and he hereby is instructed to provide, place and/or erect and thereafter maintain at appropriate places in all light restriction zones along the Oregon Coast Highway such warning, informational and directional signs as may be ordered by the United States War Department, and such additional signs as may be deemed necessary by the State Highway Commission.
2. That such signs shall be constructed of wood or other suitable material as may be ordered by the United States War Department and shall disclose to motorists the location on the highway where the restricted zone begins and ends, and such other information as may be necessary to the efficient carrying out of the purposes of the above-mentioned regulations in reference to automobile lights.
3. Such signs shall be maintained for the duration of the war or until their discontinuance is recommended or ordered by proper authorities, including the Oregon State Highway Commission.
4. That the Commission is without authority to specify the manner or method to be employed in effecting a proper and adequate dim-out of motor vehicle lights and is likewise without authority to compel compliance with the orders of the United States military forces or of the State Defense Council, and, therefore, all of said matters are left, so far as the Highway Commission is concerned, with the United States military forces and the State Defense Council.
5. This resolution shall be entered in the minutes and records of the Commission as of July 23, 1942, and the Secretary is instructed to deliver by mail a duly certified copy thereof to Mr. Jerrold Owen, Coordinator of the Oregon State Defense Council, a like copy to Lieutenant General John L. DeWitt, Commanding General of the Western Defense Command and Fourth Army, and a like copy to the Secretary of State.

The Engineer requested authority to complete the survey for the permanent location of the Pacific Highway West, U.S.99W, through Camp Adair Cantonment, in Benton County, about five miles in length, and to finance the same with state funds. The Commission approved the request.

In this connection the Engineer advised receipt of information to the effect that the Army authorities want this highway closed through the cantonment for the duration of the war, although no formal request for such procedure has as yet been filed. It was the opinion of the Commission that the road should not be closed to general public use unless the army authorities force the closure of the same and will provide the necessary funds to finance the construction of a substitute route.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - - -	6-1429 - Reedsport-North Bend Section, Oregon Coast Highway, Coos County.	1st authorization - \$170
Flight Strip -	19-1428 - Alkali Lake Flight Strip Section, Lakeview-Burns Highway, Lake County.	1st authorization - \$1500
Flight Strip -	123-1429 - Rome Flight Strip Section, I.O.N. Highway, Malheur County.	1st authorization - \$1500
Flight Strip -	24-1444 - Aurora Flight Strip Section, West Portland-Hubbard Highway, Marion County.	1st authorization - \$1500
Flight Strip -	25-1411 - Boardman Flight Strip Section, Boardman-Stanfield Highway, Morrow County.	1st authorization - \$1500
Plans - - - - -	226-1461 - Sunderland Road Section, Vancouver Access Road, Multnomah County.	1st authorization - \$600
Location - - -	30-1442 - Milton-Washington State Line Section, Oregon-Washington Highway, Umatilla Co.	2nd authorization - \$1500 Total to date \$5500
Location - - -	4-1462 - Columbia River Crossing near Knappa, Columbia River Highway, Clatsop County.	2nd authorization - \$1500 Total to date \$3500
Plans - - - - -	123-1430 - Malloy Ranch-Jordan Valley Section, I.O.N. Highway, Malheur County.	1st authorization - \$300
Plans - - - - -	223-1431 - Jordan Valley East Section, County Road, Malheur County.	1st authorization - \$100

JUL 23 1942

The Commission had under discussion the following request for extensions of time within which to complete highway construction projects:

Porter W. Yett, contract No. 2493, for grading and paving the Warrenton-Skipanon Section of the Fort Stevens County Road, in Clatsop County, requested an extension of time, from September 30 to November 15, 1941, within which to complete this project. He attributed his failure to complete the work within the specified time limit to excessive wet weather conditions and difficulties in securing sand, gravel and crushed rock materials. The Engineer advised that the reasons given by the contractor for failure to complete the contract within the specified time are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. He pointed out, however, that the Public Roads Administration has not as yet concurred in the recommendation. The Commission approved the recommendation unanimously, subject to the condition that the Public Roads Administration concurs. (Letter of approval received from Public Roads Administration on July 30, 1942.)

Rogers Construction Company, contract No. 2496, for grading and surfacing the Warner Summit-Mud Creek Section of the Warner Secondary Highway, in Lake County, requested an extension of time, from November 15, 1941, to July 31, 1942, within which to complete this project. It attributed its failure to complete the project within the specified time limit to adverse weather conditions and difficulties in performing excavation work during heavy rains. The Engineer advised that the reasons given by the contractor for overrun of time limit are correct. He added that the contractor also experienced considerable difficulty in obtaining labor and equipment repairs. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

C. J. Eldon, contract No. 2497, for construction of a bridge over Millport Slough near Kernville on the Oregon Coast Highway, in Lincoln County, requested an extension of time, from February 28 to July 8, 1942, within which to complete this job. He stated that it was not possible to complete the project within the specified time because of inclement weather which necessitated postponement of the final painting of the handrail. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time is correct and that it was on his order that the painting work was postponed until suitable weather obtained this spring. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Norris Brothers, contract No. 2515, for grading and topping the West Unit of the Sherars Grade Section of the Sherars Bridge Secondary Highway, in Sherman County, requested an extension of time, from April 30 to June 5, 1942, within which to complete this

JUL 23 1942

job. They alleged that difficulty in securing labor and supplies, particularly repair parts for their equipment, was the principal reason for overrunning the specified time limit. The Engineer advised that the reason given by the contractor for failure to complete the job on time is correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

A. H. Saxton & Son, contract No. 2541, for furnishing crushed rock for the Klaskanine Summit-Jawell Section of the Nehalem Secondary Highway, in Clatsop County, requested an extension of time of 17 days, from May 31 to June 17, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time to acute labor shortage. The Engineer advised that the reason given by the contractor for overrun of the time limit is correct. He recommended the granting of the extension of time requested without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2462, 2473, 2477, 2492, 2493, 2497, 2515, 2516, 2527, 2541, 2544, and 2545, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2462, with Norris Bros., for grading, surfacing and oiling on the Hanley Lane Section of the Frenchglen Secondary Highway, in Harney County. Completed June 30, 1942. (See paragraph following this resolution.)

Contract No. 2473, with E. L. Rigdon, for grading, surfacing and oiling on the Days Creek-Wright Ranch Section of the Tiller-Trail Secondary Highway, in Douglas County. Completed June 30, 1942.

Contract No. 2477, with E. H. Itschner, for surfacing and oiling on the Woodburn-Rock Creek Section of the Woodburn-Sandy Secondary Highway, in Clackamas and Marion Counties. Completed June 27, 1942.

Contract No. 2492, with E. L. Gates, for grading, surfacing and oiling on the Monroe-Lane County Line Section of the Territorial Secondary Highway, in Benton County. Completed May 23, 1942.

Contract No. 2493, with Porter W. Yett, for grading and paving on the Warrenton-Skipanon Section of the Fort Stevens County Road, in Clatsop County. Completed November 15, 1941.

Contract No. 2497, with C. J. Eldon, for construction of a bridge over Millport Slough near Kernville, on the Oregon Coast Highway, in Lincoln County. Completed July 8, 1942.

Contract No. 2515, with Norris Bros., for grading and topping on the West Unit, Sherars Grade Section of the Sherars Bridge Secondary Highway, in Sherman County. Completed June 5, 1942.

Contract No. 2516, with Leonard & Slate, for grading on the Madras-Juniper Butte Section of The Dalles-California Highway, in Jefferson County. Completed June 19, 1942.

Contract No. 2527, with Rogers Construction Company, for grading, surfacing and oiling on the Cinder Butte-Juniper Ridge Section of the Lakeview-Burns Highway, in Harney County. Completed July 1, 1942.

Contract No. 2541, with A. H. Saxton & Son, for furnishing 8,000 cubic yards crushed rock in stockpiles on the Klaskanine Summit-Jewell Section of the Nehalem Secondary Highway, in Clatsop County. Completed on June 17, 1942.

Contract No. 2544, with R. O. Dail and Warren Bros., Inc., for grading, surfacing and oiling on the Gerking School-Athens Section of the Athens-Holdman Secondary Highway, in Umatilla County. Completed on June 24, 1942.

Contract No. 2545, with Porter W. Yett, for grading and paving on the Sylvan-West Slope Section of the Tualatin Valley Highway, in Washington County. Completed June 26, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer advised that, in connection with the Norris Brothers contract No. 2462 for grading, surfacing and oiling the Hanley Lane Section of the Frenchglen Secondary Highway in Harney County, it was necessary to

JUL 23 1942

eliminate the proposed oil surfacing because the subgrade was too unstable for the construction of a thin oil surfacing due to the unusual and continued rains in the Harney Valley throughout the fall, winter and spring. Moreover, difficulty was encountered in securing an adequate supply of stabilizing materials and the requisite funds for such work were not available. Furthermore, time did not permit a change in plan to add additional rock to stabilize the grade because five cars for the oiling job had been delivered and were standing on the siding. On account of the shortage of cars, the department had been warned repeatedly by the Federal Government and the railroad companies to release the cars promptly. An immediate decision therefore became necessary and the engineer approved the use of the oil in resealing various projects in the vicinity of Burns on the state primary and secondary systems, which maintenance work had been programmed to be performed by state crews. It was impossible to move a state crew to do the work in the time available and this plan permitted the utilization of the contractor's equipment and crew on the job. Accordingly, arrangements were made with the contractor to perform the work in conformity with the unit prices in the contract. The Engineer acknowledged that he should have consulted with the Commission before issuing such an order but explained that quick action was necessary and the securing of the Commission's consent was inadvertently overlooked. He expressed regrets at the circumstances and asked the Commission to confirm his action. The Commission approved the disposition of the case as reported.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the O.W.R. & N. Company and Union Pacific Company covering maintenance of a railroad crossing sign on a Portland freight house.

Agreement with the Southern Pacific Company covering reconstruction of the Blodgett Overcrossing, in Benton County.

Agreement with Peter A. Nelson Company covering performance of certain work in connection with the widening of High Street between 5th and 6th Streets, in Eugene.

Agreement with Grant County Bank, John Day, Oregon, providing for lease of a road-materials site for use in connection with construction of the Prairie City Section of the John Day Highway.

Easement agreement with Lewis Pointer, et al, covering elimination of a road approach to the Tualatin Valley Highway near S. W. Canyon Road.

Agreement with Peter J. Lyski and wife, covering acquisition of property situate in Block 32, East St. Johns Addition to Portland.

Agreement with R. R. Clarke relative to a gravel bar which is being used in connection with the construction of the Rice Hill-Turkey Hill Section of the Pacific Highway, in Douglas County.

JUL 23 1942

Blanket agreement with the Mountain States Power Company providing for use of the company's poles in connection with traffic signal installations, et cetera.

Blanket agreement with Pacific Telephone and Telegraph Company providing for use of the company's poles in connection with traffic signal installations, et cetera.

Agreement with Linn County regarding the improvement and maintenance of the Richardson Gap county road.

Agreement with the United States Department of Interior, Grazing Service, providing for protection of juniper wayside strips along the McKenzie Highway between Sisters and Redmond and along the Ochoco Highway between Redmond and Prineville.

Agreement with McNutt Brothers disposing of their claim for extra compensation in connection with their contract No. 2219 for grading and paving the Dundee-West Dayton Section of the Pacific Highway West, in Yamhill County.

Agreement with Multnomah County providing for the maintenance of the Sunderland Avenue Access Road.

Agreement with Clatsop County, the City of Warrenton, and the City of Hammond providing for the improvement and maintenance of the Fort Stevens county road.

Bargain and sale deeds conveying the following properties:

Portions of Lots 29 and 30, Block 34, Coos Bay Plat "B" Addition to North Bend, to Atwell T. Andrews and wife, for \$123.00. Right of way file No. 9517.

Lot 15, Block 209, Mills Second Addition to Klamath Falls, to G. Morosin. Right of way files No. 9612 and No. 9612-A.

2.27 acres of land adjacent to Crater Lake Highway, in Section 13, T. 37 S., R. 2 W., W. M., Jackson County, to Roy P. Jones, for \$555.00. Right of way files No. 10080 and No. 10082.

1.034 acres of land situate adjacent to Crater Lake Highway, in Medford, includes building, to Derke Brothers. Consideration \$1500.00. Right of way file No. 10082.

0.076 acre of land situate in Section 13, T. 37 S., R. 2 W., W. M., Jackson County, to Medford Corporation. Right of way file No. 10145.

JUL 23 1942

Quitclaim deed conveying unto the Medford Corporation 0.081 acre of land situate in Section 13, T. 37 S., R. 2 W., W. M., Jackson County. Right of way files No. 10082 and No. 10145.

The selection of projects for which bids are to be received by the Commission at its next regular meeting had the attention of the Commission. The Commission approved the following, subject to revision later: Buchanan Rock Production Project in Harney County; Richardson Gap county road, in Linn County; additional rock production projects to be decided later; and construction of one or more airplane flight strips, if possible. The Commission also approved the taking of bids for the purchase of a trestle adjacent to the Wolf Creek Highway.

The Commission thereupon set Thursday, August 27, 1942, as the date for such meeting and instructed the Secretary to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland.

There being no further business to come before the Commission at this time the meeting was adjourned at 6:10 p. m.

Agreements, et cetera, signed as follows: Clatsop County and Cities of Warrenton and Hammond, re maintenance of Ft. Stevens-Camp Clatsop and DeLaura Beach Roads; I. J. and Nora M. Rossman, covering lease of maintenance headquarters site at Florence; City streets not on state highway routes. Agreements with Beaverton, McMinnville, Gaston, Gresham, Newberg, Independence and Stayton; E. C. Hall Co. and J. C. Compton, re contract for construction of Morrow County Flight Strip; Frank A. Moore and wife, re acquisition of right of way for Pacific Highway south of Eugene; Quitclaim deed conveying unto U. S. of America 8.64 acres situate within the borders of Camp White, Jackson County.
11381	Feb. 17	Real property. T. M. Davis, PRA, approves prices to be paid for parcels in which federal government is interested.
11385		Real property. Resolution authorizing acquisition. Personnel. Women to be trained in operation of motorized equipment. Apprentice wage to be paid while learning; standard wage when assigned to crew. Personnel. Convict labor. Legality of employing on seasonal crews to be investigated. Conference to be held with Governor, Warden and Parole Board. Log-hauling legislation. Engineer advises highways cannot be maintained under terms of Bill which would determine weight of loads by log-scale measure.
11386		Cottage Grove legislation. Bill re closure of certain streets in Cottage Grove. City requests compromise on streets to be closed. Denied.
	Feb. 18	Bids received on following projects: Ochoco Summit Rock Production; Crescent Rock Production;
11387		Chemult Rock Production; S. W. Grover St. Access Road, Portland, grading and paving. Maintenance projects. 1943 program of special maintenance projects approved. Advertising for bids authorized.
11388		Benton County. Albany-Corvallis Hwy. Building of Mrs. Florence Staley, destroyed by crew in removing from right of way, to be replaced by state-owned building.
11389		Baker County. Troy Ranch. Troys agree to damage settlement if certain work is performed. Work authorized subject to approval of Division Engineer. Umatilla County. Pendleton Airport. Lease of tract to government approved for five-year period. Multnomah County. Interstate Bridge. Claim against Carl Meyers, whose car was forced into traffic barrier by another car, to be transferred to second car.

11390	Feb. 18 1943	Postwar program. Oregon Grazing Dist. No. 6, Baker, urges adoption of program of public works for postwar period. Benton County. Pacific Highway West, Camp Adair. Claim against government for damages to highway. Letter to PRA urges reconsideration of claim. War Man Power Commission. Letter to Commission declares highway maintenance and repair to be essential activity. Log-hauling legislation. Bill penalizing log haulers for overweight violations. Substitution of more effective bill approved.
11391		Condemnation. Recommended offers. Resolution adopted: Right of way and detour road: Pacific Highway East. Right of way: Pacific Highway East. Hauling road: Boardman-Stanfield Highway.
11393		Multnomah County. Denver Avenue-Union Avenue Traffic Separation Project, Portland. Arrangements with Tower Sales & Erecting Co. for securing borrow materials approved.
11394		Douglas County. Umpqua Highway, Reedsport. Russell Hubbard confers re request for exchange of properties. Multnomah Co. Interstate Bridge. Portland Gravel Co.'s claim for damage to dredge through failure to open drawspan denied.
11395		Multnomah County. Portland. Conference with city officials. Navy's request for closing of Harbor Drive to traffic denied. Navy's request to park cars back of Market Building denied.
11396		Lincoln County. Siletz-Toledo Section. Homer G. Johnson's claim for additional compensation on contract denied. Clatsop County. H. A. Hein, Scappoose, complains that well has been contaminated by activities in state quarry. Emergency transportation permits. Report on violations. Secretary instructed to continue to warn overweight violators. Coos County. Seven Devils Chrome Mine Access Road. Contractor to be required to pay county for roadbuilding materials before final payment is made.
11397		Multnomah County. Traffic signals, Portland. Budget to be increased to take care of city's claim for work performed. Equipment. Purchase of one tractor loader to replace wheelbarrow men approved. Klamath County. Sprague River Road. Office of Indian Affairs requests state to design bridges. Approved.
11398		Delinquent accounts. Cancellation of list of accounts approved with exception of claim against PUC. Public Utilities Commissioner. Claim against PUC for survey for steam-heating plant not to be cancelled. Multnomah County. Bus-stop shelter, Glencullen. A. C. Barlo granted permission to erect shelter, if suitable location off right of way can be found. Multnomah County. Old Taylor's Ferry Road, S. W. Portland. Mrs. Martha Redmond's request to construct stairway denied.

Salem, Oregon, August 14, 1942

The State Highway Commission met in special session at 2:00 o'clock p. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Huron W. Clough arrived later.

The bid of Babler Brothers, contractors, Portland, in the amount of \$4,500, for 1.14 miles of oiling on the Shaniko Section of the Sherman Highway, in Wasco County, was opened and read in conformity with previously published notice. Action on this bid, which was the only bid received on this work, was deferred by the Commission until later in the session, pending investigation by the Engineer with respect to the unit prices bid on certain items. (Contract was awarded to Babler Brothers later in the day).

Following the disposal of this matter the Commission immediately conferred with Governor Charles A. Sprague and members of the lumber industry in the Board of Control Room, State Capitol, regarding matters pertaining to the transportation of logs over state highways. Representing the State Highway Department at such meeting were all three members of the Commission, the State Highway Engineer, the Attorney, and the Secretary. Present in behalf of the lumber industry were the following: Fred W. Packwood, Attorney, and T. H. Mills, representing the Columbia basin loggers; Truman Collins, representing the Ostrander Railway and Timber Company; Faye Abrams, representing the Booth-Kelly Lumber Company; H. C. Patton, representing the Hammond Lumber Company; R. A. Jeub, representing the Smith-Wood Products, Inc.; and H. J. Cox, A. W. Priaulx, and C. O. Marsten, representing the Willamette Valley Lumber Association; Senator F. M. Franciscovich, Attorney, Astoria, representing the Clatsop County Loggers; and Mr. J. R. Frum, representing the Crown Zellerbach Corporation. Mr. Packwood headed the group and introduced the individual members whom, he said, represent the lumbering industry throughout nearly all of the state.

Governor Sprague opened the meeting by explaining that it was called for the purpose of considering the question, "how can the greatest number of logs be furnished the mills without unduly breaking up highway bridges and road surfaces." He stated his realization of the problems that the logging industry is facing and acknowledged receipt of numerous appeals and complaints with respect to the enforcement of the requirements as set forth in statutes and as promulgated by the State Highway Commission in so far as they have to do with the operation of logging trucks on state highways. He pointed out that his interests and those of the State Highway Commission are the providing and the maintaining of the transportation system of the state, and explained that it

AUG 14 1942

is the object and purpose of the Highway Commission, in which he concurs, to maintain highways in a usable condition for all classes of traffic. The maintenance problem, he said, is acute because of present war-time conditions, and the Highway Department has a difficult problem of maintenance due to shortage of labor and inability to secure necessary equipment and supplies on account of the priorities. Further, that the Highway Department is functioning under a serious handicap and is maintaining the highway system under very adverse and trying conditions.

Governor Sprague also mentioned the penalty that is imposed on violators of the rules and regulations set forth for log haulers and referred particularly to the rule that requires the surrender of the PUC plates and the tying up of a truck for a period of four days for a gross overload. Such penalty in the past, he said, has not caused a severe hardship on the lumber industry as a whole; however, the situation has now changed on account of the war emergency, and it is alleged by certain groups that the enforcement of the penalty is seriously affecting delivery of the logs to the mills and the filling of emergency war orders; in fact, that the industry is now facing a shortage of logs this winter which situation could be improved if the penalty were dispensed with. He reiterated that the purpose of this meeting is to consider, from the standpoint of national defense, how a steady flow of logs to the mills can be maintained, providing for the continuous operation of logging trucks, while still preserving the road surfaces and highway structures without damage for the use of the general public. Governor Sprague stated his feeling that the Highway Commission would be responsive to any suggestions that will be helpful in the solving of this problem in the interests of the logging industry and the lumber business, which will not result in the too-rapid exhaustion of the capital that has been invested in the highway system.

The meeting was then turned over to the State Highway Commission. Chairman Cabell presided. He stated that members of the Highway Commission are in agreement with the remarks made by Governor Sprague and that it is the desire of this Commission to cooperate to the fullest extent so as to allow the maximum use of log-hauling equipment in the transportation of logs to the mills, and that the Commission wants to permit the maximum use of such equipment that is consistent with the preservation of road surfaces. The question, he said, is to so balance the use of the equipment with the maintenance of the highways for the maximum good of everyone concerned. This, he added, involves two questions: first, are the presently established maximum load limits as great as is possible to permit them; secondly, are the logging trucks being unnecessarily delayed in connection with the enforcement of the rules and regulations, particularly at the weighing scales.

In answer to the first question, he stated that the Commission is now permitting gross loads up to the limit to which it is possible with due regard to preservation of road surfaces and bridge structures. Gross loads in excess of the presently established maximum, he said, could be transported over state highways for a short time, but the added stress on the road facilities would soon destroy them and, as a result, the predicament of the logging and lumbering industries then would be much worse than it is at the present time. He

also said that the Commission would be glad to spend more money to maintain the road surfaces in good condition for transportation of loads of greater gross weight, if it were possible to do so. However, the Commission is confronted with a shortage of labor and equipment and with governmental control of materials and supplies, which are a major handicap to the proper functioning of the maintenance organization. He added that the Commission is now allowing an overstress as high as 50 per cent on roads and structures and cannot increase this limit without increasing the dangers of road-surface failures and the collapse of bridges. The bridge matter, he said, is particularly serious. He also mentioned that the Highway Commission feels that it must cooperate with the federal agencies, particularly with the Office of Defense Transportation, in their efforts to preserve rubber, and pointed out that the gross loads now authorized by the Commission are, in some instances, in excess of those allowed by the Office of Defense Transportation.

As to problem number two, which has to do with the enforcement of the rules and regulations, he gave as his thought that the allegation, that the four-day suspension of log-hauling equipment for overloading is working a hardship on the lumbering industry, is an exaggeration. In support thereof, he quoted the following from a report of the operations of state weighmasters covering seven days of actual weighing of logging trucks between August 1 and 10, 1942, during which period 3,952 loads were weighed at ten weighing stations:

Total number of loads weighed - - - - -	3,952
Number of trucks involved - - - - -	2,200
Total violations - - - - -	52 or 1.31%
Violations requiring surrender of PUC plates - - -	11 or 0.28%
Average number of trucks hauling logs daily - - - -	3,741
Average number of trucks weighed daily - - - - -	314 or 8.4%
Average number violations daily requiring surrender of PUC plates - - - - -	1.57 or 0.04%

He pointed out that, according to this report, an average of only six trucks are suspended from operating in every four-day period which, in his estimation, is a very low percentage considering the total number of trucks that are engaged in this business.

The Commission, he said, would like to modify the present penalty if some means of enforcing the load limits other than the suspension of the equipment could be provided. He suggested that it would be helpful if the logging and lumbering industry would ask their employees to be particularly careful so as to avoid overloading, and that it would also help if Justices of the Peace would impose fines large enough to hurt the violator but not to the detriment of the lumber industry. However, in the past, the Commission has found it difficult to secure sufficient penalties from the Justices of the Peace to make a violation a hardship on the operator. He repeated that the Highway Commission would be very happy if the problem can be solved in some manner that would not require the suspension of the hauling equipment, and added, that if the present practice of taking equipment out of service for four days should be discontinued now would be the time to try it when the roads are in good condition, it being understood that the present penalty would be restored in the event the arrangement did not prove satisfactory.

AUG 14 1942

Mr. Mills quoted statistics to show that the inventory of logs taken out this year by the Northwest logging industry in the Columbia River district is only 50 per cent of that taken out a year ago, and advised that the same condition obtains in the Puget Sound area. This is positive evidence, he said, that the lumber industry is in a serious predicament, particularly considering that the demand for lumber is greater this year than it was last year. The Highway Commission, he said, is not in a position to assist the lumbering industry in their problems of securing repair parts and equipment; however, it is felt that the Commission could render considerable help by modifying the rules and regulations that govern the transportation of logs to the mills, so as to permit a continuous flow of logs to the mills, which then could keep running without interruption. He suggested the discontinuance of the penalty which takes a truck out of service for four days on account of a gross-weight violation, and the substitution therefor of a penalty based on fine only. He held no brief for the willful violator of the requirements; however, gave as his opinion that the penalty now imposed on the violator whose gross loads do not exceed the allowable load more than two or three hundred pounds is too severe. He also suggested modification of the regulations which provide for the weighing of each load of logs by highway department weighmasters so as to avoid delays on that account.

Responding thereto Chairman Cabell advised that the Highway Commission is favorable to discontinuance of the suspension penalty, if some other way can be found to secure reasonable compliance with the regulations. He again suggested the doing away with the four-day penalty as a trial proposition to ascertain the reaction thereto by the operators; however, advised that it would be necessary to continue the present practice of weighing all loads inasmuch as that is the only way in which a fair comparison can be made. Under this method, he said, all violations would be cited to the Justices of the Peace, who would impose a fine as a penalty in each instance.

Senator Franciscovich gave as his opinion that the State Highway Commission has gone as far as it possibly can in the matter and, in his estimation, should not be asked to increase the present allowable gross weights. The paramount need at the present time, he said, is modification of the penalty for gross-load violations so as to expedite the delivery of logs to the mills. He suggested the cancellation of the four-day penalty and the order that requires weighmasters to weigh every load of logs that passes the scales. He gave as his thought that weighmasters, with a little experience, would be able to judge the approximate weight of a load of logs by inspection rather than by actual weighing, which would necessitate the weighing of only such loads which, in their judgment, appear to be in excess of the approved weight. Such arrangement, he said, would eliminate the grouping up of trucks at the scales and the losing of time for weighing operations, and would enable each operator to deliver two or three more loads of logs to the mills each day.

Chairman Cabell doubted such a saving of time and gave as his thought that the practice of weighing all trucks should be continued at least for the time being, although there is some justification for a modification of the present rules to provide for the waving on of trucks in the event of congestion of traffic.

AUG 14 1942

At the request of Governor Sprague, Mr. Jeub advised of the conditions prevailing in the Coos Bay district. He said that their main complaint is that PUC plates are taken away from the loggers whose loads weigh less than five per cent in excess of the allowable weights. He further stated that there is a big shortage of logs in his district, the present supply being 50 per cent below normal, and something must be done to increase the flow of logs to the mills; otherwise the mills will have to close down during the winter, it being necessary because of weather conditions to store logs during the summer for winter operations of the mills. He concurred in the suggestions of the other speakers with respect to the cancellation of the four-day suspension penalty and the penalizing of the violators by fine only.

Further suggestion was offered by Senator Franciscovich as follows: that the Highway Commission do not take out of service the logging trucks that are involved in overweights, but resort to the fine penalty only and, if the Justice of the Peace who imposes the fine does not cooperate by requiring a fine in sufficient amount, then that the plates be taken away from the logging operator for the regular period.

Mr. Frum stated that a check of logging trucks that work for his company reveals that the time lost by these trucks at the highway department scales aggregated between thirteen and fourteen hours per truck per month, which would account for a great many loads of logs during that period. The lost time, he said, is not all accounted for by the actual weighing of the trucks, but includes the time lost in slowing down at the truck scales and getting under way again after the weighing. He gave as his thought that about 75 per cent of the lost time could be recovered if the weighmasters were not required to weigh all loads.

Chairman Cabell concluded the meeting by stating that the Commission would give this matter serious consideration and hoped to be able to arrive at a solution in the very near future.

The meeting was adjourned at 3:15 p. m., following which the Commission reconvened in Room 325, State Office Building, for disposal of routine matters, all Commissioners being present and participating.

Reconsideration was given by the Commission to the matters brought out in conference in the office of the Board of Control, with respect to truck-hauling of logs over state highways. After considerable discussion the Commission decided unanimously to discontinue the practice of taking up the plates of logging operators that are found to be transporting loads weighing in excess of the allowable limits. Such modification is to be put into effect on Monday, August 17, 1942.

The Commission also decided to continue the weighing of all loads of logs except in cases where such weighing causes a grouping of logging trucks at the scales and creates a hazard to other traffic. On such occasions, the Commission authorized the "waving by" of those trucks which, in the judgment of the weighmasters, are not carrying loads in excess of the allowable weight.

AUG 14 1942

The Commission deferred a decision whether or not it will discontinue the weighing of all logging trucks pending a report from the Engineer at the next meeting. The Engineer was thereupon instructed to conduct an experiment in the meantime so as to determine whether or not such method of handling the situation will prove satisfactory.

Reconsideration was also given by the Commission to the bid received from Babler Brothers at the beginning of the session, for the oiling of the Shaniko Section of the Sherman Highway, in Wasco County. The Commission by unanimous vote awarded the contract to Babler Brothers at their bid of \$4,500 upon recommendation of the Engineer, who advised that a study of the bid reveals that it is in conformity with the Commission's requirements with respect to this job and is within the estimated cost of the project.

The Commission by unanimous vote approved minutes of the meetings held on March 19 and 20, April 1 and 2, and April 30, 1942.

The Engineer brought up for discussion the matter of requesting occupational deferment for "key men" who are employed in the maintenance department. He advised that the Highway Department is losing many of its maintenance men by reason of enlistments and the draft and, if something is not done to maintain the organization, it will not be long before a serious condition develops. He requested authority to ask deferment of 466 maintenance men who are under 45 years of age. The Commission approved the request by unanimous vote.

The Engineer reported on investigations that have been made of the request of Mrs. Kate MacDonald, Dayville, for the improvement of her irrigation ditch, which she alleges was severely damaged during the construction of the Ochoco Highway across her property. He recited the history of this case and advised that repairs would cost about \$1500.00. The Commission questioned if the state is liable for this expense in view of the fact that the right of way for the project was originally acquired by Wheeler County at the time that the highway was constructed in 1930. Assistant Maintenance Engineer, W. W. Stiffler, who was present, advised that he personally has investigated this matter and is convinced that the state is liable. The damage, he said, was done by the state's contractor when the highway was built and was never properly repaired, notwithstanding that Mrs. MacDonald has called the matter to the attention of the local highway department employees annually since then. He suggested approval of the repair work, which consists principally of reconstructing the diversion dam and the intake to the irrigation ditch, not only because he considers the state liable, but in order to avoid a law suit in the event that Mrs. MacDonald loses her crop by failure of her water supply. In view of this information the Commission approved the project by unanimous vote and thereupon authorized the Engineer to proceed with the work, providing Mrs. MacDonald will sign a waiver releasing the state from further obligations.

The Attorney brought up for discussion the settlement with Mr. Lloyd E. Stafford for the moving of a barn from land purchased from him as right of way in connection with the construction of the Willamette Highway, near Goshen. He recalled that the original deal with Mr. Stafford provided, among other

things, for the moving of the barn, for which he was to be paid the sum of \$600.00. However, before the moving operations were commenced the barn was destroyed by fire, notwithstanding which Mr. Stafford demands payment of the \$600.00. Subsequent investigation reveals, he said, that the barn was insured in the amount of \$700.00, and that Mr. Stafford has collected such sum from the insurance company, and has also collected the sum of \$400.00 insurance that he carried on the contents of the building. He requested instructions in view of the circumstances and recommended that the payment be not allowed. The Commission approved the recommendation subject to the condition that it has no legal obligation to pay Mr. Stafford, or unless the Commission is required to pay him by court order.

The Engineer also reported on his inspection of the Leonard and Slate contract No. 2483 for the construction of the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway, in Union County, in company with Commissioner Oliver. As a result of this inspection and subsequent conference with the contractor, he said tentative arrangements were made with the contractor to proceed with the work on the following basis: the state is to rent to the contractor one crushing plant, complete or in part as needed. The plant is to be transported, set up and operated by Mr. O. C. Yocom, subcontractor. The state is to charge a reasonable rental for the equipment and is to furnish all necessary replacement parts for which the contractor will pay. No rental is to be charged while the plant is shut down for want of repair parts or supplies. The plant is to be set up at the east end of the project in a new quarry to be acquired by the state, and the state is to pay the contractor an additional ten cents per ton for crushed rock furnished from this source, because of the extra hauling involved. The contractor is not to be required to start operations on this project until he has completed the contract on the Santiam Highway, and no penalties are to be imposed for overrun of the specified time limit. The state is to accept the project as completed when the surfacing is finished and the necessary mineral aggregate is placed in stock piles. The oiling work is to be cancelled from the contract because of difficulties in securing oil for the job. The price to be paid for mineral aggregate in stock piles is to be one-half of the unit price contained in the bid by the contractors for mineral aggregate in place. He recommended approval of this arrangement in view of the fact that this is not a project needed in connection with national defense and therefore is not entitled to a high priority rating, making it difficult to secure equipment, repair parts, materials and supplies that are needed for the job. The Commission considered the arrangement outlined by the Engineer to be the best possible to obtain under the circumstances, and thereupon by unanimous vote approved the recommendation.

A request was presented from Major Theron W. Bean, officer in charge of the Camp White Army Cantonment at Medford, for the construction of right of way fences along state highways throughout the cantonment area. The Engineer advised that to do what Major Bean requests will take about 1600 rods of fence, which, at \$2.00 per rod, will cost about \$3,200, exclusive of the fence wire which Major Bean states will be furnished by the government. He recommended approval of the request. The Commission approved the recommendation.

AUG 14 1942

The Commission discussed briefly and ordered filed correspondence received from the Public Roads Administration pertaining to the request of Mrs. Joan C. Woovallas, Portland, for the construction of an access road to a prospective coal mine on property situate near Molalla, Oregon.

The Attorney presented a form of Order providing for the stopping of all vehicular traffic at certain dangerous main-line railroad grade crossings throughout the state, which matter was discussed and approved by the Commission at the previous meeting. The provisions of the Order were approved by the Commission and the Secretary was thereupon instructed to enter the same in the minutes of the meeting held on July 23, 1942, as evidence of the action taken by the Commission at that time. The Commission thereupon signed a copy of the Order for the records and files.

The Commission had under consideration approval of the proposed agreement with the United States Army with respect to the maintenance of small airplane landing fields in Oregon. The Engineer advised that the Army is building numerous small auxiliary airfields throughout the state but has made no provision for maintaining the same; further, that the Army authorities feel that the maintenance could best be handled by state forces, which are already organized and functioning along similar lines and, accordingly, have requested approval of such arrangement. All of the work, he said, will be accomplished in strict accordance with state specifications and methods as used in similar work on state highways, and the government has agreed to reimburse the state for the actual expense involved, including salaries, rental of equipment, et cetera. He recommended approval of the request. The Commission approved the recommendation and thereupon signed an agreement with the United States War Department covering the matter.

A resolution was presented from the County Court of Umatilla County requesting the selection and designation as a state secondary highway, of a road 0.41 mile in length extending from the Boardman-Stanfield Highway to the Umatilla Ordnance Depot, in Section 27, Township 4 N., R. 27 E., W. M., Umatilla County. The Engineer recommended approval of this request in view of the fact that the road was constructed by the state and is being maintained by the state. The Commission approved the recommendation and thereupon adopted the following resolution covering the matter:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Umatilla County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the

AUG 14 1942

Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Umatilla County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Ordinance Depot Secondary Highway No. 338

Beginning at a point on the Boardman-Stanfield Highway at Engineer's Station 803+76.6 in the NE $\frac{1}{4}$ of Section 27, T. 4 N., R. 27 E., W. M.; thence northerly to the Umatilla Ordinance Depot, a distance of approximately 0.41 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Secretary presented the following county resolutions with respect to sections of state highways that have been abandoned by the Commission because of reconstruction of such sections on revised alignment:

Resolution from Baker County Court with respect to the abandoned portion of the Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway, in which the county assumed jurisdiction over this section.

Resolution from Jackson County Court in which the county elects to abandon a portion of the Eagle Point-McAllister Springs Section of the Little Butte Secondary Highway and to retain for county road purposes another portion of said section of highway.

The Commission approved the resolutions and ordered them filed.

The Engineer reported that in conformity with authority previously given him by the Commission, he has awarded the following contracts, the conditions of the awards having been satisfied:

AUG 14 1942

Grading and paving Sunderland Avenue Access Road Project on N. E. Elrod Road near Portland, Multnomah County. Bids taken July 23; contract awarded July 25, 1942, to Porter W. Yett, low bidder.

Construction of two bridges on Sunderland Avenue at Portland, Multnomah County. Bids taken July 23; contract awarded July 25, 1942, to Lindstrom Brothers, low bidders.

Surfacing on Section "A" of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. Bids taken July 23; contract awarded July 27, 1942, to E. C. Hall Company and J. C. Compton, low bidders.

Grading and surfacing Section "B" of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. Bids taken July 23; contract awarded July 27, 1942, to E. C. Hall Company, J. C. Compton and McNutt Bros., low bidders.

Surfacing Soda Mountain Mine Access Road Project on the I.O.N. Secondary Highway, in Malheur County. Bids taken July 23; contract awarded August 11, 1942, to O. C. Yocom, low bidder.

Grading and topping Seven Devils Chrome Mine Access Road Project, west of Coquille, in Coos County. Bids taken July 23; contract awarded August 12, 1942, to Tru-Mix Concrete Company, low bidder.

The Commission confirmed the awards as reported.

The Engineer reported that repairs have been completed on the Stillwell Bridge over the Trask River on the Netarts Secondary Highway, in Tillamook County, and that there no longer is need to maintain the ten-ton load limit for which this bridge has been posted the past several months. He recommended the adoption of an order lifting the reduced load limit. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 10th day of January, 1941, at a meeting of the State Highway Commission, all of the members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain State highway bridges, including the following, to-wit:

NETARTS SECONDARY STATE HIGHWAY No. 131

131-0.77 Stillwell Bridge, 10 tons, Tillamook County

and

WHEREAS, subsequent to the passage of said resolution, the said above-named bridge has been repaired so that it is not longer necessary or desirable to maintain the reduced load limit set out in said resolution;

AUG 14 1942

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the following bridge, to-wit:

NETARTS SECONDARY STATE HIGHWAY No. 131

131-0.77 Stillwell Bridge, Tillamook County

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridge shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished the County Clerk of Tillamook County, in which county said bridge is located, and the Superintendent of the Department of State Police for his information.

The Secretary presented a communication from Mr. Ernest E. Schrenk, Creswell, Oregon, requesting permission to transport loads of flax over state highways from his ranch near Creswell to Springfield, which involves continuous movements of loads in excess of the legal width limits. The Commission considered that continuous movements of such width over this highway will create too great a hazard for other traffic and thereupon denied the request.

The Commission discussed briefly a communication from Joseph E. Keller, Consultant on State Barriers for the Office of Emergency Management, in which Mr. Keller states that the position taken by the State Highway Commission with respect to the transportation of gross loads over state highways is, in his estimation, entirely sound. The Commission expressed pleasure at receiving such information and ordered the communication filed.

The matter of permitting log haulers to truck-haul logs during the three-hour period between 9:00 p. m. and midnight, which privilege is now prohibited, had the attention of the Commission. It was the thought of the Commission that the need for lumber for defense purposes justifies the giving of extra concessions to log haulers and, in view thereof, the Commission voted unanimously to allow log haulers to operate at any time during the day or night, provided the movements during the hours of darkness are properly lighted in conformity with statutory requirements.

A letter was presented from Mr. E. P. Leavitt, Superintendent of Crater Lake National Park, relative to maintaining travel this coming winter over highways in the park and adjacent thereto. Mr. Leavitt advises that there are possibilities that Crater Lake National Park will not be kept open during the coming winter because of shortage of man power, restrictions on fuel oil, tires and gasoline, and inability to secure repair parts for snow fighting equipment and other equipment. He inquired, if Crater Lake National Park were to close up entirely this winter and if the National Park Service

AUG 14 1942

decided not to maintain travel on the highways within the park, including the park section of the Crater Lake Highway, would the State Highway Commission discontinue snow removal operations on the Crater Lake Highway up to the park boundaries, or would the Commission keep the Crater Lake Highway open throughout the park as a possible public service. He also inquired if the Highway Commission would maintain travel over the Union Creek Road leading to Diamond Lake and its connection with The Dalles-California Highway, near Chemult, if it was decided not to maintain travel on the Crater Lake Highway through the park area. The Commission decided in view of the fact that there has been considerable falling off of highway travel because of war conditions and because undoubtedly there will be a further decrease in travel as time goes on, that it would make no effort to maintain travel over the Crater Lake Highway through Crater Lake Park area or even up to the boundaries of the park, in the event the National Park Service elects to close up the park during the winter season. The Engineer was instructed to convey such information to Mr. Leavitt and to advise him further that the Highway Commission will offer no objections either to the closing of the park or the park roads this winter, if the National Park Service considers that to be the proper thing to do.

A resolution was presented from Columbia County Pomona Grange No. 18, Rainier, Oregon, in which the Commission was requested to "cut all weeds growing in the rights of way of the various roads and highways" so as to prevent the spread of noxious weeds and plants over adjacent farm lands. The Engineer recalled that the Commission sometime ago authorized the discontinuance of mowing operations along highway rights of way, because of the shortage of labor to carry on this class of work and in order to conserve funds for other purposes, and that that order is now being carried out. He gave as his thought, however, that there is some justification in the Grange's request in order to prevent the spread of noxious weeds to the adjacent farm lands, particularly to the lands of farmers who are making efforts to eradicate the weeds from their holdings. The Commission concurred in the Engineer's viewpoint and thereupon authorized him to conduct mowing operations in such locations as evidence of cooperation with the farmers in that respect.

The Engineer brought up for discussion the question whether or not contractors on state highway work shall be required to comply strictly with the contract requirements relating to minimum wages and other employment matters, particularly should contractors be required to pay double time for overtime for services rendered, as provided by state law, or should they be allowed to pay their employees on the time and one-half basis of payment for such overtime, which is the rate specified in the federal law. He particularly referred to the contractors engaged in highway work on the Pacific Highway West, between Monmouth and Corvallis, in which instance the contractors have refused to pay double time as required by the state law and as required by the provisions of the contract, because they have received information to the effect that they need pay only time and one-half for overtime. (See Engineer's letter of August 14, 1942, directed to the State Highway Commission for details). He requested instructions. The matter was discussed at some length but a decision with regard thereto was deferred by the Commission until the next meeting.

AUG 14 1942

The Attorney requested authority to employ expert witnesses in connection with the Commission's pending lawsuit against the California-Oregon Power Company and the Southern Pacific Company to recover the cost of repairing The Dalles-California Highway near Algoma, Klamath County, which was severely damaged as a result of a break in a dike along Upper Klamath Lake. He stated that the case is now being prepared for trial and it would be desirable and advantageous to the state's case if the testimony of expert witnesses were secured. He recommended employment of two such witnesses to assist in working up the case and to testify at the trial, and suggested two prominent engineers; viz., Mr. J. C. Stevens, Portland, whose services are available at the rate of \$50.00 per day while working up the case and at \$100.00 per day while giving testimony, and the other, Mr. S. T. Harding from the University of California, Berkeley, who is asking a straight \$50.00 per day for his services. In view of the importance of this case and the amount of the damages involved, the Commission considered it advisable to secure such expert testimony and thereupon authorized the Attorney to arrange for the services of these two engineers at the rates mentioned.

Chairman Cabell reported receipt of a request from a Mr. C. H. Burgess, rancher at Fossil, Oregon, requesting permission to conduct farming operations on the right of way acquired for the Shaniko-Fossil Secondary Highway. It was brought out in the discussion that the construction of this proposed highway improvement was not contemplated in the near future on account of the war situation, and there will be no objections since the state will not be discommoded by the use of the right of way for the purpose intended by Mr. Burgess. In view thereof the Commission tentatively approved the request subject to the condition that the state is not held liable for loss of crop in the event the state takes the land sooner than is now anticipated.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amount authorized and allocated for such survey expenditures, are as follows:

Quarry - - - -	9-1447	- Horse Ridge-Brothers Section, Central Oregon Highway, Deschutes County	1st authorization - \$100
Reconnaissance	215-1441	- Sams Valley-Evans Creek Road, Ramsey Canyon Access Road, Jackson County	1st authorization - \$450
Plans - - - -	26-1462	- Union-Denver Avenue Junction, Pacific Highway East and West, Multnomah County	1st authorization - \$1500
Location - - -	10-1435	- Myrtle Creek-Canyonville Section, Pacific Highway, Douglas County	1st authorization - \$10,000

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and adopted the following resolution in regard thereto:

AUG 14 1942

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
6 B 5-14	206-1428	Coos	Location	Seven Devils Chrome Mine	Chrome Access Road
6 B 5-20	215-1434	Jackson	Location	Bybee Springs - Sams Valley	Medford Cantonment Access Road
6 B 5-20	215-1435	Jackson	Location	North Boundary	" "
6 B 5-20	215-1436	Jackson	Location	South Boundary	" "
6 B 5-20	215-1437	Jackson	Location	Bybee Bridge	" "
6 B 5-20	215-1438	Jackson	Location	Dodge Bridge-Haas Ranch	" "
1 A 1-39	28-1413	(Sherman (Wasco (Jefferson	Reconnaissance	Columbia River-Madras	Sherman & The Dalles-California
6 B 5-17	30-1442	Umatilla	Location	Milton-Washington State Line	Oregon-Washington

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

AUG 14 1942

R. G. Barnes, contract No. 2415, for the construction of bridges on the Scappoose-St. Helens Section of the Columbia River Highway, in Columbia County, requested an extension of time from August 31, 1941, to July 13, 1942, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to the fact that the fills at the ends of the several structures were not completed, and it was impossible to properly route traffic. Further, that this interruption delayed the rest of the work until the period of wet weather and labor shortage. The Engineer advised that it was necessary to coordinate the bridge work with the work of the grading contractor on the adjoining section and, because of failure of the grading contractors to complete the approach embankments to the bridges, Mr. Barnes was unable to complete his work on time. The approach embankments, he said, were completed on October 20, 1941, following which Mr. Barnes resumed his work and by December 23, 1941, did everything that was required under his contract except the painting of the handrails which had to be deferred until suitable weather in the spring. Such painting work, he said, was accomplished between May 5, 1942, and July 13, 1942. Considering the cause of Mr. Barnes' delay, he said, indicates that he lost only nine days within his contract time limit. He recommended in view of the circumstances that the extension of time requested be granted, but that Mr. Barnes be charged with the excess engineering charges incurred between October 29 and December 23, 1941, and between May 5 and July 13, 1942. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. L. Rigdon, contract No. 2474, for grading, surfacing, oiling and bridge construction on the Oak Creek-Marks Ranch Section of the North Umpqua County Road, in Douglas County, requested an additional three days extension of time from June 30, 1942, to July 3, 1942, within which to complete this job. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on May 22, 1941, and according to the provisions thereof should have been completed by September 30, 1941; however, that was not possible because the subcontractor on the oiling work could not perform his part of the work due to a previous contract with the federal government for the paving of an airplane landing field. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2415, 2474, 2496 and 2530, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

AUG 14 1942

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2415, with R. G. Barnes, for remodeling and widening bridges on the Scappoose-St. Helens Section of the Columbia River Highway, in Columbia County. Completed July 13, 1942.

Contract No. 2474, with E. L. Rigdon, for grading, surfacing, oiling and bridge construction on the Oak Creek-Marks Ranch Section of the North Umpqua County Road, in Douglas County. Completed July 3, 1942.

Contract No. 2496, with Rogers Construction Company, for grading and surfacing the Warner Summit-Mud Creek Section of the Warner Secondary State Highway, in Lake County. Completed July 13, 1942.

Contract No. 2530, with Tri-State Construction Company, for the construction of two dwellings and one equipment building at the Alkali Lake Maintenance Station on the Lakeview-Burns Highway, in Lake County. Completed May 6, 1942.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements et cetera as follows:

Agreement with Coos County covering removal of rock from county-owned quarry for use on Seven Devils Chrome Mine Access Road.

Agreement with the City of Jordan Valley covering maintenance of the South Mountain Mine Access road within the city limits.

Agreement with F. R. Hewett covering rental of state-owned equipment.

Two agreements with Axman and Miller covering rental of state-owned equipment.

Three agreements with O. C. Yocom covering rental of state-owned equipment.

AUG 14 1942

Agreement with Hauser, Malcom and Tiesleu covering rental of state-owned equipment.

Agreement with United States War Department covering maintenance of small airplane landing fields.

Order designating dangerous railroad crossings and requiring vehicles to come to a stop before crossing railroad tracks at grade.

Extension rider agreement with the Oregon-Washington Railroad and Navigation Company and the Union Pacific Railway Company extending lease of storage sites at Speece, Gilliam County, to December 31, 1942. Right of way file No. 5539.

Agreement with Pacific Power and Light Company providing for installation of one power pole adjacent to the highway department truck scales southwest of Pilot Rock.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:10 p. m.

R. H. Baldock
State Highway Engineer

H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

Herman Oliver
Commissioner

Herman Oliver
Commissioner

Portland, Oregon, August 27, 1942

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was excused from attending this meeting.

Bids, as follows, for highway construction projects, sale of building in Eugene, and sale of materials in railroad trestle, were opened and read in conformance with previously published notices, following which Chairman Cabell announced that the awards would be made at 2:15 p. m. in the same room:

11199

BAKER-HOMESTEAD AND HALFWAY HIGHWAYS
RICHLAND-HALFWAY ROCK PRODUCTION PROJECT

No bids received on this project

CENTRAL OREGON HIGHWAY
BUCHANAN ROCK PRODUCTION PROJECT

No bids received on this project

THE DALLES-CALIFORNIA AND WILLAMETTE HIGHWAYS
WALKER MOUNTAIN ROCK PRODUCTION PROJECT

No bids received on this project

WILLAMETTE HIGHWAY
SALT CREEK FALLS-ODELL BUTTE ROCK PRODUCTION PROJECT

No bids received on this project

LAKEVIEW-BURNS HIGHWAY
ALKALI LAKE FLIGHT STRIP PROJECT

C. A. Dunn

\$204,368.00

OLD OREGON TRAIL AND CENTRAL OREGON HIGHWAYS
DEAD OX FLAT-CAIRO JUNCTION ROCK PRODUCTION PROJECT

Chester T. Lackey

\$25,000.00

I.O.N. SECONDARY HIGHWAY
ROME FLIGHT STRIP PROJECT

Clifford A. Dunn

\$201,645.00

PENDLETON-JOHN DAY HIGHWAY
NYE JUNCTION-GRANT COUNTY LINE ROCK PRODUCTION PROJECT

SALE OF RESIDENCE BUILDING IN EUGENE

Building No. 8948 (Former owner Katherine Stewart)

Arnold Lindeland

\$360.00

AUG 27 1942

SALE OF MATERIALS IN RAILROAD TRESTLE
NEAR SUNSET CAMP, TILLAMOOK COUNTY

No bids received

Messrs. Charles Leonard and Fred Slate, contractors for the operation of the Willamette River Ferry at Wilsonville, were present and discussed with the Commission matters pertaining to their contract. They pointed out that their present contract expires on January 1, 1943; however, it contains a provision for extending the contract for a two-year period at the same rate. They asked the Commission to waive the option under such provision in view of the condition of the times, alleging that they are operating at a loss because of shortage of labor and prevailing high labor costs. They stated their willingness to continue operating at the rate specified in the contract until it expires but gave as their thought that it would be only fair if the Commission would readvertise the furnishing of this service at such time so as to obviate further losses to them. Chairman Cabell advised that in normal times the Commission's answer would be no; however, in view of existing conditions the Commission is willing to give the matter consideration but is not ready to make a definite decision today. He suggested that the contractors present their arguments for the change in writing. The contractors agreed to do this. These are to be given to the Engineer for study and report back to the Commission as soon as possible. Commissioner Oliver concurred.

The Engineer brought up for discussion a plan for the separation of vehicular traffic at the intersection of Denver and Union Avenues, Portland. He exhibited a map showing the proposed layout which, he said, is the result of some two years' study of various schemes to control the traffic at this point and is the best plan that can be devised. The separation of traffic at this intersection, he said, is badly needed in normal times and is particularly needed now because of the confusion caused by traffic to and from the shipyards. He suggested that it would be advisable to proceed with the acquisition of needed right of way now so the project can go forward without delay as soon as federal funds can be obtained to finance construction. He particularly pointed out the need to purchase right of way from Westerlund Boat Company inasmuch as this company has plans to enlarge its present building facilities and must know in the immediate future just what the Highway Commission intends to do. He estimated the cost of construction using timber at \$250,000, and the cost of extra right of way needed at between \$40,000 and \$60,000. After considerable discussion the Commission authorized the Attorney to proceed with the securing of options for the right of way. Chairman Cabell was authorized to pass on the Westerlund property so this particular deal can be closed as soon as possible. It was understood that the balance of the right of way is to be presented to the Commission for approval in the regular manner.

A delegation from Coos County, consisting of County Judge E. L. Peterson, W. E. Cross and Wallace B. Dement, representing the Fat Elk Drainage District, and E. L. Detlefsen, representing the Port of Bandon, came before the Commission and asked for state aid in the construction of a short revetment to control flood waters in the Coquille River at a point opposite the town of Norway, about five miles south of Coquille. Judge Peterson headed the group

AUG 27 1942

He advised that, as a result of the raising of the highway grade across the low lands west of Coquille, waters of the Coquille River back up and, during the period of freshets, the river breaks over its bank at the point above mentioned, inundating privately owned land in the Fat Elk Drainage District, seriously impairing the use of the land and endangering the highway. He gave as his thought that, unless something is done soon to control the water, it will not be long before a new channel is formed and the water is entirely diverted from the present channel. It was his opinion that the protection of the highway is ample justification for an expenditure of state highway funds for constructing the revetment and urged favorable consideration by the Commission from that standpoint. He advised that others who will participate in such costs are Coos County, the Port of Coquille, Fat Elk Drainage District and Smith Wood-Products, Inc.; and it is planned that each will pay one-fifth of such expense.

The Engineer advised that investigation reveals that approximately 200 feet of revetment is required, which would cost about \$7,500, including engineering and contingencies. Judge Peterson advised that Coos County is in position to perform the construction work but would like the state to furnish the engineering. The Engineer suggested that, if the state participates in the project and furnishes the engineering, the engineering expense should be included in the total costs for equal distribution among all parties; also, that the state should be relieved of any obligation with respect to maintenance of the revetment. The Attorney advised that the Commission has legal authority to contribute state highway funds for this purpose if it is necessary in order to protect the state highway. The matter was discussed at some length but a decision thereon was deferred until the afternoon session. (Approved by Commission later. See ahead for final action.)

Judge Peterson also asked the Commission to widen the Oregon Coast Highway about six feet at its intersection with the Lampa Creek county road, where considerable traffic enters the highway. He explained that the county road carries a large volume of traffic, which cannot safely enter the highway under present conditions because of the short sight distance. In his estimation, the widening of the highway would to a large extent alleviate this condition. The Engineer was instructed to investigate the condition and to report his findings, together with an estimate of the cost, at the next meeting.

A delegation from Linn County, including County Judge J. J. Barrett; County Commissioners H. A. Renninger and Claude G. Smith; County Engineer W. W. Larsen; and W. G. Phelps and Leo Howard, log haulers, Lebanon, was present and asked the Commission to assume jurisdiction over the county road between Brewster and Lacombe. Mr. Phelps headed the group. He advised that he represents operators who truck-haul logs for the Hammond Lumber Company from the Lacombe district into Lebanon; and, because of a ruling of the Linn County Court which prohibits the hauling of logs over the Brewster-Lacombe Road, they are required to use another county road which is some six miles longer. The county court, he said, is willing for them to use the Brewster-Lacombe Road, which is oiled throughout, if the State Highway Commission will agree to maintain the same at state expense. He urged the Commission to designate the Brewster-Lacombe Road a state secondary highway so as to reduce their haul mileage and save unnecessary wear and tear on their equipment, particularly their tires.

AUG 27 1942

The engineer advised that investigations reveal that the Brewster-Lacomb Road was constructed for use by light traffic only and will not stand up under log hauling traffic. To put it in condition to withstand such traffic, he said, would cost about \$208,000 and in addition thereto it would cost about \$2,680 annually for maintenance and about \$4,000 annually for extra gang patching; further, that to strengthen the present surfacing to accommodate empty logging trucks would cost about \$20,000 and to maintain the road would cost \$3,350 annually with an additional expenditure of about \$4,000 annually for extra gang patching work. He pointed out that under the present governmental rules and regulations it would be almost impossible to secure approval for such an expenditure even if the Commission were able to secure a priority rating high enough to allow the work to proceed. Furthermore, there is a question whether or not it would be possible to secure a contractor to undertake the work. Chairman Cabell advised that the Highway Commission is having a hard time meeting its present obligations, and in view of the circumstances he could not see how the Commission could justify the assumption of additional ones.

Mr. Phelps then suggested that the state maintain the present road and let the loggers use it. Chairman Cabell replied that it is becoming more and more difficult for the Commission to secure rock for road repairs and as evidence thereof pointed out that the Commission at this meeting advertised seven rock production projects for bids but received only one bid for one of them, which indicates that the contractors are not interested in this kind of work. He suggested that it might be possible to secure federal access road moneys to finance the project in view of the commodity which is to be transported over the road. Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and advised that logging roads are eligible to a certain extent for federal access road moneys but he is not in position at this time to state definitely whether or not this road would qualify. The suggestion was made that the loggers arrange with the Snow Peak Logging Company for the use of its private road which approximately parallels the county road between the same points. Mr. Phelps advised that the charge for the use of this road is prohibitive and could not be met.

Judge Barrett also urged the Commission to take over the Brewster-Lacomb Road, advising that Linn County is not financially able to assume the cost of maintaining county roads that are used by log haulers. He particularly urged state maintenance of the road so that the loggers could use it at least in returning empty to the woods. Chairman Cabell concluded the discussion by stating that the Highway Commission is not in position today to assume this obligation in view of decreasing state highway revenues so necessarily must deny the request. Commissioner Oliver concurred.

Mr. C. T. Leedy, Sisters, was present and urged, in behalf of the people of his town, the filling in of the gutters along the McKenzie Highway for three or four blocks in Sisters so that cars will not be damaged in parking next to the curb line. He explained that curbs and sidewalks were constructed last year under a W.P.A. arrangement, but no provision was made for the filling in of the area between the pavement and the curbs, and as a result the curbs were left too high and cars cannot park satisfactorily unless they stop several feet away from the curb. It appeared to the Commission that this is an obligation of the Work Projects Administration, however, in view of the fact that the

AUG 27 1942

state furnished the engineering on the job, the matter was referred to the Engineer for investigation and report. Mr. Leedy was informed that, if the project is not too costly and the Commission is able to finance it, the work will be done, although the present outlook is not very encouraging. Mr. Leedy left with the Commission a petition signed by numerous citizens of Sisters requesting the improvement.

The Assistant Attorney, in charge of real property purchases, was present and requested authority to acquire certain parcels of land that are needed for right of way and for other purposes in connection with state highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each. After careful study of each item the Commission approved the request and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission adjourned at 12:00 noon and reconvened at 1:30 p. m. in the same room, with the same persons present and participating.

The Honorable F. C. McKenzie, Mayor of Hermiston, was present in regard to the construction of a connecting road between the Boardman-Stanfield Highway and the county road which extends from Hermiston to the army ammunition depot, west of Hermiston. He advised that the county road is used extensively by people who travel back and forth between Hermiston and the ammunition depot and that up to the present time they have been allowed entrance to the depot grounds through a gate on the east side of the reservation. However, the army now proposes to close this gate to public use, and people will have to travel several miles on a circuitous route to enter the reservation through the main gate on the south side of the area, which causes unnecessary wear and tear on automobiles and tires. The connecting road, he said, would correct the situation, and he suggested that it might be possible to secure federal access road moneys to finance the work. The Commission considered that it is not justified in spending state money to build such a road and that the proper way to handle the situation would be the continued use of the east gate. Accordingly, the Engineer was instructed to write Lt. Colonel Ralph Cook Scott, who is in charge of the ammunition depot, setting forth the facts and suggesting that traffic be allowed to enter the reservation via the east gate as a proper solution for this difficulty; and, if it cannot be handled in that manner, that he (Lt. Colonel Scott) certify the proposed road as an access road

AUG 27 1942

and secure federal access moneys to finance construction of the same, including a railroad grade separation structure, so the road can be built without delay.

Reconsideration was given by the Commission to the request presented by the Coquille delegation at the morning session, for state aid in the construction of a revetment in the Coquille River opposite the town of Norway. Assistant State Highway Engineer, Mr. C. B. McCullough, advised that he personally inspected the site and found that the river is actually cutting a new channel. It was his opinion that the main river eventually will break through and cause considerable damage to private property and to the Oregon Coast Highway unless corrective measures are taken. The State Highway Engineer recommended, in view thereof, approval of the state's participation in the project by furnishing the engineering supervision and assuming a one-fifth share of the expense involved which shall include the engineering expense. He also recommended that the matter be covered by written agreement among all parties concerned. The Commission approved the recommendation.

The Assistant Attorney requested authority to institute condemnation proceedings to clear title to a quarry site that is being acquired from Matt Endres, et al., for use in connection with the improvement of the Albany-Lyons Secondary Highway, in Linn County. He advised that the Commission has already approved payment of \$200 for the property and that the owners have agreed to accept such sum, but there is an ambiguity in the title which cannot be clarified without going to court. The Commission confirmed the offer of \$200 for this property and by unanimous vote adopted the following resolution authorizing condemnation of the same:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

AUG 27 1942

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for the purpose of securing roadbuilding materials therefrom for use in connection with the Albany-Lyons Secondary Highway No. 211, which said real property is described as follows, to wit:

A parcel of land lying in the William Gilchrist D. L. C. No. 43 in Section 4, Township 10 South, Range 1 East, W. M., Linn County, Oregon; the said parcel being described as follows:

Beginning at a point on the south line of the county road; said point being North 89° East 1760.2 feet and north 386.1 feet from the southwest corner of the said William Gilchrist D. L. C. No. 43; thence South $78^{\circ} 15'$ East along said road line 400 feet; thence South 25° East 66 feet to the northerly right of way line of the Albany-Lyons Highway; thence along said right of way line in a westerly direction to its intersection with the northwesterly boundary of the owners' property; thence North 80° East to the northwest re-entrant corner of the owners' property; thence north to the place of beginning, containing 2.05 acres.

(It is the purpose of the State to acquire all that portion of the owners' property lying north of the Albany-Lyons Highway and south of the county road leading to Stayton.)

2. That the Commission does hereby find and declare that the said described parcel of real property is necessary and acquisition of the same by the State is required for the specific purpose hereinabove set forth, and the said property is being acquired for the express and specific purpose in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory

AUG 27 1942

agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Assistant Attorney also brought up for discussion a claim presented by Mrs. Viola M. Gray for damages which she alleges occurred to her property by reason of a grade change on The Dalles-California Highway, at Madras. He explained that this property is situate across the street from property owned by Mr. W. A. Ellis to whom the Commission at this meeting authorized payment of \$100 for the same reason that Mrs. Gray claims damages, and in his estimation Mrs. Gray is entitled to consideration because the change in grade was not clearly understood when the settlement had been made with her. He recommended the reopening of this case and that he be authorized to negotiate a settlement with Mrs. Gray. The Commission approved the recommendation.

Mr. D. L. Callicrate, Portland, representative of the Foster-Kleiser Company, was present and left with the Commission a folio containing examples of camouflage work which his company performs. The folio was referred to the Engineer.

The Attorney rendered a brief report on a conference with Mr. Frank Lonergan, attorney for Mr. J. H. Gilbaugh, who wants to sell to the state for park purposes certain property that he owns adjacent to the Columbia River Highway near Crown Point, or, if the state does not want the property, that it provide access to the Columbia River from the property so Mr. Gilbaugh can market the timber and rock deposits that exist thereon. He stated that Mr. Lonergan indicated at the conference that Mr. Gilbaugh wants about \$10,000 for the property. The State Parks Superintendent, who was present, advised that the property is of no special value from the state parks' standpoint. The engineer suggested refusal of the offer and denial of any responsibility in connection with construction of a roadway from the property to the river. The Commission approved the recommendation and instructed the Attorney to inform Mr. Lonergan that the Commission is not interested.

The Assistant Attorney presented an offer from Mr. J. D. Bergen, North Bend, to either purchase or lease a portion of the property recently acquired from him as right of way in connection with the improvement of the Oregon Coast Highway between Marshfield and North Bend, more particularly identified as the greenhouse property. He advised that one of the conditions of the purchase was that Mr. Bergen would be allowed the use of the area outside of the standard width right of way until such time as the state needed the property, provided he paid a reasonable rental for the same. Mr. Bergen, he said, prefers to purchase the property if the state will sell; but if he can't buy it, he is willing

to pay \$20 per month rental for the use of the same until some time this fall when he will vacate the premises. He gave as his thought that the offer is reasonable and recommended acceptance of the same in the event the Commission does not elect to sell the property. The Commission decided not to sell the excess land; however, approved rental of the same at the price offered.

In this connection the Assistant Attorney requested instructions relative to the sale of excess right of way acquired on the bay side of the highway in connection with this project. He suggested retention of all of this land by the state in order to prevent "ribbon" development along the highway. The Commission approved the suggestion although reserved the right to make exceptions in the event they are considered advisable.

Reconsideration was given by the Commission to the application of Messrs. Hilton and Burgess to rent a portion of the right of way that was recently acquired for a revision of the Fossil-Antelope Secondary Highway, in Wheeler County. The Assistant Attorney suggested, because of the likelihood that this right of way will not be utilized for state highway purposes until the war is over, that these men be permitted to use the area for farm purposes without charge until the state needs it. He pointed out that by so doing the Highway Department would avoid the expense of keeping down noxious weeds, which feature could be regarded as consideration for the use of the land. The Commission approved the suggestion as a temporary proposition, there being a possibility that the Commission may wish to make a charge for the use of the land at some future time. This privilege is to be granted with the understanding that the state will not be held liable for crop loss in the event a crop is destroyed when the land is repossessed by the state.

The Assistant Attorney reported receipt of an offer from Mr. Lawrence Osterhoff, Eugene, to purchase a building located on property acquired from Mr. A. D. Jones, in connection with the acquisition of right of way for the improvement of the Pacific Highway, through Eugene. Mr. Osterhoff, he said, has offered to pay \$50 for the building, although he believes that he might be induced to pay \$75 for the same. He recommended acceptance of the offer if he can't get more. The Commission approved the recommendation.

In this connection the Assistant Attorney requested instructions relative to the disposal of additional buildings in Eugene. He advised that normally these would be either rented or advertised for sale and recommended selling them because there is no shortage of houses in Eugene at the present time and he is having a hard time to secure renters. Action on the matter was deferred by the Commission until the next meeting.

The Attorney submitted a supplemental report on the controversy with Mr. L. E. Stafford, concerning payment for the moving of a barn, in connection with a right-of-way purchase near Goshen, in Lane County, the barn having been destroyed by fire before the moving operations were started. He read aloud a letter from Mr. Stafford's attorney to the effect that Mr. Stafford will not deal with the state on the basis of the option he gave the state unless he is allowed \$600, the amount originally allowed for moving the barn, and unless the deal is consummated in the near future. He recommended that Mr. Stafford be

AUG 27 1942

not paid such sum unless the payment be ordered by the Court. The Commission approved the recommendation.

The Attorney also brought up for discussion the matter of rental to be charged the Union County Sportmen's Club for the use of a portion of the property recently acquired by the Commission from the State Game Commission, at Union, Oregon, on which area the club has maintained a clubhouse for a number of years under agreement with the State Game Commission. He advised receipt of a letter from F. B. Wire, State Game Supervisor, suggesting the lease of the property to Union County Sportmen's Club for a period of fifteen years at the rate of \$1.00 per year. The Commission considered that fifteen years is too long a time to tie up this property; however, approved the leasing of the property to the Sportsmen's Club for a period of five years at the rate of \$1.00 per year. The Attorney was instructed to convey such information to Mr. Wire.

At 2:15 p. m. Chairman Cabell announced the following awards of contracts, sale of building in Eugene, and sale of material in railroad trestle, bids for which were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Richland-Halfway Rock Production Project, on the Baker-Homestead and Halfway Highways, in Baker County. Requires approximately 8,000 cu. yds. crushed rock in stock piles. No bids were received on this project.

"Buchanan Rock Production Project, on the Central Oregon Highway, in Harney County. Requires approximately 7,000 cu. yds. crushed rock in stock piles. There were no bids received on this project.

"Walker Mountain Rock Production Project, on The Dalles-California and Willamette Highways, in Klamath County. Requires approximately 19,500 cu. yds. crushed rock in stock piles. No bids were received on this project.

"Salt Creek Falls-Odell Butte Rock Production Project, on the Willamette Highway, in Klamath and Lane Counties. Requires approximately 14,100 cu. yds. crushed rock or crushed gravel in stock piles. No bids were received on this project.

"Alkali Lake Flight Strip Project, on the Lakeview-Burns Highway, in Lake County. The only bid received for this project was that of C. A. Dunn, Klamath Falls, in the amount of \$204,368.00. The Commission refers the bid to the Engineer with power to award the contract when certain conditions have been fulfilled.

"Dead Ox Flat-Cairo Junction Rock Production Project, on the Old Oregon Trail and Central Oregon Highways, in Malheur County. Requires approximately 9,500 cu. yds. crushed gravel in stock piles. The only bid received for this project was that of Chester T. Lackey, Ontario, in the amount of \$25,000.00. The Commission awards this contract to Chester T. Lackey at his bid of \$25,000.00.

AUG 27 1942

"Rome Flight Strip Project, on the I.O.N. Secondary Highway, in Malheur County. Clifford A. Dunn, Klamath Falls, submitted the only bid for this work, in the amount of \$201,645.00. The Commission refers the bid to the Engineer with power to award the contract when certain conditions have been fulfilled.

"Nye Junction-Grant County Line Rock Production Project, on the Pendleton-John Day Highway, in Umatilla County. Requires approximately 19,000 cu. yds. crushed rock in stock piles. No bids were received on this project.

"Rock Creek-Joseph Rock Production Project, on the Wallowa Lake Highway, in Wallowa County. Requires approximately 12,000 cu. yds. crushed rock or crushed gravel in stock piles. No bids were received on this project.

Sale of Residence Building in Eugene:

"Building No. 3948, formerly owned by Katherine Stewart. The only bid received for this building was that of Arnold Lindeland, Eugene, in the amount of \$360.00. The Commission sells this building to Arnold Lindeland at his bid of \$360.00.

Sale of Material in Railroad Trestle:

"Railroad trestle located west of Sunset Camp, in Tillamook County. No bids were received for this material."

The Commission also considered the award of the contract for the Port Orford Rock Production Project on the Oregon Coast Highway, in Curry County, bids for which were received on June 4, 1942. The Engineer advised that performance of this contract cannot be accomplished under the original specifications because of wartime regulations ordered by the army authorities. However, the low bidder for the project, A. H. Saxton & Son, Corvallis, is agreeable to certain changes in the specifications to permit the project to go forward. He recommended award of the contract to A. H. Saxton & Son on the basis of the revised specifications and said that the only alternative is to readvertise the project, which raises the question whether or not a satisfactory bid, if any, can be secured. The Commission approved the recommendation and thereupon awarded the contract to A. H. Saxton & Son.

The Commission signed a letter directed to the Work Projects Administration relative to the use of buildings erected by the WPA at Camp McNamers, in connection with the Wilson River WPA project. Such letter advises the Work Projects Administration that the buildings are to be used for state purposes only.

The Commission discussed briefly a report with respect to the proposed purchase from Mr. Elmer Bankus of certain timber land adjacent to the Oregon Coast Highway, in Curry County, but deferred action thereon until the next meeting, when Mr. Bankus will be present.

AUG 27 1942

The Commission also discussed briefly the question how to dispose of obligations for fence construction along highway projects which cannot be constructed until the present war emergency is over. Action thereon was deferred until the next meeting.

The Engineer reported that a short revision in the Wolf Creek Highway near Necanicum, in Clatsop County, has been completed and that the old road is no longer of value from the state's standpoint. He recommended that it be turned back to Clatsop County for future maintenance or other disposal. The Commission approved the recommendation and thereupon adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Wolf Creek Highway in Clatsop County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section which is more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way hereinafter designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Wolf Creek Highway, but is no longer a part of the right of way of said highway as the same has been relocated and constructed be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Clatsop County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Wolf Creek Highway, lying on the northerly side of the right of way required for the reconstructed Wolf Creek Highway over

and across Section 23, Township 5 North, Range 9 West, W. M., Clatsop County, the beginning and ending points with reference to the engineer's stations of said reconstructed line being Station 2+45 on the westerly end and Station 11+05 on the easterly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant Highway Engineer, and is dated August 17, 1942, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Clatsop County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said Wolf Creek Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Clatsop County and beyond any responsibility or supervision by the State Highway Commission.

The Engineer reported on the request of the County Court of Marion County for the substitution of a county road for a section of the secondary state highway in the vicinity of Sublimity. He recalled that the Commission, at its meeting on June 25, 1942, authorized such exchange of roads subject to the condition that the county would provide a right of way 60 feet wide throughout. Investigations have been made by the county court, he said, which reveal

*Map filed Right of Way Abandonment and Retention File - No. 109

AUG 27 1942

that the cost of securing such width right of way will be considerable and the court does not feel justified in going to this expense at the present time so has asked that the matter be dropped for the time being. The Commission approved the report.

The Commission discussed the advisability of purchasing from the State Treasurer certain state highway bonds which he has acquired in connection with the investment of state funds under his control. The Engineer advised that the State Treasurer has on hand state highway bonds totaling \$262,500 which mature \$37,500 on each April and October, commencing with April 1943 and ending April 1946; that the State Treasurer purchased them at the rate of \$113 for each \$100 par value of the bonds and that the value of the coupons attached thereto is \$37,734.55. He suggested, in view of the present and anticipated financial status of state highway funds, that the Commission do not take up these bonds in advance of maturity because the saving will amount to very little and the highway funds will be needed for other purposes. The Attorney advised that the only legislative instruction to the Commission that he can find pertaining to the matter is an instruction to pay interest and principal on highway bonds as and when due, and that he cannot find any authority for the Commission to use current state highway funds for the purpose of purchasing outstanding, unmatured state highway bonds. In view of this opinion the Commission decided not to purchase the bonds; however, instructed the Engineer to inform the State Treasurer that the Commission is open-minded in the matter and will reconsider its decision if it is ascertained later that the Commission has legal authority to use state highway funds for such purpose.

Matters pertaining to the construction of the Marshfield-North Bend Section of the Oregon Coast Highway had the attention of the Commission, particularly the rearrangement of the Standard Oil Company's plant in connection therewith. The Engineer advised that in the proposed rearrangement of the company's plant a considerable quantity of metal will be needed consisting principally of pipe but including some structural steel, and that under the arrangement the company is to furnish such metal. He pointed out that the project has a low priority rating, and it is doubtful that the company will be able to secure the metal. He suggested, in view of the fact that the highway work cannot proceed until the company's plant has been re-established, that the advertising of the highway project for bids be deferred until assurance is received that the company is able to secure the material for the rearrangement of its plant. It was the thought of the Commission that the project should not go forward until all physical things in connection therewith have been taken care of, including a satisfactory conclusion of arrangements with the railroad company as well as with the Standard Oil Company; and it was so ordered. The Engineer was instructed to bring the matter to the attention of the Commission again before advertising the project.

The Engineer reported an unsatisfactory condition which exists in connection with the construction of asphalt pavement on the Front Avenue Project, Portland. It appears that Edlefsen-Meygandt Company, the original contractor for this project, subcontracted the paving work to another contractor who is engaged in work at one of the Portland shipyards and feels that he is obligated to complete such work before constructing the paving work on Front Avenue, and it also appears that the Front Avenue paving work will not be completed before the

rainy season sets in unless it is done in the very near future. The Engineer advised that the excuse that no asphalt can be obtained is not well founded because he has made arrangements for the delivery of one car of asphalt per day. He suggested that the contractor be notified that he must proceed with the paving work at once in accordance with the specifications or the Commission will take action as is provided in the contractual provisions in order to expedite such work. He estimated that it would take about one month to do the Front Avenue paving work and gave as his thought that it would not cause a great amount of inconvenience if the shipyard work were delayed that length of time. After discussion the Engineer was instructed to contact the naval officer in charge of the shipyard work and secure, if possible, the release of the subcontractor on that work a sufficient length of time to complete the Front Avenue paving.

Reconsideration was given by the Commission to the request of the Coos County Court for the construction of a parking space for automobiles at Sunset Beach. The Engineer estimated the cost of the project at about \$350. He advised, however, that the Sunset Beach Park is owned by Coos County and that the parking area is entirely off the state highway right of way. It appeared to him that the construction of the parking area is strictly a county obligation in which the state is not particularly concerned. In this connection a report was presented from the State Parks Superintendent giving as his thought that the expenditure of funds for the parking area is inappropriate under present wartime conditions. In view of the reports the Commission denied the request.

The Commission also discussed a request from the Myrtle Point Chamber of Commerce for the alleviation of a dangerous condition which it is alleged exists along the Coos Bay-Roseburg Highway at the south entrance to Myrtle Point. The Engineer advised that to correct this situation would require the elimination of three curves and the realignment of a quarter-mile section of the highway, at an estimated cost of \$11,000. He recommended, in view of the expense involved and prevailing conditions, that the request be denied but that the project be kept in mind for future consideration inasmuch as it would be a desirable improvement when it can be financed. The Commission approved the recommendation.

The Secretary presented a petition from citizens of Corvallis for the construction of an additional 2,000 feet of sidewalk along the Pacific Highway West, north of Corvallis, beyond the limits of that proposed in the present contract, for the benefit of pedestrian traffic that has increased greatly by reason of activities at Camp Adair. The Engineer estimated that such improvement would cost about \$5,800. He advised that, when the plans for the Lewisburg-Corvallis Project were made, the matter of footpath and sidewalk construction was given very careful consideration, and the limit of such construction was fixed only after careful study and with full knowledge of anticipated future pedestrian traffic. Existing conditions, he said, are no worse than were anticipated and are not such as to make him want to change his decision. He recommended that the request be denied. The Commission approved the recommendation. Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and concurred therein.

AUG 27 1942

The Engineer requested authority to enter into a price agreement with contractor A. S. Wallace for the stock-piling of an additional 3,700 cubic yards of crushed rock in connection with his contract No. 2520, for the Pendleton-Meacham Rock Production Project, in Umatilla County. He estimated the cost of such material at \$6,845. The Commission approved the request.

The Engineer also requested authority to spend approximately \$1,700 for the widening of two small bridges on the Wells-Granger Access Road to Camp Adair, in Benton County. He explained that the existing bridges are narrow and constitute bottlenecks on this road but, if widened for a full width roadway, will take care of traffic satisfactorily for the time being. The Commission approved the expenditure.

The Engineer brought up for discussion the matter of improving the Pacific Highway West in the vicinity of Camp Adair where heavy construction-hauling operations along and across the highway have done considerable damage to the highway pavement. He advised that the Corvallis-Lewisburg contract provided for the furnishing of 1,650 cubic yards of plant-mix material for anticipated repairs between the north end of the project and the Polk-Benton County line but such tonnage is not sufficient to maintain the entire section; and as a result there is a 3,000-foot section immediately fronting the cantonment, where most of the heavy traffic is concentrated, that is going to pieces. He requested authority to enter into a price agreement with the contractors, E. C. Hall Company and J. C. Compton, for the reconstruction of this 3,000-foot section. He estimated that the work would cost about \$32,380, and advised that it is proposed to use federal funds to finance the work, if possible. The Commission approved the project; however, instructed the Engineer to present a claim to the Public Roads Administration for reimbursement for the expense involved.

Reconsideration was given by the Commission to the matter of payment of overtime to workmen employed on state highway contracts, particularly in connection with the contracts with E. C. Hall Company, J. C. Compton, and McNutt Brothers for the construction of Units "A" and "B" of the Monmouth-Benton County Line Section of the Pacific Highway West, in Polk County. The question involved is,—does the federal law, which requires contractors to pay time and one-half for overtime worked over 40 hours per week, control; or does the state law, which requires the payment of double time for work performed in excess of 48 hours in any one week, apply. The Attorney advised that, according to his interpretation of the law, the federal act does not apply to highway construction inasmuch as the "Fair Labor Standards Act of 1938," which is the federal act, is by its terms made applicable to "commerce" and to the production of "goods" for commerce; whereas the construction of the highway involved in the contracts under consideration is neither interstate commerce nor the production of goods for commerce. Further, if his interpretation of the federal act is correct, then it follows that the Oregon statute and not the federal statute prevails with respect to the labor provisions of these contracts. In other words, the contractors should be required to pay double time for all time worked in excess of 48 hours per week, notwithstanding that they allege that they are working under the federal act and are not required to pay more than time and one-half for all overtime worked in excess of 40 hours per week. The matter was discussed at considerable length; and it was the Commission's decision, in view of the Attorney's opinion, that the

contractor should be required to pay for overtime in accordance with the state law and the contract agreement. The Attorney was instructed to convey such information to the contractor. The Commission considered that it is not particularly concerned with the application of the federal law with respect to payment of overtime worked in excess of 40 hours but less than 48 hours per week, and that it is up to the workman to recover from the contractor if he is not satisfied with the amount given him.

A letter was presented from contractor Roy L. Houck requesting relief from the performance of certain work under his contract, No. 2382, for grading and paving the North Marshfield and Marshfield-Bunker Hill Sections of the Oregon Coast Highway, in Coos County, particularly Item No. 51 for furnishing and placing aggregates and Item No. 52 for furnishing and placing 151-200 asphalt, which items are involved in the construction of shoulders and sidewalk-oiling work. The Engineer advised that this contractor does not have equipment or experienced men to handle this kind of work and the subcontractor with whom he had arranged to do the work cannot do it because of press of war contracts. He recommended in view thereof that the contractor's request be approved and that the work be done with state forces. The Commission approved the recommendation. Mr. W. H. Lynch, District Engineer, Public Roads Administration, who was present, advised that he would recommend to his superiors that the state's claim for reimbursement for such force account work be allowed.

The Engineer brought up for discussion the matter of cancelling contract No. 2486, Harry I. Hamilton, contractor, for construction of a bridge over Spencer Creek on the Oregon Coast Highway in Lincoln County. He advised that the Commission awarded this contract on June 13, 1941, and that the contractual provisions called for completion of the project on or before January 31, 1942; further, that, after the excavation and certain other work in connection with the project were completed, unanticipated foundation conditions for the roadway embankment at each end of the bridge were encountered, resulting in subsidence of the embankments and ground movements near the bridge footings. He also stated that, because of such movements, he ordered the contractor to cease work until the embankments had fully settled and the ground around the bridge footings stabilized. It would not be good engineering or construction, he said, to complete the bridge work for at least six months after final settlement of the embankments has taken place. He gave as his thought, in view of the circumstances, that it would be only fair to terminate the present contract at this time and to pay the contractor for the work accomplished and for the materials that he has delivered to the job. He added that the project is not vital to the use of the highway and could be postponed until after the war without greatly inconveniencing the general traveling public. He recommended cancellation of the contract and payment to the contractor of the sum of \$4,806.49, the value of the material that the contractor has assembled at the bridge site, which amount, he said, the contractor has agreed to accept as payment in full. The matter was discussed at considerable length, during which discussion it was brought out that the state's loss by reason of the cancellation of the contract would not exceed \$2,400, and that the state very likely would have had to pay the contractor such amount anyway, to cover increased labor and material costs, if he had been required to complete the job as it was not his fault that the delay occurred. In view of the circumstances, the

AUG 27 1942

Commission decided to cancel the contract and ordered that the matter be covered by written agreement between the contractor and the state.

Mr. T. H. Banfield, President of the Iron Fireman, Portland, came before the Commission and requested permission to construct an entrance to the Front Avenue Highway, Portland, from property recently acquired by them, between Montgomery Street and Hall Street. He advised that the approach would be used as an exit only, so the crossing of the highway would not be involved. He was informed by Chairman Cabell that the Commission has an established policy which will not permit use of entrance driveways along this thoroughfare because of the hazard to highway traffic that would be created. However, if the one requested by the Iron Fireman is to be used as an exit only, and traffic from the plant will not have to cross the highway, that is a different matter and could be given special consideration. The matter was thereupon referred to the Engineer for investigation.

The Engineer requested authority to post signs on the Little Nestucca Secondary Highway prohibiting the truck hauling of logs between milepost 5.2 at the Nestucca River Bridge and milepost 8.7 near Dolph. He explained that this is a narrow, one-way road and that the bridges thereon are suitable for light traffic only. The Commission approved the request.

The Commission discussed a complaint relative to the taking of sand and gravel from the ocean beach at Oceanside, Tillamook County. It appears that materials are being taken from this beach for the construction of a navy blimp base south of Tillamook and that the beach and adjacent private property are being damaged thereby. The question arose whether or not the Commission should prohibit the taking of material from this source. The matter was referred to the Engineer with instructions to inform Lieutenant Commander W. J. Stribling, who has charge of the blimp base construction, that the Highway Commission has jurisdiction over the area and to ascertain from him just what the government's plans are with respect to securing of additional materials at this location.

The Engineer brought up for discussion a proposed change in policy with respect to the cost of installing, maintaining and operating directional signs on state highways within municipalities. He advised that under the present policy the state furnishes and installs such fixtures, but requires the cities to pay the operating costs, which is not a satisfactory arrangement. He recommended that, in order to avoid complications, the state assume all expense in connection with such installations, including the operating expense; also, that arrangements be made with the cities, if possible, to pay for electrical operating current in the first instance, reimbursement to be made by the state later, in order to secure advantage of the lower rates which are usually extended to the cities by the power companies. The Commission approved the recommendation and so ordered.

The Secretary presented an opinion from the Attorney General with respect to the Commission's authority to issue emergency transportation permits

AUG 27 1942

in accordance with the provisions of the resolution that was adopted by the Commission at its meeting on February 13, 1942. According to this opinion the State Highway Commission has legal authority to issue such permits which will operate as a modification of the law and will constitute authority to the Public Utilities Commissioner to require carriers to declare the maximum load that they will carry under such permits and to compute the fees to be paid by such carriers on the basis of the length and weight therein provided. (See opinion dated August 25, 1942, in general files.) The Commission expressed approval of the opinion and ordered it filed.

A letter was presented from Lt. Wm. J. Bennett, Assistant Engineer Officer, United States Army Air Corps, Spokane, Washington, requesting permission to operate over Oregon highways, as occasion may require in the salvaging of wrecked airplanes, certain tractor-type truck and trailer equipment larger in size than is permitted under the Oregon statutes. The Engineer recommended approval of the request, in view of the fact that the law, as now written, exempts governmental equipment from the provisions of the statute. The Commission approved the recommendation. The Secretary was instructed to bring to the attention of Lieutenant Bennett the exemption feature of the law and to inform him that, notwithstanding the same, the Commission will appreciate compliance with its rulings which require such movements to be accompanied by flagmen as protection to other traffic.

The Commission discussed briefly and ordered filed a copy of the instructions that have been issued by the Roaring River Logging Company to its truck drivers with respect to the truck hauling of logs over state highways, which instructions are in conformity with the intent of the Commission as expressed in permits that are issued covering such operations. (See copy of instructions dated July 22, 1942, in general files.)

The Commission also discussed briefly and ordered filed a report from the State Police Department with respect to a violation committed by one James Ervin Carlin who was arrested for transporting over the Oregon Coast Highway, near Seaside, a load of logs having an overall height in excess of the legal limits. According to the report Mr. Carlin was cited to the Justice of the Peace at Warrenton who dismissed the case and remitted the bail furnished by the accused, and who tendered his apologies for the arrest and inconvenience caused Mr. Carlin and the Converse & Hickman Logging Company, for whom he was working.

The Attorney reported receipt of a request from Mr. Hans Hanson, wholesale distributor, Klamath Falls, for the filling in of a depression in front of his building which was re-established to accommodate the improvement of South Sixth Street, Klamath Falls. It appears that when the buildings of this company and others were set back to accommodate the highway improvement, the vacated area was not brought to the proper level and the property owners concerned are desirous of having the holes filled in. The Engineer advised that the filling in of the holes is a right-of-way obligation and recommended approval of the project which he estimated would cost approximately \$500. The Commission approved the recommendation.

AUG 27 1942

A letter was presented from Mr. J. W. Edwards, Assistant Superintendent of the Portland Public Schools, advising that their eighth grade curriculum has been revised to include a study of Oregon history as a basis for the year's work, and inquiring as to the possibilities of securing 3,500 copies of the Oregon highway map for use in connection therewith. The Engineer advised that the supply of maps is rather low, fewer having been printed this year than heretofore because of the anticipated decrease in travel, so it will not be possible to furnish the number desired without seriously depleting the stock. He suggested, if the Commission desires to cooperate, the furnishing of 1,000 maps free of cost. The Commission approved the suggestion.

The Engineer brought up for discussion the functioning of the Highway Traffic Advisory Committee, which it is proposed to finance with federal strategic highway network funds that are available to the State of Oregon for planning survey work. He presented a program, which has been adopted by the Committee, and an operating budget for the twelve-month period commencing September 1, 1942, and ending August 31, 1943. He pointed out that the total cost of operating this department during such period is estimated at \$7,600, of which amount the state will be required to pay \$1,416. He recommended that the program and budget be approved and that both be presented to the Public Roads Administration in order to secure the federal moneys. The Commission approved the recommendation. (See budget in general files.)

The Commission also approved the appointment of Mr. Floyd Cook as Executive Secretary of the Traffic Advisory Committee at a salary of \$250 per month for the first two months and \$300 per month thereafter.

Chairman Cabell inquired as to the status of erection of the dim-out signs along the Oregon Coast Highway and was informed that the signs have all been erected in accordance with army orders and requirements.

Chairman Cabell also inquired as to the status of the state's claim against the Southern Pacific Company and the California-Oregon Power Company for damage that occurred to The Dalles-California Highway as a result of the breaking of a dike at Algoma, Klamath County. The Attorney advised that the suggestion has been made by the defendants that the State Highway Commission and the other parties concerned engage in a joint effort to reconstruct the canal which broke, the purpose of such reconstruction at this time being twofold; namely, to prevent the breaking of the south wall of the canal and to reclaim the flooded area so as to eliminate conditions which are injurious to the health and welfare of the community. He also advised that the estimated cost of doing such work is \$10,000 and that it is proposed to divide this expense equally among the four participants. Furthermore, the state is being asked to assume a share of the maintenance expense for the next three years. The only grounds upon which he could base justification for an expenditure of state highway funds in connection with this proposed undertaking is that by so

doing the Commission could avoid damage to the highway, which damage, according to the Engineer, could be avoided by an expenditure at this time of an amount not in excess of \$200. The Commission decided that it is not justified in joining in the proposed arrangement and instructed the Attorney to convey such information to the attorneys for the Southern Pacific Company. He presented the proposal.

The Commission discussed the question what can be done to encourage contractors to submit bids for highway construction work, particularly rock production projects, it being apparent from the number of bids received at this meeting that contractors are not particularly interested; and unless something is done to revive their interest, the state will be hard put to properly maintain highways when the present supply of stock-piled materials is exhausted. The matter was discussed at some length and it was decided to direct a letter to the War Production Board, advising the seriousness of the situation and urging modification of the priority rulings, requirements and regulations, so as to make it possible for contractors to secure needed equipment and repair parts for the same. The Attorney was thereupon instructed to prepare an appropriate resolution covering the matter for adoption by the Commission at its next meeting. A certified copy of the resolution is then to be sent to the War Production Board by letter over the signature of Chairman Cabell.

The Engineer reported a request from the Oregon Washington Railroad & Navigation Company for the closing of the railroad grade crossing on the county road at Corbett, and an inquiry whether or not the Highway Commission would object to use by the general public of the passageway that was built under the railroad tracks near this point, to facilitate the operations of highway contractors in this vicinity. He advised that the underpass was constructed as a temporary proposition and will be closed as soon as the new highway has been completed. He questioned the advisability of allowing its use by the general public and the closing of the grade crossing because, in his estimation, it would be difficult later on to prohibit its permanent use and the state then probably would be called upon to build a permanent structure and to maintain the roadway leading to the same. The Commission concurred in the viewpoint of the Engineer and thereupon voted not to allow the use of the underpass except as a temporary expedient.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

Wayside strips along Poison Creek Section of the John Day-Burns Highway:-The Parks Superintendent reported on the telegraphic request of County Judge Nelson B. Higgs, of Harney County, for the withdrawal of the Commission's application for recreational lands situate adjacent to the John Day-Burns Highway in Poison Creek Canyon. He advised that the Harney County Court some time ago filed an application with the Department of the Interior for the use of these lands for recreational purposes but the application was never completed; so, after first ascertaining that the county court had decided to abandon the project, he

filed the Commission's application in order to protect the timbered waysides which are an attraction and should be preserved in their natural state. It was the attitude of the Commission that the lands should be preserved and that either the county or the state should control them. The Parks Superintendent was instructed to ascertain the plans of the county court with respect to the use of the property and to arrange for the withdrawal of the Commission's request in the event the county court intends to complete its application for recreational purposes and desires jurisdiction.

Sale of burned timber along the Wilson River Highway:-The Parks Superintendent reported receipt of a proposal from Mr. James McCrea, Tillamook, to purchase at the rate of \$1.00 per M FBM the burned timber along the Wilson River Highway west of McNamers Camp. The Commission approved the sale of the timber at such rate if more cannot be secured; however, instructed the Parks Superintendent to endeavor to interest other parties therein before consummating the sale to Mr. McCrea.

Sale of old garage building:-The Parks Superintendent reported a request from Mr. James F. Grimes, Wolf Creek, Oregon, for an old garage building located on state-owned property opposite highway engineer's station 257+00 of the relocated Pacific Highway between Coyote and Grave Creek, in Josephine County. He advised that the building has no value and recommended that it be given to Mr. Grimes if he will remove it at his own expense and will thoroughly clean up the premises. The Commission approved the recommendation.

Attendance in state parks:-The Parks Superintendent reported briefly on the use of state parks this year by the general public. He advised that attendance has fallen off considerably due to wartime conditions, the average decrease in all parks for the seven-month period ending July 31, 1942, being 70 per cent. The attendance in Silver Creek Falls State Park during the month of June, he said, was 59 per cent under that for June 1941; and in the Lincoln County group of state parks the attendance in June of this year was only 83 per cent of that for June 1941.

Monthly financial parks statement:-The Parks Superintendent submitted and the Commission approved the following financial report concerning the operations of his department during the first seven months of 1942:

	<u>1942 Budget</u>	<u>Expenditures to July 31</u>	<u>Balance</u>
Acquisition	\$ 7,160.27	\$20,496.48	\$13,336.21-
Betterment	3,833.30	5,017.06	1,183.76-
Operation & Maintenance	<u>42,134.85</u>	<u>20,238.77</u>	<u>21,896.08</u>
	\$53,128.42	\$45,752.31	\$ 7,376.11

AUG 24 1942

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

M. L. O'Neil & Son, contract No. 2505, for grading and topping the Wrights Point-Narrows Section of the Frenchglen Secondary Highway, in Harney County, requested an extension of time from November 30, 1941, to July 15, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing labor and adverse weather conditions which would not permit the starting of the job as soon as they anticipated. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time are correct. He further stated that the public was not inconvenienced by the delay, neither did the state incur any extra expense for engineering supervision. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

C. J. Eldon, contract No. 2551, for the furnishing of surfacing materials in stock piles for the Polallis Creek-Hood River Rock Production Project on the Mt. Hood Highway, in Hood River County, requested an extension of time of one month, from July 31 to August 31, 1942, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: snow conditions along the highway which prevented commencement of the work until late in March, inability to secure sufficient labor to keep the crushing plant and hauling plant in operation for a single shift consistently; and difficulties in securing repair parts for his equipment. The Engineer advised that the reasons given by the contractor for overrun of time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2535 and 2592, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2535, with Rogers Construction Company, for furnishing crushed rock in stock piles for the Drews Valley Rock Production Project on the Klamath Falls-Lakeview Highway, in Lake County. Completed July 1, 1942.

Contract No. 2592, with Babler Bros., for oiling the Lower Bridge-Terrebonne Section of the Lower Bridge-Terrebonne County Road, in Deschutes County. Completed August 13, 1942.

AUG 27 1942

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized

The Commission considered and signed agreements, etcetera, as follows:

Agreement with City of Central Point covering improvement of Pine Street, from Front Street to the east city limits.

Agreement with the Lutheran Brotherhood of Minnesota and Leslie M. Hammond, being an easement for a detour road to be used in connection with the construction of the Willamette Highway, between Goshen and Lowell.

Agreement with Ruben W. Smith and wife providing for the elimination of a road approach to their property on Sexton Mountain.

Agreement with F. W. Falk for securing of borrow materials needed for the Corvallis-Monmouth Project.

Agreement with Matt Erickson authorizing truck hauling of logs across state property adjacent to the Salmon River Highway, in Tillamook County.

Agreement with Leonard & Slate with reference to their contract No. 2483 for grading, surfacing and oiling the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway, in Union County.

Bargain and sale deed conveying unto Alsea Hawley a small parcel of land adjacent to the Pacific Highway, in Douglas County. Real property file No. 8407.

Bargain and sale deed conveying unto Klamath County School District 1.69 acres of land adjacent to the Green Springs Highway, in Klamath County. Real property files No. 9657 and No. 9769.

The Commission discussed a date for its next regular meeting for the receiving of bids and decided to hold such meeting in Portland on Thursday, October 1, 1942. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:15 p. m.

[Signature]
State Highway Engineer

Henry F. Cabell
Chairman

W. E. Sealing Sr.
Secretary

Lincoln Oliver
Commissioner

Portland, Oregon, September 30, 1942

The State Highway Commission met in regular session at 9:40 p. m. in Room 515, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on May 7, May 19, June 3 and 4, and June 24 and 25, 1942.

The Assistant Attorney reported briefly on the status of the right of way budget, which report the Commission approved unanimously.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each parcel. After careful consideration of the individual items the Commission approved the request and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Cannon Beach Junction-Tillamook County Line Section, Necanicum Highway</u>

*The Attorney was instructed as follows relative to certain items contained in this resolution:

Item No. 10624, Peninsula Drainage District #2, Denver Avenue-Union Avenue Section of the Pacific Highway West:-The Commission approved this settlement as to price provided it is necessary to acquire the property to effect a settlement on the adjoining Gault property which is needed in connection with the construction of a traffic grade separation structure at this point.

In this connection the matter of acquiring the Gault property was discussed. The Assistant Attorney placed a value of \$12,412.78 on the property and advised that Mr. Gault is demanding the sum of \$34,750.00. The matter was discussed at considerable length and as a result thereof the Commission authorized payment of \$15,000 for the property if it can be purchased out of court. In the event it is necessary to condemn the property then the Attorney is to offer Mr. Gault the sum of \$12,500 in connection therewith.

SEP 30 1942

Item No. 3214-A, Julius C. Lewis, Aurora Flight Strip Project:- This settlement was approved as to price, based upon the taking of the entire property, but notification of the same is not to be given to the owner until the method of handling the project has been worked out further with the Federal Government.

Item No. 9311, Edward F. Judkins, Eugene-Goshen Section of the Willamette Highway:- This settlement was approved as to total price but the Attorney was instructed to arrange for the purchase of land, only, at this time, if possible, and for the payment of the damage items when actual construction of the highway is undertaken.

The Assistant Attorney also discussed with the Commission the purchase of a quarry site from Fayette Mettie for use in connection with the Nye Junction project, in Umatilla County, right-of-way file No. 10609. He advised that Mr. Mettie owns 46 acres of land which he is willing to sell to the state for the sum of \$1,000 provided he is allowed to retain the timber standing thereon and is granted the right to remove the timber from the property, and is also granted the right to use the property in connection with the logging of timber on adjacent land that he owns, and is allowed to continue the use of a certain cattle pass now constructed under the highway. He recommended acceptance of the arrangement. The Commission approved the recommendation.

The Assistant Attorney also requested authority to institute condemnation suits to acquire the following properties:

Dewey D. Gault property at intersection of Union and Denver Avenues, Portland. Recommended offer in condemnation \$12,500;

Harry S. Steward property needed for the Wolf Creek-Grave Creek Section of the Pacific Highway. Recommended offer in condemnation to clear title, only, \$149.00;

Cora Follett property on the Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway, in Union County. Recommended offer in condemnation \$1,628.45.

After discussion the Commission approved the request and the offers recommended. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain

SEP 30 1942

parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Dewey D. Gault, which property is located in Sections 33 and 34, Township 2 North, Range 1 East, and in Sections 3 and 4, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 5670, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Harry S. Steward, et al., which property is located in the northwest quarter (NW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) and in the southwest quarter (SW $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 22, Township 33 South, Range 6 West, W. M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 10425, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Cora Follett, et al., which property is located in Section 1, Township 1 North, Range 40 East, W. M. in Government Lot 2 (NW $\frac{1}{4}$ of NE $\frac{1}{4}$) of Section 1, Township 1 North, Range 40 East, W. M., and in the southwest quarter (SW $\frac{1}{4}$) of Section 6, Township 1 North, Range 41 East, W. M., all in

SEP 30 1942

Union County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3, 4, and 5, and is further identified in the records of the Highway Commission as files 9356 and 9356A, Parcels Nos. 3 and 4 being acquired for right of way purposes and Parcel No. 5 being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Wallowa Lake Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 29, under the heading "Real Property Condemnation Resolutions," and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Commission discussed a letter from the Good Roads Amendment Committee of the Oregon State Motor Association in which request was made for a statement from each member of the Commission and from the State Highway Engineer in support of Constitutional Amendment No. 304 which pertains to the diversion of gasoline tax revenues to other than road purposes. The object of the bill is to freeze gasoline tax revenues for road purposes by constitutional amendment, and the statements desired by the committee are to be used for publicity purposes in support of the proposal. In a discussion of this matter the Commission took the position that, while it is against the diversion of road moneys for purposes other than road construction, such moneys have been provided by the people and the matter of how the money should be spent should be determined by the people rather than by the Highway Commission which is simply the spending agency of the people. In view of this policy the Commission decided not to furnish the statements requested.

The Commission adjourned at 11:50 p. m. to reconvene the following morning in the Public Service Building.

Portland, Oregon, October 1, 1942

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work and for the sale of real property near Goshen, in Lane County, were opened and read in conformance with previously published notices, following which Chairman Cabell announced that the awards would be made at 2:00 p. m. in the same room:

BAKER-HOMESTEAD AND HALFWAY HIGHWAYS
RICHLAND-HALFWAY ROCK PRODUCTION PROJECT

No bids received on this project

CENTRAL OREGON HIGHWAY
BUCHANAN ROCK PRODUCTION PROJECT

No bids received on this project

THE DALLES-CALIFORNIA AND WILLAMETTE HIGHWAYS
WALKER MOUNTAIN ROCK PRODUCTION PROJECT

No bids received on this project

Carl H. Wagner	- -	\$2,000.00
Homer I. Toedtmeier	- -	1,600.00
Cecil P. & Retta M. Richards	- -	1,510.40
Geo. A. Halton	1,250.00	- -

The Assistant Attorney brought up for discussion matters pertaining to the acquisition of right of way needed for the Aurora Flight Strip Project, bids for which were received at this meeting. Also present and entering into the discussion was Mr. Tom Davis, Senior Highway Engineer of the Public Roads Administration. The Assistant Attorney advised that the owners of the property in question are demanding \$200 per acre for cleared land and \$100 per acre for land covered with timber and brush, which demands he considers exorbitant. He questioned the authority of the Highway Commission to condemn the property and suggested, in the event that the Commission decides not to pay the amount demanded, that it ask the Federal Government to acquire the property. The

matter was discussed at considerable length but definite action thereon was deferred pending consultation with the United States District Attorney, Mr. Carl Donagh. The Commission's attorney was instructed to contact Mr. Donagh at once and ascertain whether or not he would be willing to assume the responsibility for condemning the property.

The Attorney brought up for discussion the controversy with regard to the purchase of the Elkins property south of Monmouth which is needed in connection with the reconstruction of the Pacific Highway West at this location. This property was inspected by Commissioners Clough and Oliver on the previous day and by Chairman Cabell previously. The discussion brought out that Mr. Elkins originally agreed to sell the property for \$15,000, less the value of the crops growing thereon in the event the land was not taken before the crops were harvested; and, inasmuch as the crops have been salvaged, he is now willing to settle for \$14,000. Also entering into the transaction is the matter of damage to the property by reason of the highway construction, including that resulting from erosion; and the matter of providing for irrigation. The Commission authorized the rearrangement of the irrigation system but refused to make an allowance for damage caused by erosion unless Mr. Elkins can prove such damage and establish a definite amount of loss to him by reason thereof. The Commission authorized the Attorney to pay Mr. Elkins, in full settlement for his property, the sum of \$12,000. If such offer is refused then the property is to be condemned and he is to offer Mr. Elkins the sum of \$10,000 in connection with the condemnation proceedings. (The Attorney later settled with Mr. Elkins for the sum of \$12,000.)

Mr. W. C. Baugh came before the Commission in regard to the purchase of 12.73 acres of land which was purchased by the state in connection with the acquisition of right of way for the Wolf Creek Highway, said property being situate at the intersection of the Wolf Creek Highway and the county road about one mile west of North Plains. Mr. Baugh advised that he has recently purchased property immediately back of the state's property and would like to acquire the state's property so as to control the entire area between his property and the highway. He offered \$900 for the tract which is at the rate of approximately \$75 per acre, and agreed to relinquish right of access to the highway inasmuch as there is available to him another road to North Plains. The question arose whether or not a portion of this area is needed in connection with a prospective traffic separation structure at the intersection of the highway and the county road. In view thereof the Commission deferred its decision until the next meeting. The Engineer was instructed to investigate the road crossing matter in the meantime and report his findings at such meeting.

Messrs. Chas. A. Hart, Chief Counsel, and A. J. Wittchell, Chief Engineer, of the United Railways Company, were present and discussed with the Commission the matter of renewing the company's franchise for the maintenance of its railroad tracks on the St. Helens Road (Lower Columbia River Highway) where it passes through the Guilds Lake industrial district of Portland. Mr. Hart was spokesman. He advised that the company appreciates the reasons that prompted the Commission to refuse the company's request for the renewal of the franchise for an indefinite period but would like the Commission to reconsider

in view of the fact that the industries need the railroad badly during the present emergency. The Engineer pointed out that the Guilds Lake district some day will be a very important industrial center for the Portland area and every foot of the highway will be needed to take care of vehicular traffic that is bound to be created by the activities of these industries. It was his thought that the Commission should not grant the company's request in its entirety; however, recommended that the company be allowed to maintain and use its railroad facilities as now constructed on the highway right of way for the duration of the present war emergency and for a period of six months thereafter, at which time the entire matter could be reconsidered. Mr. Hart and Mr. Witchell both agreed to such proposal. The Commission thereupon approved the recommendation and ordered that the arrangement be covered by appropriate written agreement among the parties concerned.

Miss Frances Troy and her attorney, Mr. G. S. Grant, both of Baker, Oregon, came before the Commission relative to Miss Troy's claim for damages that occurred to her property near Baker by reason of highway construction operations conducted by McNutt Bros., contractors, in connection with the grading and surfacing of the Troy Ranch Section of the Old Oregon Trail, in Baker County, contract No. 2365. Mr. Grant advised that originally the Troys demanded \$5,000 for right of way needed from them for this improvement; but finally agreed, subject to confirmation by the Highway Commission, to sell it for the sum of \$3,000. The Commission, he said, refused to pay more than \$1,500 for the property, which amount was not acceptable to the Troys so the matter has gone to condemnation. He further stated that during the construction of the highway the contractor was required to use a large quantity of powder, and the blasting of the same caused damage to the Troy residence, amounting to \$1,000. He alleged that the highway has severed the Troys' property so it is now necessary for them to drive their stock across the highway for grazing and water; and, whereas cattle passes constructed by the state can be used for movement of cattle, it is impossible to get the horses to use them. He also claimed additional damage to the Troy property by reason of stream erosion where the state constructed a new channel for Alder Creek. He advised that the state's condemnation case for the acquisition of the right of way is still pending but Miss Troy is willing to deed the right of way and release the state from all liability for damages if paid the sum of \$3,000. The Commission discussed the matter at some length but deferred definite action pending additional information. The Engineer and the Attorney were instructed to make further investigations relative to the claim for damages and to report their findings as soon as possible. It was also agreed that at least one member of the Commission will inspect the premises before a definite decision is rendered.

The matter of furnishing state trucks to assist in the accumulation of scrap materials in connection with the Federal Government's scrap-metal drive during the week commencing October 5, 1942, was discussed by the Commission. The Commission authorized the Engineer to collect such scrap material and to deliver the same to the nearest salvage depot, provided the material is to be donated to the cause and is deposited on state highway rights of way. The Commission also ordered that the matter be given wide publicity for the information and benefit of the general public.

The Commission discussed a letter from Jacobsen-Jensen Company, contractors for the grading and surfacing of the Barbur Boulevard-Boones Ferry Road on the West Portland-Hubbard Highway, contract No. 2393, in which the Commission was requested to authorize the suspension of work on this contract until the spring of 1943 when weather conditions are favorable to the carrying on of the work involved. They alleged that their failure to complete the project within the specified time limit was due to additional work that they were required to do in connection with their contract with the Federal Government at the Umatilla Ordnance Depot, such project having been increased over 50 per cent in size. Their letter was accompanied by a statement from the surety on their bond, consenting to such suspension without prejudice to the bond. The Engineer advised that he investigated the contractors' allegations and found them to be correct. He recommended approval of the request. The Commission approved the recommendation.

For similar reasons the Commission authorized the suspension of the grading and surfacing work on Porter W. Yett's contract for the construction of the Banzer Bridge-Mist Section of the Nehalem Secondary Highway, in Columbia County, contract No. 2504. In this instance, however, the Commission limited the time for the completion of the project to June, 1943.

The Commission recessed at 11:45 a. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

During the luncheon period the Commission conferred in the Congress Hotel with the following members of the Old Oregon Trail Centennial Advisory Commission: Phil Parrish, chairman, Leo Adler and Roy Meyers. The matter of financing the activities of the Advisory Commission was discussed. The question arose as to the advisability of continuing such activities in view of the present war emergency and the probabilities that existing conditions will not permit a great number of visitors to this state. The suggestion was made that the matter should be decided by the Legislature which convenes in January of 1943, and that in the meantime the Advisory Commission continue functioning. Mr. Parrish estimated that expenses would amount to about \$1,500 between now and February 1, 1943, such amount being made up of the salary of the secretary at \$200 per month and general expenses aggregating \$700. The Commission deferred its decision until later in the day.

This matter was reconsidered by the Commission upon its return to the meeting in the Public Service Building at which time the Commission unanimously approved the suggestion. The Commission ordered that the matter be covered by official communications between the State Highway Commission and the Centennial Commission.

At 2:00 p. m. Chairman Cabell made the following announcement with respect to the award of contracts and sale of property, bids for which were taken at the morning session, action thereon having previously been approved by the Commission by unanimous vote:

"Richland-Halfway Rock Production Project, on the Baker-Homestead and Halfway Highways, in Baker County. There were no bids received on this project.

"Buchanan Rock Production Project on the Central Oregon Highway, in Harney County. There were no bids received on this project.

"Walker Mountain Rock Production Project on The Dalles-California and Willamette Highways, in Klamath County. No bids were received on this project.

"Salt Creek Falls-Odell Butte Rock Production Project on the Willamette Highway, in Klamath and Lane Counties. Eugene Sand & Gravel Company, Eugene, submitted the only bid for this project, in the amount of \$44,304.00. The Commission awards this contract to the Eugene Sand & Gravel Company at its bid of \$44,304.00.

"Crabtree Creek-Jordan Section of the Albany-Lyons Secondary Highway, in Linn County. 0.25 mile grading and 2.12 miles surfacing; also furnishing 5,000 cu. yds. crushed gravel maintenance materials. H. C. Walling dba Salem Supply Company, Salem, submitted the only bid for this work, in the amount of \$31,563.00. The Commission awards this contract to H. C. Walling dba Salem Supply Company, at his bid of \$31,563.00.

"Flight Strip Project at Aurora, in Marion County. Warren Northwest, Inc., Portland, submitted the low bid for this work, in the amount of \$309,990.00, using asphalt, and in the same amount using tar. Porter W. Yett, Portland, submitted the next-low and only other bid, in the amount of \$368,505.00, using tar. He did not submit a bid based on the use of asphalt. The Commission refers these bids to the Engineer with power to award the contract to the low bidder, using tar, when certain conditions have been fulfilled.

"Mills Bridge-McNamers Camp Rock Production Project on the Wilson River Highway, in Tillamook County. F. C. Feldschau & Son, Tillamook, submitted the low bid for this project, in the amount of \$70,344.00. Rogers Construction Company, Dayton, Washington, submitted the second-low and only other bid for this work, in the amount of \$76,687.50. The Commission awards this contract to the low bidder, F. C. Feldschau & Son, at \$70,344.00.

"Nye Junction-Grant County Line Rock Production Project on the Pendleton-John Day Highway, in Umatilla County. There were no bids received on this project.

"Rock Creek-Joseph Rock Production Project on the Wallowa Lake Highway, in Wallowa County. There were no bids received on this project.

Sale of Property near Goshen:

"One acre of land with modern five-room house and other buildings on the Willamette Highway about one-quarter mile east of Goshen, in Lane County. Former owners Joseph and Agness Trinka. L. J. McLaughlin, Cottage Grove, submitted the high bid for this property

in the amount of \$2,050.00, cash price. Carl H. Wagner, Eugene, submitted the second-high bid, in the amount of \$2,000.00, on terms. There were three other bidders. The Commission rejects all bids for this property."

The Assistant Attorney requested instructions relative to the sale of the Goshen property in view of the rejection by the Commission of the bids received at this letting. He suggested that the property be placed in the hands of a local real estate agent for private sale. The suggestion was approved by the Commission and it was so ordered.

Mr. Charles M. Knowlton, general organizer of the American Federation of State, County and Municipal Employees, conferred with the Commission relative to the affiliation of state highway department employees in his organization. He asked the Commission to authorize its employees to join his organization if they so desire. He explained that the American Federation of State, County and Municipal Employees is chartered independently of the American Federation of Labor organization, which has nothing whatsoever to say about its activities; that it does not countenance the striking of its members; that it is not concerned whatsoever with any system of spoils; and it has no discrimination for picket lines. The initiation fee, he said, is \$2.00 and the dues are \$1.00 monthly; further, that the main purpose of the organization is to help the employees, particularly in view of the fact that state employees do not function under civil service. The matter was discussed at considerable length, during which discussion Chairman Cabell read aloud the Code of Relations that was adopted by the Commission in 1936 with respect to the affiliation of highway department employees with labor unions, political parties, and similar organizations. He stated that the Highway Commission has not changed its attitude with respect thereto and suggested that the matter of affiliation be left entirely with the employees. The suggestion was approved by Commissioners Clough and Oliver and by Mr. Knowlton, who was informed that he would be given a definite answer after the Commission has had an opportunity to discuss the matter with Governor Sprague. The Commission thereupon reaffirmed, with slight modifications, the Standard Code of Relations, which was adopted by the Commission in 1936, as follows:

The Oregon State Highway Commission does not give consideration in the employment, retention, or dismissal of its employees to their membership in political parties, fraternal orders, religious organizations, or labor unions.

The Oregon State Highway Commission will not discriminate among its employees because of their membership or nonmembership in labor unions. The Commission as in the past, will employ and discharge on the basis of merit and without dictation from any group.

Membership in union labor organizations must not involve participation in any activity deemed by the Oregon State Highway Commission to be inimical to the interest of the State of Oregon.

The Commission discussed the order made by Governor Charles A. Sprague reducing the vehicular speed limit to 35 miles per hour. In the spirit of cooperation, the Engineer was instructed to erect appropriate signs on state highways throughout the state calling attention to such speed limit, and to order such speed limit for all state highway department motor vehicles.

The Engineer reported a request from the Army authorities for the establishment of a 25-mile-per-hour speed limit along the Pacific Highway West for a distance of 1,000 feet on each side of the main entrance to Camp Adair. The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highway or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Pacific Highway West
 Highway Number: 1W
 Route Number: 99W
 Location of Terminals: Highway Engineer's Station 1577+00 to
 1597+00, opposite Camp Adair
 Miles per Hour: 25

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Reconsideration was given by the Commission to the complaint of H. A. Hein relative to the use by the state of a gravel pit at Scappoose. Chairman Cabell recited the history of this case and advised that Mr. Hein is seeking payment for damages in the amount of \$2,500 which in his estimation is exorbitant. He further advised that he suggested to Mr. Hein an alternate settlement whereby the state would purchase from him a small area adjacent to the gravel pit and would deed to him in return a parcel of state-owned land equal in size on which one of Mr. Hein's buildings encroaches, and would also do certain landscaping work around the gravel pit so as to improve the sightliness of his property. However, Mr. Hein absolutely refuses to settle on such basis. The Commission decided, in view of Mr. Hein's attitude to let the matter drop unless Mr. Hein expresses a willingness to settle on the basis of Chairman Cabell's offer.

The Engineer brought up for discussion a tentative program of rock production projects for 1943 construction, as follows:

County	Section	Quantity Cu. Yds.	Estimated Cost
<u>Contracts Awarded</u>			
Malheur	Dead Ox Flat-Cairo Junction	9,500	\$27,800
	Sub-total	9,500	\$27,800
<u>Bids Called For But No Bids Received</u>			
Baker	Richland-Halfway	8,000	\$24,500
Harney	Buchanan Section	7,000	21,700
Klamath	Walker Mountain Section	19,500	54,500
Lane	Salt Creek Falls-Odell Butte	14,100	47,700
Umatilla	Nye Junction-Grant County Line	23,900	64,800
Wallowa	Rock Creek-Joseph	12,000	37,500
	Sub-total	84,500	\$250,700

OCT 1 1942

Program of Rock Production Projects (Cont.)

County	Section	Quantity Cu. Yds.	Estimated Cost
<u>Additional Required Projects</u>			
Tillamook	Mills Bridge-McNamers Camp	27,000	\$ 90,000
Lincoln	Kernville-Newport	20,000	60,000
Benton	Alsea Mountain Section	25,000	65,000
Columbia	Nehalem Highway Section	25,000	65,000
Tillamook	Hebo Section	6,300	13,000
Jackson	Siskiyou Summit Section	8,400	25,000
Curry	Rhinehart Creek-Cape Sebastian	13,800	40,000
Lane	Belknap Springs-Fourmile Butte	11,400	35,000
Lane	Trent-Oakridge	17,000	50,000
Lane	Oakridge-Salt Creek Falls	17,000	50,000
Jackson	Trail-Prospect	16,200	45,000
Jackson	Summit-Trail (Tiller-Trail Hwy.)	6,600	20,000
Grant	Dayville-John Day	17,000	45,000
Malheur	Stinkingwater Creek-Juntura	10,000	30,000
Sub-total		220,700	\$638,000
Total		314,700	\$916,500

We advised that of the total projects listed seven previously have been advertised for bids and that of these seven only one has been contracted, no bids having been received for the others. He also advised that contractors, generally, are not interested in this class of project because it carries such a low priority rating, which handicaps them in the purchase of equipment repair parts. He pointed out the seriousness of the situation and advised that unless the government's priority regulations are modified or changed, permitting contractors to keep their equipment in a good state of repair, it will be impossible to contract any projects of this kind and poor road conditions will be the result. The Commission approved the projects listed in the tentative program and instructed the Engineer to continue to advertise them for bids in the hope that satisfactory results will be obtained.

In this connection the Commission considered that it might be helpful to appeal to the War Production Board for a change in the priority rulings. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the present emergency has made necessary the movement of a large volume of traffic, both civilian and defense, over the public highways of the State; and

WHEREAS, the increased use of public highways for the transportation of United States Army materials and troops has greatly increased maintenance requirements on highways; and

WHEREAS, because of priority requirements, rules and regulations the Highway Commission has found it practically impossible to manufacture or accomplish the production of crushed rock and other roadbuilding materials with which to maintain highways for civilian and defense uses; and

WHEREAS, if public highways, and particularly strategic highways, are permitted to disintegrate, the movement of defense materials by motor vehicle will be greatly impaired; and

WHEREAS, the seriousness of the situation has been emphasized by the fact that when bids for the crushing and production of rock and other highway construction materials were called for by the Commission at its August meeting, which call for bids involved twelve highway jobs, there were received, as a result of said call, only three bids for only three jobs, and only one bid for each job; and

WHEREAS, it is the considered judgment of this Commission that serious conditions which now prevail, as disclosed by the facts set forth above, should be brought to the attention of the federal authorities responsible for priority rulings, requirements and regulations; and

WHEREAS, it appears that with the approval of the federal authorities and within the reach and protection of priority rulings trucks are permitted to transport from the forests over the highways logs of such dimensions and weights as to cause extra and unusual damage to highways comprising the state highway system, all of which highway impairment and damage demands major repairs and improvements if the highways are to be maintained for the movement thereover of war and civilian goods; and

WHEREAS, the State Highway Commission heretofore in response to urgent requests by federal authorities asserted every effort to afford freedom of movement over the public highways of the State by motor vehicle of loads exceeding in length and exceeding in gross weight the limitations fixed by law, and by reason thereof the problem of highway maintenance has become unquestionably serious.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED:

1. That the public highways in Oregon under the control of the State Highway Commission, and particularly the strategic highways, are being seriously damaged by reason of the increased traffic burden imposed upon said highways in connection with the movement thereover of defense and civilian goods, and experience has demonstrated that when public highways are not constantly maintained adequately for the traffic which moves thereover they soon deteriorate, resulting in expensive betterments as opposed to

reasonable repair and resulting too in added transportation costs by reason of unnecessary wear and tear on rubber and equipment as well.

2. Be it further resolved that these conditions and circumstances which prevail in Oregon with respect to maintenance of highways be brought to the attention of the proper federal officials in Washington, and that by this resolution the Commission impress upon official record the necessity for prompt modification and relaxation of priority rulings, requirements and regulations so that highway officials and highway contractors may be assured that degree of safety, assurance and liberty which must exist and prevail if orderly and adequate highway improvement and maintenance is to be afforded for national defense and state needs.

3. That this resolution be entered in the minutes and records of the Commission, and that Mr. Henry F. Cabell, the Chairman, be empowered to transmit to the War Production Board a duly certified copy thereof.

The Commission discussed a letter from Vice Admiral C. S. Freeman, United States Navy Commandant, 13th Naval District, Seattle, advising that the Navy Department has tentatively selected Timberline Lodge as a recuperation center and inquiring, if the selection is made definite, to what extent the State Highway Department might cooperate with the Navy Department in the removal of snow from the road leading to the Lodge from the Mt. Hood Highway, during the winter months. The Commission, after discussion, expressed a willingness to keep this road open for travel during the winter season if the Government will reimburse the state for the expense involved. The Engineer was instructed to so inform Admiral Freeman.

In this connection the Engineer advised that the United States Army has requested that there be made available to the Army, for keeping open the Alaska Highway this winter, all surplus snow equipment that can possibly be spared; and a request has also been made for snow equipment to keep airport runways open during the winter season. He advised that the Highway Department owns eighteen rotary plows, including one at Salem which is used for replacement purposes only, and one at Klamath Falls and another at Burns, neither of which is used to any great extent. He suggested that the Commission could spare two of these rotaries if they are to be used on the Alaska Highway or in some other foreign country, and if the Commission would not require that the following highways be kept open for travel during the winter months: McKenzie Highway between Belknap Springs and Sisters; Crater Lake Highway between Prospect and Fort Klamath; Mt. Hood Highway between Wapinitia Junction and milepost 81.5; Weston-Elgin Secondary Highway; Halfway-Cornucopia Secondary Highway between Carson and Cornucopia; Sumpter Valley Secondary Highway west of Sumpter.

The Commission decided as follows with respect to such roads: McKenzie Highway is to be kept open so far as is possible with push plows;

Crater Lake Highway is not to be kept open for travel between Prospect and Fort Klamath; no snow removal operations are to be conducted on the Mt. Hood Highway between Wapinitia Highway Junction and milepost 81.5; Weston-Elgin Highway is to be kept open only so far as is necessary to accommodate local people; Halfway-Cornucopia Highway is to remain closed between Carson and Cornucopia; Sumpter Valley Secondary State Highway west of the town of Sumpter is to be kept open for travel only in the event that is necessary to accommodate mining operations near Granite.

The Commission also decided to sell two "Snowgo" rotary snow plows to the Government, provided they are to be used in out-of-way places such as on the Alaska Highway. The Engineer advised that the State Highway Department also has two old V-type "Snow King" rotary snow plows stored at La Grande that have not been used for a long time. He was instructed to let the Army have these plows if it wants them.

Relative to the release of additional snow equipment for the removal of snow from airport runways, it was the Commission's opinion that such work should be performed by state highway departments which have charge of the highways in the states in which the runways are situated. By so doing it would eliminate any possibility of snow removal equipment remaining idle in one locality when it is badly needed in another locality.

The question whether or not to continue the arrangement in effect this year for the improvement of city streets that are not on state highway routes had the attention of the Commission. It was the Commission's opinion that such work should be continued as in the past. The Commission thereupon authorized a budget of \$150,000, together with an emergency fund of \$100,000, for such purpose in 1943, and ordered that the work involved be covered by appropriate written agreements between the Commission and the cities concerned.

The Engineer reported a request from the Kaiser Shipbuilding Company for additional space along the water front in Portland near the Burnside Bridge for use as an automobile parking area for shipyard workers who assemble at this point and are transported by other means to their places of work. He recommended approval of the request inasmuch as the area will not be needed by the state until the war is over. The Commission approved the recommendation.

Chairman Cabell brought up for discussion the matter of obtaining rental from Dant & Russell, lumbermen, Portland, for the storing of lumber and ties on land that was acquired by the City of Portland and the state from the Portland Gas & Coke Company in connection with the Front Avenue Project. It appears that Dant & Russell have been using this area for some time without permission or charge and indications are that they intend to continue the use of the same. It was the Commission's opinion that the company should pay for the use of this property. Chairman Cabell was thereupon authorized to contact the city officials of Portland and arrange for a reasonable rental charge.

Reconsideration was given by the Commission to the request of Leonard and Slate, contractors for the furnishing of ferry service across the

Willamette River at Wilsonville, for a modification of the present contract agreement so as to relieve them from losses that they allege they are sustaining by reason of rising operating costs. The Commission decided not to alter the contract in any way and instructed the Secretary to so inform Leonard and Slate. It was further decided to renew the contract for the full period provided in the contract.

The Commission discussed briefly and ordered filed a report from the Engineer showing a yearly summary of labor employed by contractors on highway construction as compiled from the contractors' pay rolls.

A letter was presented from Mrs. A. V. Means, The Dalles, requesting construction of a footpath along the Columbia River Highway for a distance of about one mile from the foot of Rowena Loops to Tindalls Service Station, for the benefit of school children and other pedestrians. The Commission denied the request because of lack of funds to finance the work and the urgent need of available funds for other purposes.

The Commission also discussed a letter from Mrs. H. G. Rumbaugh, Albany, requesting improvement of the North Albany Road, which she alleges was damaged by Camp Adair traffic during improvement of the Granger-Independence Road, the North Albany Road having been used as a detour during that period. It was pointed out in the discussion that the North Albany Road is not on the state highway system but is under the jurisdiction and control of the Benton County Court, in view of which the Commission considered that the improvement of the road is an obligation of the county. The Commission ordered that Mrs. Rumbaugh be so informed.

A request was also presented from the Honorable C. L. Lieuellen, Mayor, Pendleton, for the repair of Main Street and DeSpain Street in his city and suggesting that the work be done by the state's repair crew which is now operating in that vicinity. The matter was referred to the Engineer with authority to do the work in the event that investigation reveals that it is not an expensive project.

The Attorney reported receipt of a request from the attorneys of the defendants in the Algoma flood case that the state join with them in a stipulation in connection therewith, which stipulation provides that any one of the contending parties may contribute funds toward the cost of rebuilding the dike that was damaged and toward the cost of removing the flood waters, and provides further that all parties will refrain from mentioning this feature during the progress of the trial and will not raise any question during the trial as to who is responsible for the repair so as not to prejudice anyone's case. He recommended approval of the request. The Commission approved the recommendation.

The matter of collecting the cost of repairing the Rogue River Bridge near Gold Hill which was damaged by soldiers from Camp White was discussed by the Commission. Investigation reveals that the bridge was damaged by a group of soldiers from Camp White who were on a spree in a stolen bus and that it is impossible to obtain the names of the soldiers involved. The question arose whether or not an attempt should be made to collect the cost of repairing the

bridge which is estimated at approximately \$350.00. The Commission decided, in view of the fact that the guilty parties cannot be ascertained, that it would be useless to try to secure reimbursement, and accordingly ordered that the matter be dropped. However, the Engineer was instructed to bring the matter to the attention of the Camp Commander.

Consideration was also given by the Commission to its claim against Mr. Ray Redman, Jr., for damaging the barrier on the Interstate Bridge between Portland and Vancouver. It appears that Mr. Redman drove his car into the barrier while the bridge drawspan was open to allow the passage of a steamer, and that he was given ample warning of the existing condition by the gate man who sounded the bridge siren for Mr. Redman's special attention, notwithstanding which Mr. Redman failed to stop in sufficient time to avoid striking the barrier. The Engineer estimated the cost of repairs at \$21.65. The Commission referred the matter to the Attorney for collection.

The Commission discussed briefly and referred to the Engineer for further information a report on damage that was caused the Big Creek Bridge at milepost 19.90 on the Coos Bay-Roseburg Highway when it was wrecked by a logging truck belonging to Goodwin and Briggs, Myrtle Creek.

Consideration was given by the Commission to the claim of the Portland Gravel Company, in the amount of \$226.25, for the cost of repairing its dredge "Sandy" which the Company alleges was damaged when it struck the drawspan of the Interstate Bridge at Portland, which the bridge operator failed to open for passage of the dredge. The Attorney advised that he has investigated this claim thoroughly and is of the opinion that the state is not liable for the damage, because the tug that was towing the dredge did not signal for the draw to be opened and it was assumed by the bridge tender that the dredge was to be docked before reaching the bridge. He reviewed the facts in the case and recommended denial of the claim. The Commission approved the recommendation and ordered that the matter be dropped unless the company starts suit.

The Engineer reported the award of the following contracts in conformity with authority previously granted him by the Commission, bids for which contracts were taken by the Commission at its meeting on August 27, 1942:

Alkali Lake Flight Strip Project on the Lakeview-Burns Highway, in Lake County. Awarded to Clifford A. Dunn, the low and only bidder, on August 31, 1942;

Rome Flight Strip Project on the I.O.N. Secondary State Highway, in Malheur County. Awarded to Clifford A. Dunn, the low and only bidder, on August 31, 1942.

The Commission confirmed the awards as reported.

The Attorney reported a suggestion offered by Mr. Ormond R. Bean, Public Utilities Commissioner, that it would be helpful in stopping the overloading of logging trucks if Justices of the Peace were contacted and were

prevailed upon to impose fines against violators in excess of actual court costs. It appears that in numerous instances the Justices of the Peace fine these violators court cost only, which is a small amount and is readily paid by the violators who generally recover the same by increasing the size of their next loads. The Commission approved the suggestion and referred the matter to the Attorney with instructions to have someone contact the Justices of the Peace relative thereto.

The question whether or not truckers who operate under either Group 1 or Group 2 emergency permits should be penalized for overloading their equipment was discussed by the Commission. It was the opinion of the Commission that such violators should be penalized, inasmuch as the violations are apparently willful deviations from prescribed regulations and do not evidence the spirit of cooperation that was intended when the Commission granted the concession. The Commission deferred the establishment of a definite penalty; however, instructed the Secretary to inform the violators that noncompliance with the provisions of the permits will be considered sufficient cause for cancellation of the same.

The Engineer requested authority to place signs to control heavy traffic on the Sanderson Bridge at milepost 01.49 on the Albany-Lyons Secondary State Highway, and on the Willamette River Bridge at milepost 21.91 on the Hillsboro-Silverton Secondary State Highway at Newberg. He explained that there has been quite an increase in heavy traffic over these bridges, particularly log-hauling traffic, and in his estimation, in order to avoid overstressing the structures, only one truck should be allowed on any single span of either of these bridges at one time; furthermore, the speed of the trucks should be limited to 15 miles per hour. The Commission approved the Engineer's request and thereupon adopted the following resolution in regard thereto:

WHEREAS, the present war emergency has brought about a material increase in the number and weight of motor vehicles using the public highways for the transportation thereover of both war and civilian goods; and

WHEREAS, priority rulings and regulations have made difficult the acquisition of materials needed for the repair and maintenance of highway structures and by reason of such difficulties it is not always possible for the Highway Department to sustain its usual and established standard of maintenance of highway structures; and

WHEREAS, as a result of an investigation made by the State Highway Engineer and his staff it has been disclosed that the bridge over the South Santiam River at Mile post 211-01.49 on the Albany-Lyons Secondary Highway and the bridge crossing the Willamette River at Mile post 140-21.91 on the Hillsboro-Silverton Secondary Highway at Newberg should be protected by the imposition of traffic regulation and control as in this resolution provided; and

WHEREAS, it is the judgment of the Commission that in order to avoid serious damage to each of said structures heavy truck

traffic should be restricted and regulated in its use of said structures.

NOW, THEREFORE, be it and it is hereby ordered by the Commission as follows:

1. That with respect to the said bridge over the Santiam River on the Albany-Lyons Secondary Highway and with respect to the bridge over the Willamette River on the Hillsboro-Silverton Secondary Highway at Newberg not more than one loaded motor truck shall occupy any one span of either of said bridges at one and the same time, nor shall any motor vehicle operate over said bridges at a speed in excess of fifteen miles per hour.

2. The State Highway Engineer hereby is directed to erect, or cause to be erected, and maintain at each of the approaches to each of said bridges in a conspicuous place so that the same can be readily seen and read by traffic using said bridge or either of said bridges a notice or notices advising traffic of this rule and regulation.

3. This resolution shall be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the Superintendent of State Police.

The matter of permitting continuous operation of passenger-carrying vehicles, consisting of a truck-tractor and semitrailer having an over-all length of 55 feet 3 inches, over state highways to facilitate the transportation of persons to and from army camps, cantonments or other defense locations had the attention of the Commission. It appears that the government officials have recommended the construction of passenger-carrying vehicles of such size and capacity in order to afford a measure of relief from the present transportation congestion, and it further appears that Wentworth and Irwin, Inc., a manufacturing concern of Portland, has offered to construct vehicles of this type provided they are assured that the State Highway Commission will authorize the operation of the same over state highways. The Engineer recommended that such authority be granted provided the geometric design of the highways will permit the movement of the same without taking up more than one-half of the traveled roadway. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by a resolution adopted by this Commission on June 25, 1942, the Commission declared that an emergency exists with respect to the transportation of persons and property by motor vehicle over the public highways of the State; and

WHEREAS, by said resolution the Commission declared and established a policy for the duration with respect to the issuance of permits for the use of motor vehicles on state highways having

a combined weight or having an over-all length in excess of the limits fixed in the statute; and

WHEREAS, since the adoption of said resolution the transportation of persons to and from Army camps, cantonments or other defense locations or activities has become more acute and for the purpose of affording a measure of relief government officials have recommended the construction of a passenger-carrying vehicle having an over-all length of 55 feet 3 inches; and

WHEREAS, in response to said request and recommendation Wentworth & Irwin, Inc. of Portland, Oregon, have offered to construct such vehicle and make the same available for the transportation of persons to and from Army camps, cantonments and other defense locations and activities, provided a permit will be issued by the Highway Commission authorizing the use of such vehicle on state highways; and

WHEREAS, it is the judgment of the Commission that both state and national interests will be served and public welfare promoted by the proper and appropriate use of such proposed type of vehicle for the purposes hereinabove stated.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That in the opinion and judgment of the Commission the present emergency and the interest of national defense require that judicious use of every means of transportation during the emergency be encouraged and utilized.

2. That it shall be and hereby is declared the policy of the Commission to issue permits for the use of motor vehicles having an over-all length in excess of the statutory length when such vehicles are used for the transportation of persons to and from Army camps, Army cantonments or other places of defense or defense industries.

3. That the Secretary of the Commission be and he hereby is instructed, upon receipt of appropriate and satisfactory application, to issue a permit to such applicant, which permit shall embody the conditions, provisions and restrictions set out in said resolution of June 25, 1942, except where any of such conditions, provisions or requirements are not applicable or are not appropriate.

4. No such permit or permits shall be issued with respect to any highway or section of highway unless and until the Chief Engineer shall have certified that the geometric design of the highway is such that the vehicle in connection with which a permit is requested can negotiate the highway with complete safety to other members of the traveling public.

5. Such permit may be issued for one year and may be renewed thereafter by the Commission or may be revoked at the option of the Commission, but in no event shall any such permit be issued for a period beyond the present emergency.

6. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to Ormond R. Bean, Public Utilities Commissioner, and Charles P. Pray, Superintendent of State Police.

The Commission discussed and approved the application of the Union Pacific Railroad Company to transport a fuel-oil tank over the Old Oregon Trail from Pleasant Valley to Durkee, the overall dimensions of the same being width 15½ feet, height 22 feet, and length 53 feet. Such approval was granted subject to the condition that the load is properly flagged, that turn-outs will be provided at frequent intervals so as to permit other traffic to pass the movement without undue inconvenience and delay, and provided further that the state is furnished satisfactory insurance as protection in the event of an accident occurring during progress of the movement.

The Commission also approved the application of the Portland Gas and Coke Company to transport two large steel tanks over state highways, one from Bend and the other from La Grande, to convenient points on the Columbia River where they will be barged to Portland. The conditions applying to the movement of the railroad company's tank, mentioned above, are to apply to each of these movements.

The Engineer requested instructions relative to the disposal of a 1¼-yard Lorain gas shovel belonging to the highway department and stored at Garibaldi. He advised that this shovel was obtained several years ago from Tillamook County along with other equipment and was valued at that time at \$2,500; that it has been in use on the Wilson River Highway WPA construction work but its most recent use has been by Tillamook County at Garibaldi. He further advised that the shovel is beginning to rust quite badly and should be moved to Salem for proper storage; however, it will cost about \$800 to move it. He recalled that the Commission some time ago rejected two offers received for the purchase of this shovel, one of which was in the amount of \$5,000, because it was thought advisable to rent it. However, no satisfactory bid has been received for the use of the shovel on that basis. He recommended in view of the circumstances that the shovel be sold and that bids for the purchase of the same be received by the Commission at the earliest possible time. The Commission approved the recommendation and ordered that the shovel be advertised for sale at the next meeting.

The Engineer brought up for discussion the matter of sale of scrap materials consisting of worn-out equipment, parts, et cetera, which are accumulated at the highway department shops. He advised that, according to governmental rulings, when new replacement parts for equipment are purchased, the old parts that are being replaced must be sold within 30 days of receipt

of the new parts. The policy in the past, he said, has been to collect such scrap materials at the various shops until a sufficient amount has been accumulated to justify the taking of bids for the same, but this policy cannot be followed now because of the governmental regulations. In view thereof he requested authority from the Commission to dispose of this material by private sale as may be necessary in order to comply with the regulations, provided he is able to secure ceiling prices established by the government. The Commission approved the request with the understanding that if the Engineer is not able to secure the ceiling prices then the material is to be advertised for sale in conformity with past practice.

The Commission approved and ordered filed the following resolutions relative to certain sections of old state highway rights of way that have been abandoned by the Commission because of revisions in highway alignment:

Resolution from Umatilla County whereby the county elects to retain for public purposes a portion of the old right of way of the Pendleton-Adams Section of the Oregon-Washington Highway, particularly the section between Engineer's Stations 37+00 and 640+00, being a portion of what is commonly known as the Wild Horse Section.

Resolution from Coos County in which the county elects to preserve for public purposes that portion of the old right of way of the Cape Arago Secondary Highway within the town of Charleston which lies between Engineer's Station 264+80 and the east shore of South Slough.

The Commission had under discussion the matter of attending the annual meeting of the American Association of State Highway Officials which is to be held in St. Louis, Missouri, on December 7, 8 and 9, 1942. A decision as to who shall attend this meeting was deferred until later.

A letter was presented from Mr. Ben C. Flaxel, District Attorney, Coos County, relative to the development of a certain spring situate on the state highway right of way between North Bend and Marshfield. Mr. Flaxel advised that the spring is now being used by many people in the Bay area for drinking water and that the Coos County Court is desirous that the spring be maintained for such purpose and that steps be taken to insure that it does not come into the control of any one person; further, that the County Court would like to develop this spring if the Highway Commission will grant it authority to do so. The Commission approved the request subject to the condition that the development work be performed so as to fit the highway improvement and be done under the supervision of the State Highway Engineer or his authorized representative.

The Commission discussed briefly and ordered filed a letter from Governor Chase A. Clark of Idaho to Governor Charles A. Sprague of Oregon, suggesting that operators of equipment used in the transportation of produce of the farm be relieved of the payment of Oregon's regulatory taxes and fees. Governor Sprague's reply was also noted in which he stated his unwillingness to take action to that end because he did not believe that it was a sound public policy.

The Commission also noted and ordered filed a letter from Mr. Orville R. Miller, President of the West Coast Lumbermen's Association, expressing regrets that the practice of overloading logging trucks seems to be on the increase, and advising that his association is taking action which they hope will impress on the logging operators the necessity for compliance with the weight requirements.

A letter was presented from Fairview Grange, Tillamook County, expressing appreciation for the guard fence recently constructed by state highway forces along the Wilson River Highway near Jordan Creek; also requesting authority to plant a shade tree on the highway right of way near one of the drinking fountains that have been constructed on the highway right of way in this vicinity. The Commission approved the planting of the shade tree provided it is placed in a location satisfactory to the engineering department.

Reconsideration was given by the Commission to the matter of payment of overtime by contractors on highway construction work. In view of conflicting opinions as to the application of the state laws, federal acts, and presidential orders, the Commission decided that it would be unwise to continue any attempt to advise or control contractors in such matter. The Engineer was instructed to inform all contractors of this decision and to caution them that the Commission's action does not relieve them of their legal responsibilities under the several laws, acts and presidential orders that are involved; also, that any noncompliance with such laws, acts and orders will be at the responsibility of the contractor. (See circular letter No. 314, dated October 17, 1942) He was also instructed to delete the clause in the contract forms that refers to overtime payments, if not legally required, the next time the forms are reprinted.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Fence construction along juniper waysides:-The Parks Superintendent reported a request from Chas. C. Parsell, District Grazier, Department of the Interior, Prineville, for permission to construct a fence across certain portions of the juniper tracts that the Commission is acquiring between Bend and Redmond. He said that the outline of the tracts that the state is acquiring is irregular and that it would not be practicable to construct a fence along the boundaries; whereas, Mr. Parsell wished to construct his fence in a straight line which would cut off a portion of the property that the state is negotiating for. To offset this, he said Mr. Parsell has stated a willingness to grant to the state similar land of equal value from the state's standpoint. He recommended approval of the request. The Commission approved the recommendation.

Sheep grazing in Humbug Mountain State Park:-The Parks Superintendent reported a request from Mr. Ray Fromm for renewal of the sheep-grazing lease that he had in this park last year which provides for the grazing of 50 head of sheep at \$0.50 per head. The Commission approved such extension for a period of one year at the same rate.

Forest fire in Port Orford Cedar Park:-The Parks Superintendent reported the recent burning of 34 acres in a Port Orford cedar way-side tract about seven miles north of Port Orford on the Oregon Coast Highway. This tract, he said, was burned several years ago but the damage done at that time was cleaned up and the timber salvaged. The damage from the present fire was to volunteer cedar. The fire, he said, was of incendiary origin and one party has already been arrested and placed in jail for committing the offense. The Commission took no action.

Proposed purchase of Simpson property at Shore Acres, Coos County:-The Parks Superintendent reported an offer from Mr. Louis Simpson to sell to the state for the sum of \$30,000 all of his holdings at Shore Acres adjacent to the Cape Arago Secondary Highway south of Empire, including buildings. He said that Mr. Simpson originally wanted \$75,000 for this property but will now accept \$30,000, of which amount \$7,500 is to be paid in cash and the balance at the rate of \$3,750 a year for six years, without interest. The tract, he said, contains about 200 acres of land, all situate between the highway and the ocean, and has about three miles of ocean frontage; furthermore, it joins Cape Arago State Park. The matter was discussed at considerable length during which the Commission indicated a favorable attitude toward the purchase of this property; however, deferred a definite decision pending search of the title so as to make certain that it is not encumbered in any way. The matter was referred to the Attorney to make such investigation.

Sale of timber on Neahkahnie Mountain, at Short Sand Beach State Park:-The Parks Superintendent requested instructions relative to disposal of this timber in view of the fact that it has been advertised for sale on two different occasions and no bids have been received. The State Highway Engineer suggested that the matter be placed in the hands of a timber broker to sell on a selective-cutting basis, inasmuch as a lot of the timber is ripe and should be cut. The Commission approved the suggestion and so ordered.

Financial report:-The Parks Superintendent submitted a financial report as follows, for the period January 1 to August 31, 1942:

	<u>1942 Budget</u>	<u>Expenditures to August 31</u>	<u>Balance</u>
Acquisition	\$ 7,160.27	\$ 20,571.48	\$ 13,411.21-
Betterment	3,833.30	5,124.55	1,291.25-
Operation & Maintenance	<u>42,134.85</u>	<u>22,884.05</u>	<u>19,250.80</u>
	\$53,128.42	\$48,580.08	\$ 4,548.34

The Commission approved the report by unanimous vote.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission

authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Bridge - - - 4-1436 - Puget Island Crossing, Columbia River Section, Columbia River Highway, Clatsop Co. 2nd authorization - \$500
Total to date \$2000

Location - 18-1455 - Pelican City-Menley Section, Klamath Falls-Malin Highway, Klamath County. 2nd authorization - \$4000
Total to date \$13000

Reconn.- - 22-1452 - Lebanon-Foster Section, Santiam Highway, Linn County.
1st authorization - \$1500

Plans - - 20-1452 - Oakridge-Salt Creek Section, Willamette Highway, Lane County. 1st authorization - \$100

Location - 14-1421 - Viento-Hood River Section, Columbia River Highway, Hood River County. 1st authorization - \$8000

Location - 33-1431 - Mosier-The Dalles Section, Columbia River Highway, Wasco County. 1st authorization - \$17000

Location - 109-1448 - Bend-Airport Section, Powell Butte Highway, Deschutes County. 1st authorization - \$330

Plans - - 18-1463 - Klamath Falls Oil Storage Sump Section, Various Highways, Klamath County. 1st authorization - \$150

Plans - - 18-1462 - Chemult Oil Storage Sump Section, Various Highways, Klamath County. 1st authorization - \$200

Plans - - 19-1429 - Lakeview Oil Storage Sump Section, Various Highways, Lake County. 1st authorization - \$200

Reconn.- - 34-1433 - Tigard-Cornelius Pass Section, West Portland-Hubbard Extension Highway, Washington County.
1st authorization - \$3200

Revetment - 6-1430 - Coquille River Revetment Section, Oregon Coast Highway, Coos County. 1st authorization - \$200

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make

surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map-file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
6B6-2	4-1462	Columbia	Bridge	Columbia River Xing near Knappa	Columbia River
5B31-21)110-1433 5B33-23)		Douglas	Location	Days Creek-Milo	Tiller-Trail
6B6-1	215-1441	Jackson	Reconn.	Sams Valley-Evans Creek	Ramsey Canyon Access Road
7770 (Br. Dept.)	25-1410	Morrow	Bridge	Columbia River Xing near Paterson	Columbia River

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Homer G. Johnson, contract No. 2390, for grading, surfacing and oiling the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County, requested an extension of time, from August 31, 1941, to August 21, 1942, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to the following reasons: adverse weather conditions, shortage of skilled labor, difficulties in securing repair parts, supplies and equipment, increase in quantities, and insufficient

quantities of surfacing materials obtainable from sources specified in the contract. The Engineer advised that to a minor degree Mr. Johnson was handicapped throughout the job by shortage of skilled labor and difficulties encountered in obtaining repair parts and supplies, but in the main the delay was caused by his superficial examination of the proposed gravel pits prior to his bidding and to his total inability to secure the satisfactory material which he anticipated using. He gave as his thought, in view of the circumstances prevailing during the past year under which the contractor had little opportunity to conduct the job efficiently, that the extension of time requested should be granted without penalty and he so recommended, notwithstanding that this is a federal aid job and the Public Roads Administration does not concur. The Commission approved the recommendation.

R. O. Dail & Warren Bros., Inc., contract No. 2401, for surfacing and oiling the North Powder-Davis Ranch Section of the North Powder River County Road, in Union County, requested an extension of time, from July 15, 1941, to August 11, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the following reasons: excessive rains during April, May, June and July 1942, shortage of skilled and common labor, excessive breakdown of equipment because of inexperienced labor, and difficulties in securing delivery of asphalt. The Engineer recommended that the extension of time requested be granted without penalty because general conditions of labor and material prevailing since the award of this contract were adverse. The Public Roads Administration, he said, will not concur in the recommendation, nevertheless he believes that the contractor should not be penalized for the delay. The Commission approved the recommendation.

R. O. Dail & Warren Bros., Inc., contract No. 2414, for grading, topping, surfacing and oiling the Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway, in Baker County, requested an extension of time, from August 31, 1941, to August 11, 1942, within which to complete this job. The contractor gave the following reasons for failure to complete the project within the specified time limit: too many contracts under way in the early part of 1941; excessive rains during the months of April, May, June and July 1942, difficulties encountered in the quarrying of the rock, increased quantities to be furnished, and the surfacing of an additional three miles not included in the original contract, shortage of skilled and common labor, difficulties in securing deliveries of asphalt, and time lost in repair of equipment damaged by inexperienced help. The Engineer recommended that the extension of time requested be granted without penalty in view of the adverse conditions under which the contractor has been working the past year and over which he had no control. The Commission approved the recommendation.

E. L. Gates, contract No. 2468, for grading, surfacing and bituminous macadam on the Rock Creek-Benton County Line Section of the Alsea Highway, in Lincoln County, requested an extension of time from July 31 to August 27, 1942, within which to complete this project. He attributed his failure to complete the project within the specified time limit to inability to find a suitable rock quarry, making it necessary to negotiate a price agreement. The Engineer advised that the grading work was completed and some surfacing work done before the rainy season set in last fall but the contractor could not complete the project because of difficulties experienced in securing needed materials. The work, he said, has now all been completed in a satisfactory manner under a revised agreement whereby gravel was substituted for crushed rock and the oiled surface was eliminated. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

C. J. Eldon, contract No. 2481, for grading, surfacing, bituminous macadam and bridge construction on the Trask River-Peltz Corner Section of the Fairview-Clements Corner and Long Prairie County Roads, in Tillamook County, requested an additional extension of time, from June 30 to August 28, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions, making it impracticable to construct the oiled treatment within the specified time. The Engineer advised that the reason given by the contractor for overrun of time limit is correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. S. Wallace, contract No. 2511, for furnishing crushed materials in stock piles for the Hood River Rock Production Project on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties, requested an extension of time, from March 31 to August 14, 1942, within which to complete this job. He gave no reasons for failure to complete the project within the specified time limit. The Engineer advised that the contractor's delay was due to difficulties encountered in securing repair parts for his equipment and in the securing of competent labor. He further advised that the state has not incurred any extra expense for engineering supervision and recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

A. S. Wallace, contract No. 2512, for furnishing crushed materials in stock piles for the Beatty-Paradise Creek Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath County, requested an extension of time, from April 30 to July 29, 1942, within which to complete this job. He gave no reasons for failure to complete the project within the specified time limit. The Engineer recommended that the extension of time requested be granted without

penalty due to the fact that Mr. Wallace's operations were delayed by trouble in securing repair parts for his equipment and by labor conditions beyond his control. The Commission approved the recommendation.

Blair T. Alderman, contract No. 2524, for construction of two frame cabins at the Santiam Junction Patrol Station on the Santiam Highway, in Linn County, requested an extension of time, from December 31, 1941, to August 25, 1942, within which to complete the job. He alleged that his failure to complete the contract within the specified time limit was due to war conditions which made it difficult for him to secure men and materials. Furthermore, he encountered unusually severe weather conditions. The Engineer advised that work on this contract, except for the outside painting, was completed on February 20, 1942, and that the weather was not suitable for the painting work so the contractor was directed to postpone such work until suitable weather obtained during the summer. The reasons given by the contractor for the delay, he said, are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Independence Sand & Gravel Company, contract No. 2538, for furnishing crushed materials in stock piles for the Willamina Rock Production Project on state highways near Willamina, in Polk, Tillamook and Yamhill Counties, requested an extension of time, from May 31 to July 31, 1942, within which to complete this job. The company gave no reasons for failure to complete the project within the specified time limit. The Engineer advised that the overrun of time limit on this job was due to an increase in the quantity of material that was required to be furnished. It was his thought that the extension of time requested should be granted without penalty and so recommended. The Commission approved the recommendation.

Independence Sand & Gravel Company, contract No. 2539, for furnishing of crushed materials in stock piles for the McMinnville Rock Production Project on state highways near McMinnville, in Polk and Yamhill Counties, requested an extension of time from May 31 to August 20, 1942, within which to complete this job. It gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the overrun of time limit on this job was due primarily to increased quantities of material that the contractor was required to produce. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Independence Sand & Gravel Company, contract No. 2543, for furnishing crushed materials in stock piles for the Rickreall Rock Production Project on state highways near Rickreall, in Polk County, requested an extension of time, from May 31 to July 23, 1942, within which to complete this job. It gave no reason for failure to complete the project within the specified time limit. The Engineer

advised that the contract quantities on this job were increased materially which accounts for the fact that the work was not completed within the specified time limit and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

A. H. Saxton & Son, contract No. 2575, for furnishing crushed materials in stock piles for the Lebanon-Sweet Home Rock Production Project on the Santiam Highway, in Linn County, requested an extension of time, from July 31 to September 2, 1942, within which to complete this job. They gave no particular reason for their failure to complete the job within the specified time limit but stated that they were delayed because of conditions beyond their control. The Engineer advised that the delay in completion of this contract has not caused the general public any inconvenience, neither has it caused deferment of the work for which the material was to be provided. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2390, 2401, 2414, 2468, 2481, 2507, 2511, 2512, 2524, 2538, 2539, 2543, 2575, 2578, and 2599, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2390, with Homer G. Johnson, for grading, surfacing and oiling on the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County. Completed August 21, 1942.

Contract No. 2401, with R. O. Dail & Warren Bros., Inc., for surfacing and oiling on the North Powder-Davis Ranch Section of the North Powder River County Road, in Union County. Completed August 11, 1942.

Contract No. 2414, with R. O. Dail & Warren Bros., Inc., for grading, topping, surfacing and oiling on the Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway, in Baker County. Completed August 11, 1942.

Contract No. 2468, with E. L. Gates, for grading, surfacing and bituminous macadam on the Rock Creek-Benton County Line Section of the Alsea Highway, in Lincoln County. Completed August 27, 1942.

Contract No. 2481, with C. J. Eldon, for grading, surfacing and bituminous macadam, and construction of two bridges on the Trask River-Peltz Corner Section of the Fairview-Clements Corner and Long Prairie County Roads, in Tillamook County. Completed August 28, 1942.

Contract No. 2507, with Poole & McGonigle, for furnishing structural steel for the Morrison Street Bridge, Portland, in Multnomah County. Completed August 29, 1942.

Contract No. 2511, with A. S. Wallace, for the Hood River Rock Production Project, on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties. Completed August 14, 1942.

Contract No. 2512, with A. S. Wallace, for the Beatty-Paradise Creek Rock Production Project, on the Klamath Falls-Lakeview Highway, in Klamath County. Completed July 29, 1942.

Contract No. 2524, with Blair T. Alderman, for construction of employee's cabins at the Santiam Junction Patrol Station, at the junction of the North and South Santiam Highways, in Linn County. Completed August 25, 1942.

Contract No. 2538, with the Independence Sand & Gravel Company, for the Willamina Rock Production Project, on state highways near Willamina in Polk, Tillamook and Yamhill Counties. Completed July 31, 1942.

Contract No. 2539, with the Independence Sand & Gravel Company, for the McMinnville Rock Production Project, on state highways near McMinnville, in Polk and Yamhill Counties. Completed August 20, 1942.

Contract No. 2543, with Independence Sand & Gravel Company, for the Rickreall Rock Production Project on state highways near Rickreall, in Polk County. Completed July 23, 1942.

Contract No. 2575, with A. H. Saxton & Son, for the Lebanon-Sweet Home Rock Production Project on the Santiam Highway, in Linn County. Completed September 2, 1942.

Contract No. 2578, with Warren Northwest, Inc., for pavement resurfacing on South Twelfth Street, Salem, in Marion County. Completed September 3, 1942.

Contract No. 2599, with Babler Bros., for oiling on the Shaniko Section of the Sherman Highway, in Wasco County. Completed September 8, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the City of Albany relative to the improvement of the Pacific Highway East through Albany.

Agreement with Bonneville Power Authority providing for the construction of the Wolf Creek Highway across certain government-owned lands.

Agreement with L. E. Bierce covering the use of a logging road across Van Duzer Corridor.

Application for Withdrawal from the Registry System of a parcel of land situate in Multnomah County.

Application for transfer of the water right in connection with Peter Skene Ogden State Park.

The Commission set Thursday, November 5, 1942, as the date for its next regular meeting for the receiving of bids. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:00 p. m.

W. S. Stearns
State Highway Engineer

W. S. Stearns
Secretary

Henry F. Cabell
Chairman

Spencer McClary
Commissioner

Norman Oliver
Commissioner

Portland, Oregon, November 5, 1942

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work, sale of power shovel, and sale of timber were opened and read in conformity with previously published rotices, following which Chairman Cabell announced that the awards would be made at 2:00 p. m. in the same room:

BAKER-HOMESTEAD AND HALFWAY HIGHWAYS
RICHLAND-HALFWAY ROCK PRODUCTION

No bids received on this project

NEHALEM SECONDARY HIGHWAY
BANZER BRIDGE-WASHINGTON COUNTY LINE ROCK PRODUCTION

Jed Wilson
Porter W. Yett

\$37,847.00
39,610.00

CENTRAL OREGON HIGHWAY
BUCHANAN ROCK PRODUCTION

No bids received on this project

THE DALLES-CALIFORNIA AND WILLAMETTE HIGHWAYS
WALKER MOUNTAIN ROCK PRODUCTION

No bids received on this project

WILLAMETTE HIGHWAY
TRENT-SALT CREEK FALLS ROCK PRODUCTION

No bids received on this project

OREGON COAST AND CORVALLIS-NEWPORT HIGHWAYS
NEWPORT ROCK PRODUCTION - HAULING ROAD AND CRUSHED ROCK

E. F. Altree

\$29,000.00

PENDLETON-JOHN DAY HIGHWAY
NYE JUNCTION-GRANT COUNTY LINE ROCK PRODUCTION

No bids received on this project

NOV 5 1942

WALLOWA LAKE HIGHWAY
ROCK CREEK-JOSEPH ROCK PRODUCTION

No bids received on this project

SALE OF TIMBER AT SHORT SAND BEACH STATE PARK

Hanson Brothers	\$4,000.00
Gray Logging Company	2,750.00

SALE OF LORAIN GAS SHOVEL

Grimstad and Vanderveldt	\$4,250.00
Jed Wilson	3,500.00
Salem Iron Works	3,350.00
Babler Bros.	3,260.00
C. J. Eldon	2,400.00
The United Contracting Company	2,000.00
E. M. Tesdahl	1,755.00
Brookfield Company	1,260.00

The Commission by unanimous vote approved the minutes of the meeting held on July 23, 1942.

The Engineer brought up for discussion a request from Colonel Barton of the Walla Walla Army Air Base for snow removal on the Weston-Elgin Secondary Highway, between Weston and Tollgate, for the benefit of army forces who are to train in this vicinity. The Engineer estimated that it would cost about \$6,000 to do what Colonel Barton asks. He questioned the advisability of performing this service, unless it is absolutely necessary, because of shortage of equipment and man power. The suggestion was made that the request should be confirmed by General Olds of the Second Air Force Command, Fort Wright, Washington; also, that complete facts with regard to the equipment and labor situation should be brought to the attention of Colonel Barton before a decision is reached. The Engineer was thereupon instructed to contact Colonel Barton by telephone. Such contact was made by the Engineer during the afternoon session and as a result thereof the following telegram was sent to General Olds:

GENERAL OLDS
2nd AIR FORCE COMMAND
SPOKANE, WASH.

HAVE REQUEST FROM BARTON, COMMANDING OFFICER, WALLA WALLA AIR BASE, FOR SNOW REMOVAL ON TOLLGATE ROAD SO THAT TROOPS MAY BE TRAINED IN WINTER CAMP AT TOLLGATE. YOU HAVE REQUESTED OUR SNOW PLOWS FOR SNOW REMOVAL ON RUNWAYS. WE REPLIED SUGGESTING THAT WE PERFORM WORK AT COST WHICH WOULD MAKE POSSIBLE THE MORE COMPLETE USE OF EQUIPMENT, WHICH IS QUITE SCARCE, AND THEREBY INSURE SNOW REMOVAL FROM BOTH RUNWAYS AND HIGHWAYS. SO MANY REQUESTS ARRIVE THAT IT SEEMS NECESSARY TO SET UP A PRIORITY IN PROJECTS. IF YOU CONSIDER THAT, UNDER CONDITIONS OF LIMITED EQUIPMENT AND MANPOWER, TOLLGATE PROJECT IS NECESSARY WE WILL PERFORM THE WORK AT A COST ESTIMATED TO BE \$6,000 WHICH WE WILL ASSUME.

HENRY F. CABELL, CHAIRMAN, STATE HIGHWAY COMMISSION

In this connection the Secretary presented a letter from the Tollgate postmaster urging the Commission to keep this highway open during the winter months for the benefit of the Tollgate mail carrier. It was the Commission's decision that the expense is not justified for this reason alone and thereupon denied the request.

The Engineer also brought up for discussion the matter of snow removal on the road which extends from the Mt. Hood Highway to Timberline Lodge. He recalled that the United States Navy has in mind using the lodge as a recuperation center for naval personnel, provided the road to the lodge is kept open. He advised that the road in question is not a state highway, hence state funds could not be used to finance the snow removal operations, although there is a possibility that the project is eligible for federal access moneys. In view thereof he recommended approval of the operations provided the federal moneys can be secured to pay the cost. The Commission approved the recommendation.

A letter was presented from Senator Earl E. Fisher, Beaverton, suggesting action on the part of the Highway Commission to refute a proposal that is being made by highway carriers for a reduction in carrier fees. The Commission indicated approval of Senator Fisher's suggestion; however, deferred definite action thereon. The Attorney was instructed to advise Senator Fisher that his letter has had the attention of the Commission.

The question of maintenance of the DeLaura Beach Road and the Ridge Road, in Clatsop County, had the attention of the Commission. In the discussion it was pointed out that these roads are not state highways, although they are of general public interest because they are used principally by military traffic. It appeared to the Commission, in view thereof, that it would be justified in expending state funds in conjunction with Clatsop County funds to maintain them for the duration of the war, if the county will maintain them thereafter. The Commission by unanimous vote approved such an arrangement provided it is agreeable with Clatsop County Court. The Engineer was instructed to contact the county court relative thereto. (The Engineer reported later that the county court approved the arrangement.)

The Engineer reported that, on October 29, 1942, he awarded to Warren Northwest, Inc., the contract for the construction of the Aurora Flight Strip, bids for which were taken on October 1, 1942, the conditions of the award having been satisfied. The Commission approved the award as reported.

The Commission had under consideration a request from Lindstrom Brothers for the termination of their contract, No. 2594, for construction of bridges on Sunderland Avenue Access Road, in Portland, due to difficulties in obtaining lumber required for these structures. They declared that they have done everything in their power to secure the necessary lumber but without success, and asked to be relieved of their obligation. The Engineer stated that he could not agree with the contractor that it is impossible to secure lumber for these structures and recommended that the request be denied. The Commission approved the recommendation. The matter was discussed further later in the session at which time the Engineer advised that the lumber for

these structures has been manufactured by the Clark-Wilson Lumber Company and is ready for delivery, although, because of union difficulties, delivery cannot be made. He suggested that the Commission authorize the use of state trucks for the purpose if the contractor will pay the transportation costs. The Commission approved the suggestion. It later developed that delivery of the lumber could not be made even in state trucks because of union difficulties. The matter was thereupon referred to the Engineer to work out a solution.

The question whether or not to penalize contractor E. L. Rigdon for failure to complete his contract, No. 2473, for construction of the Days Creek-Wright Ranch Section of the Tiller-Trail Secondary Highway, in Douglas County, within the specified time limit, had the attention of the Commission. The Engineer advised that the contract provided for the work to be done by September 30, 1941; however, it was not completed until June 30, 1942. The delay, he said, was due largely to the fact that Mr. Rigdon was awarded two contracts at the same meeting, the other being for the construction of the Oak Creek-Marks Ranch Section of the North Umpqua County Road, in Douglas County, and that he did not have sufficient equipment to do both jobs at the same time. He further advised that Mr. Rigdon sublet the crushing and oiling work on the job to the Rogers Construction Company and J. C. Compton, who could not start this work as early as was anticipated because Rogers Construction Company had several other small jobs under way which were not finished until December, so, even if Mr. Rigdon had finished the grading work, it would not have been possible to complete the job within the specified time limit. He read aloud a letter from Division Engineer K. D. Lytle on the subject (see letter of October 29 from K. D. Lytle to H. G. Smith) and recommended in view of the findings contained therein that Mr. Rigdon be relieved of the penalty for failure to complete the job within the specified time, which penalty amounts to \$2,021.71. The Commission approved the recommendation.

The Commission discussed a letter from Mr. Maury Maverick, Chief, Bureau of Governmental Requirements, War Production Board, Washington, D. C., suggesting a cooperative plan between states, counties and municipalities for snow removal on important roads and streets during the winter months, in view of the fact that necessities of the war effort have greatly curtailed the supply of all new snow removal equipment. Mr. Maverick's plan involves a cooperative arrangement between the states, counties and towns whereby one could assist the other in this undertaking by renting equipment or performing the actual work. The Engineer advised that a similar communication has been received from the Public Roads Administration. He recommended approval of the arrangement and that a letter be directed to the county and municipal officials of the State of Oregon requesting their cooperation in order to reach the desired objectives which would work to the mutual benefit of all parties concerned. After consideration the Commission approved the recommendation and authorized the Engineer to direct the following letter to such county and municipal officials:

The State Highway Commission has received a communication from Louis Levenson, Chief of the Maintenance Machinery Section, Bureau of Governmental Requirements of the War Production Board, also a communication from the Public Roads Administration requesting

that the State Highway Department, the counties, and the cities work out a cooperative agreement or plan whereby all essential highways, roads, and streets may be kept open this winter in the event of heavy snowfall.

In conformance with the request contained in these letters, the State Highway Commission suggests that the counties and cities send in a statement of the snow removal equipment owned and operated by the counties and cities in order that it may be known what equipment is available for use for snow removal during the coming winter.

This information is requested due to the fact that, in case of severe snow conditions occurring in any certain locality or in case of a general storm the equipment can be assigned to take care of those roads which must be kept open for the movement of essential war materials or army movements.

It is the desire of the Commission to make available to the counties and cities the State equipment to assist in snow removal on those roads and streets which may become blocked and which it is necessary to open as soon as the major arteries have been opened for traffic.

It is the desire of the Commission to furnish this service to the counties and cities on a cost basis of a certain sum per hour, which will include operators and operative expense, and it is the suggestion of the Commission that counties and cities fix a price per hour for the use of their equipment which will include the operators and operating expense for each type of snow removal equipment which is owned by the county or city.

The State will prepare a statement of rental charges for the various types of equipment and place this statement in the hands of the county and city officials, so that they will know when they call on the State for assistance what the rates for the equipment will be, and the Commission desires to have a letter or statement from the county and city officials advising what the rate will be if the State calls upon the counties and cities for assistance.

It is the desire of the Commission to carry out the request of the Maintenance Machinery Section of the War Production Board, and the Commission hopes that the counties and cities will feel free to cooperate for the mutual benefit of the State, county, city and nation.

The Commission had under discussion a letter from Mr. Ralph H. Mitchell, Executive Secretary of the State Salvage Committee for Oregon, in which the Commission was asked to turn over to the Salvage Committee an old steel bridge which has been dismantled and is stored at the highway maintenance yard at Seaside. Mr. Mitchell would like to have this material in

NOV 5 1942

connection with a state-wide scrap drive. The Engineer advised that the trusses of this old bridge are of very little value although the floor beams and stringers could be used to advantage in the construction or maintenance of short-span bridges. He recommended approval of Mr. Mitchell's request in so far as it pertains to the bridge members that cannot be used by the highway department. The Commission approved the recommendation.

The Engineer requested authority to post reduced load limit signs on the Little Luckiamute River Bridge on the Kings Valley Secondary Highway, in Polk County, limiting loads to 15 tons. He explained that the hauling of logs across this structure was started a few days ago and that the condition of the bridge is such that the continued movement of log trucks is unsafe; further, that the bridge is located within the boundaries of Camp Adair and probably will be closed by the Army in the not distant future, in view of which an expenditure to strengthen the bridge to withstand legal weight loads would be a waste of money. The Commission approved the Engineer's request and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the road or highway hereinafter named has been designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon, as a state highway:

AND WHEREAS, on the said state highway there is located a certain bridge structure, known as the "Little Luckiamute River Bridge", which, in the judgment of the State Highway Commission, is incapable of safely carrying the traffic to which it is being subjected, and, in order to protect said bridge structure against damage and injury and in order to safeguard traffic over said bridge structure, it is deemed and is the judgment of the State Highway Commission and said Commission finds that it will be for the best interests of the said bridge structure and of the traffic which uses the said bridge structure that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of the said structure at any time shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having, as a result of due investigation, found that the bridge structure above referred to and hereinafter designated is incapable of safely sustaining or supporting a total gross load in excess of that specified hereinbelow;

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the said bridge structure shall not

exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

KINGS VALLEY SECONDARY STATE HIGHWAY, No. 190, Polk County

Milepost 190-03.32 Little Luckiamute River Bridge 15 tons

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O. C. L. A., shall be in full force and effect until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and placed at each end of the above-named bridge structure, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND IT IS FURTHER ORDERED, that a certified copy of this resolution be furnished the County Clerk of Polk County, in which county the said bridge structure is located, and the Superintendent of the Department of State Police for his information.

The Secretary requested instructions relative to the renewal of the Commission's forgery bond. He advised that the bond provides for \$100,000 coverage for the members of the Commission and the Engineer, and that the present policy, which was written by the American Bonding Company, Jack Godfrey and Company, general agents, expired on November 2, 1942. He further stated that Mr. Godfrey has furnished a new bond, expiring on November 2, 1945, for which the premium is \$477.75, a reduction of approximately \$128.00 from the premium previously paid. The Secretary also stated that the Ohio Casualty Insurance Company has submitted a quotation for this business and has offered to furnish a policy, with provisions identical to those contained in the American Bonding Company's policy, for a premium of \$381.87 for three years. It was the Commission's thought that the business should be given to the company charging the lesser premium, other conditions being equal, inasmuch as the premium is being paid with public funds; however, considered it advisable and a matter of courtesy to offer an explanation to Mr. Godfrey in view of the fact that he has enjoyed this business for twenty years or more and has given excellent service. The Secretary was instructed to bring the matter to Mr. Godfrey's attention.

Mr. Godfrey appeared before the Commission later in the morning when the matter was explained to him in detail by Chairman Cabell. Mr. Godfrey

NOV 5 1942

spoke highly of the Ohio Casualty Company and expressed disappointment that he would not receive this business. He inquired whether or not the Commission would continue the policy with his company if the amount of the premium were reduced to that quoted by the Ohio Casualty Company and stated that, while he did not believe that his company would approve the reduction, he would like to have a few days within which to ascertain definitely in regard thereto. The Commission authorized the placing of this business with the American Bonding Company if it will reduce the premium in such amount and gave Mr. Godfrey ten days' time within which to obtain a definite answer from the home office of his company. In the event Mr. Godfrey is unable to secure a reduction in the premium rate, then the business is to be given to the Ohio Casualty Company provided the company furnishes a policy equally as good as that offered by the American Bonding Company. The matter was referred to the Attorney and the Secretary for a decision in this regard. (Mr. Godfrey notified Chairman Cabell on November 7, 1942, that the American Bonding Company had reduced the amount of the premium to \$381.87. Mr. Cabell thereupon authorized the placing of the business with Mr. Godfrey's company.)

Mr. Walter Meacham, Executive Secretary of the Old Oregon Trail Marker Committee, came before the Commission at this time and asked the Commission to authorize the erection of ten additional markers along the Old Oregon Trail. He recalled that the Commission some months ago approved an expenditure of approximately \$2,500 for this purpose but "froze" the funds later on account of war conditions. It was his thought that the project should be revived in view of the Oregon Trail Centennial Celebration which is to be held next year. Mr. Meacham also suggested that the reading matter on the markers would be more legible if done with white enamel paint rather than with gold paint. The Commission approved the latter suggestion but took under advisement the matter of authorizing the additional markers. The matter was reconsidered after Mr. Meacham's departure at which time the Commission approved his request on the condition that there are materials on hand with which to construct the markers and that the erection of the signs be deferred until men can be conveniently spared for the purpose.

In this connection the Engineer advised that Mr. Meacham made a trip to Tacoma, Washington, on October 30, 1942, with Dr. Driggs, in the interests of the Old Oregon Trail Centennial program, his expense in connection therewith amounting to \$5.95 for which he is asking reimbursement. He recommended approval of this out-of-state expenditure. The Commission approved the recommendation.

The Commission approved and ordered filed a resolution from the County Court of Lake County with respect to the abandonment of a portion of the Drews Gap-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway which has been realigned.

The Commission discussed the claim of Mrs. J. W. Thomas for reimbursement of expense incurred by her in connection with the extinguishing of a fire which occurred on the right of way of the Pacific Highway in front of her premises south of Salem. It appears that a load of flax overturned on the highway at this point and before the flax could be picked up some small boys

in the vicinity set it afire, endangering Mrs. Thomas's home; further, that in order to protect her home, Mrs. Thomas took it upon herself to extinguish the fire using water which passes through her water meter. It also appears that her water bill for the month is \$2.69 more than her average water bill for the previous nine months which indicates that the excess water was used to put out the fire, thereby saving Mrs. Thomas's residence and also preventing the burning of some highway signs. Mrs. Thomas is asking for reimbursement in the amount of \$2.69. The Commission considered that the saving of the highway signs is more than sufficient justification for paying the claim and thereupon authorized payment of the same.

The Attorney requested instructions whether or not to press the claim against Woolach Brothers for testing lubricating oil. It appears that certain lubricating oil was purchased from Woolach Brothers and when delivery of the same was made the contents were not clearly marked for identification so it was necessary to make an extra test of the oil in each container. This work was done by the highway department's testing laboratory at a cost of \$41.00 and, due to the fact that the extra work was the result of negligence on the part of the shipper, Woolach Brothers were billed for this expense and, whereas they originally acknowledged the obligation, apparently they now do not recognize it and ignore the bills that have been presented to them. After discussion the Commission instructed the Attorney to personally contact Woolach Brothers relative thereto and report the results thereof when the Commission will give him further instructions.

The Commission discussed the advisability of selling a number of the "black and white" films of the "Old Oregon Trail." The Engineer advised that the Travel and Information Department has on hand some forty-five or fifty of these films which it has been the practice to loan to various organizations; that they have outlived their usefulness from the state's standpoint, having been replaced by colored films, and a number of requests have been received to purchase outright from the excess stock. It was his thought that it would be possible to secure from \$10 to \$15 for each film and recommended the sale of the same inasmuch as they now are of little value. The Commission approved the sale of the excess films at \$15 each with the understanding that they are not to be used for commercial purposes.

In this connection the Engineer brought up for discussion the matter of loaning colored pictures of Oregon scenes to hotels and similar institutions in California. He advised that the Travel and Information Department has a number of these pictures on hand and gave as his thought that the loaning of the same to such agencies would give the state considerable cheap advertising which is particularly desirable at this time in view of the fact that the generalized advertising of the state by this department has been greatly curtailed. The Commission after discussion authorized the loaning of the pictures provided no favoritism is shown in the dispensing of the same.

The Commission by unanimous vote adopted the following resolution covering use by the Oregon Shipbuilding Corporation of a portion of the area that was acquired in connection with the Front Avenue Project in Portland, which area is to be used by the corporation as a parking place for automobiles

belonging to shipyard workers who are to be transported from this central location to the several shipbuilding plants in the Portland area. The resolution confirms the action taken by the Commission at the previous meeting:

WHEREAS, pursuant to written agreement between the State of Oregon, by and through its State Highway Commission, and the City of Portland, by and through its municipal authorities, there is under construction a major improvement in the City of Portland known as the Front Avenue highway and street project; and

WHEREAS, in connection with said project there were acquired by the joint action of the City and the State certain real properties, some of which are needed for the immediate promotion of said project and some of which will be employed in the future when said project in its entirety is carried to completion; and

WHEREAS, for the purpose of contributing relief to the traffic problem involved in the transportation of persons to and from the shipyards of the Oregon Shipbuilding Corporation, the City and the State have been asked to make available for parking privileges certain lands acquired by the City and the State for use in connection with the said Front Avenue project; and

WHEREAS, in response to said request made by the Oregon Shipbuilding Corporation, the City has passed and regularly adopted Ordinance No. 77921, which was passed by the Council October 1, 1942; and

WHEREAS, it is the purpose of the State to join with the City in making said area available for the purpose disclosed in the petition and likewise covered in said ordinance;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and voting affirmatively, as follows:

1. That Ordinance No. 77921, as passed and adopted by the City Council of the City of Portland on October 1, 1942, be and the same hereby is approved for the State by this Commission, and the Highway Commission does hereby consent to the use of the streets and areas specified in said ordinance for the purposes therein set forth. A copy of said ordinance, marked "Exhibit A", is hereto attached and by this reference made a part hereof.*

2. That this resolution be entered in the minutes and records of the Highway Commission and the Secretary be and he hereby is instructed to deliver to the Oregon Shipbuilding Corporation a duly certified copy thereof, and that he be and hereby is directed to deliver to the City of Portland and to William Lynch, District Engineer of the Public Roads Administration, like certified copies.

*Ordinance filed in General Files. See Resolutions General file, 1942.

The Commission by unanimous vote also adopted the following resolution establishing a 35-mile-per-hour speed limit for traffic along the Oregon Coast Highway between mileposts 24 and 25, and between mileposts 32.5 and 44:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Oregon Coast Highway

Highway No. 9

Route No. US 101

Location of Termini				Established Speed
From Mile Point 24	to Mile Point 25			35 miles per hour
" " " 32.5	" " " 44			35 " " "

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

NOV 5 1942

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.*

*Note: The purpose of this resolution is to amend the resolution adopted November 17, 1941, with respect to established speeds between mileposts 24 and 25, 32.5 and 44 on said Highway US101 but in all other respects the said Resolution shall be in full force and effect.

The Commission discussed a report from the chief weighmaster with respect to the attitude of H. L. Kirk, Justice of the Peace, Lakeview, in the assessment of fines against log haulers for overloading. It appears that of some twenty-four cases that have been cited to Judge Kirk's court no fine whatsoever has been assessed except that imposed to pay court costs, and that it is Judge Kirk's impression, gained from his personal inspection of the highways involved, that the overloads do not hurt the highways. The question arose what to do in order to gain Judge Kirk's cooperation. The Engineer suggested that action on this matter be deferred until the log haulers have had an opportunity to reflect on the letter that is to be sent to them shortly over the signatures of the Office of Price Administration, Office of Defense Transportation, Oregon State Police, Public Utilities Commissioner, and the Oregon State Highway Commission; and, if the desired results are not obtained as a result of such letter, that the old penalty of suspension and/or cancellation of permits be restored. The Commission approved the suggestion.

The question whether or not to grant permits authorizing the use of special sanding equipment on trucks during the winter season, involving overloads of 700 pounds, as has been done in the past two years, had the attention of the Commission. The Engineer recommended the granting of such permits to carriers who are not operating under emergency transportation permits, but that such permit be not granted to carriers who are operating under an emergency transportation permit which already allows a gross load of 71,250 pounds, it being his thought that the 700-pound weight should be considered as included in the 71,250-pound limit. The Commission approved the recommendation.

The Commission discussed briefly a report from the Secretary disclosing a number of overweight violations committed by several carriers who are operating under emergency defense transportation permits. Action thereon was deferred by the Commission until a future meeting.

The application of F. W. Falk for permission to move a number of farm buildings across the Pacific Highway West, a short distance north of the Suver intersection, was discussed. A report on this subject indicates that there are some five or six buildings to be moved, including a large residence

building and a large barn; that the buildings are situate on the west side of the highway within the boundaries of Camp Adair; and that the Army officials have ordered Mr. Falk to vacate the premises immediately. The Engineer advised that the moving of the buildings at this time of the year is a difficult undertaking in view of the unstable condition of the new highway grade and the detour that highway traffic is using. However, it could be accomplished if Mr. Falk is willing to pay the cost of doing certain graveling work to facilitate the movement. It appeared to him that the circumstances surrounding this case justify the granting of a permit, provided the movement is undertaken during the time of the year when it will inconvenience highway travel the least amount. He suggested that an effort be made to secure approval by the Army authorities for deferment of the moving operations until next spring and, if such approval cannot be obtained, that a plan be effected whereby the buildings can be moved now. It appeared to the Commission, after discussion, that Mr. Falk must be accommodated in some manner. Accordingly, the Engineer was instructed to take up the matter with the Army authorities in an endeavor to have the moving postponed until spring when conditions will be much better than they are now. In the event the Army will not consent to the deferment, then he is to outline a plan for moving the buildings at once.

The Commission reconsidered the matter of selecting delegates to the annual meeting of the American Association of State Highway Officials which is to be held in St. Louis, Missouri, on December 7, 8 and 9, 1942. It was decided that the highway department should be represented by Chairman Cabell and Commissioners Clough and Oliver if possible for them to attend, the State Highway Engineer, the Attorney, and the Bridge Engineer, provided out-of-state travel for each is authorized by Governor Sprague.

The Engineer requested authority to spend about \$3,000 to place a pit run gravel surface on a four-mile section of the Wasco-Heppner Secondary Highway at the Gilliam-Morrow County line. He explained that the present surfacing becomes very slippery when wet and many cars have been stuck during unexpected rains, and, in some instances, cars have slid off the grade. A light surfacing of rock, he said, would correct this situation and would enable continued use of the road. The Commission approved the expenditure, the work to be done with state forces if and when men and equipment for the purpose can be spared.

Consideration was given by the Commission to the following requests for the placement of stop signs where highways cross over railroad tracks at grade:

Oregon Railroad Association:- stop signs at the crossing of the Oswego Highway with the Southern Pacific Company's tracks at Oswego; and at the crossing of the Pacific Highway with the Oregon Electric Railroad at Harrisburg.

City of Hillsboro:- crossing of the Tualatin Valley Highway and the Pacific Railroad and Navigation tracks at Baseline and Range Streets; and crossing of the secondary state highway and the railroad tracks at First and Cedar Streets.

City of Condon:- stop signs at the crossing of the John Day Highway and the Wasco-Heppner Secondary Highway with the Oregon-Washington Railroad and Navigation Company's tracks near the north city limits. The city also requests the state to erect stop signs at a point where the road which connects the Wasco-Heppner Secondary Highway and the John Day Highway, at the north city limits, crosses the Oregon Washington Railroad and Navigation Company's tracks.

This matter was discussed at considerable length during which reference was made to the order heretofore made by the Commission requiring highway traffic to stop before crossing certain main line railroad tracks. It was recalled that such order was made at the request of the Oregon Railroad Association and that it was intended to cover highway crossings of main line railroads only, and that the crossings mentioned therein were selected only after very careful study and joint approval by the highway and the railroad engineers. The Commission considered that it is not justified at the present time in extending the order to cover other crossings and, accordingly, voted unanimously to limit the stop order to the crossings mentioned in said order. Such action is to be considered as a policy to be followed hereafter in passing on requests of this nature. The Commission thereupon denied the above-mentioned requests inasmuch as they do not come within the approved category, and ordered that the respective applicants be so informed.

With respect to the crossing of the connecting road at the north city limits of Condon, there was a question whether or not this is a city street or a county road. In the event investigation reveals it to be a city street, the Commission authorized the furnishing and placing of appropriate signs on the condition that the City of Condon will deposit with the Commission, in advance, its certified check in the estimated cost of the installation.

In this connection a letter was presented from Mr. L. L. Gooding, Principal of the Milton-Freewater Public School System, requesting the removal of four stop signs at the crossing of the state secondary highway with the railroad tracks in Freewater. Mr. Gooding alleges that there are now only one or two logging freight trains that operate over this crossing daily and that there is no justification for the signs. The Commission deferred action on this matter until the next meeting.

Mr. Paul F. Murphy, Vice-President of the Loritan Investment Company, Oswego, was present and requested permission to utilize a portion of the right of way of the Oregon Coast Highway about six miles south of Marshfield in connection with the loading of coal onto railroad cars adjacent thereto. Mr. Murphy advised that his company is mining coal in this vicinity and the designated location is the most convenient one that they can find for the loading of the coal onto the cars; however, the distance between the railroad and the right of way at this point is too narrow for the use to which they propose to put it, so it will be necessary for them to encroach somewhat on the highway right of way, although not sufficient to interfere with or cause a hazard to highway traffic. He further stated that the use of this area is temporary,

only, and that it is not proposed to store any materials thereon, although the plan is to construct a bulkhead on each side of the area so it can be filled in to the level that will accommodate the loading of cars. After considerable discussion the Commission tentatively approved the request, it being understood that the use of the state's property is of a temporary nature and that the privilege is not exclusive. The Engineer was instructed to investigate the premises in the near future and to report his findings. In the event his recommendation is favorable and is approved by the Commission, the matter is to be covered by appropriate written agreement between the parties concerned.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

At 2:00 p. m. Chairman Cabell announced the following awards of contracts, sale of timber, and sale of gas shovel, bids for which were taken at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Richland-Halfway Rock Production Project on the Baker-Homestead and Halfway Highways, in Baker County. There were no bids received on this project.

"Banzer Bridge-Washington County Line Rock Production Project on the Nehalem Secondary Highway, in Columbia County. Jed Wilson, Seaside, submitted the low bid for this project, in the amount of \$37,847.00. Porter W. Yett, Portland, submitted the next-low and only other bid, in the amount of \$39,610.00. The Commission awards this contract to Jed Wilson at his low bid of \$37,847.00.

"Buchanan Rock Production Project on the Central Oregon Highway, in Harney County. There were no bids received on this project.

"Walker Mountain Rock Production Project on The Dalles-California and Willamette Highways, in Klamath County. No bids were received for this project.

"Trent-Salt Creek Falls Rock Production Project on the Willamette Highway, in Lane County. No bids were received on this project.

"Newport Rock Production Project on the Oregon Coast and Corvallis-Newport Highways, in Lincoln County. Construction of 0.66-mile hauling road and furnishing of 10,000 cubic yards crushed rock in stock pile. E. F. Altree, Agate Beach, submitted the only bid for this project, in the amount of \$29,000.00. The Commission awards this contract to E. F. Altree at his bid of \$29,000.00

"Nye Junction-Grant County Line Rock Production Project on the Pendleton-John Day Highway, in Umatilla County. No bids were received on this project.

"Rock Creek-Joseph Rock Production Project on the Wallowa Lake Highway, in Wallowa County. There were no bids received on this project.

Sale of Timber

"Timber at Short Sand Beach State Park, in Tillamook County. Hanson Brothers, Astoria, submitted the high bid for this timber, in the amount of \$4,000.00. Gray Logging Company, Seaside, submitted the only other bid, in the amount of \$2,750.00. The Commission rejects these bids.

Sale of Lorain Gas Shovel

"1 1/2-yard Lorain Gas Shovel, located at Garibaldi, in Tillamook County. Grimstad and Vanderveldt, Astoria, submitted the high bid for this shovel, in the amount of \$4,250.00. Jed Wilson, Seaside, submitted the next-high bid, in the amount of \$3,500. There were six lower bidders. The Commission sells this Lorain Gas Shovel to Grimstad and Vanderveldt at their high bid of \$4,250.00."

Mr. Carl E. Davidson, attorney, Portland, came before the Commission in behalf of George R. Van Vleet, logging contractor, whose operations involve the truck hauling of logs over the Cannon Beach Section of the Oregon Coast Highway. Also present was Mr. F. H. Brundage, Western Log and Lumber Administrator, War Production Board. Mr. Davidson asked the Commission to modify its present ruling with respect to the overall length of loads that may be transported over this highway so as to permit the moving of logs 40 feet long. The present overall length restriction of 42 feet, he said, limits the length of logs to less than 30 feet, which is an undesirable length in view of the fact that the logs are mostly spruce which are used as airplane stock and the longer length logs are much better adapted to such purpose. He also requested this privilege from the standpoint of increasing the output of logs as the Government is urging, and as a measure to conserve labor and equipment. He advised that Mr. Van Vleet has some 300,000,000 board feet of timber to market and plans, for the next two years at least, to move about 30,000,000 feet annually. Chairman Cabell advised that the Commission placed a length restriction on this section of highway because it is very crooked and the longer length logs cannot be moved over it without taking up more than one-half the roadway and endangering other traffic. Logs 40 feet long, he said, cannot be transported over this section unless a number of curves are widened which the Engineer estimates would cost approximately \$10,000 if done during the winter season. The Engineer advised that the existing highway is not on permanent alignment and that any expenditure made now to improve the alignment would be lost when the new highway is built. He gave as his understanding that the War Production Board is anxious to secure Mr. Van Vleet's logs and suggested in view thereof that the request for the improvement should come from the War Production

Board, by letter, so the Commission could have the benefit of the same as justification for any work that the Commission might authorize.

Chairman Cabell inquired whether or not the War Production Board would approve the project and the expenditure necessary to obtain the desired end. Mr. Brundage replied that he was certain that the War Production Board would approve it and that he, himself, would help to secure such approval. He advised that the problem of log supply is getting to be very bad and the outlook for a winter supply is not very promising, in fact the log ponds at the present time contain only about one-third of the normal supply. Especially is this true, he said, of spruce logs where the condition is critical. It was his thought, inasmuch as the logging contractor would receive considerable cash advantage by being permitted to haul the longer logs, that he would be willing to cooperate with the Commission in the expense involved. Mr. Davidson stated that, while he is not in position to commit Mr. Van Vleet, he believed that he would be willing to cooperate and would ascertain definitely to what extent. After further discussion Chairman Cabell concluded the conference by stating that the Commission will be pleased to give the matter further consideration if Mr. Brundage will direct a letter to the Commission confirming his oral statements with respect to the necessity for the improvement and the need for the longer length logs. Mr. Brundage agreed to furnish such letter, whereupon the Engineer was instructed to contact the members of the Commission upon receipt of the same for further instructions, it being understood that the work, if approved, would be done with state forces and that it would consist of a minimum amount of widening at bad turns so as to permit 40-foot logs to be transported without taking up more than one-half the roadway.

Messrs. Merle Chessman, Chairman, and John Laing, member, of the Advisory Committee on travel and information matters, were present in regard to the furnishing of colored post cards free of cost to soldiers in army cantonments, USO headquarters and similar places, in the state of Oregon. They explained that some of the adjoining states now furnish post cards for such purpose which is not only an accommodation to soldiers but also a form of state advertising from which it is anticipated the state will receive much benefit after the war is over. It is planned, they said, to place the cards for free distribution at the above-mentioned places. They estimated that the initial outlay for 500,000 cards would be approximately \$1,750. After discussion the Commission approved the project by unanimous vote.

The Travel and Information Department budget requirements for the calendar year 1943 was then discussed. After careful consideration the following budget was approved by the Commission subject to confirmation by members of the Advisory Board, each of whom are to be contacted relative thereto by letter by Mr. Chessman through Mr. Oscar Cutler, Acting Director of the Travel and Information Department:

601	Supervision and General Expense	
	Salaries.....	\$5250.00
	Travel, Stationery, Supplies & Miscel.....	1250.00
610	Magazine Advertising.....	00

FOV 5 1942

611	Newspaper Advertising.....	\$	00
612	Radio Advertising.....	150.00*	
613	Motion Picture Advertising.....		00
614	Specialty Advertising.....	2500.00	
616	Literature Distribution.....	150.00	
617	Maps.....		00
618	Booklets.....	1000.00	
619	Cuts and Mats.....	250.00	
620	Photographs.....	200.00	
621	Postage and Express.....	750.00	
622	Photographic Laboratory Charges.....	1250.00	

Total \$12,750.00

*1942 expense estimated; bill will probably not be received until January 1943.

A delegation representing the U. S. Highway No. 20 Association and consisting of Messrs. Don Peoples, Oregon Chairman, Bend; County Judge W. H. Malone of Benton County; County Judge J. J. Barrett and Commissioner H. A. Renninger of Linn County; C. R. Ashton, City Recorder of Albany; Sam Dolan of the Oregon State College Faculty; Jess Thompson of Nyssa; and Ernest Kagee and Matt Spellman of Newport, came before the Commission and asked the Commission to take action as may be necessary to secure the designation of the highway, which extends from Albany to Newport, an extension of U. S. Highway No. 20, so as to provide a U. S. numbered route clear across the United States, from the Atlantic seaboard to the Pacific Ocean. Mr. Peoples headed the group and was principal spokesman. He alleged that such designation would be of great advantage to the state in advertising from an ocean to ocean standpoint. Chairman Cabell doubted that the state would receive much advantage from such designation. He pointed out that the designations are made by a special committee of the American Association of State Highway Officials whose decisions are based on the benefits that the general traveling public as a whole will receive and not on the benefits that might accrue to any particular community or locality. It was his thought that the association should file its application with the Secretary of the American Association of State Highway Officials and that such application should set forth arguments in detail, clearly defining the benefits and advantages that such designation would be to the general traveling public.

There followed a general discussion in which several members of the delegation joined. Mr. Peoples inquired whether or not the Highway Commission would endorse the association's application. He was informed by Chairman Cabell that the Commission would discuss the matter further with its engineers, and if it appeared that such endorsement is appropriate then the Commission would act accordingly and if it was not approved the association would be informed. Mr. Peoples filed with the Commission, in support of the oral arguments, a copy of each of three resolutions that were adopted by the U. S. Highway No. 20 Association at its meeting which was held in Bend on October 26, 1942. This concluded the conference.

Mr. Elmer Bankus, Brookings, was present in regard to his previous offer to sell to the state a large acreage of timber land situate adjacent to the Oregon Coast Highway in Curry County. He recalled his previous offer to sell this land to the state at the rate of 50¢ per thousand board feet for the timber standing thereon. However, he advised that since he made the original offer he has given the matter further study and has discussed it with the State Parks Superintendent and is convinced that the state is not interested in all of this land, wherefore he is willing to give the state first refusal on some 894 acres which contain about 26,410,000 feet of timber. Mr. Bankus exhibited a map showing the areas in question and their proximity to the highway. After considerable discussion the Commission deleted 240 acres from the total, leaving 654 acres of which the acquisition of a 40-acre tract near the Pistol River was questioned. Mr. Bankus offered to sell the 654 acres to the Commission for \$9,500, and agreed to accept the sum of \$9,000 if the Commission decides not to take the 40-acre tract near Pistol River. The Commission indicated approval of the offer but deferred a definite decision until later in the day.

The matter was reconsidered after Mr. Bankus's departure, at which time the Commission decided to accept Mr. Bankus's offer of \$9,000 for the 614 acres, it being considered that the 40-acre tract near Pistol River is not worth the extra \$500.

Mr. Bankus reappeared before the Commission later in the session, at which time he was informed by Chairman Cabell of the Commission's action. As to the 40-acre tract eliminated, Mr. Bankus was informed that the Commission wishes to give this particular area further consideration. Mr. Bankus agreed to hold the property for such final decision. The property approved by the Commission is described as follows:

SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 33, T. 38 S., R. 14 W., W. M.
 Lots 5, 11, 12 and 14 of Section 19, T. 40 S., R. 13 W., W. M.
 N $\frac{1}{2}$ of the NW $\frac{1}{4}$ of Section 1, T. 40 S., R. 14 W., W. M.
 E $\frac{1}{2}$ of the SW $\frac{1}{4}$ and the W $\frac{1}{2}$ of the SE $\frac{1}{4}$ of Section 12, T. 40 S., R. 14 W., W. M.
 SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 24, T. 40 S., R. 14 W., W. M.
 N $\frac{1}{2}$ of the NE $\frac{1}{4}$ of Section 25, T. 40 S., R. 14 W., W. M., except the
 SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of said section.
 All that portion of the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 25, T. 40 S.,
 R. 14 W., W. M., which lies northerly of the northerly right
 of way line of the Oregon Coast Highway.
 SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 25, T. 40 S., R. 14 W., W. M.
 Containing 614 acres of land more or less.

The Parks Superintendent also reported on the following park matters:

Proposed parks in Douglas County:-The Parks Superintendent advised that Douglas County Court has offered to deed to the state, without cost, three parcels of land which they consider valuable from the recreational standpoint. One of these is an 80-acre tract situate adjacent to the old Coos Bay Wagon Road near the summit of the Coast Range. He said that this is a beautiful place but does not fit into the state parks' picture and recommended in view thereof that the offer be declined. The Commission approved the recommendation. The second area is a narrow wayside strip adjacent to the Elkton-Sutherlin Secondary Highway about two miles south of a

place known as Kellogg. It appears that the area contains a fine spring and that it might be advisable to acquire the area. The matter was referred to the Parks Superintendent for further information in regard thereto. The third tract consists of land bordering the Pacific Highway between Divide and Comstock, being approximately $1\frac{1}{2}$ miles south of the Lane-Douglas County Line. There are two strips, one on each side of the highway. They are owned by the county which has a buyer for the same but the county court wishes to give the state first refusal. The Parks Superintendent recommended acceptance of this gift, particularly in view of its possible benefit when the highway alignment is revised at this point. The Commission approved the recommendation.

Addition to Ecola State Park, Clatsop County:- The Parks Superintendent reported receipt of two deeds from the federal government conveying unto the State of Oregon two tracts of land situate on Tillamook Head, overlooking the ocean. He advised that he has been endeavoring for some time to acquire these areas in order to round out the present park and has now succeeded. The Commission approved the acquisition of this property.

Survey for proposed roadway at Golden and Silver Falls State Park, Coos County:- The Parks Superintendent advised that Coos County Court contemplates the construction of a county road through this park for the benefit of logging operators and if the plans materialize it will have a disastrous effect on the park proper. He gave as his belief that the purpose for which the county road is desired could be satisfied by the construction of a roadway around the park and accordingly requested authority for the Engineer to conduct a reconnaissance survey to ascertain whether or not such a road is feasible and approximately how much it will cost to build it. The Commission approved the request.

Lease of grazing privileges in Humbug Mountain State Park, Curry County:- The Parks Superintendent reported the application of Mr. Ace Turner for a renewal of his sheep-grazing lease in Humbug Park during the coming year, it being an extension of the privilege that he has enjoyed in the past for which he has paid the sum of 50¢ per head, annually. He recommended approval of Mr. Turner's request. The Commission approved the recommendation.

Fossil Park adjacent to the John Day Highway:- The Parks Superintendent presented to the individual Commissioners a written report, with maps, concerning the establishment of a park in the fossil area of the John Day Valley, which has the approval of Mr. J. C. Merriam, former president of Carnegie Institute. The matter was discussed briefly but no definite action was taken thereon except that it was arranged for Commissioner Oliver to inspect the area in the near future in company with the Parks Superintendent.

Purchase of Simpson property at Shore Acres, Coos County:- The Parks Superintendent rendered a status report on this acquisition,

advising that a survey of the property is now being made and that the title is being examined. He further stated that, in discussing the matter with Mr. Simpson, he pointed out the desirability of the state securing 200 additional acres of land on the easterly side of the highway in order to control the water supply and to obtain a 100-foot right of way for the highway. Mr. Simpson, he said, agreed to include such additional property in his offer. The Commission approved the report.

Proposed acquisition of O & C land near Brightwood:- The Parks Superintendent advised that it has been called to his attention by federal authorities that there is some vacant O & C land available for entry, adjacent to the Mt. Hood Highway between Brightwood and Wemme, and that it would be possible for the state to acquire this property through Clackamas County by exchange of county lands. The Salmon River, he said, runs through the property and in his estimation it would be desirable to acquire the tract or at least a part of it in order to protect the timber fringe along the Mt. Hood Highway. He recommended acquisition of a portion of the property anyway, in order to protect this timber fringe. The property is located in the S $\frac{1}{2}$ of the NE $\frac{1}{4}$ of Section 31, Township 2 South, Range 7 East, W. M. He was instructed by the Commission to make further investigations when the Commission will decide whether or not to acquire all or just a part of the property.

Proposed park at Floras Lake, Curry County:- The Parks Superintendent discussed with the Commission the advisability of acquiring 1400 acres of land with 2 $\frac{1}{2}$ miles of ocean frontage, extending from Floras Lake south to the Sixes River. He advised that the property is owned by a California concern which has stated its willingness to sell it to the state for the sum of \$2,700 which is at the rate of \$1.93 per acre. \$2,000 of the purchase price, he said, would be paid to Curry County for back taxes so the company by this deal is getting only \$700 for its interests. He pointed out that the company, a number of years ago, purchased a one-mile section of beach and that under the provisions of this deal the beach area would revert to the state, which in his estimation is a very desirable feature. Entrance to the property, he said, is gained by a road down the Sixes River and there is also available a roadway from Port Orford to Floras Lake; however, neither of these roads is in very good condition, but he believed them passable. He further advised that he has taken an option to purchase this property, which expires on January 1, 1943, and, if the Commission exercises this option, he plans to develop the area with CCC forces, including the roadways leading to the same. He suggested that the money that the Commission received from the Chrome Mining Company for the purchase of one of the Port Orford Cedar State Parks, in Curry County, be applied to the purchase price of the tract. The matter was discussed at considerable length during which the Commission indicated that the most serious objection to acquiring the tract is the difficulty of getting to it over existing roads. Action on the

acquisition was deferred until the next meeting of the Commission. The Engineer was instructed in the meantime to investigate the road matter.

The Attorney reported to the Commission that a claim had been filed against Guy K. Johnson by A. M. Esson, attorney for Burt F. Davis, and that the Commission was notified by Mr. Esson to withhold payment of money due Mr. Johnson for moving a house for the Commission, located on right of way involved in the construction of the North Portland Shipyard Access Road, until the Davis claim had been paid. The Commission's Attorney recommended that Mr. Johnson be paid, notwithstanding the claim of Mr. Davis, and the Commission approved the recommendation.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and discussed with the Commission matters pertaining to the storage of road oils. He advised that under the most recent governmental orders he cannot approve the purchase of road oils for storage purposes after January 1, 1943. However, he is authorized to approve purchases to fill storage sumps that the Commission now owns, and it is on that basis that it is necessary for him to deny the Commission's request for road oils that could not be stored until after the first of the year. He gave as his thought that the purpose of the government's order is primarily to halt the building of new storage sumps, in an endeavor to conserve lumber for other defense uses. In the discussion, the Commission took the attitude that it is useless to make additional purchases of road oil unless it can obtain authority to construct the sumps in which to store it. The Engineer advised that the Commission last year had the use of storage facilities of the Shell Oil Company, Portland; however, such facilities are no longer available, although he is trying hard to find comparable facilities to take the place of those of the Shell Company. No definite action was taken.

Mr. Lynch also brought up for discussion the governmental order to withdraw priority ratings heretofore assigned to highway projects that are not considered especially essential in connection with the defense effort and for the prosecution of the war. He advised that there are a number of projects in Oregon that will be affected by this order, such as signing and signaling projects and perhaps some construction projects such as the one proposed between Marshfield and Coquille which has not as yet been started, and it may include some projects that are now under way, although Oregon will not be affected to a great extent. He advised that he is now preparing the list of the jobs that are to be deleted from the program and will send a copy of the same to the Commission as soon as it is ready. The Commission will then have thirty days within which to act.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed for various improvements throughout the state. He submitted a list of such properties together with offers that he recommended be made in connection with each. After careful consideration of each item the Commission approved the request and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Port Orford Section, Oregon Coast Highway</u>				
10653-Gillings, Mabel, Estate	Stock Pile	30,000 sq.ft.	\$350 Lump Sum	Witt

10680-Baker, James M.	Road Oil Storage	0.18	\$1000 per acre	Chandler

The Assistant Attorney also requested authority to institute condemnation proceedings to acquire certain properties. He submitted a list of such properties, as follows, together with offers that he recommended be paid in condemnation:

File No.	Name	Purpose Required	Recommended Offer
10665	Donald L. Brown	Gravel Pit	\$ 216.00
10401	Dora A. Dawson	Right of Way	250.00
9717	John P. Headings	" " "	1000.00
10692	W. P. and Minnie E. Kausen and Edith Hammond Williams	Quarry Site	\$150.00 or \$200.00

After discussion the Commission approved the request and thereupon by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to

NOV 5 1942

construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Donald L. Brown, which property is located in Government Lot 4 (NW $\frac{1}{4}$ of the SW $\frac{1}{4}$) of Section 17, Township 21 South, Range 3 East, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 10665, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the Willamette Highway;*

Real property owned by Dora A. Dawson, which property is located in Lots 11, 12, and 13, Block 4, of East St. Johns Addition to Portland, Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2, 3, and 4 and is further identified in the records of the Highway Commission as file R 10401, and which property is being acquired for right of way purposes in connection with the North Portland Shipyard Access Road;*

Real property owned by John P. Headings, et ux., which property is located in the east half (E $\frac{1}{2}$) of the northeast quarter (NE $\frac{1}{4}$) and in the northeast quarter (NE $\frac{1}{4}$) of the

southeast quarter (SE¹/₄) of Section 25, Township 14 South, Range 4 West, W. M., Linn County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 9717, and which property is being acquired for right of way purposes in connection with the Pacific Highway East*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 30, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolman accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter specifically set forth;

NOW, THEREFORE, BE IT AID IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for the purpose of securing roadbuilding materials therefrom for use in connection with the Seven Devils Chrome Mine Access Road, which said real property is described as follows, to wit:

A parcel of land lying in the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 30, Township 28 South, Range 12 West, W. M., Coos County, Oregon; the said parcel being described as follows:

Beginning at a point which is the intersection of the easterly right of way line of the Coos Bay-Roseburg Highway and the south line of the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of said Section 30; thence east along said south line a distance of 250 feet; thence north a distance of 225 feet; thence west a distance of 275 feet, more or less, to the said easterly right of way line of said highway; thence southerly along said easterly highway right of way line a distance of 226 feet, more or less, to the point of beginning; containing 1.36 acres, more or less.

2. That the Commission does hereby find and declare that the said described parcel of real property is necessary and acquisition of the same by the State is required for the specific purpose hereinabove set forth, and the said property is being acquired for the express and specific purpose in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That the owners of the property herein described are W. P. Kausen and Minnie E. Kausen, husband and wife, and Edith Hammond Williams, a widow, and that certain interests in said property appear to be claimed by the following named persons: W. E. Marrior and Rose Marrior, husband and wife, and Marrior Rock Company.

6. That this resolution be entered in full in the minutes and records of this Commission.

Chairman Cabell reported a recent conference with a group representing the Portland Chamber of Commerce who appeared to be in favor of the state acquiring additional roadside strips. He gave as his thought that the idea is all right but now is not the time to start in on an extensive program of this kind. Commissioners Clough and Oliver concurred.

The Assistant Attorney brought up for discussion the matter of establishing a headquarters for right-of-way agents who have been assigned to negotiate for right of way for the revised location of the Oregon-Washington Highway between Milton and the Washington state line. He advised that the distance from Pendleton to the south end of the project is about 30 miles and that the distance from Walla Walla, Washington, to the north end of the project, is about six miles; further, that there are no satisfactory living accommodations in either Milton or Freewater so the project will have to be worked

either from Walla Walla or Pendleton. He recommended in view of the circumstances and in order to conserve transportation expense that these agents be authorized to maintain their headquarters in Walla Walla. After discussion the Commission approved the recommendation subject to confirmation by Governor Sprague. The Engineer was instructed to discuss the matter with the Governor and to arrange for blanket out-of-state authorization during the time that the right-of-way agents are engaged on this project.

The Engineer reported on the request of Mr. Wm. H. Hotchkiss, stockman, Lakeview, for permission to construct a stock fence along the right-of-way line of the Fremont Highway between Lakeview and Valley Falls, where the state owns an adjoining 40-acre quarry site, so as to avoid the expense of building the fence around the quarry. The Engineer advised that there are no objections from the engineering standpoint, inasmuch as the fence would not interfere with the state's use of the quarry. In view thereof the Commission approved the request by unanimous vote, subject to the condition that Mr. Hotchkiss will pay for the grazing privileges at the same rate that is charged by the State Land Board for such privileges, and provided that Mr. Hotchkiss will vacate the premises when the land is needed by the state for highway purposes. The Engineer was instructed to convey such information to Mr. Hotchkiss. The matter is to be covered by a revocable permit between the parties concerned.

The Commission discussed a request from Mr. Wm. M. Smith, Oregon City, to moor his houseboat to the public dock located in the Willamette River at the foot of Eighth Street, Oregon City. The request was denied as a matter of policy.

Reconsideration was given by the Commission to the matter of rental to the Union County Rod and Gun Club of a portion of the land that the Commission recently acquired from the State Game Commission in the town of Union. It was recalled that the Commission previously authorized the lease of this property to the club for a period of five years at the rate of \$1.00 per year but now it appears that a five-year lease is not satisfactory to the club which, however, would be satisfied with a fifteen year lease, particularly, in view of the fact that the club has had the use of the property for a number of years under agreement with the State Game Commission and is maintaining on the property a clubhouse and other facilities. After discussion, and in view of the circumstances, the Commission decided to grant the lease on a fifteen year basis.

The Attorney brought up for reconsideration the right-of-way controversy with Mr. Lloyd E. Stafford, from whom the Commission is acquiring right of way near Goshen, Lane County. He recalled that the original settlement with Mr. Stafford provided for the state to move Mr. Stafford's barn and a certain sum of money was set aside for such purpose. However, the barn burned before moving operations were commenced, notwithstanding which Mr. Stafford demands payment of the moving costs which the Commission previously denied. The Attorney advised that Mr. Stafford now wants the state to pay him for all of the items involved in the transaction except the amount agreed upon for the moving of the barn and to let the courts decide whether or not he is entitled to that item; further, that he is willing to accept a declaratory

judgment with respect to such item provided the state will relieve him from payment of any expense in connection therewith, including his attorney's fees. After discussion the Commission approved the securing of the declaratory judgment but refused to assume any of the expense that Mr. Stafford incurs in securing the same.

The Assistant Attorney brought up for discussion the transaction pending between the Highway Commission and Robert P. Brown, involving the purchase of some right of way on the Goshen Section of the Willamette Highway. It appears that in the option price there was included the cost of moving the residence; however, according to present plans, the residence will not be moved at this time. The property owner, Mr. Brown, is willing to incorporate in the deed a condition which will protect the state so that, in the event at some subsequent time the state should need additional land, it will not have to pay the second time for the moving of the residence. The Commission approved such disposition of the matter.

The Commission discussed and approved a stipulation prepared by the Attorney with respect to the acquisition of land that is needed for a revision of the Pacific Highway West across property owned by Mr. A. F. Elkins south of Monmouth. (See copy of stipulation in general files for details.) In this connection the Attorney recalled that the Commission, at its meeting on October 1, 1942, authorized the payment of \$12,500 to Mr. Elkins for this property provided settlement could not be reached for a lesser amount and that the records will show such amount unless the Commission authorizes the changing of the figure. He recommended that the records of such meeting show that the Commission authorized payment of \$12,000 rather than \$12,500, inasmuch as he effected settlement for such amount. The Commission approved the change and instructed the Secretary accordingly.

Reconsideration was given by the Commission to its settlement with Edward F. Judkins for right of way that is needed for a revision of the Pacific Highway across Mr. Judkins' land south of Eugene. The Attorney recalled that at the previous meeting the Commission instructed him to endeavor to secure a partial settlement for this property in view of the fact that it will not be possible to construct the project until the war is over, which would give Mr. Judkins full use of the property in the meantime. Mr. Judkins, he said, refuses to deal on such basis and wants the return of his option unless the Commission will settle in full as provided therein. He further advised that a portion of Mr. Judkins' property is now being used by the state in connection with the performance of the contract on the adjoining section, right of entry having been granted by Mr. Judkins to allow the contractor to deposit excavation materials from a fill, but other than for this purpose Mr. Judkins' property will not be used until the war is over and a new contract awarded. The Commission decided in view of the circumstances that it would be inadvisable and unwise to purchase more of Mr. Judkins' property than is actually needed in connection with the present contract, inasmuch as it would tie up several thousand dollars of state funds that could be used to good advantage in other ways and in addition thereto Mr. Judkins would still have the use of his entire acreage. Accordingly, the Attorney was instructed to again contact Mr. Judkins and endeavor to secure his approval of a partial

payment and to proceed with condemnation of the entire acreage in the event that Mr. Judkins still refuses to deal on such basis.

The Attorney reported that a question has arisen whether or not the state is liable for the payment of 1942-43 taxes levied upon property acquired by the Commission prior to July 1, 1942. It appears that in one instance certain real property in Washington County was conveyed to the state through the Highway Commission by warranty deed dated March 14, 1941, which deed was recorded on March 26, 1941, and that the state paid the taxes levied upon the assessment of March 1, 1941, but now has received from the tax collector a tax statement for the fiscal year 1942-43 based upon the assessment as of January 1, 1942. It was the Attorney's contention that the state is not liable for the 1942-43 tax and requested authority from the Commission to ask the Attorney General for an opinion with respect thereto in view of the fact that the same question will arise in connection with other purchases which will probably involve considerable expenditure. The Commission approved the request and ordered that the letter go to the Attorney General over the signature of the Secretary.

The Engineer reported the results of an investigation of certain state-owned property on the north side of the Wolf Creek Highway at the Vadis Road intersection in Washington County, which property a Mr. W. C. Baugh seeks to acquire to fill out his holdings. He advised that the Highway Department has constructed two powder houses on this property and that it is planned also to use the property as a site for stockpiling surfacing materials for use in connection with the construction of the highway. He recommended in view of the circumstances that the property be not sold until the construction of the highway is completed. The Commission approved the recommendation and so ordered.

The Assistant Attorney reported results of further negotiations with Mr. H. A. Hein, Scappoose, for the disposal of Mr. Hein's claim for damages arising out of the state's use of a rock quarry situate adjacent to his property at Scappoose. He advised that Mr. Hein refuses to dispose of this matter on any basis that has been suggested by the Commission's agents unless a cash payment of \$250 is included in the settlement. It was his thought that Mr. Hein's demands are unreasonable and suggested that all negotiations be discontinued and that the matter be allowed to rest until Mr. Hein again brings it up. The Commission approved the recommendation. The Assistant Attorney was instructed to write Mr. Hein summarizing the state's offer in detail and to send a carbon copy of such letter to Governor Sprague.

The Assistant Attorney presented an offer from a Mr. Henry G. Peck to pay the sum of \$20 for some old buildings situate adjacent to the Boardman-Stanfield Highway on property that was acquired from the Westland Irrigation District in connection with a right-of-way settlement. He recommended acceptance of this offer because the buildings are absolutely of no value to the state and the attractiveness of the highway would be greatly improved if they were removed. The Commission approved the recommendation.

The Engineer reported the sale of the following equipment to the United States War Department, in conformity with authority granted him by the Commission at the meeting held on October 1, 1942:

NOV 5 1942

Sold to U. S. Army

Sno-Go Rotary Snow plow truck unit, used, State of Oregon No. 27-735, Mfg. by Klauer Mfg. Co., 1927 Model, Serial No. RU-6, complete with Climax 165 H.P. engine (1939 Model), #5562 mounted on special Klauer 4-wheel drive truck.....Sale Price..... \$5,000

Snow-Go Rotary Snow Plow truck unit, used, State of Oregon No. 28-735. Mfg. by Klauer Mfg. Co., 1928 Model, Serial No. 38, complete with 165 H.P. Climax engine (1939 Model #15011), mounted on special Klauer 4-wheel drive truck.....Sale Price.....\$5,000

The Commission, by unanimous vote, approved the sale as reported.

The Commission discussed and approved an increase in salary of \$25 per month for the Commission's Secretary, same to become effective on November 1, 1942.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	26-1462	Multnomah	Union Avenue-Denver Avenue Intersection, Pacific Highways East and West	2nd - \$1,000 Total to date \$2,500
Quarry	5-1428	Columbia	Various Sections, Various Highways	1st - \$ 300
Quarry	29-1439	Tillamook	Various Sections, Various Highways	1st - \$ 300
Plans	215-1442	Jackson	Kirkland Access Road Section, Jackson County Road	1st - \$ 900
Reconn.	28-1413	Sherman	Madras-Columbia River Section, The Dalles-California and Sherman Highways	4th - \$ 750 Total to date \$6,250
R/W	4-1457	Clatsop	Quartz Creek-Tillamook County Line Section, Wolf Creek Highway	2nd - \$1,450 Total to date \$4,275

(Continued on next page)

List of surveys for authorization (cont.):

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Reconr.	127-1422	Polk	Dallas-Fings Valley and Kings Valley-Suver Sections, Dallas-Kings Valley & Kings Valley Secondary Highways	1st - \$2,500
Plans	26-1463	Multnomah	Denver Avenue Underpasses Section, Pacific Highway West	1st - \$1,500

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

J. F. Johnston, contract No. 2453, for construction of approaches to the bridge over the Yamhill River on the Three Mile Lane Secondary Highway, at Dayton, in Yamhill County, requested an additional extension of time, from December 31, 1941, to September 16, 1942, within which to complete this job. He alleged that his failure to complete the project within the previously extended time limit was due to bad weather conditions which would not permit painting of the structure, and orders from the Engineer to postpone such work until suitable weather obtained. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct; that due to shortage of lumber it was not possible to complete the timber work until January 10, 1942, when weather conditions were not favorable for painting work. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

F. R. Hewett, contract No. 2522, for surfacing and oiling the Condon-Morrow County Line Section of the Wasco-Heppner Secondary Highway, in Gilliam County, requested an extension of time, from July 15 to September 10, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to unsuitable weather conditions, to defense contracts which he had under way at the same time, and to difficulties in securing competent labor. The Engineer advised that the reasons given by the contractor for overrun of the time limit are correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Coos Bay Dredging Company, contract No. 2548, for surfacing and oiling the Grants Greek-Powers Section of the Powers Secondary Highway, in Coos County, requested an extension of time, from July 31 to September 22, 1942, within which to complete this job. It gave no reasons for failure to complete the project within the specified time limit. The Engineer advised that the delay of the contractor

in finishing this job within the specified time was due to inability to secure repair parts for the crushing plant and to the necessity of furnishing rock for airport construction at North Bend. It was his thought that the cause of the overrun of time is sufficient justification for the extension of the time limit, as requested, without penalty and he so recommended. The Commission approved the recommendation.

McNutt Brothers, contract No. 2564, for grading, surfacing and construction of bituminous macadam on the Wells-Granger Section of the Independence-Granger County Road, in Benton County, requested an extension of time, from June 15 to September 20, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and extra work orders. The Engineer advised that the reasons given by the contractor for failure to complete the job within the specified time limit are correct. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2453, 2548, 2551, and 2564, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2453, with J. F. Johnston, for reconstruction of the timber approaches and timber deck to the steel span over the Yamhill River at Dayton, on the Three Mile Lane Secondary Highway, in Yamhill County. Completed September 16, 1942.

Contract No. 2548, with Coos Bay Dredging Company, Inc., for surfacing and oiling on the Grants Creek-Powers Section of the Powers Secondary Highway, in Coos County. Completed September 22, 1942.

Contract No. 2551, with C. J. Eldon, for furnishing 12,400 cubic yards of crushed materials in stock piles on the Polallis Creek-Hood River Section of the Mt. Hood Highway, in Hood River County. Completed August 12, 1942.

Contract No. 2564, with McNutt Bros., for grading, surfacing and bituminous macadam on the Wells-Granger Section of the Independence-Granger County Road, in Benton County. Completed September 19, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Amended agreement with Coos County relative to the repair of bridges on the Seven Devils Chrome Mine Access Road.

Agreement with Union County whereby Union County agrees to furnish 5,500 cu. yds. of crushed rock for state highway maintenance.

Agreement with the Southern Pacific Company covering grant of easement to the state for the overhead crossing at Judkins Point, south of Eugene, in Lane County.

"Consent to Vacate" Plat of Haydenton on the westerly side of the Pacific Highway, between Oregon Slough and the Columbia River.

Permit authorizing the Federal Public Housing Authority to construct an underpass beneath Denver Avenue, Portland.

Easement granting to the United States of America, Federal Public Housing Authority, permission to construct a sewer pipe, water main and power line across the Pacific Highway between Portland and Milwaukie.

Lease agreement with Maud Moon for a maintenance headquarters in North Portland.

Bargain and sale deed conveying unto Samuel W. Baker 2.06 acres of land adjacent to the Wolf Creek Highway, in Washington County. Right of way file No. 5218.

The Commission set Monday, December 21, 1942, as the date for its next regular meeting for the receiving of bids and instructed the Secretary to make the usual arrangements to hold the meeting in the auditorium of the Public Service Building, Portland. (This meeting later advanced to Friday, December 18.)

NOV 5 1942

There being no further business to come before the Commission at this time the meeting was adjourned at 6:15 p. m.

Portland, Oregon, December 17, 1942

The State Highway Commission met in regular session at 8:00 p. m. in room 515 (Imperial Room), Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on August 14, August 27, and September 30 and October 1, 1942.

The Secretary presented communications from numerous organizations situate along U. S. Highway No. 20 throughout the west and middle west in which the Highway Commission was urged to extend this highway westerly from its present terminus at Albany, Oregon, to the Pacific Ocean at Newport, Oregon, so as to provide a continuous U. S. numbered route across the continent, from the Atlantic Ocean to the Pacific Ocean. The matter was discussed at some length during which the Commission indicated that it is mildly in favor of such designation but not to the extent that it will take the initiative in securing its approval by the Committee of the American Association of State Highway Officials, which has been designated to pass on such matters. However, it was decided to discuss the matter with the American Association of State Highway Officials' Committee at its next meeting and it was understood that the Highway Commission would not oppose the designation.

The Engineer brought up-for discussion the question of financing a proposed traffic interchange project at the intersection of Denver and Union Avenues, Portland, which he estimated would cost approximately \$350,000. He recommended payment by the state of 25 per cent of the cost of construction and right of way, the balance to be paid with federal access road moneys, which, he said, the federal government will probably authorize. In view of

DEC 17 1942

the fact that the project will have to be constructed some time in the not distant future, it was his thought that the project should go forward now while the federal moneys are available, particularly because there is serious traffic congestion at this point due to activities in the nearby shipyards. After considerable discussion the Commission approved an expenditure of state funds up to 25 per cent of the cost of construction and right of way.

W. H. Lynch, District Engineer, Public Roads Administration, who was present on the following day, confirmed the Engineer's statement that federal funds would be available to finance a portion of the cost. He pointed out, however, that the only federal funds that could be used are those that have been appropriated for access road projects.

The Engineer brought up for discussion matters pertaining to the handling of traffic at the Federal Housing Project known as Vanport, between Portland and the Interstate Bridge. He advised that in order to handle the traffic properly it is going to be necessary to construct an underpass under two railroad tracks, and a connection with Swift Boulevard. The underpass, he said, is estimated to cost about \$200,000 which will be paid for by the federal government. It was his thought that the state should have something to say about the design of the structure because of its proximity to the state highway, and requested authority from the Commission to spend state highway funds in the preparation of the design so as to make certain that the structure and the approach to the highway will properly care for the traffic from the state's standpoint. The Commission approved the request.

The Engineer reported briefly on the proposal of the United States Naval authorities to lengthen the runway of the airport which is located near the Lewis and Clark Bridge, Astoria. He advised that, if the runway is constructed in accordance with present plans, it would mean the rebuilding of a section of the highway and the introduction of very undesirable curvature, whereas, in his estimation, a runway of the length desired could be obtained if the extension were made from the other end of the existing runway, provided arrangements were made for the realigning of the railroad. The Commission went on record as being opposed to the present plan which involves revising the highway alignment and thereupon authorized and instructed the Engineer to discuss the matter with the naval authorities.

A brief report was made by the Engineer on the proposed plan to provide access to the Umatilla Ordnance Depot. He said that, according to information at hand, the gate on the east side of the depot is to remain closed; also, that it is planned to build up a town on the south side of the railroad opposite the south gate, in connection with which there is to be constructed what is known as a service street, adjacent to and paralleling the railroad, with connections to the depot at two points, involving passageways under the railroad for pedestrian use. The Commission took no action on the matter.

A brief report was made by the Engineer on the matter of providing road facilities for farmers residing in the Pedee District, Polk County, to replace certain roads that lie within the borders of Camp Adair Cantonment and which are to be closed by the Army authorities. The Commission took no action.

The question of providing storage space for asphalt and road oil was brought up for discussion by the Engineer. The Engineer advised that the oiling program could be greatly expedited and the cost of oiling construction work could be reduced considerably if the Highway Department possessed facilities for the storing of about one million gallons of oil at strategic points. In fact, advance storage of oil at strategic points would make it possible to do certain oiling work during the summer construction season which could not be done if it were necessary to depend on tank-car delivery to the various jobs when the oil is needed. He requested authority from the Commission to contact the various oil companies with respect to the leasing, for the duration, of idle facilities which they own; and suggested the construction of at least four oil sumps at critical places in addition thereto. He estimated the cost of constructing the sumps at \$5,000 each and advised that in his estimation they would fully pay for themselves, basing his statement on experience gained during the past working season. The Commission authorized the Engineer to contact the oil companies, as requested; however, deferred its decision with respect to the construction of the additional sumps, pending a report from the Engineer as to his success in leasing oil storage facilities from the oil companies.

The Commission discussed the Order of the Commissioner of Internal Revenue, Washington, D. C., with respect to withholding from employees the 5 per cent Victory Tax levied under Public Law 753, Seventy-seventh Congress, approved on October 21, 1942. The Engineer pointed out that, according to this Order, the tax must be withheld from all employees' checks that are issued on January 1, 1943, which means that the tax must be withheld from the December payrolls; however, according to the opinion of the Commission's Attorney, if the salary and wage checks for December are paid on December 31, 1942, no withholding of the tax is required, which is born out by subsequent information received from the Portland office of the Department of Internal Revenue. He suggested, in order to avoid the withholding of the Victory Tax from December salaries and wages, that the payroll checks be delivered to all highway department employees on December 31, 1942. To effect such an arrangement, he said, would necessitate the circularizing of all department heads and those in charge of the preparation of the pay rolls requesting that pay rolls be submitted several days before the end of December, corrections as may be necessary to be made by telephone early enough on December 31, 1942, so that the checks can be revised accordingly. This would make it possible, he added, to date all checks December 31, 1942, and place them in the mail for delivery to the respective employees before January 1, 1943. The Commission approved the arrangement as outlined by the Engineer.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended be made in connection with each. After careful consideration of each item, the Commission approved the recommended offers subject to confirmation by the Public Roads Administration with respect to properties needed for projects to be financed with federal moneys, and by unanimous vote adopted the following resolution with regard thereto:

DEC 17 1942

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

10738	T. E. Hendrick	Right of Way	\$30 per acre
4715	C. H. Walter, et ux.	Right of Way	1000.00

*To clear title only.

The Commission approved the request and the offers. The following resolution with regard thereto was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

DEC 17 1942

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Frederick A. Ros, et al., which property is located in the southwest quarter (SW $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 29 and in the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 32, and in the northeast quarter (NE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 31, Township 34 South, Range 2 West, W. M.; and in the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) and in the northwest quarter (NW $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 32, Township 34 South, Range 2 West, W. M., Jackson County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2 and is further identified in the records of the Highway Commission as file R 10725, and which property is being acquired for right of way purposes in connection with the Evans Creek-Sams Valley Access Road;*

Real property owned by August W. Fischer, et al., which property is located in the southeast quarter (SE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 2, Township 12 South, Range 5 West, W. M., Benton County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4 and is further identified in the records of the Highway Commission as file R 7908, Parcel No. 3 being acquired for right of way purposes in connection with the Pacific Highway West and Parcel No. 4 being acquired for right of way for drainage ditch purposes in connection with said highway;*

Real property owned by Harley P. Easley, et al., which property is located in Lots 1, 2, 3, 4, 7, and 8 of Block 4, Lots 1, 2, 3, and 4 of Block 5, and Lots 7 and 8 of Block 3 of Georgetown Addition to St. Helens, Columbia County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 5529A, and which property is being acquired for right of way and maintenance site purposes in connection with the Columbia River Highway;*

Real property owned by Lila M. Walter, et al., which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 35, Township 3 South, Range 1 West, W. M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file R 4715, and which

property is being acquired for right of way purposes in connection with the West Portland-Hubbard Highway;*

Real property owned by Anna B. Wurster, which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 35, Township 3 South, Range 1 West, W. M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 10630, and which property is being acquired for right of way purposes in connection with the West Portland-Hubbard Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being

DEC 17 1942

Resolution No. 31, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Assistant Attorney requested instructions whether or not to complete the acquisition of right of way needed for the Wolf Creek Highway, in Washington County. It appears that a number of condemnation cases will have to be tried and that considerable amounts are involved. Action on this matter was deferred by the Commission until April or May, 1943, when all of the properties concerned are to be inspected by the members of the Commission.

For the benefit of Commissioners Clough and Oliver, Chairman Cabell explained the method of valuing properties acquired in connection with the Front Avenue improvement, Portland, on the west side of the Willamette River. He recalled that the method that was finally approved as a result of conferences with the city officials of Portland, was to pay 125 per cent of the appraised value in so far as land was concerned and to pay 150 per cent of the appraised value for the buildings. Such procedure, he said, has worked out fine for properties acquired south of the Steel Bridge; however, cannot be used in connection with the acquisition of properties needed for the proposed improvement on the east side of the Willamette River, because values are not stabilized and, in view thereof, it will be necessary to negotiate for these properties individually and to follow standard practice. Commissioners Clough and Oliver approved such procedure.

Reconsideration was given by the Commission to its settlement with Edward F. Judkins for right of way needed for the revision of the Pacific Highway south of Eugene. The Attorney advised that Mr. Judkins has changed his attitude with respect to this settlement and now is willing to accept partial payment for the property, provided a definite time is set for the payment of the final amount after the war is over. He asked the Commission to set such time. After discussion, and it appearing to the Commission that the Eugene South Project is one of the first ones that will be undertaken when times return to normal, the Commission decided to make final settlement with Mr. Judkins within one year after the war is over. The matter is to be covered by appropriate written agreement between the Commission and Mr. Judkins.

The Commission discussed and approved the abandonment of certain portions of old state highway rights of way, as follows, such areas having been rendered valueless for state highway purposes by reason of alignment revisions:

Pacific Highway between Roseburg and Shady Point;
Pacific Highway south of Rice Hill;
The Dalles-California Highway between Terminal City and Algoma.

The following resolutions in regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate portions of the Pacific Highway in Douglas County, particularly the section known as the Roseburg-Shady Point Section; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main-travelled portion of said highway as now located certain parcels or areas of land, which said parcels or areas of land are more specifically defined and described hereinafter in this resolution and are reflected and disclosed on a print or map marked Exhibit A, a copy of which is attached hereto and made a part hereof; and

WHEREAS, while said sections or old areas of right of way are not required for right of way proper, the same are required for drainage facilities in connection with the maintenance of the highway proper; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in its minutes and records the purpose and plan of the Commission to abandon as a part of the right of way of said highway the areas described hereinafter and shown in red on said attached print or exhibit, except for drainage purposes.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating as follows:

1. That the areas or parcels of land which heretofore were within the right of way proper of said section of the Pacific Highway but which by reason of the relocation and realignment of the highway are now without the area improved and used by the travelling public but are parallel and in close proximity to the right of way of said highway as now established shall be and are abandoned by the Highway Commission as a part of the right of way of said section of said highway, except, and provided, however, that the right to use said area for drainage in connection with the maintenance of said highway is reserved. The parcels of land affected by this resolution are described as follows, to wit:

All those certain parts of the old right of way of the Roseburg-Shady Point Section of the Pacific Highway in Sections 25 and 36, Township 27 South, Range 6 West, W. M., Douglas County, lying on the easterly and westerly side of the right of way required for the reconstructed Pacific Highway, the beginning and ending points with reference to the engineer's stations of the said reconstructed highway being Station 1450+00 on the southerly end and Station 1507+80 on the northerly end.

2. In addition to the foregoing description of said parcels of land there is attached hereto a print or map marked Exhibit A, which by this reference is made a part hereof, and upon which map there are shown shaded in red the parcels of land formerly within the right of way proper of said section of said highway, but which are now by reason of the relocation and realignment of said highway not required for right of way proper. Said exhibit or map for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant Highway Engineer, and bears date of May 26, 1942.*

3. In the event there remains any physical connection between any portions of said abandoned right of way and the present highway, and by reason of such physical connection public traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

4. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Douglas County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned sections of the right of way of said Pacific Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Douglas County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe, and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Pacific Highway in Douglas County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section which is more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the

*Map filed Right of Way Abandonment and Retention File - No. 110

Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way hereinafter designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Pacific Highway but is no longer a part of the right of way of said highway as the same has been relocated and constructed, be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Douglas County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Pacific Highway in Section 32, Township 23 South, Range 5 West, and in Sections 5 and 8, Township 24 South, Range 5 West, W. M., Douglas County, Oregon, lying on the westerly side of the right of way required for the reconstructed Pacific Highway and being between Mile Post 174 and Mile Post 177 of said highway; the beginning and ending points with reference to the engineers stations of the reconstructed highway being Station 1235+40 on the northerly end and Station 1341+80 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated November 7, 1942, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic

*Map filed Right of Way Abandonment and Retention File - No. 111

from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Douglas County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said Pacific Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Douglas County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe, and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Terminal City-Algoma Section of The Dalles-California Highway in Klamath County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section which is more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way hereinafter designated and which was heretofore included within the area of the right of way of said highway as formerly located, but which is now without the regular limits of said highway as relocated;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Terminal City-Algoma Section of The Dalles-California Highway but is no longer a part of the right of way of said highway as the same has been

relocated and constructed, be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Klamath County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All those certain sections of the old right of way of the Terminal City-Algoma Section of The Dalles-California Highway in Sections 25 and 36, Township 37 South, Range 8 East, and in Sections 30 and 31, Township 37 South, Range 9 East, and in Section 1, Township 38 South, Range 8 East; and in Sections 6, 7 and 18, Township 38 South, Range 9 East, W. M., all in Klamath County, Oregon, lying on the easterly side of the right of way required for the reconstructed The Dalles-California Highway, said sections also lying between Mile Post 276 and Mile Post 282 of said highway, the beginning and ending points with reference to the engineer's stations of the said new constructed center line being Station 113+20 on the southerly end and Station 334+50 on the northerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said Exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated December 15, 1942, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly

*Map filed Right of Way Abandonment and Retention File - No. 112

DEC 17 1942

delivered to the County Court of Klamath County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned section of the right of way of said The Dalles-California Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Klamath County and beyond any responsibility or supervision by the State Highway Commission.

Reconsideration was given by the Commission to the abandonment of a section of the old right of way of the Ochoco Highway east of Prineville. It was recalled that the Commission on December 18, 1940, adopted a resolution abandoning certain portions of the old right of way because the highway had been rebuilt on other alignment, rendering these parcels valueless from the state's standpoint; also that a certified copy of the resolution was forwarded to the county court of Crook County with a request that the court enter an order in its records, either retaining such parcels for county use in connection with its county road system, or allowing them to revert to the abutting property owners. The Commission was advised that to date the county court has not acted on this resolution although the court has asked the Commission to continue the maintenance of the abandoned section between Mill Creek and Marks Creek, seven miles in length, as a stock driveway for the benefit of stockmen in this vicinity, which request the Commission denied at its meeting on April 1, 1942, because it involved the repair and maintenance of several bridges that are in an unsafe condition, and it was the thought of the Commission, if the old road is valuable for stock-driveway purposes, the responsibility to maintain it belongs to the county. Such information was transmitted to the county court by the Commission's Secretary but up to the present time no information has been received as to the county court's attitude with respect thereto. After considerable discussion the Commission decided that the general public should not be allowed the use of the old road because of the condition of the bridges. The Engineer was thereupon instructed to erect a barricade at each end of the old road between Mills Creek and Marks Creek. The Secretary was instructed to inform the county court by letter of the Commission's action and to advise the court that the Commission denies any responsibility with respect to future maintenance of this road, and, if it is to be left open for use as a stock driveway or for any other public use, the responsibility for maintaining the road and for accidents that might occur thereon rests with the county.

The Engineer reported the results of investigations of roadways leading to the proposed state park south of Floras Lake, in Curry County. He advised that there are a number of logging roads leading into this area some of which are in fair condition but are not satisfactory for a permanent park roadway; however, a satisfactory location for a permanent road was found about $3\frac{1}{2}$ miles south of the town of Denmark, which will require the construction of about $2\frac{1}{2}$ miles of roadway extending from the highway to the south end of the proposed park. He estimated the cost to construct such roadway at approximately \$16,000, exclusive of right of way and fencing. He suggested, in

the event the Commission decides to purchase the park, that construction of the roadway leading to it be deferred and that for the time being people be required to use existing roads to reach the same. The matter was discussed at some length but a decision thereon was deferred pending consultation with the State Parks Superintendent.

The matter was reconsidered on the following day when the Parks Superintendent was present. He advised at that time that the owners of the property, Blacklock Sanstone Company, of San Francisco, are no longer willing to sell the 1,400 acres for \$2,700, in view of the fact that taxes that have accumulated against the property are more than they anticipated, in view of which they are now asking \$3,600 for the property. He urged the Commission to acquire the property notwithstanding the increase in price. Action again was deferred by the Commission pending inspection of the park by Commissioner Clough.

The Parks Superintendent was instructed in the meantime to ascertain whether or not it would be possible to acquire the 40-acre tract owned by W. J. Sweet, which is surrounded by the proposed state park, inasmuch as the Commission dislikes to have privately-owned property within state park boundaries.

A request was presented from the Clackamas County Cemetery Association for the privilege of purchasing certain state-owned property adjacent to and beyond the limits of the standard width right of way at the Clackamas Overcrossing, in Clackamas County. The Assistant Attorney advised that the area desired by the Association contains 0.34 acre which was purchased in connection with a right-of-way transaction at the rate of \$500 per acre. The Engineer advised that this property is of no particular value to the state. He recommended that it be sold to the Association at \$500 per acre provided access to the highway from the property is denied. The Commission approved the sale of the property subject to such condition.

The Assistant Attorney requested instructions with regard to requiring property owners to construct fences along right of way that has been acquired for highway improvements that are to be deferred until the war is over. He advised that many of these settlements contain provision for such right-of-way fences and that in each case a certain amount is allowed the grantor to pay for the fences. In some instances, he said, the purchase price has been paid to the owners but the fences have not been built, and in other instances the payment for the right of way has not been completed. It was his thought that the Commission might wish to withhold the amounts authorized for the fence construction until it is ready to proceed with the construction of the highway. On account of the fact that it is extremely difficult for farmers to purchase fencing materials at the present time due to war conditions, the Commission decided to complete such purchases in full, regardless of whether or not they build the fences now.

In this connection the question arose whether or not the adjacent property owners should be allowed the use of the right of way pending construction of the highway. It was the opinion of the Commission that the state would benefit if the right of way were cultivated, inasmuch as it would eliminate the expense of cutting weeds and brush. Accordingly, the Assistant

Attorney was instructed to let the abutting farm owners use the property free of charge.

In accordance with this decision the Commission approved a request from Mr. Jurgen LaFrents to use a portion of the land that was acquired from him for right of way for the Wolf Creek Highway near the town of North Plains, in Washington County.

The Commission discussed the request of Mrs. Viola M. Gray for an additional payment for land which she sold to the state for right of way for the improvement of The Dalles-California Highway at Madras. The Commission was advised by the Assistant Attorney that Mrs. Gray charged only a very small amount for the right of way, being under the impression at the time that the finished highway would be about level with the rest of her property. However, it appears that the highway was constructed on a high fill at this point, and Mrs. Gray alleges damages in the amount of \$500.00. Inspection of Mrs. Gray's property, he said, reveals that it has been damaged to some extent but not enough to justify an additional payment in excess of \$250.00. After discussion the Commission authorized the Assistant Attorney to offer Mrs. Gray the sum of \$200.00 in full satisfaction of her claim.

A request was presented from Mr. T. C. Simmons to rent certain state-owned property adjacent to the Oregon Coast Highway near Spencer Creek, north of Newport. The Assistant Attorney advised that this is camp-ground property which the Commission was obliged to purchase in connection with the acquisition of right of way for a revision of the Oregon Coast Highway at this place, and that Mr. Simmons wants to lease the property for a six-months period commencing May 1, 1943, for which he is willing to pay the sum of \$25.00 per month. He recommended acceptance of the offer in view of indications that the highway improvement will not be undertaken until the war is over and that the property will not be needed by the state for any other purpose. The Commission approved the recommendation.

The Assistant Attorney reported an application received from the United States War Department to purchase a parcel of state-owned land near the Madras Overcrossing, in Jefferson County, for use in connection with the construction of the Madras airport. The parcel desired by the Army is situated on the northerly side of the Oregon Trunk Railway and is on the westerly side of the Warm Springs Highway, and contains approximately 21.0 acres. He advised that the state paid \$25.00 per acre for this property and recommended that it be sold to the Federal Government at the same rate. The Commission approved the recommendation.

The Engineer brought up for discussion a request from Mr. E. W. Kenney, Monmouth, for sidewalk construction in front of his premises on the east side of East Street just north of its intersection with South Street in Monmouth. He advised that plans for the original improvement of the Pacific Highway West at Monmouth included the widening of East Street and the replacing of existing sidewalks, but in the case of Mr. Kenney no sidewalk existed so there was none to be replaced. However, later it was agreed that the state would construct two approaches from the highway to his premises and would

extend the sidewalk to the first of these approaches. Mr. Kenney, he said, now wants the state to build the remaining section of sidewalk, about 40 feet in length, so that it will extend clear across the front of his property. He gave as his thought that such improvement is not an obligation of the state and recommended that Mr. Kenney's request be denied. The Commission approved the recommendation.

Consideration was given by the Commission to the matter of expediting the procedure for receiving of bids for construction work, particularly in connection with projects that are of an emergency nature and which should be gotten underway much sooner than is possible by following the present practice of advertising the projects for two weeks. The Attorney advised that the Commission has legal authority to take bids on two or three days notice, if it so desires and will follow a certain procedure. It was the thought of the Commission that advantage should be taken of this feature of the law in order to hurry up certain projects. The Attorney was thereupon instructed to prepare a form of resolution covering the matter for adoption at the next meeting of the Commission.

The Commission adjourned at 11:00 p.m. to reconvene the following morning in the auditorium of the Public Service Building.

Portland, Oregon, December 18, 1942

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction projects and for the sale of buildings in North Bend were opened and read in conformity with previously published notices, following which Chairman Cabell announced that the awards of contracts and sale of buildings would be made at 2:30 p. m. in the same room:

BAKER-HOMESTEAD AND HALFWAY HIGHWAYS

No bids received on this building

The County Court of Marion County, represented by County Judge Grant Murphy and County Commissioner Ralph Girod, and County Engineer N. C. Hubbs, came before the Commission in regard to the maintenance of the Niagara-Detroit Section of the North Santiam County Road which is a link in the North Santiam Secondary Highway. Judge Murphy headed the group. He asked the Commission to take over the maintenance of this section as a state obligation in view of the expenditures heretofore made by the county in the construction of the North Santiam Highway and because it is an isolated section of county road which is costly for the county to maintain. It was his thought that the state could perform the maintenance work much cheaper than the county because the state is now maintaining adjoining sections. Commissioner Girod and Engineer Hubbs made similar statements. Chairman Cabell advised that the Commission had plans at one time to rebuild the North Santiam Secondary Highway between Gates and Detroit to fit in with the Federal Government's proposed flood control dam across the North Santiam River, but there now appears to be no possibility of undertaking this improvement until the war is over. It was his thought that, from a public standpoint, it would be much better if the existing road were maintained in its present condition as a county road, and would draw less public criticism if the county would continue the maintenance of the same. The matter was discussed at considerable length and as a result thereof the Commission agreed to give the matter further thought and to notify the county court as soon as a definite decision is reached.

The Attorney brought up for discussion matters pertaining to the Federal Government's condemnation suit to acquire the state highway right of way at Tongue Point. He advised that the suit is now under way and he would like permission from the Commission to enter a stipulation providing for public use of the old road, pending completion of the new section of highway that is to replace that taken by the government. The Commission approved such stipulation; however, instructed the Attorney to include therein provision for the use of the old road after the new road is built and open for traffic, in the event of the blocking of the new road by slides, or in case the old road is needed for other emergency purposes. It was the thought of

DEC 18 1942

the Commission that such provision should be made notwithstanding the fact that it probably will not be necessary to use the old road after the new one is finished.

The Commission had under discussion requests from Mrs. Wm. Swindell and other residents in the vicinity of Sylvan, Multnomah County, for something to be done for the protection of school children who are required to cross the Tualatin Valley Highway (Canyon Road) where it connects with Skyline Boulevard, S. W. Hewitt Boulevard, Scholls Ferry Road, and S. W. 58th Avenue, in Sylvan, and particularly suggesting that the installation of some type of traffic signal would serve the purpose. The Engineer advised that the intersection referred to is a particularly hazardous one, in view of the fact that so many roads enter the highway at this point; also, that a couple of years ago some minor channelization work was done at this point and several overhead flashing beacons were installed; but at that time the main issue was the control of vehicular traffic upon entering and leaving the highway. Recent investigations, he said, reveal that something should be done to protect pedestrians. He recommended that the most satisfactory and cheapest arrangement to effect such protection would be to install a four-way stop signal as described by Traffic Engineer John Beakey in his report dated December 15, 1942, from which he quoted. He explained that the plan provides for the installation of additional sections in the existing overhead signals, containing both red and yellow lights. Under normal conditions, he said, the yellow signal would flash but during hours when school children cross the highway in going either to or from school the red signal would show for highway traffic and for traffic on the cross roads. The advantage of this system over that which requires the stopping of all traffic at the intersection at all times would be that vehicular traffic would not have to come to a full stop except when the signal flashes red. The Commission after discussion agreed with the Engineer and accordingly authorized him to proceed with the rearrangement of the lights in accordance with his recommendation.

Reconsideration was given by the Commission to the termination or modification of its contract with Leonard & Slate for the operation of the Wilsonville Ferry and particularly a letter from Leonard & Slate dated November 30, 1942, in which the Commission was advised that "under the present condition of the ferryboat and the inability to secure certain materials, we do not feel that we can sign the extension of the contract as there are certain clauses that we could not fulfill. Therefore, we intend to file a new request after the first of the year." The Commission confirmed its previous decision to neither terminate nor modify the present contract and ordered that Leonard & Slate be advised that the Commission expects them to continue the operation of this ferry for another two-year period in accordance with the provisions of the contract, and to furnish new insurance for the protection of the public under any operation of the ferry subsequent to 6:00 a. m. January 1, 1943.

A letter was presented from contractor Max J. Kuney requesting the termination of his contract No. 2517 for the construction of the Warm Springs River-Mill Creek Section of the Warm Springs Highway, in Wasco County. The Engineer advised that the Federal Government also has requested that the completion of this job be postponed for the duration of the war. He estimated

the value of the work remaining to be done by the contractor at \$1,625.00 if paid for at the unit prices mentioned in the contract, as compared to a cost of \$3,300.00, if the work were completed by the state. Mr. Kuney, he said, wants to be relieved of this obligation and has agreed to compensate the state for the additional cost that the state will assume in completing the work at a subsequent date. He recommended approval of this arrangement. The Commission approved the recommendation and thereupon signed an agreement with Mr. Kuney covering the matter.

The matter of requiring highway traffic to come to a complete stop before crossing the Southern Pacific railroad tracks on the highway detour, at Judkins Point south of Eugene, had the attention of the Commission. The Engineer advised that this is a dangerous grade crossing and in his estimation all traffic should be required to stop before crossing the tracks, notwithstanding that the crossing is of a temporary nature and will be discontinued when the Judkins Point grade separation structure is completed and opened for use. He requested authority to maintain "stop" signs on each side of the crossing during the time that it is being used by the general public. The Commission approved the request.

The Commission discussed, approved and signed a letter form of agreement with the University of Oregon providing for a modification of the agreement dated December 18, 1941, which provides that "the state shall construct an oil service line, together with all necessary pumping facilities, which oil service line shall extend from the University power plant to the said siding. Said service line shall be adequate for the transmission of fuel oil between said points." In the discussion it was pointed out that, because of the scarcity of materials brought about by war emergencies and because of priority regulations which have been imposed by the Federal Government, the state cannot at this time procure materials with which to conform to and carry out the provisions of the agreement as quoted above, hence it is necessary to modify this provision so as to relieve the state of its obligation during the emergency on the condition that, until materials are available for the construction of the oil service line, the state will reimburse the University for the cost of transporting fuel oil by truck or other means from the railroad siding to the University power plant.

A letter was presented from Vice Admiral C. S. Freeman, U. S. Navy, advising that the Navy Department is in urgent need of tools and construction equipment in first class condition with spare parts for use in connection with naval activities, and inquiring whether or not the Highway Commission has any such articles that it might be willing to sell to his department. The Engineer advised that the Highway Commission acquired a number of wooden tanks with the Union Fish Hatchery property at Union, and suggested that these might be turned over to the Government. The Commission deferred a decision in the matter pending further check by the Engineer to ascertain whether or not the tanks can be used to good advantage in connection with highway department activities.

The Commission had under discussion the matter of renewing its agreements with the several hospital associations covering the furnishing of medical

and hospital service to state highway department employees. The Commission authorized the extension of the existing agreement with the National Hospital Association without change. With respect to the Physicians and Surgeons Hospital Association of Salem, the Engineer advised that this company has effected a merger with the Multnomah Hospital Association, which also serves some of the state highway department employees, and hereafter the merged companies will be known as the Oregon Physicians' Service. The new company, he said, desires to continue to render service to highway employees, as in the past, except that the rate has been raised from \$2.00 to \$2.50 per month per person. He recommended approval of the change-over because of advantages to be gained thereby, and particularly called attention to the fact that the Oregon Physicians' Service is approved and sponsored by the Oregon State Medical Society. The Commission approved the recommendation and thereupon signed an agreement with the Oregon Physicians' Service covering the entire matter.

A letter was presented from Mr. Walter Meacham, Executive Secretary of the Old Oregon Trail Centennial Committee, requesting that a state highway department automobile be placed at his disposal for use in connection with his official duties. The Commission denied the request in view of the critical shortage of rubber and the necessity to conserve tires as much as possible, it being the thought of the Commission that there are other means of transportation available that would serve the purpose.

The Commission confirmed its oral approval of the renewal of its forgery bond with the American Bonding Company, such company having agreed to reduce the amount of its premium to that quoted by competing companies. This action of the Commission was taken in view of the fact that Mr. Jack Godfrey, who represents the American Bonding Company, has furnished valuable service to the state for many years in connection with forgery bond matters.

The Commission discussed a complaint from Mrs. A. E. Clark, Milwaukie, Oregon, that the gravel pit which was acquired by the Commission from her, located in the vicinity of Clackamas Station, is being used by people as a dumping ground for rubbish, and that top soil from adjacent property belonging to her is washing into the gravel pit because of faulty slope protection. The Engineer advised that the premises were inspected by Division Engineer W. C. Williams, who reports that someone has dumped a few empty cans into the pit but they are near the edge and can be covered readily by excavation from the bank so as to eliminate the unsightliness, and that it is his intention to see that they are covered up at once; further, that such inspection does not reveal soil washing of any consequence. Damage from water erosion is negligible, he said, and is not of sufficient importance to require special remedial work. The fact of the matter is the banks of the gravel pit are rapidly becoming covered with vegetation and within a short time will be stable so that no additional washing should occur. The Commission instructed the Engineer to erect appropriate signs at this pit prohibiting the dumping of rubbish therein and also ordered that Mrs. Clark be informed that efforts will be made to maintain the pit in a sightly condition.

The Commission considered a letter from the Curry County Court, requesting permission to obtain gravel from a state-owned gravel pit on Elk River,

in Curry County, for use by Mr. J. F. Kronenberg of Bandon in the surfacing of an access road that Mr. Kronenberg is constructing from the Oregon Coast Highway to certain county-owned timber lands. The County Court advised that the road being improved by Mr. Kronenberg is partially on the county road system and that the surfacing of the entire road will benefit the county, inasmuch as it will provide access to county-owned property. In this connection a letter was presented from Mr. Kronenberg submitting a statement of the amount of gravel already furnished him from this pit by the state's contractor, A. H. Saxton & Son, such material having been delivered to him in violation of the provisions of Mr. Saxton's contract with the state for the production of materials for maintenance of the Oregon Coast Highway. The Engineer advised that, according to state highway specifications, a highway contractor is prohibited from selling materials taken from any state-owned source unless it is by some special advance arrangement in order to accommodate a county or a municipality, but in no case is he allowed to furnish materials to private parties. He also said that, when it was first brought to his attention that Mr. Saxton was selling materials to Mr. Kronenberg, he immediately notified the contractor to desist therefrom, in response to which notification Mr. Saxton replied that he understood the state's ruling in the matter, nevertheless delivered the material to Mr. Kronenberg as an emergency proposition, because there was urgent need for the surfacing of the road at the time, in order to make it passable for the transportation of vital war materials. Mr. Saxton also agreed to pay the state for 623 cubic yards of pit-run gravel already delivered to Mr. Kronenberg at the rate of \$0.03 per cubic yard. He requested instructions from the Commission whether or not to let Mr. Saxton deliver additional materials to Mr. Kronenberg for this project.

After discussion the Commission decided not to deviate from its present established policy which will not permit a contractor to deliver materials to a private individual; however, stated its willingness to let the county have materials as may be needed for the improvement of the county road provided the county will pay the state \$0.03 per cubic yard for the materials taken. The Commission is not particularly concerned as to who does the hauling of the materials but insists that any arrangement that is made for the taking of materials must be with the County Court and the materials must be used on a county project.

The Commission discussed a letter from Mr. John Franklin Reading with respect to the state's claim against him for damaging a traffic signal pole situate at the intersection of Fourteenth and Water Streets, in Oregon City. It appears that Mr. Reading fell asleep while driving his car and crashed into the pole, causing damage costing \$72.00 to repair. Mr. Reading admitted the liability and stated his willingness to pay the full amount of the claim provided the Commission will allow him to make small payments monthly rather than all at one time. The Engineer suggested, in view of the attitude taken by Mr. Reading, that the state's claim be reduced 50 per cent and that he be allowed to pay the amount in twelve equal installments. The Commission approved the suggestion.

A letter was presented from Mr. V. A. McNeil, District Chief of the Industrial Salvage Section, War Production Board, Portland, urging in behalf

DEC 18 1942

of Mr. Virgil Morris, La Grande, that the Highway Commission conduct snow removal operations on the road which extends from Halfway to the Cornucopia Mines so as to permit the salvaging of 400 tons of scrap iron and steel located at the mine. The Engineer advised that it would cost considerably more to keep the road open for travel than the value of the materials that will be salvaged. Furthermore, the Highway Department could not spare equipment and men to do this work without neglecting work on other highways which are of considerable more importance. It was his thought that the salvaging of the materials at the Cornucopia Mines could be deferred until next spring after the road has been opened by nature. The Commission concurred in the viewpoint of the Engineer and instructed the Secretary to so inform Mr. McNeil.

Consideration was given by the Commission to a request from the County Court of Benton County that the State Highway Department assume, for the duration, the maintenance of the Benton County portion of the Independence Road from its junction with the Albany-Corvallis Highway at Granger to Camp Adair, in view of the fact that this road was improved by the state and that a similar arrangement is now in effect with Polk County for the maintenance of the Polk County Section of this road. The Commission approved the request and ordered that the matter be covered by appropriate written agreement between the county and the state.

The Commission discussed a letter from Peninsula Drainage District No. Two, Portland, pointing out the need for a road extending from Denver Avenue to Vancouver Avenue in order to take care of the large volume of traffic from the new town of Kaiserville (Vanport) and to relieve traffic congestion on Denver Avenue. The Engineer advised that the proper way to relieve traffic congestion on Denver Avenue is to widen this thoroughfare to six lanes of traffic rather than to divert traffic; however, investigations that have been conducted do not reveal a justification for such improvement at the present time. It was his thought that the construction of the road proposed by the Drainage District is properly the obligation and responsibility of Multnomah County, in view of which he recommended that the request be denied. The Commission approved the recommendation and instructed the Secretary to so inform the Peninsula Drainage District.

The Commission also discussed a letter from the Peninsula Drainage District No. Two suggesting that the Gertz County Road, which is now routed to connect with Union Avenue north of Columbia Boulevard, be rerouted to a connection with East Thirteenth Street, Portland, so as to do away with the present dangerous intersection at Union Avenue. The Engineer advised that there is no question that the present intersection is dangerous; however, in his estimation, the rerouting of travel to eliminate the same is a problem for the local authorities. He suggested that the District be advised to contact the Board of County Commissioners of Multnomah County relative thereto. The matter was discussed at some length during which the Commission expressed its opinion that the elimination of this intersection might be of sufficient benefit to the state to justify a state contribution toward the expense involved. The Secretary was instructed to inform the District of the Commission's attitude and to advise further that, because of the prospective benefits to the state, the Commission is willing to give consideration to the construction of

the proposed road as a federal aid secondary highway after the war is over, but is precluded from making a definite commitment to the project at this time, because the Commission's road construction activities are now limited to access roads or roads that are essential in the conduct of war activities.

A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, with respect to the request of the State Highway Commission for reimbursement, under the provisions of Section 10 of the Defense Highway Act of 1941, for damages caused to the Pacific Highway West by reason of war emergency hauling at Camp Adair. Mr. Lynch advised that he has received information from authorities in Washington, D. C., that the state's claim is not eligible for reimbursement under the provisions of the above-mentioned law, since the only substantial damage was apparently caused by private contractors' equipment hauling material for the construction of the army cantonment, and not by the Army directly. The Engineer advised that the repairs cost approximately \$40,000, and that the state will have to assume the entire expense if it is not possible to secure the Federal funds. He was instructed to look into the law again and ascertain if there is some way in which the state can recover from the government, notwithstanding the information received from Mr. Lynch.

A letter was presented from Mr. L. L. Gooding, Principal of the Freewater Schools, Freewater, Oregon, requesting the removal of certain stop signs that have been erected by the State Highway Department at the railroad crossings on the Oregon-Washington Highway, in Freewater. Mr. Gooding pointed out that all passenger trains along the railroads have been discontinued, and at the present time there are only one or two local freight trains daily on each railroad, so there is no apparent reason for traffic stopping before crossing the tracks as is now required. He urged the Commission to order the removal of the signs, as they are a great inconvenience to local people. The matter was discussed at considerable length, during which the Commission indicated a favorable attitude toward Mr. Gooding's request, but considered it inadvisable to remove the signs, because they were installed along with others pursuant to an official order which was made upon the petition of the Oregon Railroad Association. The Commission was reluctant to modify this order unless the Oregon Railroad Association would consent thereto. The Engineer was thereupon instructed to discuss the matter with Mr. Harold Turner, Secretary of the Oregon Railroad Association, and to secure, if possible, the consent of the Association to the removal of the signs. The Commission also ordered that Mr. Gooding be advised of the Commission's action and the reasons therefor. The suggestion is also to be made to him to take the matter up with Mr. Turner.

A letter was presented from Grant Union High School, John Day, requesting permission to store a school bus in the highway department's maintenance building at Seneca at nighttime during the school year. It appears that heretofore storage space for the bus has been furnished by the Hines Lumber Company which is not now able to provide storage facilities in view of the expansion of its business, and under present conditions it is impossible for the school district to obtain materials with which to construct a garage of its own. The Engineer advised that the maintenance foreman, who is in charge of the highway buildings at this place, has assumed in writing the responsibility for tools, materials and supplies that are stored in the building and in his estimation he could not be held responsible for loss if outside parties were permitted access to the building. He also pointed out the possibilities of fire that might be caused by the shorting of electrical connections in the bus, and in this connection advised that the wiring in the highway department equipment is constantly checked as a precaution against the creation of fires by faulty wiring. It was his thought that the granting of the request in this instance would establish an undesirable precedent which might prove costly as well as very embarrassing to the Commission in the disposal of similar requests in the future. He recommended in view of these reasons that the request be denied. After discussion the Commission approved the recommendation and instructed the Engineer to explain fully to the School District the reasons that motivated its action.

The Commission discussed and denied as a matter of policy a request from Mrs. E. J. Ambruster, Portland, and others, for permission to erect and maintain a waiting room on the Canyon Road (Wolf Creek Highway) in West Portland, where Bentz Park Drive and Crest Dale Drive intersect, for the benefit of some fifty families who patronize the busses that operate on Canyon Road. It was the thought of the Commission that the granting of this request would establish a very undesirable precedent.

Consideration was given by the Commission to the request of the Seaside Kiwanis Club for permission to erect and maintain "lift stations" on the right of way of the Oregon Coast Highway in the vicinity of Seaside as an accommodation to men in the armed service; also to maintain appropriate signs at selected points along the highway calling public attention to such stations. They propose to construct a type of shelter for the men as a protection from the weather, with three or four signs on each side of each station. It was the opinion of the Commission that the maintenance of such shelters on the highway right of way would be a deviation from its long established policy which does not permit encroachments of any kind upon highway rights of way. Furthermore, it would establish an undesirable precedent. In view thereof the Commission denied the request; however, agreed, if the Kiwanis Club would build the shelters off the highway right of way under permit or easement from the property owners, to construct approaches to them so traffic could turn off the highway to pick up the servicemen without incurring a traffic hazard. The Commission approved the temporary maintenance of the signs on the highway directing

the public to such points. The Engineer was instructed to convey such information to Mr. Irving C. Allen, City Attorney of Seaside, who presented the request in behalf of the Kiwanis Club.

The Commission had under discussion the application of the Eugene Plywood Company for permission to operate two high-line cables over the McKenzie Highway near Nimrod, in Lane County, as a temporary proposition in connection with the reconstruction of its bridge over this river, which was recently damaged by high water. The Engineer advised that investigations reveal that one of the cables is to be used for conveying men and supplies and the other is to be used in connection with bridge repair work; that the company wants to use these as a temporary proposition and has agreed to remove them immediately upon completion of the bridge work, which they state will not take longer than a couple of months. He recommended approval of the request subject to the condition that the cables be installed to his satisfaction from an engineering standpoint, that the company maintain a flagman on each side of each cable while the cables are in use, and furnishes public liability and property damage insurance for the protection of the Commission and the general public in the event an accident should occur. The Commission approved the recommendation.

The Secretary presented a report on violations committed by carriers who are operating under emergency transportation permits. He was instructed by the Commission to continue the present practice of warning such violators that if they persist in loading their equipment in excess of the gross weights allowed by their permits the Commission may find it necessary to cancel the permits.

The Secretary also presented a list of overweight violations committed by log haulers. He was instructed to send a complete list of the same to Mr. Orville R. Miller, President of the West Coast Lumbermen's Association, and to notify violators that the Commission may find it necessary to reinstate the penalty which provides for the suspension of their equipment in the event they continue to load their equipment in excess of the prescribed weight limits.

The Commission discussed a news release from the National Roadside Council with respect to the salvaging of metal in billboards for use in connection with the national defense program. The National Roadside Council offers the suggestion that the owners of the metal signs be contacted relative to the scrapping of the signs in view of the fact that the metal is sorely needed in the government's scrap pile, and because in its estimation the signs are of very little value since highway travel has been greatly curtailed because of wartime regulations. The Commission approved the suggestion and authorized the Engineer to remove the signs if written permission so to do can be obtained from the owners of the signs. It was the thought of the Commission that the owners' consent should be obtained by the Oregon Roadside Council, and accordingly ordered that the matter be brought to the attention of such organization, with information to the effect that the Highway Commission will authorize its forces to perform the work of demolishing the signs and billboards at state expense and will transport the salvaged materials to the

nearest county salvage depot if the Oregon Roadside Council will secure written releases from the owners of the signs and from the owners of the property on which the signs are located.

Consideration was given by the Commission to a letter from the Corvallis City Engineer, Mr. V. L. Goodnight, requesting help from the State Highway Department in the removal of snow from Mary's Peak Road, which extends northerly from the Alsea Highway to Mary's Peak, a distance of some ten miles. Mr. Goodnight advises that travel over this road must be maintained during the winter months for the benefit of airplane spotters who operate from a lookout tower located at the top of the mountain, and for the benefit of telephone linemen in the maintenance of telephone circuits to the lookout station, and for the watchmen engaged to protect the Corvallis watershed; also that the City of Corvallis is not equipped to do the work but has funds available with which to reimburse the state for expense incurred if the state will keep the road open. The Engineer advised that the State Highway Department does not have personnel and equipment that could be assigned to this project; furthermore, in his estimation it is a matter that Benton County should handle if the City is unable to take care of it itself. He recommended that the request be denied. The Commission approved the recommendation.

The Commission recessed at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

The Secretary presented three proposals from McNutt Brothers on jobs for which bids were opened at the morning session, having been received several hours after the scheduled time for the receiving of such bids. It was the decision of the Commission that these bids could not be considered because they were not submitted at the proper time. The Secretary was thereupon instructed to return them to McNutt Brothers unopened.

At 2:30 p. m. Chairman Cabell announced the awards of contracts and sale of buildings in North Bend, as follows, bids for which were received by the Commission at the morning session, the awards and sales having previously been approved by the Commission by unanimous vote:

"Richland-Halfway Rock Production Project on the Baker-Homestead and Halfway Highways, in Baker County. No bids were received for this project.

"Ochoco Summit Rock Production Project on the Ochoco Highway, in Crook and Wheeler Counties. No bids were received for this project.

"Buchanan Rock Production Project on the Central Oregon Highway, in Harney County. Oscar E. Joelson, Eugene, submitted the only bid for this project, in the amount of \$23,500.00. The Commission awards this contract to Mr. Joelson at his bid of \$23,500.00.

"Evans Creek-Sans Valley Access Road Project, in Jackson County. 8.3 miles grading and surfacing. The only bid received for this

project was that submitted by the Tru-Mix Concrete Company, Medford, in the amount of \$133,416.20. The Commission refers this bid to the Engineer with power to award the contract to the Tru-Mix Concrete Company when certain conditions have been fulfilled.

"Solo-Camp White Access Road Project, in Jackson County. 2.65 miles grading, surfacing and oiling; also construction of 57 feet of timber trestle. Tru-Mix Concrete Company, Medford, submitted the only bid for this project in the amount of \$49,025.60. The Commission refers the bid to the Engineer with power to award the contract to the Tru-Mix Concrete Company when certain conditions have been fulfilled.

"Crescent Rock Production Project on The Dalles-California Highway, in Klamath County. No bids were received on this project.

"Chemult Rock Production Project on The Dalles-California and Willamette Highways, in Klamath County. No bids were received on this project.

"Trent-Salt Creek Falls Rock Production Project on the Willamette Highway, in Lane County. No bids were received on this project.

"Flight Strip Project (Southwest Boardman), in Morrow County. Four bids were received for this project, the low one being that of E. C. Hall Company & J. C. Compton, Eugene and McMinnville, in the amount of \$290,785.00. The second-low bid was submitted by Porter W. Yett, Portland, in the amount of \$330,055.00. The Commission refers all bids to the Engineer with power to award the contract to E. C. Hall Company & J. C. Compton when certain conditions have been fulfilled.

"Nye Junction-Grant County Line Rock Production Project on the Pendleton-John Day Highway, in Umatilla County. The only bid received for this project was that submitted by O. C. Yocom, McMinnville, in the amount of \$71,115.00. The Commission awards this contract to Mr. Yocom at his bid of \$71,115.00.

"Rock Creek-Joseph Rock Production Project on the Wallowa Lake Highway, in Wallowa County. No bids were received for this project.

Sale of residence buildings in North Bend:

"Building No. 9560. Formerly owned by J. H. Tewsley. No bids were received for this building.

"Building No. 9499. Formerly owned by John Sandin. The only bid for this building was submitted by G. Gilbertson, Marshfield, in the amount of \$20.00. The Commission considers this bid satisfactory and accordingly sells the building to Mr. Gilbertson at his bid of \$20.00.

DEC 18 1942

"Building No. 9518, formerly owned by P. M. Ross, and Building No. 9521, formerly owned by K. Horn. M. Jorgenson, Marshfield, submitted a combination bid for both of these buildings at \$50.00 lump sum. The Commission rejects this offer.

"Building No. 9486-D. Formerly owned by Coos County. Clarence S. Wilson, North Bend, submitted the only bid for this building in the amount of \$5.00. The Commission considers this bid satisfactory and accordingly sells the building to Mr. Wilson at his bid of \$5.00.

"Building No. 9646. Formerly owned by A. M. Haley. No bids were received for this building."

The Engineer requested authority to spend state funds in connection with certain extra work to be performed by the contractor in connection with the Swan Island Access Road Project, which work consists of the construction of traffic dividers that were not included in the original plans for this project. He estimated the cost involved at between \$1,000 and \$2,000, and advised that the contractor has stated his willingness to do this work under a special price agreement provided he is permitted to do it at once. He explained that there is an apparent shortage of federal funds with which to pay for this work, so if the traffic dividers are to be constructed now the work will have to be paid for with state funds because it would take too long to secure approval for additional federal funds. He recommended approval of the expenditure in order to expedite completion of the project, notwithstanding that the road in question is not on the state highway system. After discussion the Commission authorized an expenditure of not to exceed \$2,000 for this purpose.

The Commission discussed a request from the Southern Pacific Company for permission to obtain rock from a state-owned quarry near Klamath Falls for use in connection with the construction of a dike in Upper Klamath Lake adjacent to the company's property at Algoma. The Engineer recommended approval of the request provided the company will pay \$0.03 per cubic yard for material taken and provided further that the company will furnish the state with public liability insurance as protection in the event someone were injured during the progress of the company's operations on the state's property. The Commission approved the recommendation subject to the conditions mentioned by the Engineer and ordered that the matter be covered by written agreement between the company and the state.

Reconsideration was given by the Commission to the Troy controversy in Baker County, being a claim for damages arising out of the reconstruction of the Troy Ranch Section of the Old Oregon Trail. Commissioner Oliver advised that he personally inspected the Troy property and found conditions to be substantially as previously reported by Miss Troy and her attorney, Mr. Grant, of Baker; in fact, the house shows evidence of having been severely jarred, the plaster being badly cracked and the cellar has caved in. The Troys, he said, allege that all of this damage occurred by reason of blasting operations by the state's contractor. He said that he also inspected the approach from the Troy property to the highway and in his estimation the approach

was constructed in the wrong place. Furthermore, some of the Troy fences were covered up by highway embankment construction and have never been rebuilt, and the Troys are also complaining because of the blocking of certain culverts and the changing of drainage ditches so that water no longer flows in its natural channel. Miss Troy, he said, will not suggest any manner of settlement other than on the basis of the price of \$3,000 which was contained in the original option given the state when the state purchased the right of way for the highway improvement, which right of way has not been paid for up to the present time.

The Attorney advised that he could not reach an agreement with the Troys for the right of way, so it was necessary to acquire it by condemnation and that his offer for the same in condemnation was \$1,500. He quoted from a letter directed to Commissioner Oliver by Division Engineer Paul Van Scoy in which Mr. Van Scoy estimates that it will cost about \$800 to repair the damage to the Troy property exclusive of the damage that occurred to the residence building, and a few other little items that he did not believe concerned the state. The Engineer gave as his thought that the state is not responsible for all of the damage that occurred. He suggested, in order to bring this matter to a final conclusion, that the Commission offer to settle in full for \$2,500, and let the Troys assume the responsibility for repairing their property.

Division Engineer W. C. Williams, who had charge of highway work in Baker County at the time the highway was rebuilt across the Troy property, was called into the conference. He advised that the approach road from the Troy property to the highway was constructed in a location specified by the Troys, notwithstanding that he pointed out to them at the time that the location was wrong, and the Troys offered no objections whatsoever until the road was built. As to the damage caused by blasting, he stated that he inspected the Troy property after the blasting and observed that very little damage was done; in fact there couldn't have been much damage because the contractor did very little blasting; furthermore, the contractor did everything that he was asked to do in repairing this damage.

After further discussion the Commission decided unanimously, in order to terminate this controversy, to offer the Troys the sum of \$2,500 as payment in full for their claim, both right of way and damages, provided they will sign a statement releasing the state from further obligation in connection therewith. This offer was telephoned to Miss Troy's attorney, Mr. Grant, by Commissioner Oliver who advised that Mr. Grant appeared to be satisfied with such settlement and would endeavor to secure approval by the Troys. The Commission instructed the Attorney to make further presentation of the offer in writing.

The Attorney presented a damage claim submitted by Mr. Ernest M. Dyson, Scappoose. He explained that Mr. Dyson is asking reimbursement for expense incurred as a result of driving his car into the concrete curb along the west side of the Lower Columbia River Highway, in Scappoose, and that he alleges that the state is liable because the curb was not properly lighted so as to be clearly visible by traffic at nighttime. The Engineer advised that investigation reveals that this accident occurred at a point where the highway

changes from two traffic lanes to four traffic lanes, but there is no curvature in the highway alignment and there is absolutely no reason for an accident to occur at this point if the car were driven at a moderate rate of speed and were under control, particularly if all wheels of the car were on the pavement. It appeared to him that Mr. Dyson's accident occurred as a result of carelessness and accordingly recommended that his claim be denied. The Attorney concurred therein. The Commission approved the recommendation.

The Engineer reported the need to purchase four additional, three-quarter horse power, air compressors in order to keep truck tires properly inflated. These compressors, he said, are for use at Ochoco Summit, Lapine, Seneca, and Snake River Slides maintenance stations and will cost approximately \$125 each. The Commission approved the purchase.

The Engineer also requested authority to purchase from contractor C. A. Dunn 4,930 cubic yards of maintenance materials in order to fill up the stock piles that are located in the vicinity of the gravel pit which Mr. Dunn is now using in connection with the construction of a flight strip in Lake County. He estimated the cost of this material at \$12,000 and recommended approval of his request, because Mr. Dunn is able and willing to furnish this material under his present setup, whereas, if the Commission advertised the project for bids, it very likely would go begging because contractors, under the present wartime conditions, are not particularly interested in projects of this kind. After discussion the Commission approved the purchase of these materials from Mr. Dunn as an extra nonparticipating item in connection with his contract with the Commission for construction of the Alkali Lake Flight Strip.

The Commission discussed matters pertaining to the Front Avenue Project, Portland, particularly the question whether or not to continue negotiations for purchase of right of way in view of the fact that the City of Portland is running short of funds with which to contribute its share of the costs involved. The Commission went on record as favoring the continuance of the purchase of right of way on both sides of the Willamette River to the extent of the City's ability to pay its agreed cooperative share. When the City's funds are exhausted then the matter of financing the purchase of the remaining parcels is to be discussed with the city officials. Chairman Cabell was authorized to confer with the city officials in regard thereto. Pending further notice, the Right of Way Department was instructed to continue with right of way negotiations.

The Assistant Attorney requested instructions relative to the purchase of fire insurance covering certain buildings that have been acquired in connection with the Front Avenue improvement on the east side of the Willamette River, in Portland. He advised that the buildings were covered by insurance when they were acquired by the state and the Portland city officials feel that the insurance should be renewed. The Commission authorized the renewal of this insurance, if that is in accordance with the desires of the City; and the payment of 40 per cent of the premium with state funds, which is the percentage the state is paying in connection with the purchase of the property.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported personally on the following park matters:

Logging road easement across Neahkahnie Mountain State Park:- The Parks Superintendent advised that Koppisch and Donelson, loggers of Astoria, have submitted a petition for a roadway easement across state property located in the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 17, Township 3 North, Range 10 West, W. M., Tillamook County, in order to reach certain timber holdings which they own east of the state's property; and that they have also declared a desire to purchase the timber growing on the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 17, which tract is a unit of Short Sand Beach State Park. He explained that on account of the terrain it will be necessary for the loggers to construct their roadway across property belonging to Mrs. S. G. Reed before they enter the state's property, and that they petitioned Mrs. Reed for a roadway lease which was denied because Mrs. Reed was fearful that they would not build the road in the proper location and that they would severely damage her property. Mrs. Reed, he said, has offered to give the state a 60-foot right of way for a park roadway across her property if the state wants it and will survey the road and supervise construction of the same by the loggers in order to eliminate any possibility of dispoilation. He recommended that the Commission secure the right of way from Mrs. Reed at this time, so as to control the location of the logging road, if the Commission authorizes the construction of the same. The Commission approved the recommendation and also approved the granting of an easement to Koppisch and Donelson to construct its roadway along the same and across the existing state park, provided it is built in a location that meets the approval of the Commission and that the approaches to the highway are so constructed that loads of logs may be driven onto the highway without causing an undue hazard to the highway traffic. The Engineer was authorized and instructed to pass on this feature.

The company's request to purchase the timber on the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 17 was denied by the Commission because this property was deeded to the state as a gift by Mr. and Mrs. Reed for recreational purposes, and the Commission considered if it sold the timber it would be violating the motive of the gift.

Timbered wayside strips in Curry County:-The Parks Superintendent recalled that the Commission at the previous meeting authorized the purchase of 614 acres of land adjacent to the Oregon Coast Highway, in Curry County, from Mr. Elmer Bankus for the sum of \$9,000. He advised that since then the descriptions of the properties have been checked and it has been found that they contain only 610 acres, and include 60 acres that are of no particular value from the state parks' standpoint. Mr. Bankus, he said, has agreed to the elimination of such acreage from the transaction and to allow the Commission a credit of \$300 for one 40-acre tract and \$150 for the other tract which contains 20 acres; in other words, it is agreeable with Mr. Bankus to sell the balance, 550 acres, to the state for the sum

of \$8,550. The Commission approved such deduction and authorized the closing of the transaction on such basis. The lands being purchased are described as follows:

SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Sec. 33, T. 38 S., R. 14 W., W. M.
 Lots 5, 11, 12 and 14 of Sec. 19, T. 40 S., R. 13 W., W. M.
 NE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Sec. 1, T. 40 S., R. 14 W., W. M.
 E $\frac{1}{2}$ of the SW $\frac{1}{4}$ and the W $\frac{1}{2}$ of the SE $\frac{1}{4}$ of Sec. 12, T. 40 S.,
 R. 14 W., W. M.
 NE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Sec. 25, T. 40 S., R. 14 W., W. M., ex-
 cept the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of said section.
 S $\frac{1}{2}$ of the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Sec. 25, T. 40 S., R. 14 W., W. M.
 All that portion of the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 25, T. 40 S.,
 R. 14 W., W. M., that lies north and west of the northerly
 right of way line of the Oregon Coast Highway.
 SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Sec. 25, T. 40 S., R. 14 W., W. M.
 Containing 550 acres of land, more or less.

Proposed purchase of timbered wayside strips along Pendleton-John Day Highway:-The Parks Superintendent brought up for reconsideration the matter of acquiring timber wayside strips along the Pendleton-John Day Highway, between Dale Ranger Station and the junction of Camas Creek with the John Day River. He explained that there are four different ownerships involved, being lands owned by the Pilot Rock Lumber Company, George E. Carnes, H. B. Longley and Dora Tomes; also, that the matter has been under consideration for some three years, options at one time having been secured, but, due to depletion of funds that were set up for purchase of recreational areas and because of the war situation, the Commission decided not to purchase the property at that time, but agreed to reconsider the matter in 1942. He further recalled that he again brought the matter to the attention of the Commission on January 21, 1942, when the Commission decided to defer purchase because of the uncertainty of funds and it then being the thought of the Commission that funds should not be spent for purchase of park areas due to wartime conditions. He stated that he is bringing the matter up at this time with the thought in mind that the Highway Department's financial situation might be in better shape and that there might be sufficient funds on hand at the close of the year that could be applied to this purchase. He said that if the Commission cannot see its way clear to purchase all of the strips it should give very careful consideration to the purchase of the tract owned by the Pilot Rock Lumber Company, in view of the fact that this company consented to hold off the marketing of the timber on its tracts until such time as the Commission had funds to purchase them. Commissioner Oliver gave as his thought that the purchase of the property would be most desirable from a wayside timber recreational standpoint, also that to his knowledge timber on properties surrounding the area is now being cut, and if the proposed wayside strips are not acquired by the state soon, the probabilities are that the timber will be cut on them also. Commissioner Clough stated that he would not oppose the purchase of

these areas if the other members of the Commission want them. The matter was discussed at considerable length and as a result thereof the Right-of-Way Department was instructed to again contact the owners of each tract and obtain a definite figure as to how much they now want for each. The Commission will make its decision when the report is rendered and will then decide whether or not to purchase the areas, considering what the Highway Department's income will be during the next three or four months.

Silver Creek Falls CCC Camp:-The Parks Superintendent reported that the Federal Government has conveyed to the State of Oregon as a direct gift the Silver Creek Falls CCC Camp and facilities, comprising 32 buildings. He recommended acceptance of this gift in view of its desirability to house future CCC personnel, and because, in any event, the buildings can be used to good advantage for recreational purposes. The Commission approved the recommendation.

Wayside strips along the Wilson River Highway:-The Parks Superintendent requested instructions with regard to the acquisition of wayside strips along the Wilson River Highway between Fall Creek and Jordan Creek. He particularly pointed out that, when the right of way for this highway was acquired from the Weyerhaeuser Timber Company, the company on its own account deeded to Tillamook County about 1,000 acres of wayside land, it being understood at the time that, at the expiration of a period of five years, Tillamook County would deed this property to the State of Oregon, and a written agreement covering the matter was made between the county and the state. This agreement, he said, was dated February 19, 1938; hence the five-year period terminates on February 19, 1943. It was his thought that the matter should be called to the attention of the Tillamook County Court and a deed requested. The Commission concurred and thereupon instructed the Attorney to handle the details with respect thereto.

Joseph Ralston Memorial at Cascadia State Park:-The Parks Superintendent presented a request from W. L. Jackson of the Albany Democrat-Herald, Albany, for permission to erect a monument on the Santiam Highway in the vicinity of Cascadia State Park, in memory of the late Joseph Ralston of Albany, who was prominently identified and who took an outstanding part in the promotion of this highway. He said that the monument has been prepared and is ready for erection and all that is needed is the approval of the Highway Commission to erect it on the highway right of way. He recommended approval of the request. The Commission approved the recommendation.

John Day Highway fossil area:-The Commission discussed briefly with the Parks Superintendent matters pertaining to the establishment of a state recreational area in the John Day Valley near Picture Gorge where prehistoric fossils abound. The Commission indicated a favorable attitude toward the acquisition of this property

for scientific as well as recreational purposes, but deferred a definite decision in regard thereto pending personal inspection of the property by Commissioner Oliver and the Parks Superintendent to determine the limits of the area that should be acquired and to ascertain generally just what is wanted.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Location	215-1443	Jackson	Evans Creek-Sams Valley Section, Evans Valley Road	1st - \$3,720
Plans	122-1453	Linn	Cottonwood Corner-Sanderson Bridge Section, Albany-Lyons Secondary Highway	1st - \$ 100
Plans	13-1464	Klamath	Barclay Springs-Algoma Section, The Dalles-California Highway	1st - \$ 500
Plans	22-1454	Linn	Approach Road to State Park, Santiam Highway	1st - \$ 750
Boundary	6-1431	Coos	Simpson Park Section, Cape Arago Secondary Highway	1st - \$ 700
Plans	22-1455	Linn	Albany Airport Section, Pacific Highway East	1st - \$ 75
R/W	27-1417	Polk	West Approach-Willamette Riv. Bridge, Salem-Dallas Highway	2nd - \$ 100 Total to date \$200
Prospect	7-1420	Crook	Ochoco Forest Section, Ochoco Highway	1st - \$ 200

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, contract No. 2366, for grading and paving the Rice Hill-Turkey Hill Section of the Pacific Highway in Douglas County, requested an extension of time from July 31, 1941, to September 9, 1942, within which to complete this job. He alleged that his failure to complete the project within the specified time limit

DEC 18 1942

was due to adverse weather conditions, shortage of skilled labor and materials, and to war conditions which made it difficult to secure shipment of materials to the job and to obtain necessary equipment and repair parts for the same. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct; further, that the most serious trouble that the contractor experienced was his controversy with the Labor Union on other jobs, which prevented completion of such projects in time to get started on this one. The general traveling public, he said, has not been greatly inconvenienced by the delay, because it has had the use of the old highway at all times. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Roy L. Houck, contract No. 2396, for grading and paving the Scappoose-Multnomah County Line Section of the Columbia River Highway, in Columbia County, requested an additional extension of time, from July 1, 1942, to September 26, 1942, within which to complete this job. He attributed his failure to complete the project within the extended time limit to war-time conditions which made it difficult to secure labor, transportation of materials, and the securing of equipment and repair parts. The Engineer advised that the reasons given by the contractor for the overrun of time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Frank Penepacker, contract No. 2412, for grading the South Unit of the Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County, requested an additional extension of time, from the spring of 1942 to September 14, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to traffic conditions at the south end of the project, it being considered by all concerned that it would be to the best public interests if the connection with the old highway at this point were delayed until the surfacing and oiling was completed on the entire realignment project between Algoma and Terminal City. The Engineer advised that the reasons given by the contractor for overrun of time limit are correct; further, that highway traffic has not been held up by the delay, neither has the state incurred extra expense in connection therewith. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Leonard & Slate, contract No. 2446, for grading and surfacing the Dixie Summit Section of the John Day Highway in Grant County,

requested an additional extension of time from July 15 to September 12, 1942, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to war-time conditions, and particularly to difficulties in securing a priority rating which would allow them to secure necessary repair parts for their machinery, and materials required in the construction work. The Engineer advised that the reasons given by the contractor for failure to complete the job within the specified time limit are correct and recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. Milne, contract No. 2451, for grading, surfacing and oiling the Long Creek-Fox Section of the Pendleton-John Day Highway, in Grant County, requested an additional extension of time from June 30 to August 19, 1942, within which to complete this job. He gave the following reasons for failure to complete the project within the previously extended time limit: inability to secure repair parts when needed and difficulties in securing labor. The Engineer advised that the reasons given by the contractor for failure to complete the job within the specified time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty, particularly because the delays were caused largely by war-time conditions. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Roy L. Houck, contract No. 2457, for grading and paving the Clackamas Overcrossing Section of the Cascade Secondary Highway in Clackamas County, requested an extension of time from October 15, 1941, to November 14, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to war-time conditions which made it difficult to secure labor, materials and supplies; also, to adverse weather conditions during 1941. The Engineer advised that the reasons given by the contractor for overrunning the time limit are substantially correct, and that the delay without question was the result of conditions which he could not anticipate or control. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Leonard and Slate, contract No. 2467, for grading, surfacing and construction of bituminous macadam on the Canyon Creek-Bryant Hill Section of the Santiam Highway, in Linn County, requested an extension of time from July 31, to October 15, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions

and difficulties incident to war-time priorities. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Frank Penepacker, contract No. 2491, for grading the Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County, requested an extension of time from May 31 to September 12, 1942, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: adverse weather conditions, difficulty in securing repair parts for equipment and steel materials for construction work because of a low priority rating, difficulties in securing labor because of labor requirements in connection with the construction of the Medford and Corvallis cantonments. The Engineer advised that the reasons given by Mr. Penepacker for failure to complete the project within the specified time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. L. Gates, contract No. 2500, for grading and topping the Meador Brook Section of the Starkey Secondary Highway, in Union County, requested an extension of time from October 15, 1941, to October 3, 1942, within which to complete this job. He alleged that the delay in completing the project was due to unfavorable weather conditions and to inability to obtain necessary equipment. The Engineer advised that the reasons given by the contractor for overrun of the time limit are correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Jud Beardsley, contract No. 2508, for making repairs to the Vista House, on the Columbia River Highway, in Multnomah County, requested an additional extension of time from October 31, 1941, to October 16, 1942, within which to complete this job. He alleged that he was unable to complete the project within the specified time limit because of adverse weather conditions and because the amount of work performed was more than double that called for in the contract. The Engineer advised that unexpected difficulties were encountered by Mr. Beardsley in connection with the work, which made it necessary to increase by a considerable amount the repair work contemplated. Such work consisted of waterproofing the roof and walls, which could not be done during the winter season, and accordingly he was instructed to close down the work until suitable weather obtained during the past summer. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

DEC 18 1942

Porter W. Yett, contract No. 2510, for grading, surfacing and oiling the West Unit of the Shaniko-Cow Canyon Section of the Sherman Highway in Wasco County, requested an extension of time from June 30 to September 26, 1942, within which to complete this job. He offered war-time conditions and scarcity of competent labor and equipment as reasons for failure to complete the project within the specified time limit. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. S. Wallace, contract No. 2520, for furnishing crushed rock in stock piles on the Pendleton-Meacham Section of the Old Oregon Trail in Umatilla County, requested an extension of time, from June 30 to October 14, 1942, within which to complete this job. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that Mr. Wallace had several contracts under way at the same time, in connection with two of which he was required to furnish considerable more material than was called for in the original contract, which undoubtedly was the reason why he failed to complete the project within the specified time limit. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

C. J. Montag and Sons, contract No. 2542, for grading and paving the Illahee-Steiwer Hill Section of the Pacific Highway East, in Marion County, requested an extension of time from September 30 to October 31, 1942, within which to complete this job. He alleged that the delay in completing the project within the specified time limit was due to difficulties in securing shoulder materials because the federal government was taking all available materials for use in the construction of the Salem Airport, which was under way at the same time. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Strong & Macdonald, Inc., contract No. 2549, for construction of 1.87 miles of railroad roadbed along the Pacific Highway between Eugene and Judkins Point, in Lane County, requested an extension of time from May 31 to September 10, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unfavorable weather conditions which necessitated many shut-downs and prohibited double-shift operations. The Engineer advised that in addition to adverse weather conditions the contractors encountered difficulties in securing repair parts for their equipment and efficient labor, and that these were the principal causes for failure to complete the project on

time. Due to the fact that war-time conditions had much to do with the delay, he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Parker-Schram Company, contract No. 2554, for paving the Sun Dial Secondary Highway, in Multnomah County, requested an extension of time from February 24 to October 25, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and to war-time conditions which made it difficult to secure necessary emulsified asphalt. The Engineer advised that the reasons given by the contractor for failure to complete this job on time are correct, and that he personally asked the contractor to defer the placing of the final seal coat until later in the year, so as to allow time to repair certain broken sections that were rushed through to completion under adverse conditions. He further stated that the traveling public was not inconvenienced to any great extent by the delay; neither has the state incurred any extra expense for engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Parker-Schram Company, contract No. 2567, for grading and paving the Airbase-Columbia Bottom Road Section of the Portland Airbase East Access Road, in Multnomah County, requested an extension of time from May 15, 1942, to October 25, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unfavorable weather conditions and to difficulties in securing emulsified asphalt, because of war-time conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct, and that the delay was not caused by any reason of negligence on the part of the contractor. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2366, 2396, 2412, 2446, 2451, 2467, 2491, 2500, 2508, 2510, 2520, 2522, 2526, 2542, 2549, 2554, and 2567, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and

DEC 18 1942

provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2366, with Roy L. Houck, for grading and paving on the Rice Hill-Turkey Hill Section of the Pacific Highway, in Douglas County. Completed September 9, 1942.

Contract No. 2396, with Roy L. Houck, for grading and paving on the Scappoose-Multnomah County Line Section of the Columbia River Highway, in Columbia County. Completed September 26, 1942.

Contract No. 2412, with Frank Penepacker, for grading on the South Unit, Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County. Completed September 14, 1942.

Contract No. 2446, with Leonard & Slate, for grading and bituminous macadam surfacing on the Dixie Summit Section of the John Day Highway, in Grant County. Completed September 12, 1942.

Contract No. 2451, with A. Milne, for grading, surfacing and oiling and construction of two bridges on the Long Creek-Fox Section of the Pendleton-John Day Highway, in Grant County. Completed August 19, 1942.

Contract No. 2467, with Leonard & Slate, for grading, surfacing and bituminous macadam on the Canyon Creek-Bryant Hill Section of the Santiam Highway, in Linn County. Completed October 15, 1942.

Contract No. 2491, with Frank Penepacker, for grading the Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County. Completed September 12, 1942.

Contract No. 2500, with E. L. Gates, for grading and topping the Meadow Brook Section of the Starkey Secondary Highway, in Union County. Completed October 3, 1942.

Contract No. 2508, with Jud Beardsley, for repairs to the Vista House, on the Columbia River Highway, in Multnomah County. Completed October 26, 1942.

Contract No. 2510, with Porter W. Yett, for grading, surfacing and oiling on the West Unit, Shaniko-Cow Canyon Section of the Sherman Highway, in Wasco County. Completed September 26, 1942.

Contract No. 2520, with A. S. Wallace, for the Pendleton-Meacham Rock Production Project on the Old Oregon Trail Highway, in Umatilla County. Completed October 14, 1942.

DEC 16 1942

Contract No. 2522, with F. R. Hewett, for surfacing and oiling on the Condon-Morrow County Line Section of the Wasco-Heppner Secondary Highway, in Gilliam County. Completed September 10, 1942.

Contract No. 2526, with A. T. Dolan, for the Wren Rock Production Project, on the Corvallis-Newport Highway and Kings Valley Secondary Highway, in Benton County. Completed June 22, 1942.

Contract No. 2542, with C. J. Montag & Sons, for grading and paving on the Illahee-Steiner Hill Section of the Pacific Highway East, in Marion County. Completed October 31, 1942.

Contract No. 2549, with Strong and Macdonald, Inc., for railroad roadbed construction on the Eugene-Judkins Point Section of the Pacific Highway, in Lane County. Completed September 10, 1942.

Contract No. 2554, with Parker-Schram Co., for paving on the Sun Dial Highway Section of the Sun Dial Secondary Highway, in Multnomah County. Completed October 25, 1942.

Contract No. 2567, with Parker-Schram Co., for grading and paving on the Air Base-Columbia Bottom Road Section of the Portland Air Base East Access Road, in Multnomah County. Completed October 25, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission set Thursday, January 14, 1943, as the date for its next regular meeting for the receiving of bids. Such meeting is to be held in Portland, and the Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the University of Oregon with respect to the construction of an oil service line to the campus.

Agreement with Max J. Kuney terminating his contract for construction of the Warm Springs River-Mill Creek Section of the Warm Springs Highway, in Wasco County.

DEC 13 1942

Agreement with the Loritan Investment Company relative to the use by the company of a portion of the Oregon Coast Highway right of way south of Marshfield.

Agreement with the Bennett Trust Company and L. J. Simpson relative to the acquisition of Shore Acres property south of Empire.

Agreement with John V. O'Mara covering the maintenance of drainage facilities in connection with the Roseburg-Shady Point Section of the Pacific Highway, in Douglas County.

Agreement with the Union County Sportsman's Club covering the use by the club of a portion of the property recently acquired from the State Game Commission.

Agreement with the Oregon Physicians' Service covering the furnishing of medical and hospital services to state highway department employees.

Agreement with Jackson County relative to the maintenance of the Evans Creek-Sams Valley Access Road.

Agreement with Jackson County relative to the maintenance of the Tolo-Camp White Access Road.

Agreement with The Standard Oil Company of California with respect to the remodeling of its facilities due to highway construction between Marshfield and North Bend.

Agreement with the City of Cornelius providing for the improvement of certain city streets that are not on state highway routes.

Acceptance of easement from the United States of America pertaining to the construction of a sewer line and a power line across government property adjacent to the Pacific Highway East between Portland and Milwaukie.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:00 p. m.

State Highway Engineer

Chairman

Secretary

Commissioner

Commissioner

Portland, Oregon, January 13, 1943

The State Highway Commission met in regular session at 8:00 p. m. in Room 515 (Imperial Room), Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Huron W. Clough was excused from attending this meeting.

The Engineer brought up for discussion matters pertaining to a slide condition that exists along the Oregon Coast Highway near its junction with the road approach to Tongue Point Naval Base, a short distance east of Astoria. It appears that the highway embankment was constructed on an unstable foundation, and that ground movements resulting therefrom have seriously endangered several residence buildings situate in Block 21 of Alderbrook Addition to Astoria, said buildings being owned by the following parties: Mr. Labiske, Mr. Beckner, Mary Kiiski, Eino O. Jarvinen, and Mr. McGraw. The Engineer advised that investigations reveal that the highway fill is responsible for existing conditions which indicates that the state is liable for damage that has occurred. He suggested that further liability could be avoided if the state either purchased the properties affected or paid for the damage that has already occurred. He recommended the former, in view of the probabilities that additional damage will occur before final correction can be made of the slide condition, which would eventually cost the state considerably more than if the properties were purchased. The matter was discussed at considerable length and as a result thereof the Commission authorized the Attorney to secure options for the purchase of the properties involved and to report the same to the Commission along with an estimate of cost to settle with the owners by the payment of damages.

The Commission discussed briefly the following matters which are to be presented by delegations on the following day:

Request of Hon. Charles Childs, Albany, for construction by the state of a service roadway along the Pacific Highway East, opposite Waverley Lake, Albany:- The Engineer explained that Mr. Childs wants a service roadway along the full length of his holdings, which front on the highway for about a quarter of a mile, to take the place of numerous private driveways. He exhibited a map showing the proposed improvement and gave as his thought that such roadway would be of considerable advantage to the state if Mr. Childs would relinquish his right of access to the highway, except at the north and south ends of his property. He estimated that the improvement would cost about \$3,500, and that it would cost the state approximately \$1,750 to construct its portion of the separate driveways, if the service roadway were not built. After discussion the Commission decided to construct this roadway provided Mr. Childs will pay one-half of the cost involved and will relinquish his right of access to

JAN 13 1943

the highway, except at points approved by the Engineer. Such information is to be conveyed to Mr. Childs when he appears.

Improvements requested by E. L. Gray and the Polk County Court on the Independence-Wells County Road and on the Suver Road:-The Engineer advised that the improvement requested on the Independence-Wells County Road consists of flattening a couple of sharp turns and realignment of about three-quarters of a mile near the Benton-Polk County line, and that the county court is asking that this work be done in connection with the state's maintenance of the road. He further stated that this is a desirable improvement but the possibilities of undertaking it are very remote, due to governmental regulations; in fact he has tried on several occasions to secure approval of the governmental authorities, but to date has been unsuccessful therein. As to the Suver Road improvement, he advised that this matter raises a question of providing an outlet for the people and timber products in the Pedee District of Polk County, several solutions for which have been offered, including the improvement of the present McTimmonds Valley Road which extends northerly from Pedee, improvement of the Suver Road and construction of an extension thereof from Airlie to Pedee, and the use of the existing logging railroad for the transportation of logs. He estimated the cost to temporarily repair the McTimmonds Road at \$50,000, and recommended against the expenditure because it would not provide a standard improvement and would in effect be a waste of public funds. He suggested the extension of the railroad by private investment as a means of transporting logs from this district, and the extension of the Suver Road from Airlie to Pedee. The matter was discussed at some length, but no definite action was taken. The Engineer was instructed to invite Mr. C. L. Starr, General Manager of the Valley and Siletz Railroad Company which owns the existing railroad, to be present at the meeting on the following day when this matter is discussed with the delegation.

Request of F. W. Brundage, Western Log and Lumber Administrator, that certain logging interests of Seaside be permitted to obtain rock from the right of way of the Oregon Coast Highway along Short Sand Beach Creek near the Tillamook-Clatsop County line:-The Engineer advised that Mr. Brundage's interest in this matter is simply to help the loggers in the marketing of spruce timber from their holdings adjacent to the highway, the timber being badly needed by the Government for defense purposes and the rock being needed to surface the logging road over which the logs are to be hauled. He recommended the granting of the request, in view of the emergency, provided the state is paid \$0.03 per cubic yard for the material that is taken; and provided further that the loggers will furnish public liability and property damage insurance to cover their operations on the highway and will maintain flagmen to protect highway travel. The Commission approved the recommendation.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended

JAN 13 1942

be made in connection with each. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Clackamas County Section, Clackamas-Boring County Road</u>				
10742-Telford, Myrtle I.	Oil Storage Site	1.0	Five-year lease at \$30 per year	Parker

The Commission discussed and denied an offer from the Oregon Piling Company to purchase timber from state-owned property situate adjacent to the Wolf Creek Highway near Sunset Camp, it being considered by the Commission to

JAN 13 1943

be advisable to retain this property in its natural state for purposes for which it was originally acquired.

The Attorney requested instructions relative to the payment of damages to a Mr. John Denney for trespass on his property by the state's contractor, M. L. O'Neil & Son, in connection with the construction of the Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway. The Engineer advised that when this project was started Mr. Denney was approached with respect to the purchase of a small parcel of his land which was to be used as a source of surfacing materials, but he refused to make any offer of settlement until he knew how much gravel was to be taken therefrom; further, that during the process of taking gravel from the bed of the Umatilla River the contractor inadvertently encroached on Mr. Denney's property and Mr. Denney now feels that he is entitled to compensation, in view of the fact that the contractor entered upon his property without his permission. He recommended payment of \$50 to Mr. Denney as payment in full of his claim. The Commission approved the recommendation and so ordered.

The Attorney brought up for consideration a number of legislative matters which were discussed by the Commission. The following action was taken thereon:

Bill authorizing issuance of a duplicate check, in the event of loss of an original check:- The Attorney was instructed to prepare the bill and present it to the Legislature which is now in session.

Bill to increase the amount of the Highway Department's revolving fund from \$200,000 to \$350,000:- While the Commission appeared favorably inclined toward such increase, the final decision in the matter was deferred pending further study of the matter. The Attorney was instructed to write the individual members of the Commission explaining in full the necessity for the same.

Freeway bill:- The Commission decided not to introduce this bill at this session of the Legislature; however, instructed the Attorney to watch closely for any legislation with respect to freeway matters that might be presented by other parties.

Proposed bill relative to the dead-ending of city streets which are crossed by new highway improvements:- Action on this matter was deferred pending further study, particularly in view of the apparent difference of opinion between the Commission's Attorney and members of the Supreme Court with respect to the authority that the Highway Commission now has relative to such matters. The Attorney was instructed to discuss the matter personally with Justices Rossman and Brand of the Supreme Court and to advise the Commission the results thereof. He was also instructed to furnish each member of the Commission a copy of the proposed bill.

JAN 13 1943

Proposed bill establishing a minimum fine to be imposed on log haulers for overloading:- The Commission took this matter under advisement.

Bill to increase the overall length and overall width of vehicles that may be transported over Oregon roads:- The Commission decided not to sponsor any legislation in this regard, but to stand on the statements that were made at the 1941 session of the Legislature. The Attorney was instructed to watch for any bill that might be presented to the Legislature with respect to such matter, with a view to having the same amended to include special provisions that the Commission feels are necessary for the best interests of the state.

Proposed bill with respect to the disposition of the salary or wages of a highway department employee who has died:- The Attorney explained that this bill simply authorizes the payment of such salary or wage check to the next of kin of the deceased employee, which authority does not exist under the present law. The Commission approved the bill and instructed the Attorney to place it before the Legislature.

Proposed amendment to the Eminent Domain Law, with respect to the moving of buildings on property acquired by the state:- The Attorney advised that under the present law the state is obligated to purchase buildings that are affected but not taken by the state in condemnation actions, and that this bill will make the owners responsible for the buildings if the state doesn't want them. The Commission approved the submission of the bill to the Legislature.

Proposed bill permitting the Highway Commission to charge the property owner with benefits, in condemnation actions:- The Commission disapproved such bill.

House Bill No. 4, relating to increase in the salaries to be paid employees of the State Police Department:- The Commission decided not to interfere with this legislation, regardless of the fact that it involves an additional expenditure of state highway funds for policing purposes.

The Commission adjourned at 9:45 p.m. to reconvene the following morning in the Public Service Building.

Portland, Oregon, January 14, 1943

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was absent.

JAN 15 1943

Bids as follows, for highway construction work and for the sale of a residence building at Lampa Creek Landing, near Coquille, in Coos County, were opened and read in conformity with previously published notices, following which Chairman Cabell announced that the awards would be made at 2:00 p.m. in the same room:

BAKER-HOMESTEAD AND HALFWAY HIGHWAYS
RICHLAND-HALFWAY ROCK PRODUCTION

M. C. Lininger & Sons \$26,000.00

OCHOCO HIGHWAY
OCHOCO SUMMIT ROCK PRODUCTION

M. C. Lininger & Sons \$24,750.00

THE DALLES-CALIFORNIA HIGHWAY
CRESCENT ROCK PRODUCTION

No bids received on this project

THE DALLES-CALIFORNIA AND WILLAMETTE HIGHWAYS
CHEMULT ROCK PRODUCTION

M. C. Lininger & Sons \$34,450.00

WILLAMETTE HIGHWAY
TRENT-SALT CREEK FALLS ROCK PRODUCTION

A. H. Saxton & Son \$52,480.00

WALLOWA LAKE HIGHWAY
ROCK CREEK-JOSEPH ROCK PRODUCTION

M. C. Lininger & Sons \$39,400.00

SALE OF RESIDENCE BUILDING NEAR COQUILLE

Gene L. Robison	\$125.00
T. W. Panter	50.00
W. E. Foote	37.50

Honorable Charles Childs, Albany, came before the Commission with regard to the construction of a service road along the right of way of the Pacific Highway East, opposite Waverley Lake at Albany. Mr. Childs stated that he and his associates own considerable property fronting on the highway at this location which they plan to divide into lots and sell for residential purposes. Under ordinary circumstances, he said, the owner of each lot would have right of access to the highway and could construct a driveway approach to the highway, which would mean numerous connections along a quarter-mile frontage. It was his thought that a much better arrangement would be to serve

JAN 14 1943

all of the lots with a single roadway paralleling the highway and connecting with it at each end, thus eliminating the need for individual driveways and the dangers incident to the use of the same. He further stated that the immediate construction of such service road is not a necessity, although it is necessary that he have a definite understanding with the Commission with respect thereto to pass on to prospective purchasers of his property. He offered to relinquish his right of access to the highway along the full length of his property, except at each end of the service road, and to donate the land that may be required to provide a service roadway of proper width, if the Commission will approve his proposition.

The Engineer advised that the highway right of way at this point is extra wide and could easily accommodate the service road. It was his thought that the road would be of benefit to the state in that it would eliminate the use of numerous private driveway connections to the highway and would provide a freeway past Mr. Childs' property. He estimated the cost of constructing the service road at approximately \$3,500, and the state's share of the cost of constructing the driveways at approximately \$1,750. Chairman Cabell gave as his thought that Mr. Childs' plan is sound. He pointed out, however, that it involves the policy of the Commission and would have considerable bearing on the disposition of similar requests that are received in the future. He pointed out that it has been the practice of the Commission for some time in the acquisition of right of way, to purchase the property owners' right of access to the highway, and gave as his thought that the state should compensate Mr. Childs for such right in this instance, but not to the extent of paying the entire cost of the service road, because it would establish a precedent that undoubtedly would prove very costly to the state. He suggested that the Commission would be willing to construct the road if Mr. Childs would agree to pay 50 per cent of the costs involved. Commissioner Oliver concurred. Mr. Childs reiterated that he would waive right of access to the highway at all points except two, and that he would discuss with his associates the offer made by Chairman Cabell. He repeated that they are not asking for the construction of the service road until the war is over, and in any event not until the War Production Board allows the work to proceed. However, they do want two approaches to the highway constructed this summer. The Commission took such request under advisement.

The matter of maintenance of the service road was also discussed briefly, but no decision was reached relative thereto.

The Engineer brought up for discussion the matter of realigning the Upper Columbia River Highway at the entrance to Bonneville. He advised that within the last few days the Bonneville Hotel, which is located at the entrance to the Bonneville reservation, burned to the ground and in his estimation it would be advisable to acquire the right of way for the permanent location of the highway now before the hotel is rebuilt. He requested authority for the Right of Way Department to negotiate options for the same. The Commission approved the request.

The Secretary presented an offer from Mr. Fred Domogalla to pay \$30.00 for an old rock crusher that has been used in the highway department

laboratory for many years. The Engineer advised that this crusher is not of much value and is now in storage, having been replaced with a new one; in fact is carried on the Highway Department's records at a valuation of only \$5.00. He recommended acceptance of Mr. Domogalla's offer, in the event that inquiry reveals that the crusher cannot be used to advantage by the State Mining Board. He was instructed to contact Mr. Nixon of such Board relative thereto, and to turn the crusher over to him if he wants it. In the event the State Mining Board doesn't want the crusher, then the Engineer is authorized to accept Mr. Domogalla's offer, if he is unable to secure a better one.

A letter was presented from Mr. E. W. Elliott, general contractor, Seattle, inquiring whether or not the Highway Commission would be willing to sell to him the six-ton Buffalo Springfield tandem roller which he is now renting from the state. The Engineer advised that the roller can be used to good advantage by the Highway Department and recommended against the sale of the same. The Commission approved the recommendation.

The Commission discussed a petition from Mrs. Martha Redmond and others requesting the construction of a stairway leading from the Pacific Highway West to the top of the highway cut in front of Mrs. Redmond's tavern, near the Taylors Ferry Road intersection, in Southwest Portland. The Engineer advised that inspection of the premises reveals that Mrs. Redmond's tavern fronts on a short section of the old Taylors Ferry Road that was cut off by the new highway, and that it is now excellently served by roadway facilities which provide ingress to and egress from her property in both directions. He further stated that if the stairway were constructed for the convenience of Mrs. Redmond's patrons it would encourage the parking of cars on the highway at the foot of the steps, and would create a traffic hazard; also, that, if automobiles were not parked on the highway at the foot of the steps, the probabilities are that they would park across the highway, which consists of four traffic lanes at this point, and people would then have to walk across this heavily-traveled thoroughfare in order to gain access to the stairway. He recommended, in view of the circumstances, that the petition be denied. The Commission approved the recommendation.

The Commission discussed briefly the Engineer's report on the request of contractor Homer G. Johnson for additional compensation, in connection with his contract No. 2390 for construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County, but deferred a decision thereon until the next meeting.

The Commission also discussed briefly, and ordered filed, a number of arrest reports furnished by the Department of State Police, with respect to overload violations committed by truck haulers in the transportation of gravel over the Oregon Coast Highway from Seaside to the Astoria Airport.

The Secretary presented a report on the violations that have been committed by carriers who are operating under emergency wartime permits. He

JAN 14 1943

was instructed by the Commission to continue the present practice of bringing these violations to the attention of the owners of the equipment.

The Commission had under discussion a resolution adopted by the Association of Oregon Counties, with respect to proposed legislation to increase the length and weight of motor vehicles which operate on public roads of this state. The association goes on record as being opposed to such increase. The Engineer was instructed to watch for this bill, and to see that it is properly amended, if necessary, to meet state highway requirements.

The Engineer reported the award of the following contracts, bids for which were received by the Commission at its meeting on December 18, 1942, the conditions of the awards having been satisfied:

Tolo-Camp White Access Road Project, in Jackson County. Awarded on December 28, 1942, to Tru-Mix Concrete Company, Medford, the only bidder.

Southwest Boardman Flight Strip Project, in Morrow County. Awarded on December 31, 1942, to E. C. Hall Company and J. C. Compton, Eugene and McMinnville, the low bidders.

Evans Creek-Sams Valley Access Road Project, in Jackson County. Awarded on January 4, 1943, to Tru-Mix Concrete Company, Medford, the only bidder.

The Commission confirmed the awards.

The Secretary presented an invoice from the American Association of State Highway Officials, for payment of 1943 dues of the State of Oregon in such Association, amounting to \$450. The Commission approved the payment.

The Commission discussed a mimeographed communication from the Headquarters, Western Defense Command and Fourth Army, containing rules to be followed by newspapers in the dissemination of information concerning weather conditions and condition of highways. In view of this communication and the fact that very little tourist travel is anticipated for the duration, the Commission decided to discontinue the publication of its weekly road condition report, and so ordered. Due to the fact that this communication was not an official order from General John L. DeWitt, Commanding General, Western Defense Command and Fourth Army, the Commission decided not to discontinue its daily radio reports on road conditions or the typewritten transcript of such reports which is prepared for limited use.

Consideration was given by the Commission to the purchase from the Southern Pacific Company of property that is needed in connection with the

JAN 14 1943

improvement of the Oregon Coast Highway between Marshfield and North Bend. It appears that when negotiations were started with the Southern Pacific Company with respect to this improvement it was not known that the company owned certain lots that were needed by the state and as a result no mention was made of such property in the agreement between the state and the company with respect to re-establishing the company's facilities. The Engineer presented a map showing the parcels of land in question. He recommended, in view of the fact that the right-of-way negotiations were supposedly complete a long time ago, that the acquisition of the additional property be made a matter of an entirely separate agreement and that the company be paid for this property as a separate transaction. The Attorney advised that the company is asking \$2,400 for its property. He gave as his thought that the company should deed the lots to the state without charge, in view of the fact that the Highway Commission is deeding to the company without charge property which cost the state \$6,000. The matter was discussed at some length and as a result it was decided to discuss it with the railroad officials. The Engineer was thereupon instructed to arrange for a conference at which Chairman Cabell and the other members of the Commission are to be present, if possible.

The Commission adopted the following resolution with respect to the contracting of access roads and other defense projects in accordance with the decision reached by the Commission at the previous meeting; however, the Engineer was instructed not to take bids as authorized therein without first securing telephonic approval from the individual members of the Commission:

WHEREAS, with respect to advertising for bids for highway construction projects the Commission's established policy and procedure requires that it call for competitive bids by publishing in a newspaper or newspapers having an established general circulation; and

WHEREAS, as a part of national defense the Commission is frequently called upon by the Federal Government or by agencies of the United States of America to assume responsibility for the letting of contracts for the construction of access roads and other defense projects; and

WHEREAS, in such matters time is a controlling element or factor, thereby making conformance with the Commission's established policy with respect to advertising for bids quite difficult; and

WHEREAS, it is the judgment of the Commission that during the emergency and for the purpose of making possible more efficient and effective cooperation between the State and the Federal Government a policy should be adopted and applied to United States defense emergency jobs whether they be promoted for the United States alone or by the State as a State contribution to national defense;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and participating as follows:

JAN 14 1943

1. The Commission does hereby declare that an emergency exists necessitating the adoption of a policy and practice with respect to the construction of defense projects which will permit a more expeditious award of contracts in connection therewith.

2. That with respect to defense projects in connection with which time is a controlling factor the Commission's established policy and practice of advertising for bids shall be dispensed with and instead the call or invitation for competitive bids shall be made by sending all necessary information through the United States mails to such of the Commission's list of qualified bidders as in the opinion of the Commission might be interested in and qualified to bid on such project.

3. That in such invitation or call for bids the Commission shall fix the date when and the place where such bids will be received and in fixing the time the Commission shall be influenced by the necessities and request of the Federal Government.

4. That this policy, practice and procedure shall be in effect for the duration of the war and for six months thereafter unless rescinded or amended by the Commission.

5. This resolution shall be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to William H. Lynch, District Engineer, Public Roads Administration.

The Commission considered and denied as a matter of policy a request from A. C. Barlo, Portland, to construct and maintain a wooden bus-stop shelter on the right of way of the Hillsdale-Beaverton Highway at Glencullen.

The Commission confirmed its action taken on November 6, 1941, with respect to the width of right of way that is to be acquired for the proposed improvement of the Oregon Coast Highway through the town of Gold Beach, Curry County, which action specifies an 80-foot width right of way under certain conditions. (See minutes of November 6, 1941)

Reconsideration was given by the Commission to a request of the County Court of Marion County that the state assume the maintenance of the North Santiam Highway between Niagara and Detroit, which section is now classified as a county road. The Commission decided not to place this section on the secondary highway system or to perform the maintenance work on the same; however, agreed to reimburse the county for the full cost of such maintenance work if the county will furnish the equipment and do the work with county forces. Such arrangement is to be in effect for the duration of the war and for a period of six months thereafter.

A letter was presented from Sister M. Genevieve, Superintendent of McAuley Hospital, Marshfield, in which the Commission was asked to authorize

JAN 14 1943

the highway department maintenance crew to oil certain driveways on the hospital grounds because local contractors are not equipped to do the work. The Engineer read aloud his letter of January 8, 1943, in reply thereto, in which he stated reasons why the Commission could not perform this work. The Commission approved the letter and thereupon denied the request. (See details in letter in general files.)

The Commission discussed a letter from Roy L. Wilson of the Warm Springs Lumber Company, Warm Springs, Oregon, requesting the surfacing of a four-mile section of the Warm Springs Highway north of Warm Springs Agency to facilitate the transportation of logs to their mill at Warm Springs. The Engineer advised that the section of highway referred to has been graded to state standards but has not been surfaced. He recommended that the request be denied in view of the cost involved and the fact that the Commission does not have funds to spare for this purpose. The Commission approved the recommendation; however, instructed the Engineer to inform Mr. Wilson that the Commission will offer no objections to the company placing a temporary surface on the road at its own expense.

A delegation from Polk County, consisting of County Commissioners Fred Gibson and H. H. Brant, County Engineer Edward Himes, and Mr. E. L. Gray, came before the Commission in the interests of the Independence-Granger County Road and of the Suver-Airlie County Road. They asked for the elimination of several sharp turns on the Independence-Granger Road, two of which are about one and one-half miles south of Independence and the others about three miles north of the Polk-Benton County line, on what is known as Davidson Hill. The Engineer advised that army officials at Camp Adair also have requested these improvements and in response thereto he has twice recommended the project to the Public Roads Administration for federal access moneys but in each instance approval was denied, so under the circumstances it does not appear that the project can go forward because governmental priority regulations preclude the construction work as a state-financed project. The state, he said, is limited in its expenditure to maintenance work. Chairman Cabell confirmed the Engineer's statements and advised that in view of the situation the State Highway Department can do nothing more than maintain the present road.

As to the delegation's request for the improvement of the Suver Road, the Engineer advised that, while the project has merit and the road is needed, it does not appear to be an obligation of the state; but, on the other hand, is rather an obligation of the Army in view of the fact that the road is within the borders of Camp Adair and is used principally by military equipment. Mr. Gray advised that he has been given to understand that the Army would cooperate in the maintenance work. He also suggested that the road be extended from Airlie to Pedee in order to secure full value of the road. There followed a general discussion which was concluded by a statement by the Engineer that he would consult with Colonel McCoy, who has charge of Camp Adair, with respect to the securing of Army cooperation to maintain the road.

Mr. Gray also asked the Commission to reconsider the matter of constructing a new bridge over the Willamette River at Independence, so as to

JAN 14 1943

make available for public use in emergencies an alternate route between Independence and Salem. The Commission took no action on this matter.

The Engineer reported a request from the City of Tillamook that it be authorized by the Commission to perform certain maintenance work on city streets, at state expense. He recalled that the Commission has budgeted for 1943 the sum of \$150,000 to pay the cost of maintaining certain heavy-traffic city streets that are not on state highway routes, and advised that there is a question whether or not it will be possible to perform all of the work that has been programmed for this year's construction due to lack of equipment and shortage of manpower caused by wartime conditions. He gave as his thought that it would be advisable to let the cities perform the work with city forces, if they are equipped to do it, with the understanding that the state will reimburse them later for the expense involved, such arrangement to be effective for the duration only. The Commission approved the suggestion and ordered that the arrangements with the cities be covered by written agreement.

A letter was presented from County Judge David F. Graham, Malheur County, in which the Commission was asked to deed back to Malheur County a 10-acre tract that the state acquired as a gravel pit, being situate in the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 25, T. 17 S., R. 44 E., W. M., so that the county can fulfill an agreement with another party who purchased the balance of this subdivision. The Engineer advised that the tract is valuable to the Highway Department for use in connection with the surfacing of highways in this vicinity and recommended that the tract be retained by the state for this purpose. The Commission approved the recommendation, and accordingly denied the request.

The Commission also considered a letter from Judge Graham, requesting that the state deed back to Malheur County a two-acre tract situate in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 7, T. 18 S., R. 47 E., W. M., to enable the county to complete the sale of the remaining portion of this subdivision to another party. The Engineer advised that this two-acre tract was acquired as a site upon which to stock pile maintenance materials, in fact a contract has been awarded for the stock-piling of maintenance materials in that vicinity and it is planned to utilize this site in connection therewith. He recommended that the request be denied. The Commission approved the recommendation.

The Attorney requested instructions relative to the payment of rental on certain property that the Commission is acquiring from the Southern Pacific Company at Central Point. (See right-of-way file No. 10136.) He explained that the Commission leased this property from the company for a certain period of time, but later decided to purchase it outright and, notwithstanding the purchase agreement, the company demands the full amount of the rentals until the deed has been signed and delivered to the state, which in effect is a duplicate charge. The amount involved, he said, is small, and his only reason for bringing it to the attention of the Commission is because it involves a matter of principle. The Commission decided, in view of the small amount involved, to continue the payment of the monthly rentals until such time as the deed is delivered to the state.

The Commission approved a resolution from the County Court of Klamath County with respect to the abandonment by the state of a section of The Dalles-California Highway between Terminal City and Algoma, which section is no longer of value for state purposes, in view of the fact that the highway has been reconstructed on other alignment.

The Attorney reported briefly the status of negotiations with the Army authorities and the United States Department of Justice, relative to the disposition of a state-owned stock-pile site which is located within the borders of Camp White Army Cantonment, in Jackson County. The Commission took no action on this matter.

The Attorney brought up for discussion matters pertaining to the acquisition of the proposed 1400-acre state park at Floras Lake, in Curry County. He advised that examination of the abstract of title covering this property reveals some discrepancies which, while minor in character, should be clarified if the state buys the property. This could be accomplished easily, he said, by a suit of equity to quiet the title. He pointed out that the property is to be sold by the county sheriff on February 26, 1943, for delinquent taxes, and suggested the filing of condemnation proceedings in the meantime in order to protect the state's interest, pending final decision by the Commission whether or not to purchase the property, it being his understanding that there are other parties who are desirous of acquiring this land and who would not hesitate to purchase it if given the opportunity. The commencement of condemnation proceedings, he said, would protect the state's interests until such time as the Commission makes its final decision with respect to the purchase of the property. In view of this report the Commission authorized condemnation of the property. The following resolution in regard thereto was thereupon adopted:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire land or ground necessary for the development, maintenance, and operation of parks, parking places, automobile camps, camp sites, public squares, recreational grounds or resorts, and land for the preservation of trees or timber growing thereon; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for said purposes; and

WHEREAS, in the judgment and opinion of the State Highway Commission it will be for the convenience and is for the best interests of the general public that there be acquired for public purposes, to wit: for the purpose of developing and maintaining a park, recreational ground and/or resort, and for the purpose of

JAN 14 1943

preserving the timber growing thereon, the following described parcels of land, to wit:

Property of the Blacklock Sandstone Company,
a California corporation

All of Lot 10 and Lot 9 of Section 17 except the north 5 acres of Lot 9 described as follows: Commencing at a stake near Floras Lake at the northeast corner of Lot 9, Section 17, Township 31 South, Range 15 West; thence West 7.43 chains; thence South 7 chains; thence East 7 chains; thence North $3^{\circ} 45'$ East 7.01 chains to beginning, containing 5 acres; also excepting all minerals and right of way.

All of Lots 1, 2, and 3 and the east half of the southeast quarter of Section 18, Township 31 South, Range 15 West, W. M.; all of the west half of the northeast quarter and the southeast quarter of the northwest quarter; and all of Lots 1, 2, and 3, and the east half of the southwest quarter, and the southeast quarter of Section 19, Township 31 South, Range 15 West, W. M.

All of the west half of the east half and the east half of the west half, and all of Lots 1, 2, and 3 of Section 30, except 3 acres described as follows: A portion of the northwest quarter of the northwest quarter of said Section 30 and described in deed recorded in Book 4, Page 539, of Curry County Deed Records; all in Township 31 South, Range 15 West, W. M.

Also, all of the northwest quarter of the northeast quarter and the northeast quarter of the northwest quarter and Lot 1 of Section 31, Township 31 South, Range 15 West, W. M.

Also, all of Lots 1 and 2 of Section 24, Township 31 South, Range 16 West, W. M.

Also, all of Lots 3, 4, and 2 of Section 25 except as follows: Beginning 20 chains north of the southeast corner of Section 25, Township 31 South, Range 16 West, being the southeast corner of Lot 2; thence North 11.95 chains; thence West 25.40 chains; thence South 28° West 13.58 chains; thence East 31 chains, to beginning, containing 33.75 acres of land, all in Section 25, Township 31 South, Range 16 West, W. M.

Also, tide lands fronting Lots 1 and 2 of Section 19, Township 31 South, Range 15 West, and Lots 1 and 2 of Section 24, Township 31 South, Range 16 West, W. M., in Curry County, Oregon, containing 18.46 acres of land, more or less.

The above described parcels contain a total of 1397.91 acres, more or less.

NOW, THEREFORE, BE IT RESOLVED that the said parcels or tracts of land be and the same hereby are declared by this resolution to be necessary for the purposes herein stated; and

BE IT FURTHER RESOLVED that title to the said parcels or tracts of land be acquired by the State of Oregon, by and through its State Highway Commission, for the above specified public use and purpose.

BE IT FURTHER RESOLVED that the best interests and convenience of the general public require that title to the said tracts or parcels of real property be acquired for the purpose of developing and maintaining the same for a park, recreational ground or public resort and for the purpose of preserving the timber growing thereon, and for the further purpose of making said parcels of land available for the use and enjoyment of the general public.

BE IT FURTHER RESOLVED that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to negotiate further with the owner, or owners, of said property and endeavor to acquire said property by agreement, and, in the event that said property cannot be acquired by agreement, then the said J. M. Devers, Attorney for the State Highway Commission, is hereby requested to institute and prosecute such condemnation proceeding or other suit or action as may be necessary to acquire the said real property.

BE IT FURTHER RESOLVED that in such suit, action, or procedure as may be prosecuted for the acquisition of said real property provision be made whereby title in fee simple shall be acquired in the name of the State of Oregon, by and through its State Highway Commission.

The Attorney discussed with the Commission a settlement with Frank A. Moore for right of way needed for the Pacific Highway, in Eugene. After discussion the Commission approved the settlement and thereupon signed an agreement with Mr. Moore covering the transaction.

The Commission discussed briefly and ordered filed a letter, dated December 22, 1942, from B. F. Howard to Mr. George K. Aiken, Executive Secretary to Governor Sprague, with respect to the Smithfield-Franklin controversy, concerning the maintenance of road signs along the Territorial Secondary Highway south of Cheshire, in Lane County.

The Secretary presented a letter from the Russell Towboat and Moorage Company, agent for the United States Maritime Commission, requesting approval of the substitution of United States Maritime Commission for Oregon

JAN 14 1943

Shipbuilding Corporation, as permittee, under Ordinance No. 77921 of the City of Portland. The Commission offered no objections to such substitution of names provided the change is approved by the Portland City Council. The Secretary was instructed to so inform the Russell Towboat and Moorage Company and the City Council.

The Commission discussed a letter from the Walter Butler Company, contractors for the construction of the Naval Training Station at Lake Pend Oreille, Idaho, requesting renegotiation for the readjustment of rentals that the company is paying for equipment leased from the Oregon State Highway Commission; also requesting transfer of title of the equipment to the United States Government and the application of a portion of the rentals already paid for the use of the equipment toward the purchase price thereof. The company advises that the Navy Department has placed this matter upon a patriotic plane and considers that it is the duty of the Highway Commission to let the Government have this equipment or to refund a fair portion of the rentals already paid for the same, because it feels that the state has received full value of the equipment. After considerable discussion the Commission denied the request and instructed the Engineer to inform the company that the Highway Department needs this equipment and that it should be returned to this department in the event the company no longer needs it; further, that the Commission made this equipment available to the company simply as an accommodation, in order to cooperate in the war effort, and that it did not set the rental rate but simply charged the rate that was set by the Office of Price Administration, to which the company agreed in writing. However, if the rate now being charged is incorrect, the Commission is willing to adjust it to the proper amount, but is unwilling to make any further concession.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Reconn.	4-1466	Clatsop	Lewis & Clark Bridge-Camp Clatsop Sec., Oregon Coast Hwy.	1st - \$ 900
Reconn.	4-1422	Crook	Prineville-Sage Hollow Sec., Crooked River Highway	1st - \$1,250
Reconn.	107-1421	Crook	Prineville-Post Section, Paulina Highway	1st - \$1,250
Cinder Pit	118-1465	Klamath	Rocky Point-Wocus Marsh Sec., Klamath Lake Highway	1st - \$ 50

JAN 14 1943

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	26-1464	Multnomah	West End Steel Bridge-Ankeny Street Sec., Pacific Hwy. West	1st - \$1,000
Plans	26-1455	Multnomah	Parkrose-Troutdale Section, Columbia River Highway	2nd - \$1,500 Total to date \$4,500
Slide	29-1440	Tillamook	Wheeler-Brighton Section, Oregon Coast Highway	1st - \$ 195
R/W	29-1441	Tillamook	State Park-Neahkahnie Mountain Section, Oregon Coast Highway	1st - \$ 115
R/W	22-1456	Linn	Albany-Millersburg Section, Pacific Highway East	1st - \$ 150
Plans	127-1423	Polk	Camp Adair Access Roads, Dallas-Kings Valley and Kings Valley Secondary Highways	1st - \$9,800

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, contract No. 2382, for grading and paving the North Marshfield and Marshfield-Bunker Hill Sections of the Oregon Coast Highway, in Coos County, requested an extension of time, from August 31, 1941, to October 5, 1942, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: a portion of the right of way was not cleared for construction until October 20, 1941, which delayed oiling work until the season of 1942; failure of Warren Northwest, Inc., to undertake their subcontract for the oiling work because of defense contracts that they had under way which necessitated completion of the work by the state's oiling crew; also adverse weather and wartime conditions further delayed construction, it being difficult to secure delivery of the necessary materials and to hire competent labor. The Engineer advised that bids were received for this project on October 11, 1940, and that Mr. Houck commenced operations on January 13, 1941. He further stated that the contract stipulated that all of the buildings would be removed from the right of way by July 1, 1941; however, the right of way was not entirely cleared of such obstructions until October 20, 1941, when the Union Oil Company moved the last of its oil pipe lines. This delay, he said, made it necessary for the contractor to shift his forces from one part of the job to another, slowing down the progress of the work. The principal reason for Mr. Houck's failure to complete the job within the specified time limit, he said, was Mr. Houck's difficulties with

JAN 14 1943

labor, the Labor Unions maintaining a picket on the job all of the time that work was under way because Mr. Houck refused to enter into an agreement with the Unions with respect to labor matters. On account of this trouble, he added, the United States Employment Service refused to assign men to the job and Mr. Houck was unable to find many good men to carry on the work. As a further result of Union troubles, he said, the gravel producers in the Coos Bay area refused to furnish Mr. Houck with concrete aggregates, which forced him to ship them from Eugene. Mr. Houck's statements as to difficulties in securing deliveries of material, he said, are correct. He recommended, in view of the circumstances, that the extension of time requested by Mr. Houck be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

M. L. O'Neil & Son, contract No. 2442, for grading and topping the Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway, in Umatilla County, requested an extension of time, from April 30 to September 16, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time to adverse weather conditions and to the noncompletion of the bridge over the Umatilla River, which was being built under separate contract, it being necessary for them to haul certain excavation material over this bridge, as provided for in the contract. The Engineer advised that the contract was awarded on March 27, 1941, and that the contractor commenced operations soon thereafter but could not carry them to conclusion because the Umatilla River Bridge, which was being built under another contract, was in an uncompleted state, there having been delays in connection with that project because of material priorities. M. L. O'Neil & Son, he said, were allowed to suspend their operations and move their equipment from the job, pending completion of the bridge structure. They resumed operation in 1942, but could not complete the job within the specified time limit because of wartime conditions which made it difficult for them to secure competent help and repair parts for their equipment. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. C. Hall Company, contract No. 2471, for grading and paving the Eugene Overcrossing-Seventh Avenue Section of the Pacific Highway, in Lane County, requested an extension of time, from October 31, 1941, to November 10, 1942, within which to complete this job. No reason was given for failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on May 21, 1941, and that the contractor started operations on May 26 of the same year, but the work was not carried to a conclusion in the specified time limit because the contractor had in progress at the same time construction of the Eugene and Corvallis Airports, and he was unable to secure sufficient grading equipment

JAN 14 1943

to carry on all of the jobs simultaneously. The airport projects, he said, are defense projects; hence had priority over the highway work. He recommended in view of the reasons for the contractor's delay, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

C. J. Montag & Sons, contract No. 2489, for construction of the Umatilla River Overcrossing on the Boardman-Stanfield Highway, in Umatilla County, requested an extension of time, from April 15, to December 17, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to shortage of steel which made it necessary for them to close down their operations from January to August of 1942. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Jacobsen-Jensen Company, contract No. 2532, for grading, surfacing and oiling the South Hermiston Section of the Old Oregon Trail Highway, in Umatilla County, requested an extension of time, from June 30 to November 14, 1942, within which to complete this job. It alleged that the principal reason for failure to complete the project within the specified time limit was its inability to release equipment and personnel from another contract that it had under way at the Umatilla Ordnance Depot, and difficulties in securing road oil. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended in view of the circumstances and the fact that the contractor's work at the Ordnance Depot was a war emergency project that the extension of time requested be granted without penalty. The Commission approved the recommendation.

F. R. Hewett, contract No. 2560, for surfacing and construction of bituminous macadam on the Boardman-Stanfield Section of the Boardman-Stanfield Highway, in Morrow and Umatilla Counties, requested an extension of time, from September 30 to December 12, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the following: unseasonable late rains which held up oiling operations for three weeks on a contract that he held in the state of Washington, so it was not possible for him to send his equipment to the Oregon job until late in June; necessity to complete the construction of the Condon-Morrow County Line Project on the Wasco-Heppner Secondary Highway; difficulties in securing competent labor; accidents which occurred to two oiling superintendents on the job; and adverse weather conditions after October 27, 1942. The Engineer advised that the principal causes that contributed to the delay in completing this project within the specified time limit were lateness

JAN 14 1943

in starting the oiling work; poorly organized oiling crews; delays incident to grading operations; and alterations of design. The contractor, he said, commenced the production of rock for this project early in the spring and had he been able to start oiling operations in May he could have completed the job within the specified time limit; however, for reasons given by him, he was not able to start the oiling work as early as was anticipated. The contractor's statements with respect to the completion of state projects near Condon and Hermiston, he said, are correct as are also his statements with respect to difficulties in securing labor, the fact being that he was unable to obtain and keep competent men on the job because of the government work at the Umatilla Ordnance Depot. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

F. R. Hewett, contract No. 2563, for construction of the Umatilla Ordnance Depot Undercrossing structure and approach road, in Umatilla County, requested an extension of time, from June 30 to December 12, 1942, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: suspension of work on the undercrossing by order of the Engineer until structural steel had been shipped from the rolling mill; instructions from the Resident Engineer to finish the oiling on the Boardman-Stanfield Project before oiling the approaches to the undercrossing structure; bad weather conditions; difficulties in securing experienced carpenters and other labor; and increased quantities of work to be done. The Engineer advised that he ordered the contractor to stop the excavation for the abutments of the undercrossing because the operation required the detouring of the Union Pacific Railroad Company's main line over a shoofly track, and it did not seem advisable to do the abutment excavation work until it was definitely certain that the structural steel needed for the job would be delivered. This delay, he said, interfered with oiling operations, so that such work was not done until adverse weather was encountered. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter from the Public Roads Administration concurring therein was presented. The Commission approved the recommendation.

J. F. Johnston, contract No. 2577, for widening of bridges on the Lewisburg-Corvallis Section of the Pacific Highway West, in Benton County, requested an extension of time, from August 15 to October 9, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to shortage of labor and inability to obtain necessary materials when needed. The Engineer advised that the reasons given by the contractor for failure to complete the job within the specified time limit are correct. He recommended in view thereof that the

JAN 14 1943

extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Tower Sales & Erecting Company, contract No. 2584, for construction of the Going Street Overcrossing on the Swan Island Access Road, in Multnomah County, requested an extension of time, from September 15 to December 17, 1942, within which to complete this job. It alleged that the overrun of time limit was due to delays in receiving necessary materials and to a change in the plans which required additional excavation and concrete. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2332, 2442, 2471, 2489, 2532, 2560, 2563, 2577 and 2584, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above contracts was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2382, with Roy L. Houck, for grading and paving the North Marshfield and Marshfield-Bunker Hill Sections of the Oregon Coast Highway, in Coos County. Completed October 5, 1942.

Contract No. 2442, with M. L. O'Neil & Son, for grading and tapping the Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway, in Umatilla County. Completed September 16, 1942.

Contract No. 2471, with E. C. Hall Company, for grading and paving the Eugene Overcrossing-Seventh Avenue Section of the Pacific Highway, in Lane County. Completed November 10, 1942.

Contract No. 2489, with C. J. Montag & Sons, for construction of the Umatilla River Overcrossing and other structures near Stanfield, on the Boardman-Stanfield Highway, in Umatilla County. Completed December 17, 1942.

Contract No. 2532, with Jacobsen-Jensen Company, for grading, surfacing and oiling on the South Hermiston Section

JAN 14 1943

of the Old Oregon Trail Highway, in Umatilla County. Completed November 14, 1942.

Contract No. 2560, with F. R. Hewett, for surfacing and bituminous macadam surfacing on the Boardman-Stanfield Section of the Boardman-Stanfield Highway, in Morrow and Umatilla Counties. Completed December 12, 1942.

Contract No. 2563, with F. R. Hewett, for construction of the Umatilla Ordnance Depot Undercrossing, in Umatilla County. Completed December 12, 1942.

Contract No. 2577, with J. F. Johnston, for widening three bridges on the Lewisburg-Corvallis Section of the Pacific Highway West, in Benton County. Completed October 9, 1942.

Contract No. 2584, with Tower Sales & Erecting Company, for construction of the Going Street Overcrossing on Northeast Going Street in Portland, Multnomah County. Completed December 17, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the date for its next meeting for the receiving of bids for highway construction work and decided to hold such meeting in Portland on Thursday, February 18, 1943. The Secretary was instructed to make the usual arrangements to hold such meeting in the auditorium of the Public Service Building.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Chairman Cabell announced the following awards of contracts and sale of residence property, bids for which were taken at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Richland-Halfway Rock Production Project on the Baker-Homestead and Halfway Highways, in Baker County. M. C. Lininger & Sons, Medford, submitted the only bid for this project in the amount of \$26,000.00. The Commission awards this contract to M. C. Lininger & Sons at their bid of \$26,000.00.

"Ochoco Summit Rock Production Project on the Ochoco Highway, in Crook and Wheeler Counties. The only bid received for this project

JAN 14 1943

at of M. C. Lininger & Sons, Medford, at \$24,750.00. The Commission rejects this bid.

"Crescent Rock Production Project on The Dalles-California Highway, in Klamath County. No bids were received for this project.

"Chemult Rock Production Project on The Dalles-California and Willamette Highways, in Klamath County. M. C. Lininger & Sons, Medford, submitted the only bid for this project in the amount of \$34,450.00. The Commission rejects this bid.

"Trent-Salt Creek Falls Rock Production Project on the Willamette Highway, in Lane County. A. H. Saxton & Son, Corvallis, submitted the only bid for this project in the amount of \$52,480.00. The Commission awards this contract to A. H. Saxton & Son at their bid of \$52,480.00.

"Rock Creek-Joseph Rock Production Project on the Wallowa Lake Highway, in Wallowa County. M. C. Lininger & Sons, Medford, submitted the only bid for this project in the amount of \$39,400.00. The Commission awards this contract to M. C. Lininger & Sons at their bid of \$39,400.00.

Sale of residence building at Lampa Creek Landing, Coos County:

"Three bids were received for this building, the high one being that of Gene F. Robison, Coquille, at \$125.00. The second high bid was submitted by T. W. Panter, Bandon, at \$50.00. The Commission considers the offer of Mr. Robison satisfactory and accordingly sells the building to him for \$125.00."

Messrs. F. D. Macpherson, representing the Western Log and Lumber Administrator, and A. F. Koppisch of the D. & K. Logging Company, Astoria, came before the Commission in regard to the securing of rock from the right of way of the Oregon Coast Highway along Short Sand Beach Creek, near the Clatsop-Tillamook County line, for use in connection with the surfacing of a logging road extending from the highway to the company's timber. Mr. Macpherson was spokesman. He advised that the War Production Board is particularly interested in this matter because the Government is extremely anxious to secure the spruce timber that the company is cutting. He gave as his understanding that the company needs about 4,000 cubic yards of rock to surface its road, and urged the Commission to take favorable action on the request as a war emergency measure, because it is absolutely necessary that the timber be gotten out and this is the only available source of supply of rock. The Engineer inquired whether or not the company would be willing to protect the general public and the state by maintenance of flagmen on the highway during the quarrying operations, furnishing of public liability and property damage insurance, and by furnishing of a bond to guarantee the cost of repairing damage that may occur to the highway by reason of the operations; also, whether or not the company would be willing to pay \$0.03 per cubic yard for the material taken.

JAN 14 1943

Mr. Koppisch stated his willingness to pay for the material at the rate mentioned and to comply with the Commission's requirements in every other respect, if granted this privilege. After further discussion the Commission approved the request subject to the conditions mentioned by the Engineer, Chairman Cabell having explained in the meantime that the granting of such privilege by the Commission is contrary to its established policy, but the Commission is willing to stretch a point in this particular instance because of the emergency. The Attorney was instructed to prepare an appropriate form of agreement covering the matter.

At the conclusion of this discussion Mr. J. O. Mulligan, logging contractor, Seaside, and his attorney, Mr. J. F. Hadler, Portland, conferred with the Commission relative to obtaining a similar yardage of rock from the same source for the surfacing of Mr. Mulligan's logging road. Messrs. Macpherson and Koppisch were asked to sit in on the discussion. Mr. Mulligan stated that he would comply with all of the requirements of the State Highway Commission, if granted this privilege, and that he would cooperate fully with Mr. Koppisch in the quarrying of the rock so as to eliminate any possibility of friction between the two operators. Mr. Koppisch offered no objections to Mr. Mulligan's use of the quarry, and agreed to cooperate with him. Mr. Macpherson urged the granting of the request and agreed to send the Commission a confirming letter. As a result of further discussion the Commission unanimously approved the taking of the additional yardage from this location by Mr. Mulligan, and it was mutually agreed among all parties that the matter should be covered by a joint agreement between both parties and the Commission.

The Engineer suggested, due to the fact that there is a question as to the exact amount of yardage that is to be taken from this site, and in order to eliminate expense of checking the rock as it is removed, that it would be advisable to set a maximum of 10,000 cubic yards, and that the operators pay a flat sum of \$300 for such privilege, with the understanding that if more than 10,000 cubic yards are taken, then a check will be made to determine the exact quantity and the additional amount to be paid. Mr. Koppisch and Mr. Mulligan both agreed to such arrangement and it was so ordered by the Commission.

Messrs. George Barnes and Sam Lockwood, of the Spaulding Logging Company, came before the Commission in regard to the improvement of the McTimmonds county road, in Polk County, to facilitate the truck hauling of logs, from timber holdings near the town of Pedee, to Independence. Other interested parties present were: Messrs. C. L. Starr, representing the Valley and Siletz Railroad Company; Fred Gibson and H. H. Brant, County Commissioners of Polk County; E. L. Gray of Independence; and Floyd J. Cook, Executive Secretary of the Highway Traffic Advisory Committee. Mr. Barnes pointed out that the road over which their logs are now being transported lies partially within the boundaries of Camp Adair and that the Army authorities will not allow their trucks to pass through the cantonment, except between 12:00 noon and 1:00 p. m., and after 5:00 p. m., and at those times only loaded trucks are passed through, it being necessary for the empty trucks to return to Pedee by way of the McTimmonds road, which is in very poor condition and entirely

JAN 14 1943

unsatisfactory for their use. He asked the Commission to improve the McTimmonds Road so that it would be suitable for loaded trucks as well as for empty trucks, thus avoiding use of the road through the cantonment.

The Engineer estimated that it would cost about \$50,000 annually to provide a temporary improvement and to maintain the road for log hauling. It was his thought that the expenditure is unwarranted in view of the temporary nature of the work. He gave as his opinion that the expenditure would be a waste of funds and that the road would still be a dangerous one for general public use because it still would be narrow and would contain numerous sharp pitches where sight distance would be extremely short. He suggested that the proper solution of this problem would be for the company to arrange for the transportation of its logs over the Valley and Siletz railroad which extends into that district, and recommended that the Commission do not improve the McTimmonds Road as requested. Chairman Cabell advised that the Commission's finances will not permit an expenditure of such large sum of money for such improvement. Furthermore, the Highway Department does not have the men and equipment to spare in view of wartime conditions. He pointed out that the Federal Government controls the construction activities of the State Highway Department to a very large extent and that it is practically impossible to undertake a project without governmental approval. He concurred with the Engineer that the proper solution would probably be the use of the railroad, advising, however, that the Highway Commission has no control over the railroad, although the availability of the railroad would have some influence on the Commission's decision with respect to the road improvement. He confirmed the Engineer's statement that there appears to be no justification for the improvement of the McTimmonds Road.

Mr. Barnes replied that it is not only a matter of providing transportation for the logs, because they might be able to arrange for the use of the railroad, but it also involves the transportation of their men, as the company is obliged to pick up the men at their homes and furnish them transportation to and from the woods. Mr. Lockwood also pointed out that the company has no facilities for the dumping of logs at Independence, and that it would cost the company about \$10,000 to provide such facilities; furthermore, it would take about three months' time to furnish them. The Engineer pointed out that the Commission is now endeavoring to secure federal funds with which to finance the construction of a new road between Airlie and Pedee, surveys for which are now under way. If the Government approves such project, he said the Commission would immediately advertise the project for bids, but in any event the road would not be available for use until fall, and in addition thereto the Commission still has the problem of improving the present road from Suver to Airlie.

After further discussion the conference was concluded by a statement from Chairman Cabell to the effect that the Highway Commission can see no justification for an expenditure to improve the McTimmonds Road for temporary use but will do all that it possibly can to secure governmental approval for the construction of the Airlie-Pedee Road, although its efforts in that regard may be handicapped by the fact that the railroad is available for the transportation of logs from that district.

JAN 14 1943

The Commission discussed a letter from Mr. Herman O. Sites, District Manager, Office of Defense Transportation, inquiring as to the possibilities of obtaining additional information from the Highway Department with respect to overweight violations committed by log haulers. The Engineer advised that a report is now being sent to Mr. Sites each month, giving certain information regarding such violations but it appears that the report does not contain all of the information that Mr. Sites desires and he is asking that the Highway Department's weighmasters show in their daily reports the total number of wheels on the equipment, tire sizes, and the gross loads involved. To furnish such additional information, he said, would require the employment of five additional weighmasters which would cost the state approximately \$10,000 annually. He pointed out that under present conditions it is extremely difficult to hire men who are competent to do this work and anyway, he said, such information should be available to Mr. Sites from the Office of Price Administration, inasmuch as it is his understanding that such agency has perfected an organization to obtain such information. He recommended that the request be denied for reasons stated. After discussion the Commission approved the recommendation and instructed the Engineer to explain to Mr. Sites the reasons that motivated the Commission's action.

The Engineer reported receipt of an inquiry from the Public Roads Administration whether or not the state would contribute funds toward the cost of realigning a short section of the Oregon Coast Highway near Astoria to accommodate a proposed extension of a runway at the Astoria Airport. He advised that the survey for the project is estimated to cost \$5,000, right of way \$20,000, and construction \$300,000, or a total of \$325,000, and that the state is being asked to pay 25 per cent of this expense. Mr. W. H. Lynch, District Engineer, Public Roads Administration, who was present, advised that the request is being made in behalf of the United States Navy Department. The Commission took no definite action on the matter, although it indicated that it would not approve such expenditure in view of the fact that the highway improvement is of no benefit to the state, but on the other hand would introduce extremely bad curvature in the highway alignment.

The Commission had under discussion a resolution from the Hood River City Council in which the Commission is asked to approve the installation of traffic signs at numerous city street intersections. The Attorney advised that undoubtedly this resolution is presented to the Commission for approval under the provisions of Section 115-310, O.C.L.A., which law provides that the State Highway Commission shall have general supervision with respect to the erection by local authorities of official traffic signs and signals for the purpose of obtaining uniformity as to type and location of such facilities throughout the state. The Engineer advised that investigation reveals that there is justification for most of the signs. He recommended approval of the city's request provided the city will furnish a type of sign which meets the approval of the Commission and will erect them in satisfactory locations. The Commission approved the recommendation and instructed the Engineer to notify the city of the action taken, and to point out to the city the locations concerning which there is doubt whether or not the signs are justified. The following resolution with respect to this matter was adopted by the Commission:

WHEREAS, the City of Hood River has by resolution duly and regularly adopted authorized the installation and maintenance of certain traffic control signals on certain specified streets in said city; and

WHEREAS, the City has, pursuant to the provisions of Section 115-310 and the provisions of Section 115-351, O. C. L. A., requested the Highway Commission to approve said locations and provide the specific type and design of the particular traffic signals to be erected and maintained; and

WHEREAS, the streets and street intersections where it is proposed by the City to erect and maintain traffic signals as disclosed in said resolution are as follows:

One on the south side of Columbia Street, near its intersection with Industrial Street.

One on the east side of Fourth Street, near the south side of Columbia Street.

One on the east side of Sixth Street, near the south side of Industrial Street.

Two on Sixth Street, one on the east side of Sixth Street, near the south line of Columbia Street, and one on the west side of Sixth Street near the north line of Columbia Street.

Two on Sixth Street, one on the east side of Sixth Street, near the south line of Cascade Avenue, and one on the west side of Sixth Street near the north line of Cascade Avenue.

Two on Sixth Street, one on the east side of Sixth Street near the south line of State Street, and one on the west side of Sixth Street near the north line of State Street.

Two on Sherman Avenue, one on the south side of Sherman Avenue, near the west line of Sixth Street, and one on the north side of Sherman Avenue, near the east line of Sixth Street.

One on the north side of Hazel Avenue near the east side of Serpentine Street.

Two on Eugene Street, one on the north side of Eugene Street near the east side of Serpentine, one on the south side of Eugene Street near the west side of Fourth Street.

JAN 14 1943

Two on Montello Avenue, one on the south side of Montello Avenue, near the west side of Fourth Street, and one on the north side of Montello Avenue, near the east line of Fourth Street.

Two on Prospect Avenue, one on the south side of Prospect Avenue, near the west line of Fourth Street, and one on the north line of Prospect Avenue, near the east line of Fourth Street.

Two on June Street, one on the south side of June Street near the west line of Fourth Street, and one on the north line of June Street near the east line of Fourth Street.

Two on May Street, one on the south side of May Street near the west line of Fourth Street, and one on the north side of May Street near the east line of Fourth Street.

One on the north side of Pine Street near the east side of Fourth Street.

One on the south side of Sherman Avenue near the west side of Seventeenth Street.

One on the east side of Eighteenth Street near the south side of May Street.

Two on First Street, one on the east side of First Street, near the Union Pacific Railroad right of way crossing, and one on the west side of First Street near the north line of the Union Pacific Railroad right of way crossing.

One on the east side of the road leading to Jaymar Mill near the south side of the Union Pacific right of way crossing.

AND WHEREAS, it is the judgment of the Highway Commission that there should be authorized by the Commission, in so far as it has authority so to do, the erection and maintenance of traffic control signals of the type, design and specifications and at the locations hereinafter in this resolution particularly set out.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, as follows:

1. That the City of Hood River may cause to be erected and thereafter maintained by the City, without expense to the State, traffic control signals at the following points, places or street intersections:

JAN 14 1943

1. One at the intersection of Columbia and Industrial Streets designating Columbia Street on the west as a stop street.
2. One at the intersection of Fourth and Columbia Streets designating Fourth Street on the south as a stop street.
3. One at the intersection of Sixth and Railroad Streets designating Sixth Street on the south as a stop street.
4. Two at the intersection of Sixth and Columbia Streets designating Sixth Street on the north and south as a stop street.
5. Two at the intersection of Sixth and Cascade Streets designating Sixth Street on the north and south as a stop street.
6. Two at the intersection of Sixth and State Streets designating Sixth Street on the north and south as a stop street.
7. Two at the intersection of Sixth and Sherman Streets designating Sherman Street on the east and west as a stop street.
8. One at the intersection of Hazel and Serpentine Streets designating Hazel Street on the east as a stop street.
9. One at the intersection of Eugene and Serpentine Streets designating Eugene Street on the east as a stop street.
- 9a. One at the intersection of Fourth and Eugene Streets designating Eugene Street on the west as a stop street.
10. Two at the intersection of Fourth and Montello Streets designating Montello Street on the east and west as a stop street.
11. Two at the intersection of Fourth and Prospect Streets designating Prospect Street on the east and west as a stop street.
12. Two at the intersection of Fourth and June Streets designating June Street on the east and west as a stop street.

JAN 14 1943

13. Two at the intersection of Fourth and May Streets designating May Street on the east and west as a stop street.

14. One at the intersection of Fourth and Pine Streets designating Pine Street on the east as a stop street.

15. One at the intersection of Seventeenth and Sherman Streets designating Sherman Street on the west as a stop street.

16. One at the intersection of Eighteenth Street and County Road designating Eighteenth Street on the south as a stop street.

17. Two at the intersection of First Street and the Union Pacific right of way designating First Street on the north and south as a stop street.

18. One at the intersection of the road leading to Jaymar Mill and the Union Pacific right of way designating the road leading to Jaymar Mill on the south as a stop street.

2. That there is attached hereto, marked Exhibit A and by this reference made a part hereof, a table showing the type and design of traffic control signal which shall be used and employed by the City and which shall be erected and maintained at the respective locations shown on said Exhibit A.

3. That there is attached hereto a set of white prints, consisting of four sheets, marked Exhibits B, C, D, and E, which exhibits are by this reference made a part of this resolution and which said exhibits are to supplement Exhibit A and together with Exhibit A are intended to disclose the type and location of the particular traffic signals authorized and provided for by this resolution.*

4. That such traffic signals as may be erected and thereafter maintained by the City within the meaning and purpose of this resolution shall be at the expense of the City and without cost to the State.

5. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the municipal authorities of the City of Hood River.

The Commission discussed a request from the Hines Lumber Company, Hines, Oregon, for the erection of stop signs at five street intersections on the Pendleton-John Day Highway, in the town of Seneca. Commissioner Oliver advised that there is justification in this request, because the business houses in Seneca are located on the opposite side of the highway from the residential district. He recommended approval of the request, at least in so far as it pertains to the highway within the city limits of this town. Chairman Cabell concurred, and the Engineer was thereupon instructed to erect the signs. The following resolution designating the Pendleton-John Day Highway a stop highway through the town of Seneca was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the John Day-Burns Highway through the unincorporated town of Seneca is a state highway and therefore a part of the state highway system; and

WHEREAS, said highway through said town carries a large volume of traffic, both local traffic and through traffic; and

WHEREAS, in the judgment of the Commission said section of said John Day-Burns Highway should be designated as a main-travelled or through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, a majority of the members being present and voting affirmatively as follows:

1. That the section or portion of the John Day-Burns Highway through the town of Seneca be and the same hereby is designated as and declared to be a main-travelled or through highway.

2. That the Highway Engineer be and he hereby is instructed to place or cause to be placed along said highway at all points where streets or roads intersect or enter said highway between mile post 24.10 and mile post 24.60 signs or markers notifying drivers of vehicles to stop before entering or crossing said highway.

3. That the Engineer is further instructed to place such signs or markers as nearly as practicable at the place or places where said cross or intersecting roads or streets meet a prolongation of the nearest property line of such through highway, and such signs so placed and installed shall indicate and designate to drivers of motor vehicles entering said through highway from any of said cross or intersecting roads the place where the stop shall be made.

4. This resolution shall be entered in the minutes and records of the Commission as of the fourteenth day of January, 1943, and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Grant County.

JAN 14 1943

In this connection the Attorney pointed out that a search of the records discloses that there are a number of highways that the Commission has not formally designated "through highways," requiring traffic from side roads to stop before entering the same. He said that such information is valuable in connection with law suits arising out of highway accidents, and suggested, in view thereof, that the Commission take official action with respect to such roads by adopting appropriate resolutions making them "through highways." The Commission approved the suggestion and instructed the Engineer to furnish the Attorney with a list of the highways to be so covered.

The Commission discussed a request from the City of Tillamook for the installation of traffic signals at the intersection of Second Avenue East and Third Street, in Tillamook. The Engineer advised that this matter has been investigated and the report indicates that the installation is justified. He estimated the cost of the installation at approximately \$200 and recommended approval of the request. The Commission approved the recommendation.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Clatsop County and the Cities of Warrenton and Hammond with respect to the maintenance of the Fort Stevens-Camp Clatsop Road and the Delaura Beach Road, for the duration.

Agreement with I. J. and Nora M. Rossman covering lease of a maintenance headquarters site at Florence.

Agreements with the following cities covering improvement of city streets not on state highway routes: Beaverton, McMinnville, Gaston, Gresham, Newberg, Independence, and Stayton.

Agreement with E. C. Hall Company and J. C. Compton with respect to their contract for construction of the Morrow County Flight Strip Project.

Agreement with Frank A. Moore and wife relative to the acquisition of right of way which is needed for the improvement of the Pacific Highway south of Eugene.

Quitclaim deed conveying unto the United States of America 8.64 acres of land situate in Sections 19 and 20, T. 36 S., R. 1 W., W.M., Jackson County, and being within the borders of Camp White Army Cantonment.

There being no further business to come before the Commission at this time the meeting was adjourned at 3:30 p. m.

State Highway Engineer

Secretary

JAN 14 1943

Chairman

Commissioner

Portland, Oregon, February 17, 1943

The State Highway Commission met in regular session at 8:30 p. m. in room 515 (Imperial Room) Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission discussed real property matters and in connection therewith the Assistant Attorney presented a list of properties that are needed in connection with various highway improvements throughout the state. After careful consideration of each item the Commission authorized acquisition of the several parcels at the prices recommended by the Assistant Attorney. Mr. T. M. Davis, Senior Highway Engineer, Public Roads Administration, who was present, approved the prices to be paid for the parcels in which the Federal Government is particularly interested. The following resolution with respect to such purchases was thereupon adopted by the Commission by unanimous vote.

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

*5671 - This settlement was approved by the Commission subject to inspection of the properties by Chairman Cabell. Due to Mr. Cabell's absence from the state the following week, such inspection could not be arranged until Monday, March 1, at which time Mr. C. W. Parker, Right of Way Agent, telephoned Mr. Cabell's office and ascertained that Mr. Cabell had previously resigned as a member of the State Highway Commission to join the Army and had already reported for Army duty, so no longer was available to pass on highway matters. The Commission's Attorney, Mr. J. M. Devers, thereupon discussed this acquisition with Commissioners Huron W. Clough and Herman Oliver, over the telephone, both of whom approved the settlement as set forth in the above resolution.

**10682 - This settlement was later approved on the basis of Proposal #1. (See minute entry ahead for details.)

The Engineer brought up for discussion the training and employment of women in the operation of motorized equipment. He advised that, due to wartime conditions, it is becoming more and more difficult to hire and retain men in these positions and suggested, in view of the success of the experiment that was conducted by the Highway Department last year, the training of women to perform such functions, particularly in connection with extra-gang seasonal work such as oiling and pavement patching. He requested authority to conduct a school at each of the divisional highway shops and to pay the women attending the same an apprentice wage of twenty-five cents per hour during the time that they are receiving instructions. He also requested authority to pay the women the same wages that men receive for this class of employment if the women are placed on regular crews after the period of instruction terminates. After discussion the Commission approved the establishment of such schools and the wage payment of twenty-five cents per hour while the women are receiving instructions. The Commission also authorized the payment of the standard wage rate if and when the women are assigned to highway crews.

The Engineer also brought up for discussion the matter of employment of convicts to perform heavy labor on highway seasonal crews. He requested authority to discuss the matter with Governor Snell, the State Parole Board and the Penitentiary Warden, in order to secure their attitude with respect thereto and to enable him to arrange a definite plan for the utilization of these men, payment for their services, et cetera, if the plan is finally approved. Chairman Cabell stated that in normal times he would not favor such an arrangement but due to the present wartime emergency he is willing to give the matter consideration, provided the Commission has legal authority to employ convicts on its work. After considerable discussion the Attorney was instructed to look into the legal features involved and to advise the Commission at its next meeting. Chairman Cabell was authorized to discuss the matter with Governor Snell and the members of the Parole Board, and the Engineer was instructed to discuss it with Mr. George Alexander, Warden of the Penitentiary. The Commission made no definite commitment at this time, deferring the same until its next regular meeting, when reports are to be rendered on the results of the above-mentioned contacts.

The Commission discussed at considerable length matters incident to Senate Bill 118, now before the Legislature, which provides for the determination of the weight of a load of logs by log-scale measure rather than by actual weighing. The Engineer advised that if this bill should become a law it will be impossible to properly design highway facilities based upon the uncertain weights that such facilities would be permitted to carry under the terms of this bill. The average log scale which is to be set up under the provisions of the bill, he said, would give an indefinite weight, the maximum of which may overstress the bridges to failure, jeopardize the lives of the people that use them, and may ruin highway surfaces. He also said that neither he nor any other engineer could in truth and justice accept the responsibility for the proper maintenance of the highway facilities or for the design of the same if this bill becomes a law. The Commission gave careful consideration to the Engineer's statements but took no definite action thereon except to confirm Chairman Cabell's statement to the Highway Committee in opposition to the passage of the bill.

JUN 17 1943

The Attorney brought up for discussion matters pertaining to Senate Bill 86 that is now before the Legislature, which bill authorizes the Highway Commission to close or dead-end certain streets in the city of Cottage Grove, where they connect with the new state highway in this town. He advised that the City of Cottage Grove is strenuously opposing the passage of this bill; also, that a compromise arrangement has been presented to him for disposal of the controversy between the Commission and the City. By this proposition, he said, the city will offer no objections to the closing of the Seventh Street connection with the highway, but it wants the Eighth Street connection left open for public use. The Commission considered that such compromise is not in accordance with the provisions of its original agreement with the City, which was the basis of the approval of the project by the Commission, and was one of the things required by the Public Roads Administration before it would obligate federal funds for the payment of a share of the costs involved. The Attorney was thereupon instructed to inform the City that the Commission entered into its agreement with the City in good faith and because the Commission thought it was for the best interests of everyone that the streets in question be dead-ended at the highway right-of-way line, and in view thereof the Commission cannot compromise.

The Commission adjourned at 10:45 p. m. to reconvene at 9:00 a. m. on the following day in the auditorium of the Public Service Building.

Portland, Oregon, February 18, 1943

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards of contracts would be made at 2:30 p. m. in the same room:

OCHOCO HIGHWAY
OCHOCO SUMMIT ROCK PRODUCTION

The Engineer requested approval of the 1943 program of special maintenance projects, involving a total expenditure of \$950,000, made up as follows:

To complete projects in 1942 program	\$ 31,000
To complete eleven 1943 projects now under contract . . .	494,000
Fifteen 1943 projects remaining to be contracted	403,000
Projects to be contracted in 1943 for 1944 performance . .	22,000

He submitted a detailed list of the projects, as follows, which the Commission approved by unanimous vote:

1943 PROGRAM - SPECIAL MAINTENANCE

<u>Highway</u>	<u>Section</u>	<u>Cu. Yd.</u>	<u>Estimated Cost</u>
<u>Division No. 2</u>			
Oregon Coast	Newport-Kernville	10,000	\$ 32,000c
Alsea	Alsea Mountain	10,000	30,000
Wilson River	Mills Bridge-McNamers	25,000	81,000c
Nehalem	Banzer Bridge-Washington Co. Line	10,000	<u>42,000c</u>
Total, Division No. 2			\$185,000
<u>Division No. 3</u>			
Oregon Coast	Port Orford	23,100	\$ 60,000c
Willamette	Salt Creek Falls-Odell Butte	14,200	50,000c

Materials to be contracted in 1943 for use in connection with 1944 projects			\$ 22,000

c - Projects under contract

(Additional budget for state parks approved later in session.)

The Engineer was authorized to advertise these projects for bids as soon as they can be prepared.

The Attorney reported on the claim of Mrs. Florence Staley for the destruction of a building that was deposited on the right of way of the Albany-Corvallis Highway by flood waters from the Willamette River. He advised that Mrs. Staley was notified to remove her building from the highway right of way but did not do so for a matter of some ten days, so the highway maintenance crew was ordered to remove it and in the process thereof the building was demolished. Mrs. Staley, he said, is now demanding payment in the sum of \$300. He further stated that the building was an old one of very little value and

and in his estimation the state is not liable for payment of the claim. However, in order to appease Mrs. Staley, he has offered to give her a small building, 12' x 26' in dimension, which was acquired in connection with a right-of-way purchase and for which the Highway Department has no use. The Commission approved such settlement of this matter, it being understood that Mrs. Staley is to pay the cost of moving the building.

The Attorney reported the status of the Commission's offer of settlement of the Troy claim arising out of the reconstruction of the Troy Ranch Section of the Old Oregon Trail, in Baker County. He advised that he submitted to Mr. A. S. Grant, Baker, attorney for the Troy heirs, the Commission's offer to settle this claim for \$2,500, and received a reply to the effect that the Troys are willing to accept such sum as settlement in full if the Highway Commission will agree to reconstruct a certain cattle pass so cattle can use it, will agree to maintain in workable condition a certain siphon through which water is conveyed to the Troy ranch, and will maintain the free flow of water through a certain drainage ditch approximately paralleling the highway along the Troy frontage. The Engineer advised that from his understanding of the matter it quite likely is the obligation of the Highway Commission to perform these functions, at least in so far as these facilities are situated on the highway right of way, although he is not in position to definitely pass on the matter until he has consulted with Division Engineer Paul Van Scoy who has charge of the highways in this district. He recommended approval of the things requested unless objections are offered by Mr. Van Scoy. The Commission approved the recommendation; however, instructed the Engineer to consult the individual Commissioners by telephone if, in Mr. Van Scoy's estimation, the state is not liable. The final arrangement is to be covered by written agreement between the Troys and the Commission.

The Attorney reported receipt of a form letter from the Federal Government providing for the use of a state-owned tract of land situated near the Pendleton Airport, in Umatilla County. He said that this is a standard government form and is satisfactory in every way except that it provides for ten year's use of the property by the government. He questioned whether or not the Commission should lease the property on such time basis, in view of the fact that the property is valuable and very likely can be used to good advantage by the Highway Department when times return to normal. After discussion the Commission approved the leasing of the property to the government for a period of five years or for the duration of the war.

The Attorney requested instructions whether or not to press the state's claim against Mr. Carl Meyers who was involved in an accident that resulted in the damaging of a traffic barrier on the Interstate Bridge. It appears that Mr. Meyers' car was stopped at the barrier which was down for the opening of the bridge draw span, and that it was rammed by another car which evidently was traveling too fast, and, as a result, Mr. Meyers' car was forced into the barrier causing damage amounting to \$40.80. The Attorney advised that Mr. Meyers' insurance company will not accept liability under the circumstances and refuses to pay the state's claim. It appeared to the Commission that the claim is really against the owner of the other car. Accordingly, the Attorney was instructed to collect the amount of the damages from such party, if possible.

FEB 19 1943

The Commission discussed briefly and ordered filed a resolution from Mr. Fred A. Phillips, Chairman, Advisory Board, Oregon Grazing District No. 6, Baker, Oregon, wherein the Board goes on record "urging the various federal and state agencies, counties and cities in the state of Oregon to adopt a unified plan of public works for the postwar period, for immediate use if such a program becomes necessary, such program to be coordinated on a state wide basis through the state coordinator."

The Commission also discussed the Engineer's letter dated January 29, 1943, directed to Mr. W. H. Lynch, District Engineer, Public Roads Administration, urging reconsideration of the Highway Commission's request for reimbursement for expenditures made in the repair of the Pacific Highway West through Camp Adair, which section of highway was severely damaged by reason of the trucking operations of contractors in connection with Camp Adair construction. (See letter in general files.) Mr. T. M. Davis, who was present, advised that this letter has been approved by Mr. Lynch and by the Regional Office of the Public Roads Administration, San Francisco, which has forwarded it to the main office of the Public Roads Administration, Washington, D. C., for final decision. The Commission decided to do nothing further in the matter until Mr. Lynch's reply has been received.

The Commission also discussed and ordered filed a letter from Mr. L. C. Stoll, Area Director, War Man Power Commission, Portland, advising that "the maintenance and repair of highways is declared by this office to be an essential activity."

The Attorney reported briefly on certain legislative matters, particularly on Senate Bill 89 which provides for the penalizing of log haulers who are apprehended for transporting loads that weigh in excess of the weight limits specified in their permits. He advised that as originally introduced in the Legislature the bill limits the penalties to log haulers who are engaged in the hauling of logs, poles or piling, involving overall lengths in excess of the statutory limits; whereas, to be most effective, it should also apply to log haulers whose loads do not exceed the statutory limit of 50 feet, and he has asked the Highway Committee to permit the substitution of another bill which would produce the desired objective. The Commission approved such substitution of bills.

The Assistant Attorney requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for various highway improvements. He presented a list of such properties together with offers that he recommended be made in connection with each, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
5669	Peninsula Golf Course	Right of Way	\$10,000.00
3 52A	Jess Correa, Jr.	Hauling Road	25.00
10650	S. G. Talia	Right of Way	3,000.00
*5670	Dewey D. Gault, et al.	R/W & Detour Road	12,500.00

*The Commission previously authorized condemnation for right of way only. Present request is for authority to include the detour road in the proceedings with no increase in the amount offered.

After careful consideration the Commission approved the offers and by unanimous vote adopted the following resolution authorizing condemnation of the properties:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes herein-after expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Dewey D. Gault, et al., which property is located in Sections 33 and 34, Township 2 North, Range 1 East, and in Sections 3 and 4, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and in the southeast quarter (SE $\frac{1}{4}$) of Section 33 and in the southwest quarter (SW $\frac{1}{4}$) of Section 34, Township 2 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2 and is further identified in the records of the Highway Commission as file R 5670, Parcel 1 of which property is being acquired for right of way purposes and an easement on Parcel 2 of which property is being acquired for detour road purposes during construction in connection with the Pacific Highway East;*

FEB 10 1943

Real property owned by Peninsula Public Golf Course, Inc., which property is located in the east one-half ($E\frac{1}{2}$) of Section 4 and in the west one-half ($W\frac{1}{2}$) of Section 3, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 5669, and which property is being acquired for right of way purposes in connection with the Pacific Highway East;*

Real property owned by S. G. Talia, which property is located in the south one-half ($S\frac{1}{2}$) of Section 33, Township 10 South, Range 3 West, and in the northeast quarter ($NE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 4, Township 11 South, Range 3 West, W. M., and in the southwest quarter ($SW\frac{1}{4}$) of Section 33, Township 10 South, Range 3 West, W. M., Linn County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 4 and 5 and is further identified in the records of the Highway Commission as file R 10650, and which property is being acquired for right of way purposes in connection with the Pacific Highway East;*

Real property owned by Jess Correa, Jr., which property is located in the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 5, Township 3 North, Range 29 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file R 8852A, and which property is being acquired for right of way for a hauling road in connection with the Boardman-Stanfield Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 33, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Commission had under discussion the matter of securing borrow materials that will be needed for embankments in connection with the construction of the Denver Avenue-Union Avenue traffic separation project, in North Portland. The Engineer advised that several sources of material have been investigated and in his estimation the most satisfactory source is property owned by the Tower Sales and Erecting Company on Lotus Island. The embankments, he said, will require approximately 150,000 cubic yards of such material and the company has tendered two proposals with respect thereto, as follows:- Under Proposal No. 1 the company will let the state have this material at the rate of \$0.08 per cubic yard. Under Proposal No. 2 the state can have the material at the rate of \$0.05 per cubic yard, provided the state will purchase and deed to the company adjoining land on Lotus Island that is owned by the Portland Electric Power Company. Under such arrangement the company allows the state a credit of \$5,000, by reducing the unit price to be paid by the state for the material taken from its land. Under either proposal the State of Oregon and/or the successful bidder for the highway work will have free use of the company's bridge which connects the Island with the mainland. However, the contractor will be required to maintain the bridge while he is using it and to turn the bridge back to the company in as good condition as it now is, regular wear and tear excepted; and the State of Oregon must provide in its specifications that the contractor shall not use, in connection with the transportation of the material over the bridge, trucks of more than seven cubic-yard capacity. The company also agrees, under both proposals, to insure the bridge structure against collapse or any other vital injury and to

FEB 18 1943

carry public liability and property damage insurance during the year 1943 at no charge to the state or the state's contractor.

This matter was discussed at considerable length and as a result thereof the Commission approved and accepted Proposal No. 2. The Attorney was thereupon authorized and instructed to negotiate with the Portland Electric Power Company for the purchase of its property at not to exceed \$5,000. He was authorized to close the deal with the Tower Sales and Erecting Company on the basis of Proposal No. 1, if he is unable to reach a satisfactory settlement with the Portland Electric Power Company. The Engineer was instructed to include in the contract for the highway construction provision for the exemption of responsibility by the state in connection with the use of the bridge structure and to provide therein that the highway contractor shall not transport more than seven cubic yards of material in his trucks while operating across the bridge. (The Attorney reported later in the session that he was unable to reach any agreement whatsoever with the Portland Electric Power Company with respect to the acquisition of its land. The Commission thereupon confirmed its acceptance of Proposal No. 1 and instructed the Attorney to prepare an appropriate agreement with the Tower Sales and Erecting Company covering the matter.)

Mr. Russell Hubbard, Reedsport, came before the Commission in regard to an exchange of properties fronting on the new location of the Umpqua Highway just north of Reedsport. He advised that he needs the lowland property that lies between the highway right of way and the Umpqua River in connection with his log-booming operations in the river, and asked the Commission to deed this property to him in exchange for which he offered to deed to the state certain property on the opposite side of the new highway location, which he understands the state may need for a prospective revision in the highway alignment. He also asked the Commission to deed to him some fractional city lots in the town of Reedsport which lie between the new highway location and certain dedicated city streets. Chairman Cabell advised that the Commission acquired all of the land between the highway and the river in order to control the area and to preserve the scenic view without obstruction, and that the Commission is reluctant to sell property that has been acquired for such purposes.

Mr. Hubbard stated that he needs the land only to facilitate his log-booming operations and that it is not his intention to erect any buildings or any other facilities thereon, so the view from the highway would not be obstructed in the least. He further explained that he owns the booming rights along the river front and would offer no objection to the state wasting road materials over the river bank in the event the Commission had materials to dispose of in such manner. After further discussion the Commission agreed to inspect the property at the earliest opportunity. The Engineer was instructed to give his immediate attention to the matter of acquiring extra width right of way on the south side of the new highway location and to the advisability of deeding to Mr. Hubbard the fractional lots in the city of Reedsport. A report of his findings is to be presented to the Commission at the next regular meeting.

Mr. Howard F. Puarica, President of the Portland Gravel Company, Inc., was present in regard to his company's claim against the Commission for the

cost of repairing its dredge which was damaged as a result of the collision with the drawspan of the Interstate Bridge, said claim being in the amount of \$836.00. Mr. Puariea read aloud a report from the operator of the dredge in which it was stated that the bridge tender failed to open the drawspan to allow passage of the dredge, notwithstanding repeated signals from the dredge. Chairman Cabell pointed out that there is a conflict of testimony, because reports received by the Highway Commission indicate that the dredge did not signal for the opening of the bridge, and in view thereof the bridge tender assumed that the dredge was to be docked before reaching the bridge. The matter was discussed at considerable length, during which Mr. Puariea suggested that each party assume 50 per cent of the expense. The Commission took the matter under advisement. The Commission discussed the matter further following Mr. Puariea's departure and, after reviewing the facts in the case, confirmed its previous decision denying any responsibility or liability in the matter.

The following persons, Honorable Earl Riley, Mayor, City Commissioner Wm. A. Bowes, and Ben Morrow, City Engineer, representing the City of Portland, were present and discussed with the Commission the matter of closing Harbor Drive to vehicular traffic opposite the Public Market Building, as has been requested by the United States Navy Department. It appears that the Navy Department has arranged for the use of the Market Building as a warehouse for the storage of shipbuilding materials, et cetera, which are to be used in the outfitting of vessels built in the Portland area; that the vessels are to be moored in the river opposite the building and there will be considerable movement of both personnel and equipment from the building to the ships, necessitating the use of the doors on the river side of the building and uninterrupted use of the highway between the hours of 8:30 a. m. and 4:30 p. m., daily, except Sunday. Commissioner Bowes advised that at a conference with Commander L. D. Whitgrove, United States Navy, Supervisor of Shipbuilding, the disadvantages and impracticability of closing Harbor Drive were pointed out in detail and as a result thereof Commander Whitgrove has agreed to withdraw his request, although he still wants permission to load and unload a limited number of trucks, at any hour of the day, from the east wall of the Market Building, which would involve parallel parking. He gave as his thought that such use of the highway would seriously interfere with highway traffic, and that if any concession is granted at all in that regard it should be limited to certain hours specified by the State Highway Commission.

Chairman Cabell gave as his thought that if this privilege is granted it will eventually mean the unlimited use of the highway by the Navy Department. He gave as his opinion that a very undesirable situation would result and suggested that the request be denied. Mayor Riley advised that any use of the highway that would interfere with the free flow of traffic would be resisted by the City, and that the City would join with the State Highway Commission in preventing such use of this facility, either by the Navy or by anyone else. The State Highway Engineer suggested that at small cost the Navy could provide doorways on the west or front side of the Market Building which would serve the purpose. After further discussion it was mutually agreed that Commander Whitgrove's request for the closing of Harbor Drive, between the Market Building and the seawall, should be denied; and it was also mutually agreed that his request for the intermittent parking of trucks or automobiles

on the highway back of the Market Building should be denied. Such information is to be conveyed to Commander Whitgrove by letters from the City of Portland and the State Highway Department.

The Commission discussed thoroughly and denied the claim of contractor Homer G. Johnson for additional compensation in connection with his contract, No. 2390, for construction of the Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County, it being the opinion of the Commission that the state is not liable for the extra expense incurred by Mr. Johnson. (For details, see Engineer's written report to members of the State Highway Commission dated December 22, 1942, in general files.)

The Commission discussed a complaint from Mr. H. A. Hein, Scappoose, that his well has become contaminated as a result of the installation of a drainage pipe in the state-owned quarry which joins his property at Scappoose. Mr. Hein alleges that the water from the well has been rendered unusable and wants it corrected. The Engineer advised that investigation reveals that the floor of the quarry was changed very little by the contractor's activities, and it does not seem reasonable that the slight deepening of the pit could have had any effect on Mr. Hein's well, particularly in view of the fact that the well is some 75 feet deep; further, that District Maintenance Superintendent A. J. Ford obtained a sample of the water which he had tested by the State Board of Health, from whom a report has been received indicating that the water conforms with accepted bacteriological standards of purity for drinking water. In view of the report the Commission concluded that Mr. Hein's complaint is unjustified and accordingly decided to let the matter rest.

The Secretary reported on overweight violations that have been committed by commercial freight haulers who are operating under the privileges of the Commission's emergency transportation permits. He was instructed to continue bringing these violations to the attention of the offenders and to warn them that the Commission will take drastic action with respect to their permits in the event they continue to overload.

The Commission had under consideration the transaction by which, with the approval of the Highway Commission, the Tru-Mix Concrete Company, in connection with its contract on the Seven Devils Chrome Mine Access Road, made arrangements with Coos County for the purchase of some roadbuilding materials. In connection with this transaction the Highway Commission has been requested to assure the county that its claim against the said contractor for materials furnished pursuant to said arrangement will be protected in the final settlement between the state and the said contractor. After consideration, the Commission ordered that, before final payment is made to the contractor, Honorable E. L. Peterson, County Judge of Coos County, be advised and given an opportunity to file with the state the amount of the county's claim for materials so furnished by the county and acquired by the contractor, and that before final payment is made the contractor be required to furnish to the state satisfactory proof of the payment of such claim.

The Commission discussed an invoice from the City of Portland in the amount of \$9,115.92 covering the state's share of the cost of traffic signal

installation work performed by the City under agreement with the Commission during the year 1942. The Engineer advised that this expense is chargeable against minor betterments on primary highways, but investigation reveals that the total amount, \$75,000, budgeted for such purposes has already been allotted to other work, so if the claim is to be paid the budget will have to be increased in the amount of the invoice. In view of the situation, the Commission approved increasing the budget to take care of this item.

The Engineer requested authority to purchase three tractor loaders at a cost of \$3,600 each, for use by paving crews to replace wheelbarrow men. It was his thought that the use of such equipment would facilitate paving operations, in view of the fact that it is difficult to hire and to retain men to perform such service, due to wartime conditions. The Commission approved the purchase of one of the loaders for experimental purposes.

A letter was presented from Mr. H. J. Doolittle, District Engineer, Office of Indian Affairs, in which the Highway Commission is requested to assume responsibility for the design of several concrete bridges that are to be constructed on the Sprague River Road, within the borders of the Klamath Indian Agency, in Klamath County. It was Mr. Doolittle's thought that the design of the bridges should harmonize with the Indian surroundings, and that the State Highway Department is in much better position to effect appropriate designs than is the Department of Indian Affairs. The Commission approved the request.

The Engineer requested instructions whether or not to make any further attempts to collect a number of delinquent accounts that range in amounts of 25¢ against Hood River County to \$183.97 against the Public Utilities Commissioner. He presented a list of such accounts and advised that in each instance, except as to the claim against the Public Utilities Commissioner, there is some question as to the liability of the party owing the state. As to the claim against the Public Utilities Commissioner, he said that this represents expense by the State Highway Department during the month of December 1935 for a field survey of a proposed steam-heating plant and transmission pipe line to serve state buildings in Salem. This survey, he said, was made at the request of the Public Utilities Commissioner, who agreed to reimburse the Highway Department for the expense involved and would have paid the account a long time ago but for the fact that the claim was not allowed by the State Board of Control, on account of lack of an appropriation for such purpose. He recommended the cancellation of all of the accounts except that against the Public Utilities Commissioner. The Commission approved the recommendation and instructed the Attorney to make further attempts to secure satisfaction of the claim against the Public Utilities Commissioner. A complete list of the accounts follows:

<u>Name</u>	<u>Date</u>	<u>Amount</u>
W. A. Jones	April 26, 1938	\$ 7.75

Reconsideration was given by the Commission to a request from Mr. A. C. Barlo, Portland, for permission to construct and maintain a wooden bus-stop shelter on the right of way of the Hillsdale-Beaverton Highway at Glencullen, Multnomah County. Chairman Cabell advised that he has discussed this matter with Mr. Barlo and it appears that there is some justification for a facility of this kind in this vicinity although there is not sufficient justification for a deviation from the standard policy of the Commission with respect to encroachments on highway rights of way. It was his thought that, if a suitable place could be found where the Commission owns land beyond the limits of the standard width right of way, it would be satisfactory to let Mr. Barlo maintain a bus-stop shelter on such area. Commissioners Clough and Oliver concurred. The Engineer was thereupon instructed to investigate the matter and, if he is able to find such a location, to allow Mr. Barlo to erect the shelter thereon.

Reconsideration was also given by the Commission to the request of Mrs. Martha Redmond, Portland, for permission to construct a stairway up the highway excavation slope on the Pacific Highway West at her place of business near the old Taylors Ferry Road junction. The request was again denied, for reasons previously stated.

A letter was presented from Mr. John M. Begg, Assistant Chief, Division of Cultural Relations, Department of State, Washington, D. C., requesting the use of the Highway Department's film, "The New Oregon Trail," in the dissemination to foreign countries of American information of an educational nature. The Commission approved the request.

Reconsideration was given by the Commission to resolutions from the County Courts of Marion and Linn Counties requesting that the county road, which extends from the junction with the North Santiam Secondary Highway at Mehama via the town of Lyons to the junction with said highway at Mill City, be designated a state secondary highway. The Engineer recalled that the Commission previously gave the County Courts to understand that it would designate this road a state secondary highway when the counties had complied with the Commission's requirements with respect to rights of way, encroachments, et cetera. He advised that a standard width right of way has been acquired, and that buildings and fence encroachments have been removed, so if the

Commission is still inclined to assume jurisdiction over this road there is nothing to prevent appropriate action at this time. After some discussion the Commission approved the county resolutions and thereupon, by unanimous vote, adopted the following resolutions designating the road a state secondary highway:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Marion County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Marion County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Mehama-Mill City Secondary Highway No. 213

Beginning at the junction of the North Santiam Secondary Highway No. 162 with the Mehama-Lyons Road; thence southerly to the Linn-Marion County line at the North Santiam River, a distance of approximately 0.17 miles. Also beginning at the junction of the North Santiam Secondary Highway No. 162 at Mill City; thence southerly to the Linn-Marion County line at the North Santiam River, a distance of approximately 0.09 miles; the total length of the two sections described herein being approximately 0.26 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Linn County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Linn County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Mehama-Mill City Secondary Highway No. 213

Beginning at the Linn-Marion County line at the North Santiam River near Mehama; thence easterly via Lyons and Fox Valley to the Linn-Marion County line at the North Santiam River at Mill City; a distance of approximately 8.6 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Engineer reported that the County Court of Marion County has accepted the Commission's proposition with respect to the maintenance of the Gates-Detroit Section of the North Santiam Secondary Highway, and has executed a form of agreement which provides that the county will perform all of such maintenance work with county crews and equipment with the understanding that the state will reimburse the county for the cost thereof. The Commission approved the arrangement and thereupon signed the agreement.

The Engineer requested authority to conduct a survey for the proposed relocation of the Chemult-Chiloquin Section of The Dalles-California Highway, 33 1/3 miles in length. He estimated the cost of the survey at \$20,000, and advised that it is planned to finance it with moneys appropriated by the Federal Government for preliminary engineering for postwar construction. The realignment of this section, he said, is a desirable project to take up postwar slack. The Commission approved the request subject to the condition that it be possible to obtain federal funds to finance the survey.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

The Assistant Attorney reported receipt of an offer from a Mr. Robert T. Reed to pay \$3,500 for a portion of the property that the Commission purchased from Mr. Trinka in connection with the acquisition of right of way for the Coshen-Pleasant Hill Section of the Willamette Highway, in Lane County. He advised that Mr. Reed's offer provides for a down payment of \$1,000 and the payment of \$35.00 monthly thereafter, plus six per cent interest on the unpaid principal, until the full amount of the purchase price has been paid. He recalled that the Commission previously advertised this property for sale but did not receive a satisfactory bid, and recommended acceptance of Mr. Reed's offer. The Commission approved the recommendation and thereupon signed an agreement with Mr. Reed relative thereto.

The Engineer reported that, due to extremely serious snow-slide conditions existing on the Santiam Highway at Hogg Pass, he has ordered the closure of the highway between Marion Creek and Suttle Lake for public travel until the danger is past, which he anticipated would be not later than April 1, 1943. It was his thought that the closing of the highway is the only way to properly protect the public because the snowfall has been very heavy and slides may occur at any time. He asked the Commission to confirm his action on the matter. The Commission approved closing of this highway as reported.

The Commission considered, approved, and signed a form of option submitted by the Federal Government in connection with the sale by the Commission to the United States of America of 21.43 acres of state-owned land situated in Jefferson County. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Highway Commission heretofore acquired a tract of land in Jefferson County then needed for highway purposes; and

WHEREAS, approximately 21.43 acres of said tract are no longer needed by the State Highway Commission for highway or other public uses and the United States has applied to the Highway Commission for the purchase of said 21.43 acres; and

WHEREAS, it is the judgment of the Highway Commission that the reasonable cash market value of said 21.43 acres is \$535.75; and

WHEREAS, the United States has agreed to pay said sum of \$535.75 for a deed conveying said tract to the United States free and clear of all encumbrances;

NOW, THEREFORE, BE IT AID IT HEREBY IS RESOLVED by the Highway Commission as follows:

1. That the Commission execute and deliver to the United States an option to purchase the said tract consisting of approximately 21.43 acres, which tract is particularly described in the option, a copy of which is attached to this resolution.
2. That upon the acceptance of the said offer to purchase and upon payment of the said purchase price the Commission shall execute and deliver to the United States a bargain and sale deed conveying to the United States the real property described in said option.
3. That this resolution be entered in the minutes and records of the Commission and the Secretary of the Commission is instructed to deliver said executed copies to the United States by delivering the same to Mr. Don E. Meldrum, Chief of Portland Sub-Office, Real Estate Division, Army Engineers, Portland, Oregon.

At 2:30 p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken by the Commission at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Ochoco Summit Rock Production Project on the Ochoco Highway, in Crook and Wheeler Counties. M. C. Lininger & Sons, Medford, submitted the low bid in the amount of \$23,500.00. The only other bid submitted was that of D. C. & A. L. Williams, Portland, at \$27,500.00. The Commission awards this contract to M. C. Lininger & Sons at their low bid of \$23,500.00.

"Crescent Rock Production Project on The Dalles-California Highway, in Klamath County. No bids were received for this project.

"Chemult Rock Production Project on The Dalles-California and Willamette Highways, in Klamath County. The only bid received for this project was that of M. C. Lininger & Sons, Medford, at \$33,300.00. The Commission awards this contract to M. C. Lininger & Sons at their bid of \$33,300.00.

"S. W. Grover Street Access Road Project in Portland, Multnomah County. 260 linear feet of grading and paving. Cascade Construction Company, Portland, submitted the low bid for this project, in the amount of \$4,931.00. The only other bid was that of Parker-Schram Company, Portland, in the amount of \$5,052.80. The Commission awards this contract to Cascade Construction Company at its low bid of \$4,931.00."

Messrs. George R. Van Vleet and A. F. Koppisch, logging contractors, Seaside, came before the Commission at this time in regard to the transportation of logs over the Cannon Beach-Cannon Beach Junction Section of the Oregon Coast Highway, in Clatsop County. They advised that they are hauling 32-foot logs over this section, but cannot keep the overall length of load and equipment within the 42-foot length limit specified by the Highway Commission, and urgently requested permission to continue the hauling of such length logs, notwithstanding that they cannot guarantee that the movements will be kept in the right-hand traffic lane at all points due to sharp curvature in the highway alignment. It was their thought that the urgent need for the logs in connection with war activities is ample justification for approval of their request. Chairman Cabell advised that the Commission established the 42-foot overall length limit for this section of highway only after test runs had been made and it was found that loads of greater length cannot be moved thereover without taking up more than half the roadway, and the Commission is not inclined to grant any concession that will create an avoidable hazard to other traffic. He pointed out that Mr. Van Vleet is now widening some of the worst curves on this section under an arrangement with the Highway Commission so as to make it possible to transport loads of longer length; however, the Commission cannot permit such longer-length loads until the widening work is completed.

After considerable discussion, in which Messrs. Van Vleet and Koppisch presented arguments in behalf of an extended privilege for the use of the road because of the need of the logs for wartime purposes, the Engineer suggested that the Commission might order one-way traffic over a one-mile section that contains the worst curves. Under such system, he said, a flagman would be maintained at each end of the restricted section to prevent traffic moving in opposite directions from occupying the section at the same time. He added that the flagmen would maintain contact among themselves, either by telephone or some other approved arrangement, and that the plan would be effective only until Mr. Van Vleet completes the widening work that he is now performing. Messrs. Van Vleet and Koppisch both agreed to such an arrangement, and Mr. Van Vleet offered to furnish the telephones for use in connection therewith. He also agreed to pay the cost of maintaining flagmen and other expense incident thereto; however, asked the Commission to employ the flagmen because, in his estimation, instructions issued by them would be more effective if they were in the employ of the state. In this connection he agreed to deposit with the Commission \$1,000 as a guarantee for the payment of the expense of the flagmen. Such arrangement was approved by the Commission by unanimous vote, and it was arranged that Mr. Van Vleet would confer with the Engineer on the following day in Salem, concerning details.

In this connection Mr. Van Vleet called attention to another curve on the Oregon Coast Highway near a point known as Haystack Rock around which, he said, it is impossible to transport a 40-foot log without taking up more than one-half of the traveled portion of the roadway. He asked the Commission to approve the widening of this curve. The Commission referred the matter to the Engineer for investigation.

The Engineer brought up for discussion the matter of providing adequate facilities to care for traffic entering Swift Secondary Highway from the

FEB 10 1943

new townsite of Vanport, Multnomah County. He advised that, according to present plans, traffic from Vanport destined to Vancouver would enter the highway on a new roadway paralleling the highway, and that traffic destined from Vanport to Portland, would cross under the highway at the Columbia Slough Bridge opening, and follow a roadway parallel with the highway for a short distance in the direction of Vancouver, before entering the highway on a sharp curve. It was his thought that such an arrangement is unsatisfactory and creates an undue hazard due to the large volume of traffic that the road will have to accommodate. He suggested, in order to avoid serious accidents, the widening of the highway for four lanes of traffic at this point, and the construction of the approach roads in such a manner that traffic would flow onto the highway gradually rather than abruptly as it would have to do under the present plan. He exhibited drawings to disclose what he had in mind and estimated the cost of such widening work at approximately \$20,000. Such amount, he said, would have to be paid out of state funds; however, the money would not be lost to the state because eventually the highway will have to be widened anyway and the work now planned would fit in very nicely with the eventual improvement. It was the thought of the Commission that the situation is serious enough to justify such expenditure and accordingly the Engineer was instructed to proceed with the improvement at state expense.

A letter was presented from the Jaymar Wholesale Lumber Company, Hood River, in which the Commission was requested to authorize removal of snow from the Mt. Hood Highway, from the end of the present open section to the company's new logging operations about 0.6 mile south of Coopers Spur. The Engineer advised that the section referred to extends from a point about 1.1 miles north of the Coopers Spur Road to a point about 0.6 mile south of Coopers Spur, or a total of 1.7 miles. He estimated that it would cost about \$200 to open this section, and advised that, if the Commission approved the request, the work could be done with a snogo that is now stationed at Parkdale. He questioned the advisability of doing this work, however, in view of the fact that the road is subject to frost boils, and the operation of logging trucks thereover at present undoubtedly would cause serious damage to the highway surface. He suggested, however, that if the company would agree not to haul logs over the road or to move heavy logging equipment over it until the Highway Commission approved of such movements, then it would be alright to open the road up at this time so that timber-fallers could drive their automobiles to the job. After considerable discussion, and in view of the need of logs in connection with the war effort, the Commission approved the opening of the road as an emergency proposition, subject to the condition that neither logs nor logging equipment be moved over the road until the company has been advised that the road is in satisfactory condition.

Reconsideration was given by the Commission to the request from Mr. L. L. Gooding, Principal of the schools at Freewater, Oregon, for the removal of the stop signs that have been erected by the state at the Union Pacific railroad-track crossings on State Highway No. 11 at Milton-Freewater. The Engineer advised that, in conformity with the Commission's instructions, he contacted the Oregon Railroad Association relative thereto and received a reply from Mr. Roy F. Shields, General Solicitor for the Union Pacific Company, which is concerned, to the effect that they have confidence in the judgment

of the Highway Commission relative to the removal of the signs and, if the Commission feels that the element of danger which would result if the signs were removed is inconsequential in comparison with the inconvenience to the public in stopping at the crossings, the railroad company would not be disposed to question the Commission's judgment, except that the stop signs should be replaced during the prune season when there are considerable train movements. In view of this letter the Commission ordered the removal of the signs; however, instructed the Engineer to see that they are replaced during the prune season, as an aid in the prevention of accidents.

The Commission discussed a resolution from the Oregon Roadside Council stating its inability to assume the responsibility of securing the required authority to remove advertising signs that are being maintained on privately owned property adjacent to highway rights of way. The Commission took no action in the matter, in view of the fact that the State Highway Department likewise is not in position to assume such responsibility on account of labor shortage.

The Commission also considered and ordered filed a letter from the Gold Beach Chamber of Commerce soliciting the support of the Commission in the securing of legislation to keep the Rogue River closed to net fishing.

The Commission discussed a letter from Mr. Marshall M. Dana, Chairman of the Battleship Oregon Commission, in which the Highway Commission is asked to assume the responsibility for redesigning Battleship Oregon Marine Park, in Portland, and in connection therewith to make provision for the placement of the foremast that was salvaged from the Battleship Oregon, and for other architectural features. The Commission considered that this really is a city responsibility, in view of the fact that the park is a city park, but agreed to cooperate. The Engineer was thereupon instructed to consult the city officials relative to their desires with respect to the placement of the foremast. He was also instructed to discuss with the city the matter of paying the expense involved with funds received from the rental of properties that were acquired jointly by the state and the city in connection with the Front Avenue improvement.

The Assistant Attorney presented the application of Mr. Ben M. Hecht for the use of a parcel of land that was acquired by the Commission from the City Motor Trucking Company in connection with the construction of the Lombard-Killingsworth Project in Portland. He advised that the property is located at the intersection of Northeast Myrtle Street and Northeast 65th Avenue, and that Mr. Hecht plans to utilize it for Victory garden purposes. The Commission approved the request subject to the condition that Mr. Hecht will clean up the premises when he is through with the property. The matter is to be covered by written agreement.

Consideration was given by the Commission to a request from Mr. Wm. G. Folsom for an extension of his lease of certain state-owned property at Thompson Creek along the Siuslaw Highway, in Lane County. The Assistant Attorney advised that this property is located between the highway and the Siuslaw River and is improved by a store building and gasoline pumps which

originally were placed on the property by a Mr. K. N. Lucas. Further, that on March 30, 1933, the Commission leased the property to Mr. Lucas for a five-year period, or until March 30, 1938, for the sum of \$125; which lease, on July 8, 1937, was extended for another five-year period or until March 30, 1943, upon an additional payment of \$125.00. On March 19, 1938, he said, the lease was assigned by Mr. Lucas to Mr. Folsom with the approval of the Highway Commission and subject to the condition that the lease be not renewed after its expiration and that the lessee return the property to the state in satisfactory condition. Mr. Folsom, he added, has applied for an extension of this lease on a year-to-year basis at an annual rental of \$100, and in support of his request alleges, as follows: (1) impossibility of securing anyone to move the buildings and inability to rebuild on some other location because of difficulties in securing critical building materials; (2) the property is located at the junction with the Indian Creek Road which serves twenty-two families who cannot secure delivery of feed and other items nearer than this junction point because of the stopping of commercial truck deliveries by the Federal Government; and (3) his store serves as a post office for the people in this vicinity. After discussion, and in view of the arguments presented by Mr. Folsom, the Commission authorized the renewal of the lease on a yearly basis at the rate of \$100 per year.

The Assistant Attorney requested instructions relative to compensating the Klamath County Abstract Company for furnishing preliminary title reports for title insurance covering certain properties along South Sixth Street, Klamath Falls. He explained that, when negotiations were under way for the acquisition of the property for the widening of the highway at this point, he ordered thirteen preliminary reports for title insurance, ten of which were not used because negotiations were discontinued. The company, he said, is billing the Commission for service rendered at the rate of \$12.50 for each preliminary report, or a total of \$162.50, but has agreed to credit such payment on the purchase price of title insurance if such insurance is purchased within a reasonable length of time. He requested instructions. The Commission took the attitude that the company furnished the reports in good faith, therefore should be paid for services rendered, and accordingly authorized payment of the full amount of the bill.

The Commission discussed a letter from the County Court of Tillamook County, in which the Commission was asked to deed back to the county certain property that the Commission acquired from the county as right of way for a proposed relocation of the Oregon Coast Highway just south of Neskowin, so as to enable the county to dispose of the balance of its property at this location. The Engineer advised that this particular tract consists of right of way for a permanent location of U. S. Highway 101 and, if it is now returned to the county and the county in turn deeds it to private interests, undoubtedly the state will be forced to pay a considerable amount to again secure it when it is needed for the highway improvement. He recommended denial of the county's request. The Commission concurred in the viewpoint of the Engineer and ordered that the County Court be informed that the Commission desires to retain this property for use in connection with the future improvement of the highway at this location.

111

The Engineer reported that the realignment of the Halsey-Sweet Home Secondary Highway, between Crawfordsville and Holley, in Linn County, has rendered valueless certain sections of the old road. He recommended that the Commission abandon such sections and leave them to revert to the adjoining or abutting property owners or to the control and supervision of the county. The Commission approved the recommendation, and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe, and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Crawfordsville-Holley Section of the Halsey-Sweet Home Highway in Linn County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there were eliminated and made unnecessary as parts of the permanent highway certain sections which are more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragments or portions of right of way hereinafter designated and which were heretofore included within the area of the right of way of said highway as formerly located, but which are now without the regular limits of said highway as relocated;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragments of land confined within the area hereinafter described, which fragments or parcels of real property were formerly within the limits of the right of way of the Crawfordsville-Holley Section of the Halsey-Sweet Home Highway but are no longer parts of the right of way of said highway as the same has been relocated and constructed, be and said parcels of real property are abandoned as parts of the right of way of said highway, and said parcels of land are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners, or to the control and supervision of the County Court of Linn County for highway or other public purposes, as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain parts of the old right of way of the Crawfordsville-Holley Section of the Halsey-Sweet Home Highway lying on each side of the right of way required for the reconstructed highway over and across Sections 16 and 17, Township 14 South, Range 1 West, W.M..

FEB 10 1943

Linn County, Oregon, the beginning and ending points with reference to the engineer's stations of the said reconstructed highway being Station 310+20 on the easterly end and Station 415+00 on the westerly end.

Also:

All those certain parts of the old right of way of the said Crawfordsville-Holley Section of the Halsey-Sweet Home Highway lying on each side of the right of way required for the reconstructed highway over and across Section 15, Township 14 South, Range 1 West, W. M., the beginning and ending points with reference to the engineer's stations of the said reconstructed highway being Station 241+40 on the easterly end and Station 278+50 on the westerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to maps or blueprints marked respectively Exhibit A and Exhibit B attached hereto and by this reference made a part hereof, which said exhibits for identification purposes bear the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated February 17, 1943, upon which maps or exhibits are reflected the above described parcels of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Linn County, together with a copy of Exhibit A and Exhibit B, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned sections of the right of way of said Halsey-Sweet Home Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Linn County and beyond any responsibility or supervision by the State Highway Commission.

*Map files Right of Way Abandonment and Retention File - No. 113.

FEB 10 1943

The Secretary presented communications, as follows, relative to resolutions previously adopted by the Commission abandoning portions of the right of way of old state highways which have been rendered valueless for state highway purposes by reason of alignment revisions:

Letter from the Town of Talent, Jackson County, in which the town accepts jurisdiction over that portion of the abandoned section of the old Pacific Highway within the city limits.

Resolution from Josephine County Court accepting jurisdiction and control over portions of the abandoned right of way of the Williams Secondary Highway between engineer's station 35+16 and engineer's station 46+43 of the relocated center line of said highway, in Section 19, T. 37 S., R 5 W., W. M.

Letter from the County Court of Linn County accepting jurisdiction over the abandoned portion of the Brownsville Section of the Halsey-Sweet Home Secondary Highway at Brownsville, in so far as it pertains to the portion lying outside of the city limits of Brownsville.

Letter from the City of Reedsport accepting jurisdiction over the former routes of the Oregon Coast Highway and the Umpqua Highway within the city limits, which have been abandoned by the state.

Resolution from the County Court of Lincoln County accepting control and jurisdiction over certain sections of the old right of way of the Olalla Creek-Toledo Section of the Corvallis-Newport Highway.

Order from the County Court of Jackson County accepting control and jurisdiction over that portion of the right of way of the old Pacific Highway between Bear Creek and Talent, which lies outside of the corporate limits of the town of Talent.

The Commission accepted the communications and ordered them filed.

Chairman Cabell presented a request from Senator Louis W. Wipperman, Grants Pass, for the improvement of the Lower River Road (Rogue River Loop Secondary Highway) in Josephine County, from the end of the present improved section near Gunnell Road junction to the crossing of the Rogue River at a place known as Robertson Bridge, as a postwar project. After discussion the Commission tentatively approved the request and instructed the Engineer to include this project in the list of projects that are to be considered for construction in the postwar program. The Secretary was instructed to inform Senator Wipperman of the action taken.

In this connection the suggestion was made by Chairman Cabell that it would be advisable to arrange a postwar program for state secondary highways as well as for primary highway construction. The suggestion was adopted by the Commission and the Engineer was thereupon instructed to prepare a program of such projects for consideration by the Commission.

FEB 10 1943

A letter was presented from Mr. Henry Baker, Chairman, Morrow County United States Department of Agriculture War Board, requesting the immediate improvement of the Lexington-Jarman Secondary Highway and the Eightmile and Hardman Secondary Highways (Secondary Highways No. 300, 320 and 321), sections of which, he declared, have been severely damaged during the past month by reason of heavy traffic. Mr. Baker further states that the condition of the Morrow County highways at the present time is such that, unless immediate steps are taken to repair them, transportation in this county will be seriously handicapped during the balance of the year. He suggests the posting of the highways in question for reduced load limits to prevent their use by heavy traffic until the repair work is completed. The Engineer was instructed to inform Mr. Baker that the Commission is doing its best to maintain the highways under its control in good travelable condition, and expects to continue to do so, although that is becoming increasingly difficult because of wartime conditions.

Chairman Cabell reported a request from Mr. G. S. Burris, Moro, Oregon, for a small amount of improvement work on the Cottonwood Grade Section of the Vasco-Heppner Secondary State Highway, in Sherman County. The Commission referred this matter to the Engineer for investigation to ascertain just what Mr. Burris has in mind.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

Jurisdiction of the provisional government park at Champoe:- The Parks Superintendent called attention to Senate Bill 154 now before the Legislature, which transfers jurisdiction over this park to the State Highway Commission. He advised that the bill has passed both Houses and will become a law as soon as it has been signed by the Governor. The Commission voted unanimously to accept jurisdiction over this park.

Timbered wayside strips along the Oregon Coast Highway through the Sparrow holdings, in Douglas County:- The Parks Superintendent requested instructions relative to the purchase of wayside strips consisting of 40-acre tracts along the Oregon Coast Highway between Elbow Lake and Gardiner. He advised that the Sparrow Realty Corporation, which owns this property, has plans to cut the timber on a portion of the property in the not distant future and if the Commission wants to preserve this timber it would have to act soon. He also said that there are approximately 650 acres of land concerned, on which there is a stand of approximately 35 million feet of fir and spruce timber which, at the present market price of \$5.00 per thousand, would cost the state about \$175,000. The Commission decided not to purchase this property in view of the expense involved.

In this connection the Parks Superintendent advised that the Sparrow Realty Company owns another 40-acre tract bordering on the highway at the southern tip of Elbow Lake and that the company has offered to sell this tract to the state for \$8,020. In order to

properly protect the value of the lake scenery he said it would be necessary to purchase an additional 80-acre tract; in other words, the expenditure necessary to properly protect the state's interests would be approximately \$25,000. The Commission decided that it could not spare the funds at the present time and accordingly refused the offer.

Proposed state park at Floras Lake, in Curry County:- The Parks Superintendent brought up for reconsideration the matter of purchasing the Blacklock Sandstone Company property, consisting of 1,400 acres, in Curry County. He recalled that the company offered to sell this property to the state for \$3,600 and advised that, if the Commission purchases it, he would develop it with CCC forces when the government CCC program is revived. Commissioner Clough advised that he inspected this property in company with the Parks Superintendent on February 15 and in his estimation the property is much more valuable from the park standpoint than the state park that the Commission sold to the Chrome Mining Company. It was his thought that if the Commission purchases any park properties this year it would make no mistake in purchasing the 1,400 acres under discussion. In view of this report the Commission voted unanimously to purchase the property. The Parks Superintendent was instructed to conduct further negotiations for the purchase of the "Sweet" acreage which is surrounded by the Blacklock Company property.

Sheep grazing in The Cove State Park, Jefferson County:- The Parks Superintendent reported receipt of an application from Mr. James Grino, Bend, for the use of two sections of land in this park as a sheep range and for lambing purposes. It appears that Mr. Grino wants to range 600 sheep on this land for a period of about one month. The Parks Superintendent advised that he has no objections, provided Mr. Grino pays for the privilege at the prevailing rates. The Commission approved the request subject to payment by Mr. Grino of \$0.25 per acre for the use of the property. (Investigation by the Parks Superintendent following the meeting revealed that the property desired by Mr. Grino is not owned by the state, but is simply under lease from the Federal Government for park and recreational purposes, and that the lease contains a clause which will not permit the re-leasing of the property to a third party; hence it was necessary to refuse Mr. Grino's request and he has been so informed.)

Sheep grazing in Cape Sebastian State Park, Curry County:- The Commission considered and upon recommendation of the Parks Superintendent approved the application of Mr. Arthur G. Walker, Gold Beach, to pasture 100 sheep in this park at the rate of \$0.50 per head per year. The matter is to be covered by written agreement.

Maintenance of Vista House at Crown Point, Multnomah County:- The Parks Superintendent presented a petition from Mr. Edward L. Dimmitt, Concessionaire at Crown Point Vista House, for help from

the Commission in view of the falling off of his business on account of wartime conditions. He advised that Mr. Dimmitt, for a number of years, has had charge of this place under special contract which provides that he shall maintain the Vista House for the privilege of catering to the traveling public. Due to the gasoline and rubber rationing, he said, tourist travel has about stopped, and Mr. Dimmitt's sales have fallen off in proportion. He recommended, in view of the fact that it is necessary to maintain a caretaker on the premises for the protection of the state's property, that Mr. Dimmitt be hired to perform this service and that he be paid a salary of \$75 per month for the duration of the war. Such arrangement, he said, would not relieve Mr. Dimmitt from paying all maintenance costs, cost of electricity, water, rest-room supplies, et cetera, but he would be required to assume such expense as in the past. The Commission approved the recommendation.

Purchase of timber strips along the Pendleton-John Day Highway in the vicinity of Camas Creek:- This matter was discussed briefly by the Commission but no action was taken in view of the fact that options have not as yet been secured from the property owners. The Attorney was instructed to negotiate the options and report results thereof at the next meeting of the Commission.

Parks budget for 1943:- The Parks Superintendent submitted the following budget for his department for the calendar year 1943:

Acquisition of new parks and expense to satisfy existing obligations:

1. Geo. Geisendorfer, Cascadia Park, 12 monthly payments of \$50.00	\$ 600.00
2. Shore Acres, Coos County, 1st annual payment	3,750.00
3. Purchase of Blacklock property, in Curry County	3,600.00
4. O & C recreational leases subject to exchange with counties:	
a. Clackamas Co., Wildcat lease, Mt. Hood Hwy.	600.00
b. " " Wemms " , " " "	200.00
c. Douglas County, Loon Lake lease	260.00
d. " " , Camas Mt. lease	600.00
e. " " , Elkton tunnel lease	1,000.00
f. Jackson County, Crater Lake Hwy. lease	<u>1,600.00</u>
	\$12,210.00
Betterment of Parks	0.00
Operation and Maintenance of Parks	<u>*40,077.25</u>
Estimated Total	*\$52,287.25

*This amount does not include anticipated expense to operate and maintain prospective parks at Champoege and Sodaville.

After discussion the Commission approved the budget by unanimous vote, and instructed the Engineer to add this item to the maintenance budget that was previously approved by the Commission at this meeting.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Road Approach	210-1436	Douglas	Sparrow Road, near Gardiner, County Road	1st - \$ 200
Plans	12-1427	Grant	Beach Creek Sec., Pendleton-John Day Highway	3rd - \$1,500 Total to date \$4,000
Storage Tank	20-1453	Lane	Springfield Oil Storage, McKenzie Highway	1st - \$ 100
Plans	26-1463	Multnomah	Denver Avenue Underpass, Pacific Highway West	2nd - \$1,500 Total to date \$3,000
Plans	26-1462	Multnomah	Union Ave.-Denver Ave. Sec., Pacific Highways East and West	3rd - \$1,500 Total to date \$4,000
Slide	29-1440	Tillamook	Wheeler-Brighton Section, Oregon Coast Highway	2nd - \$ 475 Total to date \$670
Location	10-1437	Douglas	Lane County Line-Rice Hill Section, Pacific Highway	1st - \$18,955
Location	20-1454	Lane	Walker-Douglas County Line Section, Pacific Highway	1st - \$8,670
Plans	26-1465	Multnomah	Barbur Blvd.-Interstate Ave. Section, Pacific Hwy. West	1st - \$5,000
Right of Way	29-1442	Tillamook	Nehalem-Arch Cape Section, Oregon Coast Highway	1st - \$ 250
Plans	1-1431	Baker	Lime-Huntington Section, Old Oregon Trail Highway	1st - \$ 150

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map-file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
9C24-11	210-1436	Douglas	Reconn.	Sparrow Road near Gardiner	
6B6-14	215-1443	Jackson	Location	Evans Creek-Sams Valley	Ramsey Canyon County Road
5B24-3	18-1428	Klamath	Reloc.	Crescent	The Dalles- California
9C24-12	127-1422	Polk	Reconn.	Kings Valley-Dallas Kings Valley-Suver	Dallas-Kings Valley & Kings Valley
6B6-9	215-1442	Jackson	Location	Tolo-Camp White	Tolo Access Co. Rd.
1A1-37	26-1463	Mult.	Loc. & Plans	Union & Denver Aves. Grade Separation	Pacific Highways East and West

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Edlefsen-Weygandt Company, contract No. 2498, for construction of the Front Avenue Project between Clay Street and Sheridan Street on the Pacific Highway West, Portland, Multnomah County, requested an extension of time of two months, from October 31 to December 31, 1942, within which to complete this job. It alleged that the delay in the performance of the work was due to serious wartime conditions, shortage of labor and certain demands of the Federal Government with respect to black-top pavement operations. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Birkemeier & Saremal, contract No. 2514, for reconstruction of the west approach to the Morrison Street Bridge on the Pacific Highway West, in Portland, Multnomah County, requested an extension of time from August 8 to September 19, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to extra work that was ordered by the Engineer, and to delays in receiving materials due to a low priority rating. The Engineer advised that the completion date specified was rather indefinite, being set as five months after material for the project was available, and he was assured that the material would be delivered on March 8, 1942, which would establish the completion date as August 3, 1942. Skilled labor for the job was very hard to obtain in the Portland area, due to competition of shipyards and other harbor work and, whereas the contractors made every reasonable effort to expedite the project, they were not able to obtain sufficient men for full crews at all times. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Edlefsen-Weygandt Company, contract No. 2537, for grading and paving the Front Avenue Project, between Ankeny Street and Washington Street, on the Pacific Highway West, in Portland, Multnomah County, requested an extension of time of two months, from October 31 to December 31, 1942, within which to complete this job. It attributed its failure to complete the project within the specified time limit to serious wartime conditions, shortage of labor, and certain demands of the Federal Government with reference to black-top pavement operations. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A

letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Berke Brothers, contract No. 2569, for grading and paving Section A, of the South Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County, requested an extension of time, from August 31 to December 21, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to shortage of labor caused by war-time conditions, and extremely adverse weather conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. However, in addition thereto, some delay was caused by inability of the contractor to obtain certain paving equipment. The traveling public, he said, was not caused much inconvenience by the delay as the old road was available for use at all times. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. C. Hall Company and J. C. Compton, contract No. 2576, for grading and paving the Lewisburg-Corvallis Section of the Pacific Highway West, in Benton County, requested an extension of time, from October 31 to December 19, 1942, within which to complete this job. They alleged that adverse weather conditions and other features beyond their control were the principal reasons that they were not able to complete the project within the specified time limit. The Engineer advised that the paving work was completed on October 28, and that the shoulder work was completed on November 10, and that the finishing work, consisting of clean-up of the premises, adjustment of ditches for drainage, et cetera, was completed on December 19, 1942. He confirmed the reasons given by the contractor for failure to complete the project within the specified time, and recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

J. F. Johnston, contract No. 2588, for the widening of bridges on the Suver-Lewisburg Section of the Pacific Highway West, in Polk County, requested an extension of time from August 15 to December 22, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to shortage of labor and difficulties in obtaining necessary materials due to wartime conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2498, 2514, 2529, 2537, 2569, 2576, and 2588, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2498, with Edlefsen-Weygandt Company, for grading, paving and construction of subway structures on the Front Avenue (Clay Street-Sheridan Street) Section of the Pacific Highway West, in the city of Portland, Multnomah County. Completed December 31, 1942.

Contract No. 2514, with Birkemeier & Saremal, for construction of approaches to the Morrison Street Bridge on the Pacific Highway West, in the city of Portland, Multnomah County. Completed September 19, 1942.

Contract No. 2529, with Rogers Construction Company, for the Klamath Falls Rock Production Project on four state highways, in Klamath County. Completed July 3, 1942.

Contract No. 2537, with Edlefsen-Weygandt Company, for grading and paving the Front Avenue (Ankeny Street-Washington Street) Section of the Pacific Highway West, in the city of Portland, Multnomah County. Completed December 31, 1942.

Contract No. 2569, with Berke Brothers, for grading and paving Section A of the South Unit, Antelope Creek-Medford Section of the Crater Lake Highway, in Jackson County. Completed December 21, 1942.

Contract No. 2576, with E. C. Hall Company and J. C. Compton, for grading and paving the Lewisburg-Corvallis Section of the Pacific Highway West, in Benton County. Completed December 19, 1942.

Contract No. 2588, with J. F. Johnston, for widening three bridges on the Suver-Lewisburg Section of the Pacific Highway West, in Polk County. Completed December 22, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway

projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the D & K Logging Company covering construction of a logging roadway across Short Sand Beach State Park, in Tillamook County.

Agreement with contractor Porter W. Yett providing for the stockpiling of crushed rock by-products on property owned by the Estate of Gladys Schmidt, adjacent to the Shaniko-Cow Canyon Section of the Sherman Highway, in Wasco County.

Agreement with Marion County providing for the maintenance of the North Santiam Road between Gates and Detroit.

Agreement with Robert T. Reed relative to the sale to Mr. Reed of property purchased by the State Highway Commission from Joseph Trinka, near Goshen.

Agreements with the towns of John Day, Jefferson, Vernonia, Canyon City and Central Point covering work to be performed by the state during 1943 upon city streets that are not on state highway routes.

Permit from the Klamath Indian Agency for the use of tribal lands as quarry, stock-pile site and hauling road, in the SE $\frac{1}{4}$ of Section 2, T 37 S., R. 11 E., W. M. Right of way file 5942.

Form of option covering the sale to the Federal Government of 21.43 acres of land situate in Jefferson County.

Bargain and sale deed conveying unto the Southern Pacific Company certain property situate in Block 2, Villa Heights Addition to Portland. Right of way file 3722.

The Commission set Thursday, March 18, 1943, as the date for its next regular meeting for the receiving of bids. This meeting is to be held in Portland and the Secretary was instructed to make the usual arrangements for the use of the Auditorium of the Public Service Building for this purpose. (This meeting date was later advanced to March 16 and 17, 1943.)

The Engineer was authorized to include in the call for bids the Denver Avenue-Union Avenue traffic separation project, in the city of Portland, in accordance with previously approved plans.

FEB 19 1943

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:00 p. m.

Portland, Oregon, March 16, 1943

The members of the State Highway Commission met in special session at 4:00 p. m. in Room 234, Imperial Hotel. Present were: Mr. Huron W. Clough, Commissioner, Canyonville; Mr. Herman Oliver, Commissioner, John Day; and Mr. T. H. Banfield, Portland, who was appointed a member of the Highway Commission on February 28, 1943, by the Honorable Earl Snell, Governor of Oregon, to complete the term of former Chairman of the Commission, Mr. Henry F. Cabell, resigned.

This being the first meeting attended by Mr. Banfield, following his appointment, and there being a vacancy in the Chairmanship of the Commission, the election of a new Chairman was considered to be in order. After discussion, motion was made by Commissioner Oliver that Mr. Banfield be elected Chairman of the Highway Commission. The motion was duly seconded by Commissioner Clough and, having received the majority vote of the members of the Commission, was declared approved.

There followed a general discussion of highway matters, after which adjournment was taken at 5:30 p. m.

Portland, Oregon, March 17, 1943

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p. m. in the same room:

OREGON COAST HIGHWAY
LEWIS AND CLARK BRIDGE NEAR ASTORIA
REMOVAL AND REPLACEMENT OF PIER FENDERS

The Gilpin Construction Co.
Makela Construction Co.

\$5,855.00
6,259.60

THREE STATE HIGHWAYS
JOHN DAY ROCK PRODUCTION

Chester T. Lackey
R. O. Dail & Warren Bros.
D. C. & A. L. Williams

\$45,350.00
57,970.00
58,500.00

CENTRAL OREGON HIGHWAY
DRINKWATER PASS-JUNTURA ROCK PRODUCTION

No bids received on this project

THE DALLES-CALIFORNIA HIGHWAY
CRESCENT ROCK PRODUCTION

No bids received on this project

AURORA FLIGHT STRIP
CLEARING OF APPROACH AND SIDE CLEARANCE ZONES

Vernie Jarl
C. W. Reeve

\$5,350.00
7,160.00

PACIFIC HIGHWAY EAST
DENVER AVENUE JUNCTION SECTION
GRADING, SURFACING, PAVING AND BRIDGE CONSTRUCTION

Henry L. Horn	\$318,116.50
Edlefsen-Weygandt Co.	339,224.40
E. C. Hall Co.	347,294.00
Berke Bros.	349,165.50
C. J. Montag & Son	355,068.00

The Engineer reported on the request of the City of Milton for state aid in correcting a drainage condition which exists along the Oregon-Washington Highway near the southern limits of Milton. It appears that, during periods of heavy rainfall and melting snow, water heavily laden with silt flows from adjacent canyons onto certain city streets, including Main Street, the route of the Oregon-Washington Highway, due to the inability of the irrigation ditch of the Milton Ditch Company to take care of it. As a result, silt and debris are deposited on the city streets, including the highway throughout most of its length within the city limits. It also appears that the Milton Ditch Company objects to the use of its ditch as an outflow for this water. The Engineer advised that the city has started negotiations to secure approval for a project which would divert water from Nichols Gulch, and is asking the state to cooperate because of the benefits that the highway will receive thereby. It was his opinion that the state will receive considerable benefit by reason of such improvement and recommended, in view thereof, that the Commission assume fifty per cent of the expense involved, which is estimated at \$5,000, provided the state's share shall not exceed \$2,500, and that the city will do the work in the first instance, either by contract or with city forces, under state supervision. The state's share of the cost, he said, would be paid to the city after the work is completed. After discussion, the Commission approved the recommendation, and ordered that the arrangement be covered by appropriate agreement between the city and the state.

In this connection the Engineer brought up for discussion the matter of improving city streets that are not on state highway routes. He recalled that the Commission some time ago approved a budget for this purpose, and inquired, in view of the fact that the Legislature acted favorably on the bill which allocates a portion of the highway fund to the cities and towns, whether or not it is the desire of the Commission to proceed with such city street improvements as planned. The Commission decided unanimously to perform such work as is planned for this year. Whether or not the work shall be continued in the future will be decided later when next year's budget is adopted.

The Engineer also brought up for discussion a recent order made by the Director of the Office of Defense Transportation, which modifies the 35-mile-per-hour speed limit and certain other governmental motor-carrier regulations, in order to expedite emergency war shipments. He explained that, as the order was first issued, it apparently ignored local authorities, and inference from the order was that truckers might proceed at any speed, with any weight, under protection of the Office of Defense Transportation's certificates of exemption and "V" emergency pennants provided for by the order. However,

when the matter was called to the attention of representatives of the Director of Defense Transportation, and it was explained that the order as written would set aside state laws and regulations that control such features, the order was modified to prohibit speeds in excess of the applicable speed limit duly prescribed by competent public authority, and to provide that the gross and axle weights should not exceed the applicable state laws or the weights allowed by permits issued by competent state authorities. (See copy of rules and regulations for details.) He recommended action by the Commission, approving speeds in excess of 35 miles per hour for such vehicles, provided the speed limits prescribed by law are not exceeded; also, that the Commission go on record as opposing movements that weigh in excess of the legal-weight requirements and/or the weights specified in the emergency transportation permits that have been issued to such carriers. The Commission, by unanimous vote, approved the Engineer's recommendation. The Engineer was thereupon instructed to inform Governor Snell of the Commission's attitude with respect to the application of this Order. (See letter dated March 18, 1943.)

The Engineer reported on the cost to improve Edwards Street, Medford, between the Pacific Highway and Central Avenue, which improvement has been requested by the City Council and certain local industries. He advised that investigation reveals that, since the Pacific Highway has been declared a one-way street for northbound traffic, and southbound traffic has been routed along Court Street and Central Avenue, Edwards Street has become an important connection for industries along Central Avenue. Formerly, he said, access to these industries was had by driving north on Central Avenue, but such routing is no longer available because of the designation of this street a one-way street for southbound traffic only; and, when entering the city from the south, trucks now are obliged to go several blocks out of the way in order to reach their headquarters. Edwards Street, he said, is the logical route, but traffic is reluctant to use this street because its poor condition is hard on tires and equipment; hence the request for the improvement of this street at state expense. He gave as his thought that the state is largely responsible for existing conditions, because the one-way street designations were adopted at the instance of the Highway Commission. He recommended, in view thereof, that the Commission authorize the improvement of Edwards Street, which will cost about \$4,500, provided the War Production Board will certify the project for needed materials. After discussion, Commissioner Clough stated his approval of the Engineer's recommendation. Commissioner Oliver concurred, whereupon Chairman Banfield declared the action unanimous. The Engineer was thereupon authorized to proceed with the project.

The Commission had under discussion two applications from the Foster Booming Company, in one of which the company requests authority to flood the right of way of the Santiam Highway under Wiley Creek Bridge, and in the other requests authority from the Commission to construct a logging railroad under the highway at the westerly end of this bridge. The Engineer explained that the company proposes, in connection with its logging operations in this vicinity, to construct a dam across Wiley Creek to create a pond for storing logs, and that the backwater will submerge the state's property under the bridge. The company, he said, is asking authority from the Commission to flood this land. He gave as his opinion that such flooding would not be harmful to the

highway and will not create a traffic hazard. He further explained that the company plans to construct a logging railroad from their timber to their mill at Lebanon and wants to construct such logging road under the west approach to Wiley Creek Bridge. He offered no objection to such construction provided the company will do the work in conformity with plans and specifications approved by the State Highway Department and will pay all of the costs involved. He recommended approval of the company's request on such basis. After considerable discussion, the Commission by unanimous vote approved both applications in principle and ordered that the entire matter be covered by appropriate written agreement between the company and the Commission, when satisfactory disposition has been made of all the details involved.

The Attorney rendered a status report on the settlement of the Troy damage claim, arising out of the reconstruction of the Old Oregon Trail across the Troy property, in Baker County. He advised that the Troys have agreed to settle on the basis of the Commission's latest offer of \$2,500, if provision is made in the agreement covering the matter of state maintenance of a certain ditch that occupies the highway right of way. Commissioner Oliver suggested that the state should maintain the ditch if it is on the highway right of way. Commissioner Clough concurred. The Attorney was thereupon instructed by Chairman Banfield to revise the agreement in conformity therewith.

The Engineer brought up for discussion the matter of securing deferment from the draft of certain highway department employees whose loss to the department would seriously impede the department's work. He advised that the Highway Commission, at a meeting on July 23, 1942, authorized Chairman Cabell to direct a letter to the Draft Boards of the state, requesting deferment of certain key men, individually, as need arose, and inquired if it is the wish of the Commission to continue such practice. After discussion, the Commission by unanimous vote confirmed the action taken on July 23, 1942, and thereupon authorized Chairman Banfield to sign similar letters in behalf of the Commission.

The Commission discussed briefly matters pertaining to the employment of convict labor on state highway work, but took no definite action thereon.

The Engineer reported receipt of a request for the use of a portion of Floras Lake State Park, in Curry County, as an aircraft landing field. It appears that the Federal Government has appropriated approximately \$365,000 for the construction of a navy aircraft landing field in this district, and that the most suitable site for the same happens to be located in the state park which was recently acquired by the Highway Commission from the Blacklock Sandstone Company of California. The Engineer advised that the plans provide for the construction of runways in the back end of the park, which would leave the area fronting on the ocean available to the state for the purposes for which it was acquired. It was his thought that the existence of the landing field in the park would not be objectionable, and might work to the advantage of the state after the war is over, inasmuch as the Government no doubt will build roadways leading to the area which would be available for park use when times return to normal. The State Parks Superintendent, Mr. S. H. Boardman, was present and concurred in the remarks of the Engineer. After discussion,

the Commission decided unanimously to lease the area to the Federal Government for landing-field purposes, provided the Government will allow the state to sponsor the project, and will return the property to the state for maintenance after the war is over.

This matter was discussed further with a delegation which appeared before the Commission at this time, consisting of the following members: Elmer Bankus, Brookings, representing Curry County interests; Leo G. Devaney, Director of the State Board of Aeronautics, Portland; L. W. Wilcox and J. H. Reavey, representing the Civil Aeronautics Administration, Seattle, as District Engineer and Supervisor of Development of Airports, respectively. Mr. Bankus presented a resolution from the County Court of Curry County, in which the Court resolves, in behalf of the people of Curry County, to act as sponsor for the proposed airport project, and to cooperate with the Civil Aeronautics Administration and the United States Navy in all measures designed to bring the airport project to materialization; also, in which the State Highway Commission is requested to convey unto Curry County such portion of the state park as may be required for said airport.

In response to an invitation from Chairman Banfield, Mr. Wilcox stated that the Federal Government has appropriated \$865,000 for this airport project, the money to be spent under the direction of the Civil Aeronautics Administration; also, that the project needs a sponsor and that Curry County has offered to, and particularly wants to, assume such sponsorship. The only way that it would be possible for the county to assume such responsibility, he said, is for the county to obtain title to the land upon which the airport is to be constructed. The Civil Aeronautics Administration, he added, has received its orders to proceed with the making of surveys and plans for construction as soon as possible, and the only thing that is holding up the proposition is the fact that the county does not own the land. Mr. Wilcox also said that the county, as sponsor, would be required to adopt a resolution prepared by the Civil Aeronautics Administration, known as the AP-4 Resolution, which provides briefly that the county will agree to operate and maintain the airport as a public facility to the best interests of the public. The Navy Department, he said, would probably lease the airport from the county for the duration of the war and for a period of six months thereafter and, in that event, the county would be relieved of its immediate obligation and responsibility with respect to the maintenance feature, which would be assumed by the Navy during the time that the lease is in effect.

The Attorney advised that the State Highway Commission has gone on record as favoring state sponsorship of this project and inquired why the state could not act as sponsor in view of the authority given the Highway Commission by the 1943 Oregon Legislature to cooperate with the United States in the construction and maintenance of airports, et cetera. Mr. Wilcox replied that the Government's AP-4 ruling is not very flexible, and that he could not state definitely whether or not the state could qualify as sponsor until he has received a ruling from Washington.

The State Highway Engineer pointed out that the state is in much better position to carry on the maintenance work than is the county, to which

Mr. Wilcox replied that the Federal Government is of the opinion that maintenance by local authorities is best, because the local community would receive the most benefit and would take a greater interest in the project. Personal service, he said, such as can be provided by local authorities, will provide for a better and more successful operation of the field. Mr. Devaney admitted that the state is better fixed to perform certain features of the maintenance work but, in his estimation, local interests are in better position to perform certain features such as lighting the premises, surfacing, and operation.

Chairman Banfield pointed out that the State Highway Commission in the past has assumed certain obligations with respect to the operation and maintenance of flight strips, and that the project under discussion is only a forerunner of similar projects that no doubt will arise in the future. The establishment of a precedent in the present instance, he said, may or may not work to the advantage of the state, and, in view thereof, it was his thought that the state should act as either sponsor or cosponsor for the project. Should future investigations reveal, he added, that the state cannot act as sponsor or cosponsor, then the Commission will be pleased to reconsider the question, but in the meantime the Commission believes that its duty is to act as either the sponsor or cosponsor and to retain title to the land.

There followed a general discussion, in which Mr. Heavey pointed out the urgency of a decision so as to expedite the construction of the airport. The conference was concluded by Chairman Banfield, who stated that the Commission wishes to cooperate fully in this undertaking, but the main question is who is to maintain the project after the war is over. He reiterated that the adoption by the Commission of an undesirable precedent now would act to the state's disadvantage in the disposition of similar projects that arise in the future. The Highway Commission, he said, will consider all of the facts, and will reach a decision in the matter in a few days.

The Commission reconsidered the matter later in the session, at which time the Attorney advised that there are two solutions to the problem, if investigation reveals that the state cannot legally act as sponsor; viz., the state could lease the property to the county, which does not appear favorable because the lease would have to be for a period of twenty-five years; or the state could act as cosponsor, and in that event the county would be able to perform certain things that the state could not do, and the state could perform certain things that the county could not do. He also pointed out that, if the Navy were determined to take the property, it could do so by condemnation, and the Commission would have very little to say about it, and in that event title could be transferred to the county, which then could act as sole sponsor. The Attorney was instructed to advise the Commission with respect to its legal authority to sponsor construction, maintenance and operation of this proposed airbase.

Mr. Bankus appeared before the Commission as an individual and offered to deed to the state certain land which fronts on the Oregon Coast Highway, in Curry County, for a distance of $1\frac{1}{2}$ miles. He said that the land contains 13,000,000 feet of timber, and that he would deed the land and the timber to the state at the rate of \$0.50 per M-FEM. He asked for a decision by

MAY 17 1943

the Commission before its next meeting because he said he has another offer for the timber. The matter was referred to the Engineer and the Parks Superintendent for investigation and report. The State Parks Superintendent reported later in the session that he is familiar with the property offered by Mr. Bankus and in his estimation the property is of no value for park or recreational purposes. He recommended that the offer be declined from the park's standpoint. The Commission approved the recommendation; however, instructed the Engineer to investigate the property from the standpoint of its being of value to the state as right of way for a proposed revision of the Oregon Coast Highway at this location.

Mr. John M. Colon, Attorney, representing the United States War Department, came before the Commission with regard to the leasing, for military purposes, of property recently acquired by the Commission from Mr. L. J. Simpson at Shore Acres, adjacent to the Cape Arago Secondary Highway in Coos County. He advised that the Army is ready and willing to enter into a lease agreement with the Commission for the use of this property, in accordance with the conditions outlined in the letter of the State Highway Engineer directed to the United States Army Engineers, Portland, dated March 10, 1943. (See letter in general files for details.) He stated, however, that it would be necessary for the Army to construct one roadway across the property, in addition to the improvement of the existing road. After discussion the Commission by unanimous vote approved the leasing of this property to the United States Army on the basis of the Engineer's letter of March 10. The matter is to be covered by formal lease agreement.

Mr. Colon also brought up for discussion the following matters:

(1) Occupation of Cape Sebastian State Park in Curry County:-Mr. Colon agreed to look into the matter of preparing a lease of this property which is now being occupied by Army personnel and which park is closed to civilians.

(2) Use of a portion of the right of way of the Oregon Coast Highway near Waldport, in connection with the operation of a troop shelter:-Mr. Colon advised that in order to provide access to the troop shelter, it would be necessary to construct a service road for a short distance on the highway right of way. This roadway, he said, would be constructed at the top of the excavation slope and in his estimation would not interfere with the use of the highway. The matter was referred by the Commission to the Engineer for investigation, with authority to grant the permission if there are no objections. The matter is to be covered by appropriate lease agreement, and there is to be no charge for the use of the area by the Army.

The State Highway Engineer advised that he has received information to the effect that the Army and the Coast Guard are conducting certain activities in other state parks, which operations are being carried on without authority from the State Highway Commission. He particularly mentioned activities at Ecola State Park near Cannon Beach, Short Sand Beach State Park in northern Tillamook County, Cape Lookout State Park south of Tillamook, Yaquina Bay State Park at Newport, Patterson Ocean Wayside Park south of Waldport, and others. It was his thought that the use of these parks by the armed forces should be covered by appropriate written agreements. Mr. Colon suggested that, if the

Commission would direct a letter to the Commanding Officer in charge of these operations, giving full information with respect to the encroachments, the probabilities are that appropriate action would be taken to effect the cessation of such activities, unless they are absolutely required; in any event, something would be done to respect the state's property. Should it develop that such use of the state's property could not be discontinued, then the use of the property will be covered by appropriate written agreement. The Engineer was instructed by the Commission to make investigations as may be necessary and to prepare agreements to cover the use of the properties that are absolutely needed by the Armed forces.

County Judge Nelson B. Higgs of Harney County was present and asked the Commission to assist the county in the maintenance of its market roads. He also asked for better maintenance of state secondary highways in Harney County some of which, he alleged, are in very poor condition and are difficult to travel. The matter was referred to the Engineer for investigation.

The matter of selecting companies, who shall participate in furnishing the bond required of the State Highway Engineer in connection with the administering of the \$150,000 increase in the highway department's revolving fund that was authorized by the 1943 Legislature, had the attention of the Commission. Action on this matter was deferred until the next meeting. The Secretary was instructed in the meantime to furnish each member of the Commission a list of companies that now participate in the Engineer's \$200,000 bond and a list of the companies that are eligible to participate in the new bond.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he posted the Central Oregon Highway, between Bend and its junction with the Lakeview-Burns Highway, for a 50 per cent reduced load limit in order to preserve the surface of the road during the time that the frost was leaving the ground, and that the signs were erected on February 23, 1943. The signs, he said, were taken down on March 15, 1943, due to improved conditions and he is simply reporting the circumstances at this time for the Commission's information and in conformity with previous instructions. The Commission approved the action taken by the Engineer on this matter.

The Engineer reported further that on February 23, 1943, he also ordered that the I.O.N. and Jordan Valley Secondary State Highways, between the Oregon-Nevada state line at McDermitt, Nevada, and the town of Jordan Valley, be posted for 50 per cent reduced load limit because the roads were being seriously damaged by heavy traffic and were becoming almost impassable. He asked the Commission to confirm such action. The Commission approved such posting and by unanimous vote adopted the following resolution in regard thereto.

WHEREAS, the following roads or highways have been designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to wit:

I.O.N. and JORDAN VALLEY SECONDARY HIGHWAYS

AND WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a

MAR 19 1943

kind and character of traffic which is damaging and injuring the said highways, and, in order to protect said highways against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to-wit:

I.O.N. and JORDAN VALLEY SECONDARY HIGHWAYS from the Oregon-Nevada state line near McDermitt, Nevada, to the town of Jordan Valley, in Malheur County,

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394, O.C.L.A., shall be in full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named sections of said highways and at important crossroads on said highways so that said notices can be readily seen and read, which said notices shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that certified copies of this order be furnished the county clerk of Malheur County, in which county said highways are located, and the Superintendent of the Department of State Police for his information.

The Commission had under discussion the claim of Mr. and Mrs. Ralph R. Gibbs, Broadbent, Oregon, for damages which they allege occurred to their property adjacent to the Powers Secondary Highway, in Coos County, by reason of the blocking of a highway culvert which diverted flood water onto their premises. The Engineer advised that, in the fall of 1941, certain improvements were made in the highway in the vicinity of the Gibbs' property and that in connection therewith the old bridge across Rhoda Creek was removed and a 72-inch corrugated culvert installed in lieu thereof, and, during the process of back filling, the culvert pipe was struttred to prevent collapse. It so happens, he said, that exceptionally heavy rainfall occurred before the struts could be removed and as a result the pipe was unable to carry the water which backed up on the Gibbs' property, causing considerable damage. Mr. Gibbs, he said, is asking damages in the amount of \$100 to cover the following items: overhauling three cars and a tractor \$74.15, repairs to fences and damage to grounds \$25.00. He recommended that the Gibbs be paid the sum of \$100 in full satisfaction of their claim, if they will sign a statement releasing the Commission from further obligation in connection therewith. After discussion the Commission approved the recommendation by unanimous vote.

The Commission discussed a letter from the Wedderburn Water Company requesting permission to install a four-inch water pipe line on the sidewalk of the bridge over the Rogue River between Wedderburn and Gold Beach. The Engineer recommended that the request be denied because the sidewalk is narrow and the pipe line located thereon would interfere with the use of the walk and would detract greatly from the appearance of the structure. Furthermore, when this bridge was constructed, openings were left in the forebeams and brackets for the specific purpose of accommodating such water lines and other facilities, and these openings are now available to the company if it cares to use them. The Commission approved the recommendation; however, ordered that the company be informed that the Commission is willing to issue a permit authorizing the company to install its pipe line through the existing openings if it wishes to use them.

A request was presented from the City of Tillamook for assistance from the State Highway Commission in the repair of certain city streets that are being damaged by heavy log-hauling traffic and by trucks that are engaged in hauling rock to the nearby Navy Blimp Base. The Engineer advised that he personally inspected these streets in company with the Tillamook Street Commissioner on February 25 and confirmed the city's statement that the streets are being damaged. He estimated the cost to repair them at \$5,200 which is \$4,072 more than the amount that the Commission has budgeted this year for the improvement of city streets in Tillamook. He recommended, notwithstanding the budgeted amount, that the full amount of \$5,200 be expended in this city because the Commission's program for city street improvements was designed

primarily to cover repairs that are the result of heavy hauling such as is being carried on in Tillamook. He said that, if the Commission approved such expenditure, the City of Tillamook would cooperate to the extent of providing its small paving plant and other street equipment in order to speed up the completion of the work. After discussion the Commission by unanimous vote approved the expenditure of \$5,200 in this city, as recommended by the Engineer.

For similar reasons, the Commission by unanimous vote authorized an expenditure of \$3,750 for the repair of streets in the city of Lebanon which are being damaged by heavy log-hauling traffic, such amount being \$2,654 over and above the original allotment for this town.

A letter was presented from the Department of Interior, Grazing Service, Boise, Idaho, in which the Highway Commission was asked to improve the Oxbow Tunnel Hill Section and the Homestead-Ballards Bridge Section of the Robinette-Homestead Highway, in Wallowa County, to facilitate the transportation of strategic materials that are being taken from the Red Ledge Mine for national defense purposes. The Engineer advised that the work is quite costly and probably could not be financed with the funds that the Commission would be able to spare for the purpose; further, that the work could not be undertaken without approval of the War Production Board which insists upon a certification by the Army or the Navy as to its necessity with relation to the war effort. He also pointed out that the Federal Government has made funds available to finance access roads to mines, and recommended in view thereof that the request be denied and that the suggestion be made to the Grazing Service that it file its application with the Public Roads Administration for an allotment of the mine access road funds. The Commission approved the recommendation.

The Commission considered and denied as a matter of policy the application of the Pierce Auto Freight Lines, Medford, for permission to use a state highway department scales at Medford in connection with the weighing of its trucks and trailers, and that it be furnished a key to the scales so as to avoid inconveniencing state highway department employees and state police officers when they have occasion to use the scales.

A communication was presented from the Honorable Elmo E. Smith, Mayor of Ontario, inquiring whether or not the State Highway Commission would approve the accumulation of funds that may be allotted to the City of Ontario over a period of years until the aggregate amount accumulated is sufficient to finance the oiling of city streets. Mr. Smith explained that simple repair work, that is contemplated under the Highway Commission's program for improvement of city streets that are not on state highway routes, does not meet the problem of the City of Ontario, and what they really need is a more extensive improvement which could not be financed unless the Highway Commission would permit the accumulation of funds allotted to Ontario over a period of years. After discussion the Commission instructed the Engineer to inform Mr. Smith that the Commission appreciates the value of the plan that he suggests, but is not in position at the present time to give him a definite answer, in view of the fact that the Legislature, which has just adjourned, enacted a law which allocates to the cities and towns a certain amount of state highway

funds, and there is a question whether or not the Commission will continue its present program for the improvement of city streets that are not on state highway routes; however, the Commission intends to proceed with the program of construction that has been outlined for this year.

The Commission discussed and ordered filed a letter from Mr. J. F. Oldham, Eugene, in which Mr. Oldham calls attention to possible damage that may occur to his property at Eugene by reason of the reconstruction of the Pacific Highway between Judkins Point and Springfield; also, in which he informs the Commission that he intends to hold the state accountable for such damage should there be any. The Engineer was instructed to watch developments and to keep the Commission posted with regard thereto.

Mr. C. O. Wilson, Eugene, Superintendent of the Piling Department of Pope and Talbot, Inc., came before the Commission and asked for a modification of the Commission's requirements with respect to the furnishing of flagmen in connection with the transportation of long piling over state highways. He pointed out that, according to the provisions of permits that the Commission is now issuing, two flagmen are required to accompany each movement—one of whom is required to precede the movement and the other to follow. It was his thought that the general traveling public would be amply protected if the rear flagmen were eliminated, and asked the Commission to authorize the revision of its permits accordingly, particularly in view of the fact that it is becoming very difficult to secure the services of flagmen under present wartime conditions. He also suggested the zoning of highways where the loads are of such length that they cannot be transported without taking up more than half the width of the roadway, which arrangement, he said, would eliminate the necessity for flagmen to accompany the movement throughout and would conserve tires and gasoline. The Commission referred the matter to the Engineer for investigation and report.

The Commission recessed at 12:00 noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each. After careful consideration of each item, the Commission approved the request and the recommended offers. The following resolution in regard thereto was adopted by the Commission by unanimous vote, subject to the condition that neither the Joseph L. Hastings tract, file No. 10780, nor the Jessie H. Harrington tract, file No. 10778, which it is contemplated may be used by the state's contractor as a borrow pit to secure materials for the Denver Avenue-Union Avenue Project, be purchased until it is known definitely that the contractor will use these pits; and that the 457.6-acre tract that the Commission contemplates purchasing from the Pilot Rock Lumber Company, adjacent to the Pendleton-John Day Highway, in Umatilla County, for park purposes, file No. 9473, be not purchased unless it develops that an exchange of properties cannot be effected with the United States Forest Service, (see special paragraph ahead concerning this item):

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Columbia Boulevard Section, Pacific Highway</u>				
10780-Hastings, Jos. L.	Borrow Pit	Lots 18, 19, Blk. 2, Natl. Add. to Portland -	\$135, + taxes (Estd. \$25)	Parker
10778-Harrington, Jessie H.	Borrow Pit	Lot 16, Blk. 2, Natl. Add. to Portland, -	\$50, plus taxes (Estd. \$10)	"
<u>Denver-Union Intersection, Pacific Highway</u>				
10787-Multnomah County	Borrow Pit	Removal of dirt from Lots 4 to 15, incl., Blk. 2, and from Lots 18, 19, 20, 24, 25, 26, 27, Blk. 1, Natl. Add. to Portland -	GRATIS	Parker
5673-Westerlund, Joel F.	R/W	1.09	\$6500 per acre, plus \$7915	"
<u>Oak Hill-Eugene Section, Eugene-Venita Highway</u>				
10754-Shaw, F. P. Jr.	Scale Site	0.70	\$75 per acre, plus \$100	Witt
<u>Springfield Section, McKenzie Highway</u>				
10755-Southern Pacific Company	Storage Tank Site	3,709 sq.ft.	\$250 LUMP SUM	Witt

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Springfield Section, McKenzie Highway</u>				
10763-Both-Kelly Lumber Company	Storage Tank Site	20,325 sq.ft.	\$750 LUMP SUM	Witt
<u>John Day-Prairie City Section, John Day Highway</u>				
4882-A-Oliver, Herman	Stock Pile Site		5 year lease GRATIS	Cozad
<u>Flat Creek-Prairie City Section, John Day Highway</u>				
10786-Holland, Josephine	Gravel Pit and Stock Pile	2.89	\$50 per acre	Cozad
10783-Herburger, Harold and Federal Land Bank of Spokane	Stock Pile Site	1.67	\$30 per acre, plus \$5, plus fencing	"

<u>Boardman-Stanfield Section, Boardman-Stanfield Highway</u>				
8852-A-Correa, Jess Jr.	Hauling Road	0.11	\$125 per acre, plus \$36.25	DeSouza
<u>Nye-Grant County Line Section, Pendleton-John Day Highway</u>				
9473-Pilot Rock Lumber Company	Park Timber Land	457.6 acres on which stand 3,360 M. feet merchantable pine timber, worth \$3 per M., in addition to fir and tamarack timber thereon.	LUMP SUM \$10,000	Parker
<u>Umatilla Ordnance Depot Section, Boardman-Stanfield Highway</u>				
8773-A-Northern Pacific Railway Co.	R/W	9.12	\$5 per acre	Devers

The Assistant Attorney also asked the Commission for authority to condemn certain parcels of real property that are needed for various highway purposes. He submitted a list of such properties together with offers that he recommended in condemnation, as follows:

File No.	Name	Purpose Required	Recommended Offer
5672	Leonard F. Wilmot, et ux.	Right of Way	\$ 9,000.00
6338	Ivan F. Phipps and/or A. A. Marclanelli	" " "	900.00
5674	Kernan Live Stock Farm, Inc.	R/W & Easements	1,500.00
3222-B	William Jeskey	Glide Easement	247.50
4715-A	C. H. Walter	Glide Easement	125.00
10630-A	Anna B. Wurster	Glide Easement	295.00

After careful consideration of each item the Commission approved the request and the offers, and thereupon by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and also access roads or other roads in which the Federal Government is interested, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Kernan Live Stock Farm, Inc., which property is located in the southeast quarter (SE $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 33, Township 2 North, Range 1 East, W. M.; in the northeast quarter (NE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 4, Township 1 North, Range 1 East, W. M.; and in the southeast quarter (SE $\frac{1}{4}$) of Section 33, Township 2 North, Range 1 East, and in the northeast quarter (NE $\frac{1}{4}$) of Section 4, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon. Said real property consists of three parcels necessary for right of way purposes in connection with the Pacific Highway East, designated on the attached sheets as Parcels Nos. 1, 2, and 3, and consists also of properties described on the attached sheets which are necessary for slope easement, detour road easement, and dike easement purposes in connection with said highway, all of which properties are identified in the records of the Highway Commission as file R 5674;*

Real property owned by Ivan F. Phipps, et al., which property is located in the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 3, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 6338, and which property is being acquired for right of way purposes in connection with the Pacific Highway East;*

Real property owned by Leonard F. Wilmot, et ux., which property is located in the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 3, and in the northeast quarter (NE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 4, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 5672, and which property is being acquired for right of way purposes in connection with the Pacific Highway East.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire

title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 34, under the heading "Real Property Condemnation Resolutions," and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

WHEREAS, the United States of America has selected, designated, and established in Marion and Clackamas Counties, Oregon, a flight strip for the uses and purposes of aircraft; and

WHEREAS, the United States of America has determined and designated the real properties and the boundaries thereof which are needed for use in connection with the construction, maintenance, and operation of said flight strip; and

WHEREAS, the Public Roads Administration, for and on behalf of the United States of America, has requested the Oregon State Highway Commission to procure by purchase, agreement, or by the exercise of the power of eminent domain real properties needed in connection with said project; and

WHEREAS, under and pursuant to the provisions of Chapter 198, Oregon Laws, 1943, the Oregon State Highway Commission is authorized to cooperate with the United States of America and/or with any of its agencies or representatives in the making of surveys, plans, specifications and estimates and in the construction and maintenance of flight strips and airfields, and in the construction, reconstruction or maintenance of roads or bridges necessary in connection therewith, and is authorized to procure necessary real properties needed in connection with the development, construction, or maintenance of flight strips or airfields; and

WHEREAS, the Oregon State Highway Commission, after due consideration, has found and determined that the real property hereinafter described is necessary and its acquisition will be advantageous to the State of Oregon and to the United States of America in connection with said project;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and affirmatively voting:

1. That this Commission does hereby find and declare that the real property hereinafter described is necessary for the construction, maintenance, and operation of a flight strip heretofore selected and designated by the United States of America and referred to as the Aurora Flight Strip, and does hereby find and declare that the acquisition of said real property is advantageous to the United States of America and to the State of Oregon in connection with said project.

2. That the real property required and hereby found and declared to be necessary for the construction of said Aurora Flight Strip is described as follows, to wit:

A parcel of land lying in the southeast quarter (SE $\frac{1}{4}$) of Section 35, Township 3 South, Range 1 West, W. M., Clackamas County, Oregon, the said parcel being described as follows:

Beginning at the southeast corner of said Section 35; thence north along the east line of said section 1848 feet to the north line of the owner's property; thence west along said north line 1650 feet; thence south, parallel to the east line of said section, 1848 feet to the south line of Section 35; thence east along said south line 1650 feet to the point of beginning.

3. That the inclined plane or area over the above described real property which the United States of America and the State of Oregon propose to use as a glide area has the following elevations, which are related to the U. S. Coast and Geodetic Survey (1929 Adjustment):

Elevation 260 feet at the northeast corner of said tract;
 Elevation 260 feet 1450 feet west of the northeast corner of said tract;
 Elevation 287 feet at the northwest corner of said tract;
 Elevation 275 feet at the southeast corner of said tract;
 Elevation 218 feet 420 feet west of the southeast corner of said tract;
 Elevation 218 feet 1390 feet west of the southeast corner of said tract;
 Elevation 253 feet at the southwest corner of said tract.

4. That said real property is being acquired for the purpose of using the same as a glide area in connection with the development and use of said flight strip.

5. That J. M. Devers be and he is hereby authorized to negotiate with the owners of said real property for the purpose of acquiring the same by agreement, and if said property cannot be acquired by mutual agreement then the said J. M. Devers is hereby

instructed to institute and prosecute to final determination a condemnation action for the purpose of acquiring title to the said property or an easement therein and for the further purpose of having the compensation to be paid therefor determined by a jury.

6. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney brought up for discussion the matter of purchase of timber strips along the Pendleton-John Day Highway, in Umatilla County. He advised that he contacted the Pilot Rock Lumber Company, which is the owner of a considerable portion of the property desired by the state, and ascertained that the company is willing to sell it to the state for the sum of \$10,000, which is at the rate of \$3.00 per board foot for the timber standing thereon. He further advised that, due to the large sum involved, he contacted officials of the United States Forest Service relative to the possibilities of securing this tract by an exchange for other forest timber land, and ascertained that such officials are interested in the matter. Moreover, the Pilot Rock Lumber Company appears to be agreeable to such exchange, and has stated a willingness to defer the cutting of the timber on the tract until it is known definitely whether or not the exchange can be made. He requested authority to discuss the matter further with the Forest Service officials and recommended, if such an exchange cannot be worked out, that the Commission authorize the purchase of the property at the figure quoted by the owner. After considerable discussion the Commission instructed the Attorney to investigate the possibilities of effecting an exchange of properties through the United States Forest Service. Commissioner Oliver expressed himself as being in favor of purchasing the property at \$10,000, if such exchange cannot be arranged. Commissioner Clough concurred. Chairman Banfield declared the action of the Commission to be unanimous. (This item is included in the real property resolution above.)

The Commission discussed a letter from Alden E. Miller, Oregon City, attorney in behalf of Francis Northrup, Portland, in which the Commission is requested to join with Mr. Northrup in the vacation of a short section of East 26th Street, Portland, where it is bounded on the north by railroad company right of way and on the south by Clackamas Avenue; also, in which the Commission is asked to sell to Mr. Northrup a small triangular area which would come into possession of the state in the event the vacation proceedings were approved. It appears that East 26th Street, south of Clackamas Avenue, has already been vacated and that Mr. Northrup desires the vacation of the short section north of Clackamas Avenue to enhance his present holdings which abut on the street at this location. The matter was discussed briefly but action thereon was deferred until the next meeting, when another report is to be rendered by the Attorney with respect thereto.

The Commission had under consideration the abandonment of a portion of the Crater Lake Highway (old route) which has been rendered valueless from the state's standpoint in view of the fact that the highway has been reconstructed on revised alignment. The Engineer recommended that this section of

highway be turned over to the county and city authorities for future maintenance. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Crater Lake Highway in Jackson County; and

WHEREAS, by reason of said relocation and the reconstruction of said portion of said highway there was eliminated and made unnecessary as a part of the completed highway a section or part, which section or part is more specifically defined and described hereinafter in this resolution; and

WHEREAS, said change of alignment and route affects a portion of the Crater Lake Highway as routed into and through the City of Medford as well as a portion of the route of the highway outside the corporate limits of the City of Medford; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a part of the Crater Lake Highway, and therefore as a part of the state highway system, the portion of right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of the Crater Lake Highway as formerly located between the said termini and as heretofore improved and used; and

WHEREAS, in connection with the relocation of said highway there was accomplished a change in the point of entrance of the highway into the City of Medford from the north and there was likewise accomplished a rerouting of highway traffic in said City;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, a majority of members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described and which was formerly within the limits of the right of way of the Crater Lake Highway north of the City of Medford but which is now without the limits of said right of way as said highway has been relocated and constructed be and said fragment of land is abandoned as a part of the right of way of said highway, and the part of said right of way so abandoned and which is outside of the corporate limits of the City of Medford is left to revert to the adjoining or abutting property owners or to the control or supervision of the County Court of Jackson County for highway and/or other public purposes.

2. That the fragment of land or right of way hereby abandoned and eliminated from the state highway system is described as follows:

All that certain section of the old right of way of the Crater Lake Highway in Sections 7, 8, 17, 18 and 19, Township 37 South, Range 1 West, W. M., from the north city limits of Medford at East Jackson Street and then northerly extending along the former route of the Crater Lake Highway to a point which is 1250 feet north of the section corner common to sections 7, 8, 17 and 18, said point being on the right of way required for the reconstructed Crater Lake Highway.

3. That Crater Lake Avenue from its junction with Saling Avenue to its junction with Main Street, and Main Street from said junction to its junction with the Pacific Highway (Riverside Avenue) are abandoned as streets of said City over which to route Crater Lake Highway traffic, and said streets or sections of said streets shall again be under the exclusive jurisdiction of the City of Medford.

4. There is attached hereto and by this reference made a part hereof a white print marked Exhibit A, upon which map there is shown shaded in red the abandoned section of said highway without the city limits, and upon which map there is shown shaded in yellow the streets which by this resolution are abandoned as streets of said City over which to route said Crater Lake Highway traffic, which exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer; H. G. Smith, Construction Engineer; and C. B. McCullough, Assistant State Highway Engineer, and bears date of February 24, 1943.*

5. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned section, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

6. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said exhibit, for such action as said County Court may desire to take with respect to said abandoned portion of said Crater Lake Highway outside of the city limits of the City of Medford; and a copy of said resolution, together with said exhibit, shall be delivered to the Mayor of the City of Medford for such action as said City may

*Map filed Right of Way Abandonment and Retention File - No. 114.

desire to take with respect to said city streets. Should said abandoned portion of the highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson County, and said streets or sections of said streets shall as to supervision and control revert to and be under the jurisdiction of the City of Medford, and the same shall be beyond any responsibility or supervision by the State Highway Commission.

The Secretary presented a resolution from the County Court of Douglas County with reference to the abandonment by the Highway Commission of a portion of the Rice Hill Section of the old Pacific Highway. According to the resolution, the abandoned section is of no value to Douglas County for county-road purposes, and in view thereof the County Court has elected to let the area revert to the abutting property owners. The Commission approved the resolution and ordered it filed.

The Commission discussed an offer from Mrs. Bertha M. Prelwitz, Charleston, to pay the state \$25 for an old building which is located on state property in Charleston. The Engineer advised that the building is of no value to the Highway Department and suggested that Mrs. Prelwitz's offer be accepted. In the discussion of the matter, the Assistant Attorney mentioned that there is a question as to the ownership of this building, advising that it was placed on the state's property by mistake and there is a possibility that Coos County is the rightful owner. In view of this question, the Commission deferred a decision in the matter until the next meeting. The Assistant Attorney was instructed in the meantime to look further into the matter of ownership of the building.

The Assistant Attorney brought up for discussion the matter of the sale of real property that has been acquired by the Commission in connection with right-of-way settlements and which properties are of no value for state highway purposes. He particularly referred to property acquired from Christian Ramseyer in connection with the revision of the Pacific Highway south of Salem, in which instance the state was obliged to purchase about 50 acres of land in order to secure right of way for this revision. It was the Assistant Attorney's thought that now is the opportune time to sell some of these properties, and accordingly requested authority to list them for sale with established real estate agents. The Commission approved the suggestion and so ordered.

The Commission discussed an offer from the Huntington Rubber Mills, Portland, to purchase certain state-owned property that was acquired in connection with the Front Avenue improvement in Portland, same being situate on the east side of Macadam Street between Southwest Miles Street and Southwest Nevada Street. The Assistant Attorney advised that the company has offered to pay \$2,750 for this property, which is more than the state paid for it, and recommended acceptance of the company's offer, subject to a 30-foot right-of-way reservation for a city street connecting Southwest Macadam Street with

an unnamed street easterly thereof, and subject also to franchise rights of the Southern Pacific Company along such cross-over street. After discussion the Commission by unanimous vote approved the sale of this property to the Huntington Rubber Mills at its offer of \$2,750.

The Assistant Attorney brought up for discussion the question of exchange of properties with Mr. George Stonefield, adjacent to the Oregon Coast Highway at Tennile Creek, in Lane County. It appears that the land which the state owns was purchased as a source of materials for road construction, but the supply of material is exhausted and the property is of no further value from that standpoint; also, that Mr. Stonefield wishes to acquire this property, which will fit in nicely with property that he already owns, and has offered to deed to the state 1.4 acres of land that joins the state's stock-pile site nearby. The Engineer recommended acceptance of Mr. Stonefield's offer, provided no cash consideration is involved. The Commission approved the recommendation by unanimous vote.

Consideration was given by the Commission to the granting of free use of state-owned property for garden purposes. The Assistant Attorney advised that numerous requests have been received for such use of state-owned property, and suggested that it might be advisable to allow the properties to be used for such purposes, without charge, if the user will agree to maintain the premises in slightly condition and will return the properties to the state in good condition. He pointed out that the state would benefit by such use by having the property cleared of noxious weeds and shrubs, which feature would be reflected somewhat in highway maintenance costs. The Commission concurred in the Attorney's suggestion and thereupon authorized him to permit such use of the state's property without cost. The following form of permit was thereupon approved by the Commission by unanimous vote:

Reference is made to your request to use property under the jurisdiction of the State Highway Commission consisting of _____
_____ for the following purposes: _____

This permission is granted during the balance of the calendar year 194__ upon the following conditions:

- (1) Only annual crops shall be planted;
- (2) No buildings or other structures shall be placed on the property, nor shall any commercial or unlawful use be made thereof;
- (3) The Commission shall have the right to retake possession, sell or otherwise dispose of said property at any time such action may appear to the Commission to be in the public interest without liability for loss, injury or damage of any nature whatsoever;
- (4) No noxious weeds or shrubs shall be permitted to grow on the property;
- (5) The rental to be paid shall be: _____

Reconsideration was given by the Commission to a request of Mr. Russell Hubbard, Reedsport, for an exchange of properties adjacent to the Umpqua Highway near the north city limits of Reedsport. Action on this matter was deferred by the Commission until its next meeting. The Assistant Attorney was instructed to render a full report at that time.

At 3:00 p. m. Chairman Banfield announced the following awards of contracts, bids for which were received at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Removal and replacement of pier fenders on the Lewis and Clark Bridge on the Oregon Coast Highway, near Astoria, in Clatsop County. Two bids were received, that of The Gilpin Construction Company, Portland, being low at \$5,855.00, and the other being that of Makela Construction Company, Astoria, at \$6,259.60. The Commission awards this contract to The Gilpin Construction Company at its low bid of \$5,855.00.

"John Day Rock Production Project on three state highways, in Grant County. Chester T. Lackey, Ontario, submitted the low bid at \$45,350.00. R. O. Dail & Warren Bros., Portland, submitted the second-low bid at \$57,970.00. There was one higher bidder. The Commission awards this contract to Chester T. Lackey at his low bid of \$45,350.00.

"Drinkwater Pass-Juntura Rock Production Project on the Central Oregon Highway, in Harney and Malheur Counties. No bids were received on this project.

"Crescent Rock Production Project on The Dalles-California Highway, in Klamath County. No bids were received on this project.

"Aurora Flight Strip Project, in Marion and Clackamas Counties. Clearing of approach and side clearance zones. Vernie Jarl, Gresham, submitted the low bid for this project at \$5,850.00. The only other bid received was that of C. W. Reeve, Salem, at \$7,160.00. The Commission refers both bids to the Engineer with power to award the contract to the low bidder, Mr. Jarl, when certain conditions have been fulfilled.

"Denver Avenue Junction Section of the Pacific Highway East, in Multnomah County. Grading, surfacing, paving and bridge construction. Henry L. Horn, Caldwell, Idaho, submitted the low bid in the amount of \$318,116.50. Edlefsen-Weygandt Company, Portland, submitted the second-low bid in the amount of \$339,224.40. There were three higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

The Engineer reported on the request of J. S. Burres, Moro, Oregon, for improvements to the Cottonwood Grade Section of the Wasco-Heppner Secondary

MAR 17 1943

State Highway. He advised that District Maintenance Superintendent G. C. Seeley has called on Mr. Burres several times to find out just what he has in mind, but each time found no one at home. He believed, however, that Mr. Burres is asking for the widening of a number of narrow places on this grade and the placing of additional surfacing material, which matter was investigated last year and was estimated to cost about \$5,000. He gave as his thought that, because of the decline in revenues resulting from wartime conditions, the Commission could not spare such amount now, and pointed out that even if the Commission did approve the project, it is doubtful that the federal authorities would approve the expenditure, because the road is not particularly essential from the national defense standpoint. In view of the Engineer's report, the Commission decided not to approve the project. The Secretary was instructed to advise Mr. Burres of the action taken, and to inform him further that the project will be kept in mind for future consideration and will be inspected by the Commission when it is in that vicinity.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on state park matters, as follows:

Financial statement for month of February 1943:-The Parks Superintendent rendered the following statement concerning the expenses of his department, which was approved by the Commission by unanimous vote:

	1943 Budget	Expenditures to 2/28/43	Balance
*Acquisition (See detailed list below)	\$12,210.00	\$ 282.50	\$11,927.50
Betterment	- - -	- - -	- - -
Operation and Maintenance	45,977.25	4,449.01	41,528.24
	\$58,187.25	\$ 4,731.51	\$53,455.74
*Linn County: Cascadia - Geisendorfer payments		\$100.00	
Tillamook County Nehalem Sandspit - Peterson		12.50	
		\$112.50	
Legal cost of acquisition		170.00	
		\$282.50	

Renewal of juniper wayside agreements:-The Parks Superintendent presented agreements between the State Highway Commission and the United States Department of Interior, Grazing Service, renewing previous agreements which provide for the preservation and protection of juniper waysides along the Central Oregon Highway between Bend and Horse Ridge, along the McKenzie Highway between Sisters and Redmond, and along the Ochoco Highway between Redmond and Prineville. He advised that no cash consideration is involved in these agreements, which are on a yearly basis; and that arrangements have been made for future renewals of the agreements by an exchange of letters between participating parties. The Commission approved the arrangement and thereupon signed the agreements.

Tree cutting in Van Duzer Corridor:-The Parks Superintendent presented a request from the Mountain States Power Company for

permission to fall a number of dangerous trees that interfere with the company's power line that borders the Salmon River Highway and traverses the Van Duser Corridor between engineer's stations 227+00 and 404+00. He explained that there are some fifty trees which the company wants to remove, and that the company has agreed to pay the state \$3.00 per tree. He advised that the trees are not of much value and recommended approval of the request. The Commission approved the recommendation.

Sale of 20-acre timber tract in Short Sand Beach State Park:- The Parks Superintendent presented an offer from Mr. A. F. Koppisch, logging contractor, Astoria, to purchase certain timber in Short Sand Beach State Park which is entirely surrounded by property that is now being logged by Mr. Koppisch and his associates. He recalled that the Commission discussed this matter at the previous meeting and decided not to sell the timber because it is on property that was presented to the state as a gift, for park purposes, by Mr. and Mrs. Sam Reed, and the Commission did not feel it would be doing the right thing by the Reeds to sell the timber; and, furthermore, the Commission considered that the standing timber would be beneficial in the seeding over of the adjacent logged-off land. Mrs. Reed, he said, has sold all of the timber on her property that surrounds this tract, and has stated in writing that she has no objections to the sale of the timber in question if the state considers that the advisable thing to do. He read aloud Mrs. Reed's letter to that effect. After full discussion of this matter the Commission again decided by unanimous vote not to sell the timber.

Sale of cordwood in Azalea State Park at Brookings:- The Parks Superintendent advised that, in the development of Azalea Park, he has accumulated some fourteen cords of wood which he would like to dispose of. He recommended that it be sold to local residents at the government ceiling price for such commodity. The Commission approved the recommendation.

The Engineer discussed with the Commission proposed changes in the salary and wage schedules for certain state highway department employees. He advised that it is becoming more and more difficult to retain the personnel of the present organization, due to Army draft and greater remuneration that is offered in other occupations, and in his estimation, if these employees were offered more pay, it would go a long way toward the retention of their services. The highways, he said, cannot be kept up in satisfactory condition unless there are men available to do the work, and men will not work for the state unless they are paid a wage or salary comparable to that which they can receive in other employment. He recommended approval of the following changes, effective as of April 1, 1943, and explained that, insofar as it concerns shop crews, employees in district maintenance offices, and survey and construction engineering personnel, it would also mean a change-over from a 44-hour week to a 48-hour week;

MAR 17 1943

PROPOSED WAGE SCHEDULE CHANGES

Classification	Number of Employees	Increase	Present Monthly Pay Roll	Cost of Increase	
				Per Month	Per Year
PROPOSED FROM 1942					
<u>Group I. Changes Effective April 1, 1943</u>					
Oiling and paving crews:					
Hourly rate men	192	\$20 per mo. (10¢ per hr.)		\$ 3,840	\$ 46,080
Monthly rate men	40	\$10 per mo.		400	4,800
Extra gang crews:					
Hourly rate men	106	\$20 per mo. (10¢ per hr.)		2,120	25,440
Monthly rate men	14	\$10 per mo.		140	1,680
Bridge repair crews:					
Hourly rate men	100	\$20 per mo. (10¢ per hr.)		2,000	24,000
Monthly rate men	22	\$10 per mo.		220	2,640
Traffic line crews:					
Hourly rate men	18	\$10 per mo. (5¢ per hr.)		180	2,160
Monthly rate men	3	\$10 per mo.		30	360
Section maint. crews	860	\$10 per mo. (5¢ per hr.)		8,600	103,200
Shop crews:					
Hourly rate men	95	\$10 per mo. (5¢ per hr.)		950	11,400
" " "		9% (Change to 48 hr. wk.)	\$ 15,375	1,469	17,628
Monthly rate men	44	" " " "	6,456	581	6,972

Surveys & constr. engr.	161	9% (" " " ")	30,203	2,718	32,616
	2,000			\$24,058	\$288,696
<u>Group II. Changes To Be Made Later</u>					
Administration and R/W	193	9% (Change to 48 hr. wk.)	\$38,498	\$ 3,465	\$ 41,580
Traffic engineering	23	9% (" " " ")	3,173	286	3,432
				\$3,751	\$ 45,012
<u>Group III. No Changes Proposed</u>					
Bridge operation crews	26	(Continue 48 hr. wk.)	-	-	-
Sign crews	20	" " " "	-	-	-
Road magnet crews	2	" " " "	-	-	-
Gas pump repair	2	" " 44 " " "	-	-	-
Weighmaster	20	" " " "	-	-	-
Park caretakers	14	" " " "	-	-	-
Grand Total	-	-	-	\$27,809	\$333,708

The Engineer also explained that it is planned later on to change the work week for traffic engineering personnel and the personnel of the administration and right-of-way departments from 44 hours to 48 hours, at which time it is contemplated to give such employees a nine per cent increase in salary. However, no change whatsoever is proposed for bridge-operation crews, signing crews, road-magnet crews, gasoline pump repair crews, weighmaster crews, and state park caretakers. The above changes, he said, will require an annual increase for salaries and wages of approximately \$350,000. He asked the Commission to approve the salary and wage schedule as reported. The matter was discussed at considerable length, and as a result thereof such schedule was approved by the Commission by unanimous vote, subject to final approval by Governor Snell. The matter was referred to Chairman Banfield and the Engineer to discuss with the Governor.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission by unanimous vote authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	5-1425	Columbia	Rainier-Goble Section, Columbia River Highway	2nd - \$1,740 Total to date \$5,040
Stock Pile	105-1427	Columbia	Vernonia Section, Nehalem Highway	1st - \$ 150
(Gravel Pits (Stock Piles	12-1429	Grant	Flat Creek-Prairie City Sec., John Day Highway	1st - \$ 200
Location	13-1418	Harney	Poison Creek Section, John Day-Burns Highway	2nd - \$1,800 Total to date \$4,800
Stock Pile	13-1420	Harney	Middle Fork-Juntura Section, Central Oregon Highway	1st - \$ 150
Location	20-1450	Lane	Eugene-Spencer Butte Section, Pacific Highway	1st - \$5,865
Plans	34-1434	Wash.	Davies-Sylvan Section, Wolf Creek Highway	1st - \$6,000
Plans	107-1406	Crook	Jefferson Co. Line-Prineville Sec., Madras-Prineville Hwy.	3rd - \$1,000 Total to date \$3,500
Location	10-1438	Douglas	Green Station-Myrtle Creek Section, Pacific Highway	1st - \$9,600

<u>Type of Survey</u>	<u>Prefix No.</u>	<u>County</u>	<u>Section and Highway</u>	<u>Authorization</u>
Plans	16-1406	Jefferson	Madras-Terrebonne Section, The Dalles-California Highway	2nd - \$ 525 Total to date \$13,125
Plans	16-1412	Jefferson	Forest Boundary-Warm Springs Agency Sec., Warm Springs Hwy.	1st - \$ 250
Plans	35-1413	Wheeler	Forest Boundary-Mitchell Sec., Ochoco Highway	3rd - \$ 600 Total to date \$14,350
Plans	206-1432	Coos	Empire Naval Access Road	1st - \$ 200
Test Pits	17-1419	Josephine	Sexton Mountain Section, Pacific Highway	1st - \$1,250
Plans	26-1467	Multnomah	N. W. Front Ave. (Doane to 20th Avenue), Portland	1st - \$1,000
Plans	26-1466	Multnomah	Fairview-Bonneville Section, Columbia River Highway	1st - \$4,000
Plans	26-1455	Multnomah	Parkrose-Fairview Section, Columbia River Highway	3rd - \$1,000 Total to date \$5,500
Plans	26-1462	Multnomah	Union Ave.-Denver Ave. Inter-section, Pacific Hwy. E. & W.	4th - \$1,000 Total to date \$5,000
Location	4-1467	Clatsop	Lewis & Clark Bridge-Skipanon Section, Oregon Coast Highway	1st - \$6,000
Prospect	22-1456	Linn	Jefferson-Albany Section, Pacific Highway East	2nd - \$ 100 Total to date \$250

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the

maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map-file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
6B7-6	4-1463	Clatsop	Bridge	Columbia River Xing at Puget Island	Columbia River
6B7-3	4-1466	"	Reconn.	Lewis & Clark Br.- Camp Clatsop	Oregon Coast
6B7-4	5-1425	Columbia	Location	Rainier-Goble	Columbia River
5B7-18	130-1439	Umatilla	Location	U. P. Railroad Undercrossing	Hermiston

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Fisher Bros., contract No. 2398, for grading, surfacing and oiling the East Unit, Dixie Summit-Austin Section of the John Day Highway, in Grant County, requested an additional extension of time, from June 30 to September 19, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and shortage of labor. The Engineer advised that the reasons given by the contractor for failure to complete the project within the time

MAR 17 1943

limit specified in the contract are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Edlefsen-Weygandt Company, contract No. 2476, for grading and paving the Washington Street-Clay Street Section of Front Avenue (Pacific Highway West), in Portland, Multnomah County, requested an extension of time, from June 30, 1942, to February 13, 1943, within which to complete this job. It attributed its failure to complete the project within the specified time limit to noncompletion of the Morrison Street Bridge Project, under another contract. It pointed out that, according to the provisions of the contract, the Morrison Street Bridge Project was to have been completed by December 15, 1941, whereas the bridge work was not completed and traffic allowed the use of the bridge until early in July, 1942. The Engineer advised that the special provisions of this contract stipulated the estimated date of completion of the work on the Morrison Street Bridge approaches as December 15, 1941, with the proviso that an extension of time would be granted for any delay of completion beyond that date. The bridge approach work, he said, was not advanced far enough to permit Edlefsen-Weygandt Company to commence its work until June 18, 1942, an overrun of 185 days, so in his estimation the company is entitled to an extension of time of such length, without penalty. He also pointed out that the Edlefsen-Weygandt Company was handicapped by delays incident to the securing of materials under wartime conditions, and by its inability to work more than one shift, due to scarcity of labor. The job was practically completed by January 1, 1943, he added, and the only work remaining to be done at that time was the adjustment of a few manholes, which could not be accomplished until suitable weather obtained. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Max J. Kuney Company, contract No. 2517, for grading and construction of box culverts on the Warm Springs River-Mill Creek Section of the Warm Springs Highway, in Wasco County, requested an extension of time, from July 31 to November 20, 1942, within which to complete this job. It alleged that its failure to complete the project within the specified time limit was due to instructions from the Engineer to suspend operations during the winter of 1941-42, until suitable weather obtained the next spring. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

O. N. Pierce, contract No. 2579, for the widening of North Burgard Street Overcrossing on the North Portland Shipyard Access Road, Multnomah County, requested an extension of time, from September 30 to December 16, 1942, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to wartime conditions which made it difficult to obtain material and labor. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2398, 2476, 2505, 2517, and 2579, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2398, with Fisher Bros., for grading, surfacing and oiling the East Unit, Dixie Summit-Austin Section of the John Day Highway, in Grant County. Completed September 19, 1942.

Contract No. 2476, with Edlefsen-Weygandt Company, for grading and paving Front Avenue (Washington Street-Clay Street) on the Pacific Highway West, Multnomah County. Completed February 13, 1943.

Contract No. 2505, with M. L. O'Neil & Son, for grading and topping the North Unit, Wrights Point-Narrows Section of the Frenchglen Secondary Highway, in Harney County. Completed July 11, 1942.

Contract No. 2517, with Max J. Kuney Company, for grading and construction of box culverts on the Warm Springs River-Hill Creek Section of the Warm Springs Highway, in Wasco County. Completed November 14, 1942.

Contract No. 2579, with O. N. Pierce, for widening North Burgard Street Overcrossing, in the city of Portland, Multnomah County. Completed December 16, 1942.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the California-Oregon Power Company covering relocation of the company's electric line along the Tiller-Trail Highway, in Douglas County.

Form of lease with the United States Government covering property on the Pacific Highway, lying outside of the right of way on Sexton Mountain. Property now occupied by buildings of the Aeronautics Administration.

License granting to the United States Government right to use and maintain a trail through the southwest quarter (SW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 23, Township 34 South, Range 6 West, W. M., Josephine County.

Agreement covering rental of state-owned equipment to the War Department, Camp Adair.

Application for change of water right on property at Union, recently acquired from the State Game Commission.

Petition to exclude lands from the Slide Irrigation District to eliminate payment of irrigation taxes.

Lease of gravel pit on the Hooker Creek-Jordan Valley Section of the Jordan Valley Secondary Highway, in Malheur County, from W. W. Jones.

Lease of a maintenance headquarters site at Troutdale, from Suhr's Flower Farm.

Renewal of a stock-pile site lease from A. E. Troutman, on the Maupin Section of The Dalles-California Highway, in Wasco County.

Application to the Department of Interior for lease of a maintenance site in the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 14, Township 22 South, Range 10 East, W. M., Deschutes County.

Lease of property located near Pendleton to the United States Army as a headquarters for WAACS.

MAR 17 1943

Agreements with the following cities covering work to be performed in 1943 on city streets not on the highway systems: Amity, Condon, Hillsboro, Silverton, Union, Cove, Elgin, Jordan Valley, Seaside, Prairie City, Rainier, Lakeview, Chiloquin, Coquille, Empire, Port Orford, and Joseph.

Field agreement with the United States Department of Interior, Grazing Service, providing for the protection of juniper waysides along the McKenzie Highway, between Sisters and Redmond, and along the Ochoco Highway, between Redmond and Prineville.

Field agreement with the United States Department of Interior, Grazing Service, providing for the protection of juniper waysides along the Central Oregon Highway between Bend and Horse Ridge.

Bargain and sale deed conveying unto the United States of America 21.43 acres of land situate in Jefferson County. Consideration \$535.75. Right-of-way file No. 3189A.

Bargain and sale deed conveying unto Jackson County 1.7 acre of land in Jackson County, being portion of old right of way of the Pacific and Eastern Railroad.

Bargain and sale deed conveying unto Clackamas Cemetery Association 0.34 acre of land, in Clackamas County.

The Commission discussed the date for its next regular meeting for the receiving of bids, and decided to hold such meeting in Portland on Thursday, April 8, 1943. (This meeting date was later advanced to Tuesday afternoon and Wednesday, April 6 and 7, at which time the Secretary was instructed to make the usual arrangements to hold the Wednesday meeting in the auditorium of the Public Service Building, and to arrange for the use of a room in the Imperial Hotel for the meeting on the afternoon of April 6.)

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:30 p. m.
